D. Krajcinovic Continuum Damage Mechanics		
S. Juhász, A. Nachman Scientific Journals: Their Future. Opinions on Viability - Suggestions for Improvements	Feb.	143-145
W. Stadler Multicriteria Optimization in Mechanics (A Survey)	Mar.	277-286
E. L. Axelrad, F. A. Emmerling Elastic Tubes	July	891-897

FOUNDATIONS AND BASIC METHODS IN MECHANICS

100 Continuum Mechanics

100-A General theory

Coupled fields and nonclassical continua.....	1
Finite rotations in the description of continuum deformation.....	2
Thermodynamics and stability of the elastic solid.....	1020
Small strain accompanied by moderate rotation.....	2009
Kovarijantna dinamika (Covariant dynamics) (Book).....	2010
Distribution of directional data and fabric tensors.....	2011
Damage tensors in continuum mechanics.....	2012
Structure of tensor fields of the second rank generated by an incompatibility operator.....	3087
Stationary singular surfaces in materials with scalar internal variables.....	3088
A general field theory of Cauchy continuum: Classical mechanics.....	4271
Orthographic analysis of geological structures - I. Deformation theory.....	7893
Application of the Mohr-circle construction to problems of inhomogeneous deformation.....	7894
Kinematic and mechanical discontinuity at a coherent interface.....	7895
Determination of the stretch and rotation in the polar decomposition of the deformation gradient.....	8914
Two simple proofs of Cayley-Hamilton theorem and two representation theorems.....	9920
Continuum bases and consistent numerical formulations on nonlinear continuum mechanics problems.....	9921
Spins in a deforming continuum.....	9922
Foundations of theoretical mechanics II, Birkhoffian generalization of Hamiltonian mechanics (Book).....	10932
The vapour pressure of a solid under anisotropic stress.....	10933

The -spectral sequence, Lagrangian formalism, and conservation laws. I. The linear theory.....	10934
The -spectral sequence, Lagrangian formalism, and conservation laws. II. The nonlinear theory.....	10935
Interrelationships among stress rates.....	11948

100-B Constitutive theory

On the use of invariance requirements for intermediate configurations associated with the polar decomposition of a deformation gradient.....	1021
Mechanics of heterogeneous structures.....	1022
Integral representations of constitutive equations.....	2013
Constitutive equations for damping materials.....	3089
Constitutive laws for engineering materials with emphasis on geologic materials (Book).....	7896
On the elevated-temperature constitutive relationship and structure of an austenitic stainless steel.....	7897
Overview no. 32: Material rate dependence and localized deformation in crystalline solids.....	9923
On the constitutive equations of materials under monotonic or cyclic loadings.....	10936
Analyses of temperature, structure and stress during quenching of steel with consideration for stress dependence of transformation kinetics.....	11949

100-C Thermodynamical considerations

Nonconvex energy functions. Hemivariational inequalities and substationarity principles.....	3
Nonequilibrium thermodynamics of surface phenomena in solids.....	4
Evolution equations for dissipative bodies and hyperbolicity.....	5
Multi-valued strain energy functions for crystals.....	1023
Existence of temperature and entropy of a continuous medium and its consequences on the elastic part of the stress tensor.....	1024

Item Number:	1-1019	1020-2008	2009-3086	3087-4270	4271-5577	5578-6869	6870-7892	7893-8913	8914-9919	9920-10931	10932-11947	11948-12960
Issue:	January	February	March	April	May	June	July	August	September	October	November	December

Thermodynamics and the homogenized thermomechanical behaviour.....	2014
Continuum thermodynamics.....	2015
Thermodynamic stability criterion of strained solids. I. Extension of Gibbs' stability theory.....	3090
Thermodynamic influences on stationary singular surfaces in materials with scalar internal variables.....	3091

100-D Modeling of physical phenomena

Systems of nonlinear partial differential equation (NATO ASI Series, Series C, Mathematical and Physical Sciences no. 111) (Book).....	4272
Characteristic modes and fundamental singularities of partial differential equations.....	4273
Augmented Lagrangian methods: Applications to the numerical solution of boundary-value problems (Studies in Mathematics and its Applications, vol. 15) (Book).....	9950
Glassy metals II, atomic structure and dynamics, electronic structure, magnetic properties (Topics in Applied Physics, Vol. 53) (Book).....	10937

102 Finite Element Methods

102-A General theory

Finite element techniques for problems of unbounded domains.....	6
Number of non-zero blocks in the stiffness matrix of the finite element network.....	7
A predictor-corrector contouring algorithm for isoparametric 3D elements.....	8
An alternative high-order finite element formulation for cylindrical field problems.....	9
An infinite element theory.....	10
The generalized Galerkin's equation of the finite element, the boundary variational equations and the boundary integral equations.....	11
A finite element method for solving Helmholtz type equations in waveguides and other unbounded domains.....	1025
Economical stiffness formulations for nonlinear finite elements.....	1026
Automatic node resequencing with constraints.....	1027
A partitioned finite element method for dynamical systems.....	1028
On the convergence of finite element methods.....	1029
Automatic element reordering for finite element analysis with frontal solution schemes.....	1030
Computational procedures for non-linear three-dimensional analysis with some advanced constitutive laws.....	1031
Finite element interpolation error bounds with applications to eigenvalue problems.....	1032
Unconditionally stable element-by-element algorithms for dynamic problems.....	1033
On the reduced rate of convergence for a nonconforming combined method.....	1034
Two comments on: Consistent vs reduced integration penalty methods for incompressible media using several old and new elements.....	1035
On convergence of displacement finite elements, with an application to singularity problems.....	1036
The generalized finite element method - State of the art and future directions.....	2016
A finite element-capacitance matrix method for the elliptic problem.....	2017
Stability of finite elements under divergence constraints.....	2018
Error estimate procedure in the finite element method and applications.....	2019
Generalized finite element methods: Their performance and their relation to mixed methods.....	2020
Finite element iterative techniques for determining the interface boundary between Laplace and Poisson domains - characteristic analysis of a field effect transistor.....	2021
2-D multiphase finite element technique for solving a class of 3-D problems.....	2022

The application of iterated defect correction to variational methods for elliptic boundary value problems.....	2023
Finite-element method for time-dependent Euler equation.....	2024
The finite element scheme for ordinary differential equation with small parameter.....	2025
Hybrid and mixed finite element methods (Book).....	3092
On the choice of a cost function for the reconstruction of surfaces by triangulation between contours.....	3093
Solution errors in finite element analysis.....	3094
Determining invertible two and three dimensional quadratic isoparametric finite element transformations.....	3095
A posteriori error analysis and adaptive processes in the finite element method: Part I - Error analysis.....	3096
A posteriori error analysis and adaptive processes in the finite element method: Part II - Adaptive mesh refinement.....	3097
Finite elements for the dynamic analysis of fluid-solid systems.....	3098
Two bracketing theorems characterizing the eigensolution for the h-version of the finite element method.....	3099
Algorithms for determining invertible two- and three-dimensional quadratic isoparametric finite element transformations.....	3100
A two-step approach to finite element ordering.....	3101
A novel boundary infinite element.....	3102
On the inclusion principle for the hierarchical finite element method.....	3103
On finite element approximations of problems having inhomogeneous essential boundary conditions.....	3104
Bending and shear mode decomposition in C structural elements.....	3105
Design of an optimal grid for finite element methods.....	3106
An emulator for minimizing computer resources for finite element analysis.....	4274
A method of grid optimization for finite element methods.....	4275
A static infinite element.....	4276
Unified finite element analysis.....	4277
The linear finite element method for a two-dimensional singular boundary value problem.....	4278
A displacement formulation for the finite element elastic-plastic problem.....	4279
A diagonal mass matrix with full convergence rate for finite element dynamical problems.....	4280
An operational procedure for the symbolic analysis of the finite element method.....	5578
A comment on the effectiveness of uniform finite element refinements.....	5579
Superconvergence of solutions of the finite-element method in mesh norms.....	5580
On the suppression of zero energy deformation modes.....	5581
On the importance of the discrete maximum principle in transient analysis using finite element methods.....	5582
A posteriori error indicators for the p-version of the finite element method.....	5583
Finite element solution to the second order elliptic problems.....	6870
Finite element solution of diffusion problems with irregular data.....	6871
On different finite element methods for approximating the gradient of the solution to the Helmholtz equation.....	7898
Regularity of finite transformation of the second order.....	7899
Finite elements with increased freedom in choosing shape functions.....	8915
Monotone explicit iterations of the finite element approximations for the nonlinear boundary value problem.....	8916
On quadrature and singular finite elements.....	8917
On the efficiency and accuracy of the boundary element method and the finite element method.....	8918
The maximum principle for bilinear elements.....	8919
Eigenvalues and stable time steps for the uniform strain hexahedron and quadrilateral.....	8920
Solving linear finite element systems by normalized approximate matrix factorization semi-direct methods.....	9924
The finite element method of singular perturbation problem.....	9925

- Generalized extended to the limit sparse factorization techniques for solving unsymmetric finite element systems.....9926
- Nonlinear finite element analysis and ADINA, (Proceedings of the 4th ADINA Conference, Massachusetts Institute of Technology, 15-17 June 1983) (Computers & Structures v 17, n 5/6, 1983) (Book).....10938
- Numerical solution of a nonlinear wave equation in polar coordinates.....10939
- Hourglass control in linear and nonlinear problems...10940
- Formulation methods of geometric and material nonlinearity problems.....10941
- Finite-element approximations and iterative solutions of a fourth-order elliptic variational inequality.....10942
- Determination of the 3D border by repeated elimination of internal surfaces.....10943
- Analytical integration formulae for linear isoparametric finite elements.....11950
- Testing the properties of finite element method with modified mass matrix for non-stationary dynamics...11951
- Internal finite element approximations in the dual variational method for second order elliptic problems with curved boundaries.....11952

102-B Solid mechanics applications

- Damping feature of dynamic problem and "velocity" finite element method.....12
- Tooth fillet stresses of gear with thin rim. (2nd Report, Approximation formulae for tooth fillet stresses).....13
- A study on ship vibration using finite element method.....14
- The perturbation finite element method for solving problems with nonlinear materials.....15
- Improved nonlinear finite elements for oriented bodies using an extension of Marguerre's theory.....1037
- Dynamic finite element analysis of nonaxisymmetric structures.....1038
- A simple contact-friction interface element with applications to buried culverts.....1039
- Approximate analysis of shear wall assemblies with openings.....1040
- Analysis of vibration by component mode synthesis method (Part 3. Application to cylinder block of 4 cylinders).....1041
- The effects of ovality and misalignment on root pass stresses in pipelines.....1042
- A comparative study on three boundary element method approaches to problems in elastodynamics.....1043
- Constraint equations from rigid elements including initial strains.....1044
- Visco-plastic and large deformation analysis by FEM (Investigation of numerical analysis and collapse of a beam by transverse impact load).....2026
- Computations in limit analysis for plastic plates.....2027
- The application of the theorems of structural variation to finite element problems.....2028
- Simulation of severe plastic deformation by finite element method with spatially fixed elements.....2029
- A rigid plastic finite element perturbation method for the effective prediction of the influence of the change in parameters in the constitutive equation upon deformation behaviour.....2030
- Round-off error in the penalty finite element analysis of incompressible continuous media.....3107
- Finite element analysis of steadily moving contact fields.....3108
- An algorithm for generating solid elements in objects with holes.....3109
- Inclusion of shear effect in the ACM element.....3110
- Probability of failure models in finite element analysis of brittle materials.....3111
- Minimum weight design using finite elements.....3112
- ATHOS-automatic generation of triangular and higher order meshes.....3113
- A finite element analysis of collapse of perforated casing.....3114
- Dual analysis of plane stress problems by commonly based finite elements.....3115
- Analysis of symmetric or partially symmetric structures.....3116
- An element-by-element solution algorithm for problems of structural and solid mechanics.....3117
- Development of mixed time partition procedures for thermal analysis of structures.....3118
- The combined use of axis-symmetric and solid elements for three dimensional stress analysis.....4281
- Solution of plane transient elastodynamic problems by finite elements and Laplace transform.....4282
- Infinite elements in quasi-static materially nonlinear problems.....4283
- Shear and membrane locking in curved elements.....4284
- Analysis of some mixed finite element methods for plane elasticity equations.....4285
- Analyses of large quasistatic deformations of inelastic bodies by a new hybrid-stress finite element algorithm.....4286
- A finite element modeling of the low pressure plasma deposition process—I. Temperature analysis.....4287
- A finite element modeling of the low pressure plasma deposition process—II. Stress analysis.....4288
- A dynamic substructuring method for elastodynamic stress analysis using finite element method.....5584
- An equation for solving problems with large displacements by the method of finite elements.....5585
- Mass matrix for modified finite element method (FEM). Influence of element size on accuracy of results.....5586
- The singular isoparametric elements for the calculation of elastic stress intensity factors.....5587
- Stress analysis of mitred bends by ring elements.....6872
- Dual analysis of frictionless problems by displacement and equilibrium finite elements.....6873
- Minimum principles and initial stress method in elastic-plastic analysis.....6874
- A finite element approach to dynamic characteristics of helical spring (free vibration).....6875
- Construction of more effective diagrams of the finite-element method on the basis of softened and mixed approximations.....6876
- Effective method of storing global stiffness matrices built around regular nodal grids.....6877
- Modified Kraut method for solving systems of linear algebraic equations of high order.....6878
- Modification of the finite-element method to solve two-dimensional elastic and plastic contact problems.....6879
- The three-dimensional mixed finite element method for incompressible and nearly incompressible materials.....6880
- Explicit algorithms for the nonlinear dynamics of shells.....7900
- Improved stress simulation with simple finite element meshes.....7901
- Using modal analysis to improve confidence in finite element analysis.....7902
- Finite element analysis of laminated anisotropic beams of bimodulus materials.....7903
- System of finite methods of mechanics and new possibilities of development.....7904
- Finite elements for structural analysis (Book).....8921
- A shear-flexible triangular finite element model for laminated composite plates.....8922
- Economy and convergence of notch stress analysis using boundary and finite element methods.....8923
- A new class of transitional blended finite elements for the analysis of solid structures.....8924
- A hybrid-displacement finite element model for the bending analysis of thin cracked plates.....8925
- A singular finite element for analysis of plate bending problem in fracture mechanics.....8926
- Comparison of analytical with experimental internal strain distribution for the pullout test.....8927
- Three-dimensional finite element analysis of block compression.....8928
- Rigidity matrix T-30 modified for non-homogeneous curvilinearly anisotropic continuum subjected to nonlinear volume changes (Part 2).....9927
- An analysis of pressure sintering by computer simulation.....9928
- Rigidity matrix T30 modified for non-homogeneous curvilinearly anisotropic continuum subjected to nonlinear volume changes (Part 1).....9929
- Large deformation solution of stiffened plates by a mixed finite element method.....9930

- A finite element analysis of bar and plate specimen necking.....9931
- An arbitrarily high order singular strain finite element for calculating the stress intensity factors in plane problems.....9932
- The finite element method by employing the singular element with concordant displacement at the crack tip.....10944
- A model for the hot or warm forming of metals with special use of deformation mechanism maps.....10945
- A box beam finite element for the elastic analysis of thin-walled structures.....10946
- Finite element method of studying the thermomechanical behavior of viscoelastic solids of revolution under cyclic loading.....10947
- Determination of nodal forces in elements under the effect of surface and body loads in axisymmetric and planar problems of elasticity theory.....10948
- The post-processing approach in the finite element method - Part 1: Calculation of displacements, stresses and other higher derivatives of the displacements.....11953
- The post-processing approach in the finite element method - Part 2: The calculation of stress intensity factors.....11954
- Least squares strain smoothing for the eight-node serendipity plane stress element.....11955
- Approaches to increasing the precision and efficiency of elasto-plastic finite element analysis.....11956
- Use of directed hypothesis relaxation for hybrid computational scheme refinement in the displacement method.....11957
- Application of multiple coordinate systems for construction of the stiffness matrices of thin-wall structures using hybrid analytic schemes.....11958
- 102-C Fluid Mechanics applications**
- Boundary element analysis of nonlinear water wave problems.....16
- Numerical analysis of 3-D potential flow in axial flow turbomachines.....17
- On the numerical analysis method of flow and heat transfer in condensers.....18
- Finite elements in fluids - Vol. 4 (Book).....1045
- The group finite element formulation.....1046
- A finite element model for wave refraction and diffraction.....1047
- An error estimate for a finite element approximation of an elliptic variational inequality formulation of a Hele-Shaw moving-boundary problem.....1048
- Finite elements and characteristics applied to advection-diffusion equations.....1049
- Divergence-free bases for finite element schemes in hydrodynamics.....2031
- An 'assumed deviatoric stress-pressure-velocity' mixed finite element method for unsteady, convective, incompressible viscous flow: Part I: Theoretical development.....2032
- A hybrid finite element method for Stokes flow: Part I - Formulation and numerical studies.....2033
- A hybrid finite element method for Stokes flow: Part II - Stability and convergence studies.....2034
- Finite element flow analysis, Proceedings of the Fourth International Symposium on Finite Element Methods in Flow Problems held at Chuo Univ., Tokyo, on July 26-29, 1982 (Book).....3119
- On conforming finite element methods for the inhomogeneous stationary Navier-Stokes equations.....3120
- Solution of three-dimensional axially symmetric stream fields by finite element method.....3121
- Numerically induced oscillations in finite element approximations to the shallow water equations.....4289
- Finite element analysis of seepage in viscoelastic media.....4290
- Mixed finite element solution for the Navier-Stokes equations.....5588
- An 'assumed deviatoric stress-pressure-velocity' mixed finite element method for unsteady, convective, incompressible viscous flow: Part II: Computational studies.....5589
- On normal flow boundary conditions in finite element codes for two-dimensional shallow water flow.....5590
- Wave diffraction using finite and infinite elements.....5591
- Penalty finite element method for the Navier-Stokes equations.....7905
- A two-dimensional isoparametric Galerkin finite element for acoustic-flow problems.....7906
- A collocation finite element-finite difference solution for developing isothermal flow between two parallel plates.....7907
- A finite element method to solve the Navier-Stokes equations using the method of characteristics.....8929
- The conjugate gradient method and block iterative method for penalty finite element of three dimensional Navier-Stokes equation.....9933
- Stability of some mixed finite element methods for Stokesian flows.....9934
- A modified finite element method for solving the time-dependent, incompressible Navier-Stokes equations. Part 1: Theory.....10949
- A finite element method for the three-dimensional non-steady Navier-Stokes equations.....10950
- Nozzle flow using the Galerkin finite element method.....11959
- 102-D Other applications**
- Finite element analysis of sinusoidal small-amplitude vibrations in deformed viscoelastic solids. Part I: Theoretical development.....19
- A finite-element front-tracking enthalpy method for Stefan problems.....1050
- Color computer graphics in magnetic field analysis by means of the finite element method.....8930
- 102-E Algorithms & element development**
- The construction of large element in finite element method.....20
- A spiral procedure for selecting a triangular grid from random data.....1051
- Universal serendipity elements.....1052
- An infinite element and a formula for numerical quadrature over an infinite interval.....1053
- Finite element triangular meshing optimization for pure torsion.....1054
- On the equivalence of non-conforming element and hybrid stress element.....2035
- Potential of minicomputer-array processor system for nonlinear finite-element analysis.....4291
- On the choice of iterative parameters in the relaxation method on a sequence of meshes.....5592
- A memory-economic frontwidth reduction algorithm.....8931
- An 8-node brick finite element.....8932
- A C triangular plate element with one-point quadrature.....10951
- 104 Finite Difference Methods**
- 104-A General theory**
- Further developments of rp and ap error analysis.....21
- A comparison of the accuracy of the finite-difference solution to boundary-value problems for the Helmholtz equation obtained by direct and iterative methods.....22
- Treatment of stiff initial value problems for ordinary differential equations with adaptive Runge-Kutta-Methods.....23
- General derivative approximations for finite difference schemes.....24
- On extrapolation boundary conditions for the numerical solution of hyperbolic difference schemes.....25
- Boundary conditions for a fourth order hyperbolic difference scheme.....26
- On the simplified hybrid-combined method.....27
- An extension of Ortiz' recursive formulation of the Tau method to certain linear systems of ordinary differential equations.....28
- Unigrid for multigrid simulation.....29
- Gauss-Kronrod integration rules for Cauchy principal value integrals.....30

- Further convergence results for the weighted Galerkin method of numerical solution of Cauchy-type singular integral equations.....31
- Runge-Kutta theory for Volterra and Abel integral equations of the second kind.....32
- A note on the mathematical formulation of the problem of numerical coordinate generation.....33
- Some estimates for difference scheme solutions of Neumann's problem and the mixed problem.....34
- Consistency and convergence of general linear multistep variable stepsize variable formula methods.....35
- Remarks on composite integration methods for ordinary differential equations.....36
- A modified elimination method for solving certain mesh equations.....37
- On precision mesh schemes.....38
- A difference eigenvalue problem for a second-order elliptic operator with mixed boundary conditions.....39
- The Galerkin formulation and the Hamilton-Ritz formulation: A critical review.....40
- Problems with different time scales for nonlinear partial differential equations.....1055
- The method of lines and invariant imbedding for elliptic and parabolic free boundary problems.....1056
- A comparison of some ODE solvers which require Jacobian evaluations.....1057
- An automatic multistep method for solving stiff initial value problems.....1058
- Peripheral and ADI hopscotch methods for two dimensional parabolic and elliptic equations with a mixed term.....1059
- Solution of general inhomogeneous linear difference equations.....1060
- Stable Galerkin methods for hyperbolic systems.....1061
- An extension of the alternating direction Galerkin method to more general geometries.....1062
- Convergence rates for Newton's method at singular points.....1063
- A quasi-Newton method employing direct secant updates of matrix factorizations.....1064
- A note on the generalized conjugate gradient method.....1065
- Iterative solution of systems originating from integral equations and surface interpolation.....1066
- Variable upwinding and adaptive mesh refinement in convection-diffusion.....1067
- Predictor-corrector methods for parabolic partial differential equations.....1068
- Group velocity interpretation of the stability theory of Gustafsson, Kreiss, and Sundstrom.....1069
- Difference approximations of hyperbolic problems with different time scales. I: The reduced problem.....1070
- Numerical treatment of potential type equations on R^n : Theoretical considerations.....1071
- A new fourth-order finite-difference method for solving discrete-ordinates slab transport equations.....1072
- Estimating regions of existence of unstable periodic orbits using computer-based techniques.....1073
- Product integration methods for the nonlinear Basset equation.....1074
- Block overrelaxation methods for non-rectangular coordinates.....1075
- On upstream differencing and Godunov-type schemes for hyperbolic conservation laws.....1076
- Adaptive Nystrom-Runge-Kutta methods for systems of second-order ordinary differential equations.....1077
- A block-by-block method for the numerical solution of Volterra delay integro-differential equations.....1078
- On an oscillation phenomenon in the numerical solution of the diffusion-convection equation.....2036
- Fourier analysis of numerical approximations of hyperbolic equations (Book).....2037
- A discrete Fourier analysis of coarse mesh rebalancing and some associated iterative methods.....2038
- On the convergence of the direct quadrature method for Cauchy type singular integral equations of the first kind.....2039
- Interior regularity estimates for elliptic systems of difference equations.....2040
- On the discretization error of parametrized nonlinear equations.....2041
- Optimum accelerated overrelaxation (AOR) method for systems with positive definite coefficient matrix.....2042
- The stability of variable-stepsize Nordsieck methods.....2043
- Resonances introduced by discretization.....2044
- Fully discrete approximation methods for parabolic problems with nonsmooth initial data.....2045
- A Galerkin method for elliptic-hyperbolic type equations.....2046
- Fourth- and fifth-order scaled Runge-Kutta algorithms for treating dense output.....2047
- A generalization of Buchanan's stability criterion.....2048
- Matrix formulation of the Picard method for parallel computation.....2049
- Unconditional stability of difference formulas.....2050
- Output in extrapolation codes.....2051
- A variable order deferred correction algorithm for the numerical solution of nonlinear two point boundary value problems.....2052
- Error analysis of Airken's process.....2053
- A local convergence analysis for the Gauss-Newton and Levenberg-Marquardt algorithms.....2054
- Difference schemes for the dispersive equation.....2055
- Some new finite-difference schemes for parabolic differential equations.....2056
- Accelerating and damping the modified Newton-Raphson method.....3122
- Invariance of stiff stability under a small parameter variation.....3123
- A review of some numerical methods for reaction-diffusion equations.....3124
- The Liapunov function for the second order difference systems.....3125
- A Galerkin-Petrov method for singular integral equations.....3126
- Numerical evaluation of double integrals with a logarithmic or Cauchy-type singularity.....3127
- Discrete mechanics of arbitrary order.....3128
- On superconvergence properties of Galerkin's method for compact operator equations.....3129
- Solution of differential-algebraic systems using diagonally implicit Runge-Kutta methods.....3130
- A new fourth-order finite-difference method for computing eigenvalues of fourth-order two-point boundary-value problems.....3131
- The calculation of Hopf points by a direct method.....3132
- Numerical solution of singular integral equations using Gauss-type formulae. I: Quadrature and collocation on Chebyshev nodes.....3133
- Numerical solution of singular integral equations using Gauss-type formulae. II: Lobatto-Chebyshev quadrature and collocation on Chebyshev nodes.....3134
- An efficient Runge-Kutta-Pehlberg method.....3135
- Performance evaluation of algorithms for mildly nonlinear elliptic problems.....3136
- Solution of the Poisson equation by differential quadrature.....3137
- Numerical methods for partial differential equations based on power series.....3138
- An iteration scheme for implicit Runge-Kutta methods.....3139
- On the application of extrapolation, deferred correction and defect correction to discrete-time Galerkin methods for parabolic problems.....3140
- Alternating-direction incomplete factorizations.....3141
- High resolution schemes for hyperbolic conservation laws.....3142
- Fast numerical solution of the biharmonic Dirichlet problem on rectangles.....3143
- Probability bounds and asymptotic properties of error propagation.....3144
- The integration of stiff initial value problems in ODEs using modified extended backward differentiation formulae.....3145
- Solution of the difference equation for Gauss' hypergeometric function by use of the tau method.....3146
- Sublinear convergence of the chord method at singular points.....3147
- Some new results on unsymmetric successive overrelaxation method.....3148
- Discretization methods for the solution of singularly perturbed boundary value problems.....3149
- Optimal recovery of the derivative of bounded analytic functions.....3150
- Differential quadrature and partial differential equations: Some numerical results.....4292
- Fast Toeplitz orthogonalization.....4293
- A potential method for the biharmonic equation.....4294
- Maximum principles for linear difference-differential operators in periodic function spaces.....4295

- An accelerated bisection method for the calculation of eigenvalues of a symmetric tridiagonal matrix.....4296
- Multi-grid solution of three-dimensional problems with discontinuous coefficients.....4297
- Black box multigrid for nonsymmetric problems.....4298
- Successive overrelaxation, multigrid, and preconditioned conjugate gradients algorithms for solving a diffusion problem on a vector computer.....4299
- Multigrid methods: Development of fast solvers.....4300
- Algebraic multigrid (AMG): Experiences and comparisons.....4301
- Algorithms and data structures for adaptive multigrid elliptic solvers.....4302

106 Other Methods in Computational Mechanics

106-B Boundary element methods

- A boundary element solution to elasto-plastic torsion of solids of revolution.....44
- Combination of the boundary integral equation method and the extrapolation method.....45
- Economical solution technique for boundary integral matrices.....46
- A new approach to free vibration analysis using boundary elements.....47
- A new method of numerical evaluation of singular integrals occurring in two-dimensional BIEM.....48
- A boundary integral method for some laminar forced convection problems.....49
- Boundary element method in geomechanics (Lecture notes in engineering, n. 4).....1085
- Convex cubic HERMITE-spline interpolation.....1086
- Exact evaluation of over a circular element.....1087
- Boundary element method for membrane and torsion crack problems.....1088
- An implementation of the boundary element method of zoned media with stress discontinuities.....1089
- Boundary integral equation solution of the Berger equation.....2061
- The BIE analysis of the Berger equation.....3151
- A spline-trigonometric Galerkin method and an exponentially convergent boundary integral method.....4324
- A complex variable boundary element method: Development.....5618
- Use of the Hankel transform in boundary integral methods for axisymmetric problems.....5619
- Boundary integral equation solution of moving boundary phase change problems.....5620
- A unified boundary integral equation method for a class of second order elliptic boundary value problems.....8949
- Contribution to free boundary problems using boundary elements: Trefftz approach.....8950
- Approximation of boundary values in the boundary element method.....8951
- The boundary element method in contiguous domains.....8952
- Remarks concerning the boundary element method in potential theory.....8953
- Interior point solutions for boundary integral equation axisymmetric stress analysis.....8954
- Simple layer potential method for domains having external corners.....8955
- The boundary integral equation method for plates resting on a two-parameter foundation.....8956
- The boundary integral equation (boundary element) method in engineering stress analysis.....8957
- Some boundary integral equation solutions for three-dimensional stress concentration problems.....8958
- Boundary integral equation evaluation of compression moduli of bonded rubber blocks.....8959
- Applications of the boundary element method to large strain large deformation problems of viscoplasticity.....8960
- Linking the complex variable boundary-element method to the analytic function method.....9951
- A weak formulation of boundary integral equations, with application to elasticity problems.....9952
- The boundary integral-variational theorems of an arbitrary element in the solid — compute the energy release rate of an arbitrary crack extension.....9953
- Spline collocation approach to boundary value problems.....10975
- On the asymptotic convergence of spline collocation methods for partial differential equations.....10976
- Boundary element techniques, theory and applications in engineering (Book).....11960
- Boundary integral equation solutions for solitary wave generation, propagation and run-up.....11961

106-C Collocation, least-square, & related methods

- On row and column orderings for sparse least squares problems.....50
- Finite strip method with X-spline functions.....51

- Cubic spline solution of two-point boundary value problems with significant first derivatives.....52
- On spline basis selection for solving differential equations.....53
- Galerkin methods for two-point boundary value problems for first order systems.....54
- Piecewise continuous collocation for integral equations.....55
- Weak minimal H-sets for polynomials in two variables.....1090
- Asymptotic expansions for interpolating periodic splines.....1091
- On the numerical solution of Cauchy type singular integral equations by the collocation method.....1092
- Method of weighted residuals as applied to nonlinear differential equations.....2062
- Collocation for singular perturbation problems I: First order systems with constant coefficients.....2063
- A Galerkin method and nonlinear oscillations and waves.....2064
- Recent advances in the method of weighted residuals on solid mechanics in China.....2065
- A deficient spline function approximation to systems of first order differential equations.....2066
- A note on the evaluation of bounded L⁻¹-functionals at B-splines and its application to singular integral equations.....3152
- Some aspects of infinite systems of linear simultaneous equations.....3153
- Stability and asymptotic behaviour for the numerical solution of a reaction-diffusion model for a deterministic diffusive epidemic.....3154
- C rational quadratic spline interpolation to monotonic data.....3155
- Interpolation by generalized splines.....3156
- On constrained multivariate splines and their approximations.....4325
- On the asymptotic convergence of collocation methods.....4326
- Generalized Chebyshev interpolation and its application to automatic quadrature.....4327
- On the Faber transform and efficient numerical rational approximation.....4328
- Natural spline functions, their associated eigenvalue problem.....4329
- Rates of convergence for the method of classical collocation for solving singular integral equations.....5621
- Application of orthogonal collocation to simulation and control of first order hyperbolic systems.....5622
- Recursive interpolation, extrapolation and projection.....7942
- Nonpolynomial spline collocation for Volterra equations with weakly singular kernels.....7943
- The application of shape-preserving splines for the solution of differential equations.....8961
- Rational approximation in systems engineering (Reprinted from Circuits, Systems, and Signal Processing vol. 1, no. 3-4, 1982) (Book).....9954
- Discussion on analysis of two-dimensional problems by the least squares boundary collocation method.....9955
- A collocation method for boundary value problems of differential equations with functional arguments.....10977
- The convergence of a collocation method for a class of Cauchy singular integral equations.....10978

106-D Transform methods

- The normal derivative of the double layer potential on polygons and Galerkin approximation.....56
- Inversion of the Struve transform of half integer order.....2067
- Orthogonal polynomials and second-order differential equations.....3157
- Comparison of FFT, direct inversion, and conjugate gradient methods for use in pseudo-spectral methods.....7944
- A class of Laplace transforms and their inversion.....7945
- Certain formulas of operational calculus of two variables.....8962
- Mathematics: People, problems, results (Book).....9949
- Addition theorems relating toroidal, cylindrical, and spherical harmonics.....9956
- Extension of Hilbert-Schmidt's theorem to a certain class of problems with unsymmetric kernels.....11962

- On an extension of the Hilbert-Schmidt theorem to problems with unsymmetric kernels.....11963
Interpretation of complex resistivity and dielectric data. Part I.....11964
- 106-E Hybrid & other methods (inverse scattering transforms, Rade etc.)
- The prolongation structures of quasi-polynomial flows.....1093
Existence and asymptotic behavior of Rade approximants to the Korteweg-de Vries multisoliton solutions.....1094
The emergence of solitons of the Korteweg-de Vries equation from arbitrary initial conditions.....1095
Integral equation methods in scattering theory (Book).....2068
Scattering analysis and synthesis of wave trains.....2069
The connection between partial differential equations soluble by inverse scattering and ordinary differential equations of Painleve type....2070
On the uniqueness of Backlund transformations for KdV-type equations.....2071
The history of the soliton.....2072
The inverse scattering transform for the Benjamin-Ono equation—a pivot to multidimensional problems...2073
Modulations of sinh-Gordon and sine-Gordon wavetrains.....2074
On mapping linear partial differential equations to constant coefficient equations.....3158
Rade-type approximants of $\exp(-z)$ whose denominators are $(1+z/n)^n$6888
General order Newton-Rade approximants for multivariate functions.....6889
Transmutation, scattering theory and special functions (Mathematics studies, vol. 69) (Book).....7946
Backlund transformations for systems of conservation laws.....7947
The sign of Green's function.....9957
Spectral properties of operators generated by KdV equations.....9958
Representations of solutions to linear integral equations with difference kernels.....10979
- 106-F Stochastic analysis
- Rank transformations of order statistics.....57
The exact steady-state solution of a class of non-linear stochastic systems.....2075
On the estimation of parameters in the statistical prediction of earthquakes.....11965
Statistical assessment of average aircraft engine time to failure as function of failure cause.....11966
- 106-G Asymptotic & perturbation methods
- The local geometric asymptotics of continuum eigenfunction expansions. I. Overview.....1096
On the birth of isolas.....1097
Bifurcating periodic solutions in rotationally symmetric systems.....1098
Splitting of steady multiple eigenvalues may lead to periodic cascading bifurcation.....1099
An extension of Tikhonov's theorem in singular perturbations for the planar case.....1100
The asymptotic solution of a class of third-order boundary value problems arising in the theory of thin film flows.....2076
Singular perturbation of general boundary value problem for higher order quasilinear elliptic equation involving many small parameters.....4323
Parasimonious asymptotics.....4330
Shock and transition layers for singularly perturbed second-order vector systems.....4331
Boundary and corner layer behavior in singularly perturbed semilinear systems of boundary value problems.....5623
Multiple bifurcation problems of codimension two.....5624
Interactions of fast and slow waves in hyperbolic systems with two time scales.....5625
The asymptotic solution of some integral equations....6890
- Comparison of the matched asymptotic expansions method and the two-variable technique.....7941
Perturbati singulare dezvoltari asimptotice (Singular perturbations asymptotic expansions) (Book).....7948
On the method of strained parameters and the method of averaging.....8963
Variable mesh methods for the numerical solution of two-point singular perturbation problems.....8964
Singular perturbations of bifurcations with multiple independent bifurcation parameters.....9959
Note on logarithmic switchback terms in regular and singular perturbation expansions.....11967
Application of the asymptotic expansion method for singularly perturbed equations of the resonance type in the kinetic theory.....11968
- 106-H Variational methods
- Galerkin-like methods for equations of the second kind.....1101
On the static and kinetic methods of conservative system stability, and Rayleigh's principle: A reexamination.....1102
Dual variational principles for a class of non-linear partial differential equations.....1103
A method of solving nonlinear variational problems by nonlinear transformation of the objective functional. Part I.....4332
Duality for non-convex variational principles.....4333
Complementary variational principles and variational-iterative principles with geometrical interpretations.....4334
Interpolation of the coefficients in nonlinear elliptic Galerkin procedures.....5626
Computable pointwise error bounds and the Ritz method in one dimension.....5627
One-dimensional Galerkin methods and superconvergence at interior nodal points.....5628
Variational principles for second-order quasi-linear scalar equations.....5629
Galerkin methods with splines for singular integral equations over $(0,1)$6891
Multigrid methods for variational problems: Further results.....7949
On the H⁻¹-Galerkin method for second-order linear two-point boundary value problems.....7950
A dynamic inversion of the classical variational problems.....10980
- 106-I Algorithms & software development
- Krylov subspace method for solving large unsymmetric linear systems.....58
Improving the accuracy of computed eigenvalues and eigenvectors.....59
A quadratically convergent Krawczyk-like algorithm....60
Numerical algorithms for second order systems; Applications to higher order conjugate points and eigenvalue problems.....61
Ordinary differential equations and the symmetric eigenvalue problem.....1104
Software and synthesis-oriented-structural analysis education.....4335
Handbook of numerical analysis applications with programs for engineers and scientists (Book).....6892
Characteristics of singular entities of simple cell mappings.....7951
Contraction and approximate contraction with an application to multi-point boundary value problems..7952
Eigenvalues of the Laplacian in two dimensions.....8965
A class of quadrature formulas of Chebyshev type for singular integrals.....10981
Elastic wave calculations by the Fourier method.....11969
- 108 Modeling
- 108-B Physical models
- Experimental studies of scaling laws for plasma collection at high voltages.....10982

108-D Analogies

- Mechanical properties of a composite wax model
material simulating plastic flow of metals.....10983

108-E Analog simulation

- Flight simulation for an inertial navigation system...5630

108-F Digital simulation

- Methods for validating computer simulation models of
missile systems.....62
Simulation of transient gas flows in networks.....5631

108-G Hybrid simulation

- Aerospace simulation, Proceedings of the Conference
on Aerospace Simulation, 2-4 February 1984, San
Diego, Calif., (Simulation Series, vol. 13, n. 1
(Feb. 1984) (Book).....9960

110 Experimental System Analysis

110-C Data acquisition systems

- An optimum data editing technique for the reduction
of noise in multi-channel geophysical data.....11970

110-H Statistical inferences

- Note on MIL-STD-1235 (ORD) continuous sampling
procedures for Markov-dependent processes.....10984

DYNAMICS AND VIBRATION

150 Kinematics and Dynamics

150-A General theory

- Long-time prediction in dynamics (Book).....63
On normal modes in classical Hamiltonian systems.....64
The Hamilton's principle of nonholonomic variable
mass systems.....65
The spherical analogy to the p-curves of H. Alt.....66
An eigenvalue criterion for the study of the
Hamiltonian action's extremality.....67
The Hamilton-Jacobi equation and its complementary
form.....1105
Asymptotic solutions of equations of classical
mechanics.....2077
Multibody dynamics.....2078
On integral principles for nonholonomic systems.....2079
A conservation theorem for simple nonholonomic
systems.....3159
Effects of damping and circulatory forces on dynamic
instability of gyroscopic conservative continuous
systems.....3160
Noether's theorem for a nonholonomic system.....3161
Multibody systems with constraints subject to
friction.....4336
Perturbation methods based upon varying action
integrals.....4337
Construction of dynamic systems identical with
respect to output process.....4338
A new method of stabilization for holonomic
constraints.....5632
Eulerian dynamics of a bicone.....5633
Geometrical formalism of classical dynamics:
Canonical primitives.....5634

- An example of an equiform motion with two linear
incident constraints.....5635
Kinematics (Book).....6893
A linear algebra approach to the analysis of rigid
body velocity from position and velocity data.....6894
Fundamental equation of two body problem in
relativistic analytical mechanics.....6895
On the construction of the canonical equations of
motion.....6896
Existence of solutions of the Hamilton-Jacobi
equation in the neighborhood of nondegenerate
equilibrium position.....7953
Separation of motions and the averaging method in
the mechanics of systems with an infinite number
of degrees of freedom.....7954
A state-space dynamical representation for multibody
mechanical systems, Part I: Systems with tree
configuration.....8966
Extension of whittaker equations to non-holonomic
mechanical systems.....9961
Impulsive equation with pseudo-velocities and its
matrix solution method.....9962
Dynamics (Book).....10985
Equations of motion of mechanical systems.....10986
Another theorem for determining the definiteness of
sign of functions and its applications to the
stability of permanent rotations of a rigid body...11971

150-B Particle kinematics

- Equations of motion of systems with nonideal
bilateral constraints.....5636
Motion of a body with a sharp edge over a smooth
horizontal plane.....10987

150-C Rigid body kinematics

- Vector analysis of spatial mechanisms, Part I:
Configuration analysis of spatial mechanisms by
the method of vector decomposition.....68
Envelopes of straight lines under cycloid-motions of
degree N.....69
Cycloidal trochoids and planetary motions.....70
A contribution to the history of kinematics; I.
Watt's straight-line linkages and the early French
contributions to the theory of planar 4-bar
coupler curve; II. The work of English
mathematicians on linkages during the period 1869-
78.....71
Some properties of the coupler curve of the spatial
RRRSR mechanism.....72
Kinematics of a bicone on sharp-edged rails.....1106
Rolling of an ellipsoid along a horizontal plane.....5637
Qualitative analysis of motion of a heavy solid body
on a smooth horizontal plane.....6897
A sphere rolling on a horizontal rotating plane.....6898
Periodic motions of a heavy, rigid, dynamically
almost symmetric body with a fixed point.....6899
An estimation of center of gravity from force
platform data.....6900

150-D Particle dynamics

- A consistent Eulerian formulation of large
deformation problems in statics and dynamics.....73
First integrals for one-dimensional particle motion
in a non-linear, time-dependent potential field.....4339
Motion of a particle over the surface of a rotating
rough zone.....10988

150-E Rigid body dynamics

- An approach for dynamic analysis of mechanical
systems with multiple clearances using Lagrangian
mechanics.....74
Dynamic analysis of mechanisms via vector network
model.....75
Calculation of robot joint rates and actuator
torques from end effector velocities and applied
forces.....76
Reference method in shimmy problem.....77

- Bifurcation set in the problem of motion of a heavy rigid body with a fixed point.....1107
- A new class of asymptotically uniform motions of a heavy solid body with a fixed point.....1108
- On the motion of a heavy homogeneous ellipsoid on a fixed horizontal plane.....2080
- Realistic mathematical modeling of the rattleback.....2081
- On the dynamic behavior of the wobblestone.....3162
- Nonlinear nonholonomic couplings.....4340
- Computer simulation study on a vehicle's directional response in some severe manoeuvres. Part 1: Rapid lane-change manoeuvres.....5638
- Geometric analysis of variable ratio steering gear.....5639
- Energy correlation method for the transient solution of a one-degree-of-freedom nonlinear system.....5640
- A treatment of rigid body dynamics.....5641
- Determination of the orientation of a rigid body.....5642
- Dynamics of high-speed vehicles (CISM Courses and Lectures, no. 274) (Book).....6901
- Asymptotic solution of the equations of motion for a celtic stone.....7955
- A multibody approach for dynamic investigation of rolling systems.....7956
- Comparison between analytical and vectorial methods of the synthesis of equations of motion.....7957
- On the dynamics of a rigid body suspended on a string.....7958
- Friction, restitution, and energy loss in planar collisions.....8967
- Kinetic resistance of transitory rail curves.....9963
- Turning behavior of articulated frame steering tractor - I. Motion of tractor without traction....9964
- Multiple solutions of the periodic boundary value problem for some forced pendulum-type equations....9965
- Dynamics of complex multibody systems.....11972
- 150-F Dynamics of variable-mass bodies of systems
- Constant thrust of a multistage rocket in a vacuum with a given initial thrust-to-weight ratio in the first stage.....2082
- Analytical mechanics of continua with mass, momentum, and energy sources.....9966
- The equations of motion of nonlinear nonholonomic variable mass system with applications.....11973

 Large amplitude vibration of an initially stressed moderately thick plate.....5709
 Free vibration of a circular plate elastically restrained along some radial segments.....5710
 Frequency average loss factors of plates and shells.....5711
 Free vibration of annular sector plates by an integral equation technique.....5712
 Optimum design of viscoelastically damped sandwich panels.....5713
 The elastic solution of the dynamic elastic-plastic response of a circular plate.....5714
 Radiation efficiency of a baffled circular plate in flexural vibration.....5715
 Experimental study of the free vibration of clamped trapezoidal plates.....5716
 Vibration of a solid rectangular plate on an eccentric annular elastic support.....5717
 Bending vibration of a simply supported rectangular plate with a crack parallel to one edge.....5718

- The bending vibrations of an anisotropic free circular plate of regular symmetry.....5719
 Frequency determination techniques for cantilevered plates with bending-torsion coupling.....6923
 Comparative analysis of several shear models in problems of equilibrium and vibrations for multilayer plates.....6924
 Method for investigating nonlinear periodic vibrations of circular plates.....6925
 Vibration of thermally stressed polar orthotropic annular plates.....7980
 A multiple-mode approach to large-amplitude vibration of moderately thick elliptical plates.....8993
 Prediction and measurement of the vibrational damping parameters of carbon and glass fibre-reinforced plastics plates.....8994
 The receptance method applied to the free vibration of continuous rectangular plates.....8995
 Flexural free vibrations of rectangular plates with complex support conditions.....8996
 Response of a plate to a transient pressure wave load.....8997
 A higher order theory for free vibration of orthotropic, homogeneous, and laminated rectangular plates.....8998
 Large amplitude vibrations of clamped circular plate of variable thickness.....8999
 Large-amplitude vibrations of polygonal plates - A new approach.....9000
 Effects of geometric imperfections on large-amplitude vibrations of rectangular plates with hysteresis damping.....9001
 Natural response of non-rigidly connected rectangular plates.....9992
 Vibrations of axially loaded stiffened cylindrical panels with elastic restraints.....9993
 On the boundary value problem of vibrating plates.....9994
 Numerical solution of the nonlinear free vibrations of a plate.....9995
 Amplitude-phase relationships in the piezotransformer sensor method.....9996
 Nonlinear vibration of generally laminated anisotropic thick plates.....11009
 Free vibration analysis of rectangular cantilever plates with symmetrically distributed point supports along the edges.....11010
 Vibration of quadrilateral plates.....11011
 Accurately computed modal densities for panels and cylinders, including corrugations and stiffeners.....11012
 Free vibration of continuous polar orthotropic annular and circular plates.....11013
 Vibrations of an initially stressed transversely isotropic circular thick plate.....11014
 Nonlinear vibrations of a clamped rectangular plate with initial deflection and initial edge displacement - Part I: Theory.....11015
 Stability and vibrations of geometrically nonlinear cylindrically orthotropic circular plates.....12006
 Influence of geometric imperfections and in-plane constraints on nonlinear vibrations of simply supported cylindrical panels.....12007
 Long-time response of a finite cantilever plate to antisymmetric dynamic surface loading.....12008
 Long-time response of finite cantilever plates to dynamic surface loadings.....12009
 The driving-point impedance of a plate with an attached subsystem.....12010
 Large amplitude free vibrations of square plates of variable thickness.....12011
 Natural vibrations of laminated anisotropic plates.....12012
 Free vibration of a solid plate of arbitrary shape lying on an arbitrarily shaped ring support.....12013

154-H Shells

- Simplified equations and solutions for the vibration of orthotropic cylindrical shells.....109
 Free vibrations of simply supported cylindrical shells of oval cross section.....110
 Vibrations of noncircular cylindrical shells.....111
 Numerical perturbation solutions for the vibrations of prestressed, clamped cylindrical shells.....112
 Calculating shells of revolution with axisymmetric deformation.....113

Numerical solution of axisymmetric problems of the dynamics of thin orthotropic shells of revolution....114

Vibrations of cantilevered doubly-curved shallow shells.....1134

On the vibration of shells with Timoshenko-Mindlin type shear deflections and rotatory inertia.....1135

Dynamic elasto-plastic response of shells in an acoustic medium - EPSA code.....1136

One approach to numerical analysis of free vibrations of thin-walled structures.....1137

Vibrations of a cylindrical shell with variable thickness capped by a circular plate.....2114

Free vibrations of finned cylindrical shell with intermediate supports and with absolutely solid body.....2115

Free vibrations of a prestressed variable-thickness cylindrical shell.....2116

Study of the dynamic characteristics of thin-walled structures with attached weights.....2117

Nonlinear shell dynamics - Intrinsic and semi-intrinsic approaches.....3211

Free vibration of a circular cylindrical shell elastically restrained by axially spaced springs.....3212

Dynamic response of a pre-stressed cylindrical shell to a moving load.....3213

Energy dissipation during oscillations of multilayer shells.....3214

Radial vibrations of a regularly laminated hollow sphere.....3215

Large-amplitude vibrations of geometrically imperfect shallow spherical shells with structural damping.....4376

Vibration and stability of a circular cylindrical shell subjected to a torque.....4377

Effects of uni-directional geometric imperfections on vibrations of pressurized shallow spherical shells.....4378

Flexural axisymmetric free vibrations of a spherical dome: Exact results and approximate solutions.....5720

The axisymmetrical response of a circular cylindrical double-shell system with internal damping.....5721

Tube vibration in a half-scale sector model of a helical tube steam generator.....5722

Nonlinear dynamic response of thin shells.....5723

Analysis of random response of a shallow cylindrical shell.....5724

A contribution to the dynamical analysis of two-layered half-cylindrical shell.....5725

Experimental study of the behavior of cylindrical shells with concentrated masses under a dynamic external pressure.....5726

Simultaneous, finite, gyroscopic and radial oscillations of hyperelastic cylindrical tubes.....6926

Axisymmetric vibrations of thin shells of revolution.....6927

Nonlinear parametric resonance problems of orthotropic cylindrical shell - An application of resonance in multi-frequency resonance problem.....6928

Vibrations of blades with variable thickness and curvature by shell theory.....7981

Free vibration of a point-supported circular cylindrical shell.....9002

Response of a pre-stressed, orthotropic thick cylindrical shell subjected to a pressure pulse.....9003

On transverse membrane vibration of conical shells.....9004

Coupled primal-dual variational principles in linear elastodynamics: Case of thin shells.....9997

Study of the vibration of component cylindrical shells by the dynamic stiffness method.....9998

Calculation of the vibration of a sloping shell with a rigid inclusion.....9999

Vibrations of a shallow shell under concentrated load.....10011

Acoustic spectrogram and complex-frequency poles of a resonantly excited elastic tube.....11016

Axisymmetric vibrations of thin shells of revolution.....11017

Axisymmetric vibrations of thick shells of revolution.....11018

Free vibrations of clamped-free circular cylinders.....11019

Vibration and damping analysis of a multilayered cylindrical shell, Part II: Numerical results.....12014

Vibration of shell of revolution, (Improved theory).....12015

Behavior of an elastic rod falling into a vibrating circular cylinder.....12016

The additional dynamical analysis of a simply supported, two-layered half-cylindrical shell.....12017

Vibrations of shallow shell with attached mass distributed over a segment of its surface.....12018

Asymptotic method in a problem of nonlinear shell vibrations.....12019

154-I Plates & shells (thick)

Axisymmetric vibrations of a vessel with variable thickness.....115

Efficiency of annular finite elements for flexural vibrations of thick disks.....5727

Natural frequencies of completely free annular and circular plates having polar orthotropy.....5728

Use of Lagrange multipliers with polynomial series for dynamic analysis of constrained plates, Part I: Polynomial series.....5729

Use of Lagrange multipliers with polynomial series for dynamic analysis of constrained plates, Part II: Lagrange multipliers.....5730

Large amplitude free vibrations of a square plate of variable thickness.....5731

A highly accurate analytical solution for free vibration analysis of simply supported right triangular plates.....5732

154-J Discs & blades

Vibratory load of the turbine rotor blades of an aircraft gas turbine engine with dry friction dampers.....1138

Vibration modes of a disc of wood laminate.....2118

Vibratory control of thermally stressed discs by means of intermediate heating.....2119

An investigation into distribution parameters of steam turbine blade and wheel vibration measurements.....2120

Tuning of turbine blades: A theoretical approach.....3216

The influence of Coriolis forces on gyroscopic motion of spinning blades.....3217

Comparison of beam and shell theories for the vibrations of thin turbomachinery blades.....3218

Vibration and stability analysis of polar orthotropic uniform discs subjected to peripheral hydrostatic loading.....5733

Natural frequencies of rotating bladed disks using clamped-free blade modes.....6929

A parametric study of dynamic response of a discrete model of turbomachinery bladed disk.....6930

Theoretical evaluation of the effect of rotation of impellers on the natural frequencies.....6931

Effects of structural coupling on mistuned cascade flutter and response.....7982

Measurements of self-excited rotor-blade vibrations using optical displacements.....7983

Structural response due to blade vane interaction.....7984

Analysis of an axial compressor blade vibration based on wave reflection theory.....7985

Effects of static friction on the forced response of frictionally damped turbine blades.....7986

Blade vibration measurements on centrifugal compressors by means of telemetry and holographic interferometry.....7987

Dynamic analysis of practical blades with shear center effect.....9005

Acoustic resonances and blade vibration in axial flow compressors.....9006

Vibration modes of packeted bladed disks.....10000

Stagger angle dependence of inertial and elastic coupling in bladed disks.....10001

Model development and statistical investigation of turbine blade mistuning.....10002

Resonant vibration levels of a mistuned bladed disk.....10003

Maximum resonant response of mistuned bladed disks.....10004

Coupling technique of rotor-fuselage dynamic analysis.....10005

Vibrations of twisted rotating blades.....10006

Sequential quadratic programming and dynamic optimal design of rotating blades.....11020

Finite element dynamic analysis of blade shear center effects on practical bladed discs.....12020

- Characteristics of natural frequencies of steam turbine blades. (1st Report. Relationship on vibration between grouped blades and disk).....12021

154-K Rotating shafts (critical speed, balancing)

- Energetic evaluation of stability in rotor-bearing system. (Contribution of each element to logarithmic decrement).....116
- Vibration analysis of rotor-bearing system by quasi-modal transformation (Analyses of complex eigenvalue and response history).....1139
- Impact response of rotor-bearing system to an arbitrary excitation of pedestals (1st report: Comparison of linear analysis with experiment).....2121
- Modal balancing of flexible rotors without test runs: An experimental investigation.....3219
- Response in passing through critical speed of arbitrarily distributed flexible rotor system (Part 1, Case without gyroscopic effect).....3220
- Response in passing through critical speed of arbitrarily distributed flexible rotor system (Part 2, Case with gyroscopic effect).....3221
- Torsional deformations of a shaft with rotor having time-dependent moment of inertia.....4379
- The role of cavitation in whirl instability in a rotor bearing. 1. The -film model.....5734
- The role of cavitation in whirl instability in a rotor bearing: 2. Effect of oil inlet position and supply pressure.....5735
- Vibration of cracked shafts in bending.....5736
- Whirling and stability of flywheel systems, Part I: Derivation of combined and lumped parameter models.....5737
- Whirling and stability of flywheel systems, Part II: Comparison of numerical results obtained with combined and lumped parameter models.....5738
- Study of damped critical speeds and damping ratios of flexible rotors.....6932
- Whirl speeds and unbalance response of multibearing rotors using finite elements.....6933
- Finite element and modal analyses of rotor-bearing systems under stochastic loading conditions.....6934
- Identification of modal parameters of an elastic rotor with oil film bearings.....6935
- Analysis of the response of a multi-rotor-bearing system containing a transverse crack in a rotor.....6936
- The vibrational behavior of a multi-shaft, multi-bearing system in the presence of a propagating transverse crack.....6937
- On the shaft end torque and the forced vibrations of an asymmetrical shaft carrying an asymmetrical rotor.....6938
- A study on passage through resonances of a rotor supported by vibration isolation system with many degrees-of-freedom.....6939
- The steady-state response of a cantilevered rotor with skew and mass unbalances.....6940
- Instability of rotors in fluid film bearings.....6941
- Vibration stability analysis of shafts in swinging motion.....6942
- Hydrodynamic damping of the torsional vibrations of the system shaft-ship's propeller.....6943
- Rotor dynamics (Book).....7988
- An experimental investigation of the stability of a bearingless model rotor in hover.....7989
- Subharmonic vibrations of a rotor in roller bearings.....7990
- Balancing flexible rotating shafts with an initial bend.....9007
- Load torque effects on the critical speeds of a continuous rotor.....9008
- Optimum design of rotating machines with overhung weight. Part 1, Formulation of optimum problems.....9009
- Designing vibrating beams and rotating shafts for maximum difference between adjacent natural frequencies.....9010
- Vibration and stability analysis of rotors on orthotropic supports.....9011
- A rapid approach for calculating the damped eigenvalues of a gas turbine on a minicomputer: theory.....10007
- Stability of a rigid rotor supported by externally pressurized gas journal bearings with a circular slot restrictor.....10008
- A new method for the balancing of flexible rotors.....10009

- Heuristic optimization in the balancing of high speed rotors.....11021
- Soil influence on unbalance response and stability of a simple rotor-foundation system.....11022
- Computer simulation of rotor radial vibration due to ball bearings.....11023
- First order non-stability fields for vibrating shaft performing swing-like motion.....11024
- Estimation of linearized oil-film parameters from the out-of-balance response.....12022
- Introduction to dynamics of rotating machine aggregates.....12023
- Optimization of acceleration of unbalanced rotor through critical velocity.....12024

154-L Frames, trusses, & arches

- Forced motions of cantilever planar-curved bars considered as discrete systems by the flexibility method.....5739
- Vibration of truss rack bars.....9012
- Dynamic response of a slender, articulated space frame.....11025
- Concept of a program for the computation of eigenfrequencies of a hinged rectangular grid of rods.....12025
- Modal analysis of infilled frames with openings.....12026

154-M Sandwich materials

- Vibrations of bonded beams with a single lap adhesive joint.....5740
- Response of multiple layered media.....5741
- Resonance response of stiffened sandwich panels.....5742
- A note on symmetry considerations in the transient response of unsymmetrically laminated anisotropic plates.....5743

154-N Composite Materials

- Modal density of honeycomb plates.....4380
- A higher order dynamic theory for viscoelastic plates and layered composites.....5744
- Attenuation of stresses in laminated viscoelastic composites in uniform harmonic loading.....6944
- Constrained layer damping with vitreous enamel.....10010
- Oscillations of a circular two-layer metal-polymer plate.....11026

154-O Structural elements on foundations

- Study of the decrease of the friction between a metal plate and a sandy sea-bed under the effect of ultrasonic waves transmitted on the plate. Influence of frequency.....3222
- Generalized solution of time dependent traveling load problem via moving finite element scheme.....4381
- Unilateral contact, dynamic analysis of beams by a time-stepping, quadratic programming procedure.....5745
- Vibration of beams on non-homogeneous elastic foundations.....7991
- The influence of high-frequency excitation on piping and support design.....11027

154-P Complex Systems

- Finite-dimensional representation of model of solid body with attached elastic elements.....117
- Nonlinear oscillations of weakly asymmetric elastic systems with several degrees of freedom.....1140
- A generalized Dunkerley-Graeffe procedure for complex vibrating systems.....5746
- Nonlinear induced oscillations of vibroshock systems.....5747
- Vibration analysis for periodically symmetric structures with solid centers.....6945
- Wave transmission and energy dissipation at structural and machine joints.....6946

154-Y Computational techniques

- Harmonic acceleration method for dynamic structural analysis.....118
 A new approach to the dynamic analysis of structures using fixed frequency dynamic stiffness matrices.....119
 An iterative algorithm for solving inverse problems in structural dynamics.....1141
 Fast response method for undamped structures.....1142
 On the application of a numerical algorithm for Hopf bifurcation to the hunting of a wheelset.....3223
 Two methods of calculation by bounding of natural frequencies of elastic structures.....3224
 Mathematical modeling of complex structures for dynamic analysis.....4382
 Optimization with frequency constraints—limitations.....4383
 Fast modal response method for structures.....4384
 Transient analysis of large frame structures by simple methods.....4385
 Incorporation of Lagrangian multipliers into an algorithm for finding exact natural frequencies or critical buckling loads.....4386
 Error analysis of modal methods for viscously damped structural systems.....5748
 Harmonic motion of nonconservative, forced, damped systems subjected to nonpotential follower forces.....5749
 Analysis of vibration by substructure synthesis method (Part 1. Basic approach).....5750
 Analysis of vibration by substructure synthesis method. (Part 2. Development of optimum design system 1).....6947
 Eigenanalysis of the rigid body motion effect on elastic systems.....6948
 Smoothed frequency responses for matrix-characterized vibrating structures.....9013
 The solution of higher order integration formulae for dynamic response equations by the conjugate gradient method.....9014
 Dynamic reduction algorithms for the structural eigenproblem.....9015
 NASTRAN forced vibration analysis of rotating cyclic structures.....10012
 On the solution of approximated systems when using reduced component modes.....11028
 Stochastic methods in structural mechanics, Proceedings of the International Workshop on Stochastic Methods in Structural Mechanics, Department of Structural Mechanics, University of Pavia, Pavia, Italy, June 9-12, 1983 (Book).....12027
 An improved approach to investigation of the natural vibrations of pipes.....12028

154-Z Experimental techniques

- On the dynamic response of lightweight structures.....120
 Identification of structural systems using naturally induced vibration data in the presence of measurement noise.....5751
 The use of manganin stress transducers in impulsively loaded long rod experiments.....9016
 Measurement of relative vibratory motion at the shroud interfaces of a fan.....10013
 ESPI - The ultimate holographic tool for vibration analysis?.....11029

156 Vibrations (structures)

156-B Buildings & foundations

- On the effect of the rigid sidewall on the dynamic stiffness of embedded circular footings.....3225
 Vibration control of tall buildings.....4387
 Cladding influence on dynamics response of tall buildings.....10014
 Non-linear torsional coupling in symmetric structures.....12029

156-D Bridges

- Dynamic response of orthotropic curved bridge decks due to moving loads.....121

156-E Hydraulic structures

- Time-harmonic and nonstationary stochastic vibrations of arch dam-reservoir systems.....4388

156-F Marine structures

- Longitudinal resonant behavior of very deep water risers.....5752
 Dynamic interaction of a guyed tower with its guying system.....5753
 Simple models to evaluate dynamic guyed tower response.....5754
 Stochastic stability of tethered buoyant platforms.....7992
 Stochastic response of compliant platforms to irregular waves.....7993
 Summer ice floe impacts against caisson-type exploratory and production platforms.....12030

156-G Vehicles (including locomotives)

- Optimum design of hydraulic shock absorbers. (2nd Report, Using unknown parameters comprising piecewise linear resisting force, spring constants, and damping coefficient).....122
 Vibrations of a flatbed truck.....123
 Remarks on the theory of vehicle vibrational analysis based on the on-the-road measurements.....1143
 Study of ride comfort using a nonlinear mathematical model of a vehicle suspension.....1144
 The natural and forced vibrations of a wheel disc.....1145
 Vibration of a rolling wheel—preliminary results.....1146
 Ground vibrations from heavy freight trains.....1147
 Diagnostic methods in the control of railway noise and vibration.....1148
 Analysis of properties of the railway vehicle springing equipped with non-linear element with negative stiffness under random excitation.....3226
 Evaluation of rail head surface configuration viewed from wheel load variation.....4389
 Characteristics of rolling resistance of freight cars at low temperature and the general expression.....4390
 Optimum characteristics of automotive shock absorbers under various driving conditions and road surfaces.....5755
 Solution of nonlinear vibration of a wheel tractor with a trunk by statistical linearization.....5756
 The effect of a trailer on car vibrations.....5757
 Equivalence classes and optimization of vehicle swinging systems.....5758
 On the lateral stability of a flexible truck.....6949
 The application of Green's function to the investigation of the response of vehicle accelerating over random profile.....6950
 Optimal design of an off-road motorcycle suspension.....10015
 Improved off-road tractor ride via passive cab and seat suspensions.....10016
 Automated vehicle dynamic analysis with flexible components.....10017
 Basic research on vibration and noise of internal combustion engine. (1st Report, Vibration analysis of the piston-crank system 1).....10018

156-H Ships

- An integral approach to vibration problems of passenger-rail ferries.....6951

156-I Aircraft

- Substructure program for analysis of helicopter vibrations.....7994
 Optimal frequency response modification by added passive structures.....9017
 Finite element analysis of natural, longitudinal vibrations of a deformable aeroplane with suspended masses.....11030
 On an algorithm for solving the incomplete eigenproblem in vibration analysis of complex fuselage-type structures.....12031

Weighting coefficient selection in the problem of optimal damping of wing elastic vibrations.....12032

156-J Spacecraft

Vibration characteristics of self-expanding stayed columns for use in space.....3227
Digital simulation of counterspun nutation damper operation under non-ideal operating conditions.....11031

156-K Machine elements

Vibration analysis of movable part of internal combustion engine. (Part 2. Combined system of crank shaft and flywheel).....124
On tuned bladed disk dynamics: Some aspects of friction related mistuning.....125
Non-linear effects in the support motion of an elastically mounted slider crank mechanism.....1149
Proceedings of the XIVth Conference, Dynamics of Machines, Interdynamics 83, held in Liblice, from 12th to 16th September 1983 (Czech and English) (Book).....6952
Design sensitivity analysis of frequency response in machine structures.....10019
Vibration of a hydrostatic gas bearing due to supply pressure oscillations.....12033
A contribution to dynamics of machine aggregates with an asynchronous drive.....12034
Design of the vibration control structure of a tractor seat.....12035
Resonance response of thin-walled elements of carriage bodies.....12036

156-L Machine Tools

Chatter vibration of lathe tools. Part 1: General characteristics of chatter vibration.....3228
Chatter vibration of lathe tools. Part 2: On the mechanism of exciting energy supply.....3229
Modal analysis of machine tool structures based on experimental data.....4391
New approaches to the modal analysis for machine tool structure.....6953
Multi-criterion optimization of vibration-proofing systems for precision machine tools.....6954
Machine tool modifications with tuned dampers.....7995

156-M Rotating machines & turbomachinery

Effects of anomalous rotor joints on turbomachine dynamics.....4392
Component synthesis of multistage, rotating machinery trains by the generalized receptance approach.....4393
Transient vibration of high-speed, lightweight rotors due to sudden imbalance.....4394
The control of engine vibration using squeeze film dampers.....4395
Eigensolution reanalysis of rotor dynamic systems by the generalized receptance method.....4396
Closed-form, steady-state solution for the unbalance response of a rigid rotor in squeeze film damper.....4397
In-plane inertial coupling in tuned and severely mistuned bladed disks.....4398
An improved method for calculating critical speeds and rotordynamic stability of turbomachinery.....4399
Nonlinear analysis of rotor-bearing systems using component mode synthesis.....4400
A variational formulation for the finite element analysis of the vibratory and acoustical response of high speed machinery.....5759
Dynamic investigation of the main journals of two-cylinder engine crankshaft with damping.....5760
The monofilar dual frequency rotor hub absorber.....7996
Ground and flight tests of a passive rotor isolation system for helicopter vibration reduction.....10020
Beats of a rotor running on ball bearings.....11032
Dynamics of a positive-synchronization system for mechanical vibrators with asynchronous drives.....12037

156-N Damping

Damping estimation method using the spectral analysis technique based on the auto-regressive model fitting.....126
A lumped parameter model for the iterative analysis of cylinderlike antivibration mounts.....2122
Dry friction damping mechanisms in engine blades.....3230
Vibration problem of visco-elastically damped structures.....4401
The dynamic analysis of a structure having discrete dampers.....5761
Computer simulation of a shock-absorbing pneumatic cylinder.....10021
An alternative approach to the random response of bilinear hysteretic systems.....10022

156-O Isolation

Fundamental investigation of an oil damper. 2nd Report. Analysis based on the unsteady flow assumption.....127
The dynamics of vibration-insulated machine equipment substructures.....128
Minimum angular vibration design of airborne electro-optical packages.....2123
Vibration isolation using feedback control and compound dynamic absorber for portable vibrating tools.....3231
Vibration isolation from irregularity in a nearly periodic structure: Theory and measurements.....4402
Optimization for vibration isolation.....11033

156-P Absorption

On the suppression of ground vibration by active force controller. (Suppression of exciting force by feedforward control).....129
Working of magnetic dynamic absorber. (Sub-harmonic vibration).....130
A study on the torsional dynamic vibration absorber consisting of rare-earth magnets.....131
Behavior of magnetic dynamic absorber.....1150
The centrifugal pendulum as a non linear torsional vibration absorber.....4403
The cruciform dynamic vibration absorber.....11034

156-Y Computational techniques

Finite element approximations in transient analysis...4404
Subspace iteration with divided block method for eigensolution of the natural vibration problems of large structures.....5762
An improved method of dynamic coupling in structural analysis and its applications.....9018

156-Z Experimental techniques

Dynamic modeling of structures from measured complex modes.....132
Impact and vibration testing of shipping containers..10023
Developments in structural vibration testing methods.10024

158 Wave Motions in Solids

158-A General theory

A comparison of parabolic wave theories for linearly elastic solids.....1151
Exact solutions describing soliton-like interactions in a nondispersive medium.....2124
Elastic waves in solids.....2125
Simple waves in nonlinearly elastic media.....2126
Radiation of elastic waves in one-dimensional systems by a moving source.....5763
On the regularity of one-dimensional elastic waves in an incompressible isotropic material.....7997

- Equipartition of energy for anisotropic elastic waves.....9019
 Nonlinear deformation waves (IUTAM Symposium, Tallinn, Estonian SSR, USSR, August 22-28, 1982) (Book).....10025
 Application of torsional and longitudinal elastic waves in mechanical systems.....10026

158-B Rods & beams, elastic

- Acceleration wave propagation in hyperelastic rods of variable cross-section.....133
 Coupled flexural-longitudinal wave motion in a periodic beam.....1152
 On variational inequality for an operator of dynamics of elastic rod.....1153
 Dispersion of nonlinear spatial waves in a rod.....1154
 Elastic waves in heterogeneous rectangular clad rod.....1155
 Dispersion of nonlinear waves in a rod.....1156
 Coupled torsional and longitudinal wave propagation in a neo-Hookean bar.....2127
 Forced flexural vibrations of a Timoshenko column supported by an elastic half-space.....3232
 Wave propagation in nonhomogeneous almost nonlinear thin elastic rods.....3233
 Propagation of longitudinal elastic waves in a rod surrounded by a medium of Winkler type.....4405
 Reflection and transmission of a pulse at a notch-discontinuity in a rod.....5764
 Generation of elastic stress waves at a T-junction of square rods.....5765
 Wave propagation in an infinite long bar of arbitrary cross section and with a circular cylindrical cavity.....7998
 Responses of continuous, inertialess beams to traversing mass—a generalization of Stokes' problem.....9020
 Elastic system moving on an elastically supported beam.....10027
 Dynamics of an unbounded, initially stressed beam on an elastic foundation.....10028
 Propagation of elastic waves in a finite length bar with a variable cross section.....11035
 Transient response of Timoshenko beams with discontinuities of cross-section.....11036
 Investigation of stress wave propagation through intersecting bars.....12038
 Non-linear longitudinal waves in bars.....12039
 Form of pulsed input for directional displacement of a free beam.....12040

158-C Plates & shells, elastic

- Numerical analysis of wave processes in a shell-rod system.....134
 Instantaneous plugging of stretched elastic plates.....2128
 Calculation of natural vibration frequencies for anisotropic plates with holes.....2129
 Transient response of an inhomogeneous elastic hollow cylinder to an impulsive line SH-source.....2130
 Study of the velocities and modes of propagation of axisymmetric waves along an orthotropic hollow cylinder.....2131
 Propagation of torsional waves in tubular bones.....4406
 Free-wave propagation in an irregularly stiffened, fluid-loaded plate.....5766
 Method of asymptotic integration in problems of wave propagation in shells of revolution.....5767
 Vibration and stability of orthotropic circular cylindrical shells subjected to axial load.....7999
 Response of a thin plate resting on a fluid-layer to a moving point load.....8000
 Vibrations and radiation of a shell revolution acted upon by an annular load.....8001
 Generation of waves in an elastic plate by a torsional moment and a horizontal force.....9021
 An exact analytical approach to the free vibration analysis of rectangular plates with mixed boundary conditions.....9022
 Dynamic response of a prestressed, orthotropic thick plate strip to a moving line load.....10029
 Propagation of nonaxisymmetrical elastic waves in an orthotropic hollow cylinder.....10030

- Diffuse waves in finite plates.....11037
 Effect of velocity of a pressure wave on the reaction of a three-layer cylindrical shell.....11038
 Some problems of stability of propagation of non-linear waves in shells and plates.....12041

158-D Infinite & semi-infinite media, elastic

- Diffraction of Rayleigh waves in a quarter-space.....135
 Diffraction of plane harmonic waves by cracks.....136
 Dynamic response of lined tunnels by an isoparametric boundary element method.....137
 Diffraction of SH waves by a moving crack.....138
 Elastic waves generated by loading applied to surface of spherical cavity.....139
 Crack transient torsional wave interaction in an elastic bi-material.....140
 Elastic response to a time-harmonic torsion-force acting on a bore surface.....141
 Wavefront analysis in the nonseparable elastodynamic quarter-plane problems, I, Part 1, The general method, Part 2: Wavefront events in the edge uniform pressure problem.....1157
 Scattering of elastic waves from simple defects in solids, a review.....1158
 The singularity expansion method as applied to the elastodynamic scattering problem.....1159
 Interaction of stress waves with curvilinear tunnel cracks of longitudinal shear in a half-space.....1160
 The second correction in low-frequency scattering by a body in lubricated contact.....1161
 Scattering of a pulsed Rayleigh wave by a spherical cavity in an elastic half space.....1162
 Radiation from a dislocation oscillating in a circular cylinder.....1163
 Plane waves in simple elastic solids and discontinuous dependence of solution on boundary conditions.....1164
 Torsional oscillations of an anisotropic semi-infinite space by an impulsive twist in the presence of a magnetic field.....2132
 Interaction of shear waves with two coplanar Griffith cracks situated in an infinitely long elastic strip.....2133
 Diffraction of an elastic wave by an embedded quarter-space.....2134
 High-frequency scattering of elastic waves from cylindrical cavities.....3234
 The determination of the elastodynamic fields of an ellipsoidal inhomogeneity.....3235

162-E Capillary waves

- Subharmonic generation by resonant three-wave interaction of deep-water capillary waves.....169
 Nonlinear capillary waves under gravity with edge constraints in a channel.....170
 An efficient numerical technique for the solution of a nonlinear capillary wave problem.....1184
 Instabilities of dynamic thermocapillary liquid layers. Part 1. Convective instabilities.....3270
 Instabilities of dynamic thermocapillary liquid layers. Part 2. Surface-wave instabilities.....3271
 The effects of finite amplitude on the behavior of antisymmetric waves on two-dimensional liquid sheets.....3272
 Self-refraction of nonlinear capillary-gravity waves.....4442
 Surface oscillation due to Marangoni-effect in a freely floating sphere.....4443
 Capillary waves on a vertical jet.....5806
 Non-local progressive capillary waves of arbitrary amplitude.....6974
 Nonlinear gravity-capillary standing waves in water of arbitrary uniform depth.....10052
 Determination of the surface wave amplitude on water by acoustic pulse method.....12073

162-F Thin films

- Stability of a film flowing down along an oscillating surface.....1185
 Features of convection in thin films due to van der Waals pressure.....1186
 Hydrodynamics of films of surface-active substances.....2155
 Waves of general type propagating in a liquid layer sandwiched between two thermo-elastic half-spaces.....5807
 Wave characteristics of falling film flows in a co-current gas flow.....8020
 Weakly nonlinear stationary waves in a thin fluid film.....12074

162-G Non-Newtonian fluid

- Reflection and refraction of harmonic shear waves in incompressible viscoelastic fluids.....3273
 Propagation and damping of surface- and interface-type waves in viscoelastic fluids.....12075

162-H Reflection, refraction, diffraction, & scattering

- A boundary integral equation approach to wave propagation over a trench.....171
 Over-reflection and instability.....2156
 On weak reflection of water waves.....2157
 Scattering of surface waves by a submerged fixed vertical plate in water of finite depth.....2158
 Experimental analysis of sloshing flow in circular cylindrical tank using the laser Doppler velocimeter.....4444
 On reflection of a planar solitary wave at a vertical wall.....5808
 Nonlinear focusing of surface waves by a lens - theory and experiment.....5809
 Transmission of waves in a liquid through absorbing layers and subsequent interaction of the waves with an obstacle.....5810
 A note on the diffraction of an obliquely incident surface wave by a partially immersed fixed vertical barrier.....5811
 A theoretical and analytical study of phenomena linked with the reflexion of a solitary wave on a plane vertical wall.....5812
 Harmonic generation in waves propagating over submerged step.....6975
 Hydrodynamics of a rigid block in water of finite depth.....6976
 Nonhydrostatic standing waves in a parabolic basin.....8021
 The scattering of a continental shelf wave by a semi-infinite barrier located along the outer edge of a step shelf.....9043
 Propagation of paddle generated waves over a submerged sill. Nonlinear theory.....9044
 Interactions of fast and slow waves in problems with two time scales.....10053
 Over-reflection of internal-inertial waves from the mixed layer.....12076
 Performance of a numerical short-wave model.....12077
 Wave reflection from a vertical permeable wave absorber.....12078

162-I Pipes & ducts incl. water hammer & surging

- Fluid transient analysis in pipelines with nonuniform liquid density.....4445
 Analysis of the frequency response of a fluid amplifier using unsteady flow characteristics.....4446
 Matched impedance to control fluid transients.....4447
 Knocking from valve hammer in triplex pumps.....5813
 Simplified models of large pipe networks for simulation of pressure transients.....6977
 Resonant amplitudes of pressure pulsation in pipelines. (2nd Report, A calculation by method of transfer matrix).....6978
 Laplace operator analysis of water hammers.....6979
 The phenomena of hydraulic hammer and pulsation in liquid storing system.....6980
 Determination of invariants in connection with examination of long pipelines with air chambers.....6981
 Internal pressure fluctuations in pressure pipes.....9045

162-J Open channels

- Fission of solitons in a symmetric triangular channel with variable cross section.....1187
 Waves in meandering streams.....4448
 Turbulent bores and hydraulic jumps.....4449
 The generation of cross-waves in a long deep channel by parametric resonance.....6982
 On the nonlinear theory of paddle generated waves in laboratory channels.....6983

- Gravity current upstream of a buoyant influx in an open-channel flow: a numerical study.....9046
 A justification of the KdV approximation to first order in the case of N-soliton water waves in a canal.....10054

162-K Rotating flows

- Anomalous frequency spectrum of inertial waves in a finite, rotating, sectored cylinder.....1188
 The phase configuration of the waves around an accelerating disturbance in a rotating stratified fluid.....1189
 On inertial flow over topography. Part 1. Semigeostrophic adjustment to an obstacle.....2159
 Initial-value problems for Rossby waves in a shear flow with critical level.....3274
 Circular waves on a stationary disk in rotating flow.....4450
 Gravity currents moving along a lateral boundary in a rotating fluid.....4451
 Exact periodic solutions of long wave equations for a rotating fluid.....5814
 Attenuated wave-induced drift in a viscous rotating ocean.....6984
 On free surface oscillations of a liquid partially filling a rotating cylinder. (1st Report, Visualization of resonant mode and analysis by inviscid theory).....6985
 On free surface oscillations of a liquid partially filling a rotating cylinder. (2nd Report, The calculation of fluid force using boundary layer approximation).....6986
 Experiments on the elastoid-inertia oscillations of a rigidly rotating fluid in a cylindrical vessel.....10055
 Wave speeds in wavy Taylor-vortex flow.....12079
 Topographically generated cyclonic disturbance and lee waves in a stratified rotating fluid.....12080

162-L Stratified flows & internal waves

- The KdV equation in stratified fluid flow.....172
 Interfacial progressive gravity waves in a two-layer shear flow.....173
 Asymptotic behaviour of the solution of a problem in the theory of waves on the surface of a thin layer of stratified fluid.....174
 Nonlinear interfacial progressive waves near a boundary in a Boussinesq fluid.....1190
 A study of resonant interactions between internal and surface waves based on a two-layer fluid model.....1191
 Parametric excitation of internal waves in a continuously stratified liquid.....1192
 An example for period doubling bifurcations of internal gravity waves.....1193
 Hamiltonian description of stratified fluid dynamics.....1194
 Viscous effects in some internal waves.....1195
 Influence of the shape of a collapsing "spot" and the fluid boundaries on internal wave formation in a stratified medium.....1196
 On the generation of water waves at an inertial surface.....3275
 Cauchy problem for equations of internal waves.....3276
 Convergence of approximate solutions for waves in a stratified fluid with approximated density distribution.....3277
 Forced oscillations in a two-layer fluid of finite depth.....3278
 Experiments on solitary internal Kelvin waves.....4452
 Visualization of particle displacement and flow in stratified salt water.....4453
 Stratified flow over three-dimensional ridges.....5815
 Asymptotic form of the solution of the problem of waves on the surface of a heterogeneous stratified liquid.....5816
 Study of internal waves in the case of rapid horizontal motion of cylinders and spheres.....6987
 Finite-amplitude steady waves in stratified fluids.....6988
 Internal kinematic waves and the large-scale stability of two-layer stratified flow.....6989
 Generation of internal gravity waves in a thermocline.....8022
 A composite equation related to oscillations of a stratified compressible fluid.....8023

- Energy and entropy evolution of interacting internal gravity waves and turbulence.....9047
 Jumps in layered miscible fluids.....9048
 Statistical dynamics of internal gravity waves-turbulence.....9049
 The incidence of internal waves onto a thin submerged barrier.....9050
 Parametric instabilities of internal gravity waves in Boussinesq fluids with large Reynolds numbers...10056
 A wave theory for free spreading of buoyant fluids in a two-layer system.....10057
 Observations indicating parametric instabilities in internal gravity waves at thermospheric heights....11060
 Internal waves in a horizontally inhomogeneous flow...11061
 The structures and energetics of fully nonlinear symmetric baroclinic waves.....11062

162-M Multicomponent fluids

- Time evolution of discontinuities at the wave head in a non-equilibrium two-phase flow of a mixture of a gas and dusty particles.....1197
 Wave structure in oscillatory Couette flow of a dusty gas.....1198
 Discontinuity waves for fluid mixtures.....9051

162-N Mass transport by waves

- The effect of Langmuir circulation on the distribution of submerged bubbles caused by breaking wind waves.....11063

162-O Vibrations in fluids

- Waves on the interface of two-liquid layers in a vertical periodic motion.....1199

162-P Stability of motion of bodies containing liquids

- Stability of steady motions of a rigid body with an elastic shell partially filled with fluid.....2160
 On the stability of steady rotation of a cylinder partly filled with a viscous incompressible fluid...2161
 Quasistatic loss of stability by a rotating cylindrical shell with a liquid.....2162
 Kinematic control of the motion of a vessel with an ideal heavy fluid.....3279
 Dynamics of a mobile tank partially filled with liquid: Equations of motion and their linearization.....3280
 On the stability of the rotational motion of a rigid body having a liquid filled cavity under finite initial disturbance.....4454
 A class of elliptical free-surface flows.....4455
 On the global stability of the rotational motion and the qualitative analysis of the behaviour of disturbed motion of a rigid body having a liquid-filled-cavity.....10059

162-Y Computational techniques

- Numerical analysis of waves in a semi-infinite layer of fluid.....175
 Analysis of spurious oscillation modes for the shallow water and Navier-Stokes equations.....176
 Numerical realization of a variational method of solving several hydrodynamic problems.....2163
 Discrete radiation boundary conditions for a semi-infinite layer of fluid.....3281
 Analysis of free surface flows using isoparametric finite elements.....3282
 Application of a high accuracy finite difference technique to steady, free surface flow problems....4456
 Application of algorithm for calculation of Stoke's coefficients in the theory of finite amplitude gravity waves.....9052
 Approximate method of solving problems of fluid agitation in rotating cavities.....10060
 Numerical solution of the 2-D non linear wave resistance problem.....11064

162-Z Experimental techniques

- Longitudinal surface waves for the study of dynamic properties of surfactant systems. I.
 Instrumentation.....2164
 Scale effects in a wave-refraction experiment.....4457
 A note on the visualization and measurement of the internal wave field behind a cylinder moving through a stratified fluid.....10061
 Pattern analysis of edge-tone oscillation by moiré topography.....11065

164 Wave Motion in Compressible Fluids

164-A General theory

- Spatial analog of centered Riemann and Prandtl-Meyer waves.....177
 The evolution of resonant oscillations in closed tubes.....3283
 Various heat-transfer regimes in two-temperature gasdynamics.....8024

164-B Expansion & compression

- Mode propagation in nonuniform circular ducts with potential flow.....178
 The inversion of a spherical compression wave in fluid.....1200
 Characteristic frequencies of transonic diffuser flow oscillations.....3284
 Interaction of rarefaction waves with area reductions in ducts.....6990
 An analytical treatment of the formation of one-dimensional steady shock waves in uniform and diverging ducts.....9053
 Propagation of pressure waves in bubbly mixtures....11066
 On the propagation of waves exhibiting both positive and negative nonlinearity.....11067

164-C Shock

- Cylindrically converging shock and detonation waves....179
 Interference of oblique shock waves of one family in a hypersonic flow.....180
 Stability of shock waves with finite relaxation region.....181
 Mechanism of pseudo-shock wave in supersonic jet.....182
 Vorticity at the shock foot in inviscid flow.....183
 Effect of thermal relaxation of attenuation of shock waves in two-phase medium.....184
 Shock dynamics in non-uniform media.....1201
 Three-dimensional effects on the focusing of weak shock waves.....1202
 Shock reflection transition in three-dimensional steady flow about interfering bodies.....1203
 On regular reflection of a shock wave from a rigid wall.....1204
 Spherically-symmetric shock wave in a dilatant medium.....1205
 Stability of flows with discontinuity surfaces.....1206
 Probability analysis of random plane waves in gas dynamics.....1207
 Rarefaction shock wave near the critical liquid-vapour point.....1208
 Action of weak shock waves on a membrane separating two acoustic half-spaces.....1209
 The regular case of shock wave diffraction on a wedge partly submerged in fluid.....2165
 An update on non-stationary oblique shock-wave reflections: actual isopycnics and numerical experiments.....2166
 Equilibrium parameters behind a shock wave in wet vapor.....2167
 Spherical shock due to point explosion with varying energy.....2168
 Fully implicit shock tracking.....2169
 A theory of weak shocks.....2170

- The interaction between shock and rarefaction waves in the problem of angular piston.....3285
 Critical times of generating shocks on smooth one-dimensional pressure wakes in inviscid fluids.....3286
 Stability of shock waves attached to wedges and cones.....4458
 Unsteadiness of the separation shock wave structure in a supersonic compression ramp flowfield.....4459
 Shock-wave series for real fluids.....4460
 Direct observation of shock splitting in a vapor-liquid system.....4461
 An approximate analytical solution for self-isothermal flow behind a radiation driven shock wave, II.....4462
 Spherical radiation-driven shock waves in a non-uniform atmosphere.....4463
 On the propagation of weak and moderately strong, curved shock waves.....4464
 Shock-wave propagation in a liquid with gas bubbles.....4465
 Focusing of shock waves.....4466
 Asymptotic laws of damping of shock waves in inhomogeneous media.....5817
 Pressure wave acting on a cylindrical sandwich shell immersed in a compressible fluid.....5818
 Aspects of regular reflection of a shock wave from the walls of a conical funnel.....5819
 Wave motion of a three-component medium acted upon by a load traveling along a plane boundary.....5820
 Asymptotic laws of damping of weak continuous and shock waves in dust-laden gas.....6991
 Shape of a shock wave diffracted by a rounded corner.....6992
 Shock waves in gas-particle mixtures.....6993
 Decay of a plane shock wave in a two-parameter medium with arbitrary equation of state.....6994
 Approximate solution to nonself-similar problem of motion of a piston after an impact.....6995
 Growth and propagation of the shock in thermally conducting fluid.....8025
 Shock waves in liquids containing gas bubbles.....9054
 Reflection of a stationary shock wave from a rigid partition in a three-component medium.....9055
 The structure of normal shock waves in polytropic gases.....10062
 Instability of a convergent spherical shock wave.....10063
 Pressure distribution behind a nonstationary reflected-diffracted oblique shock wave.....10064
 Application of S. K. Godunov's method for solving the problem of quasi-one-dimensional gas flow with a shock wave.....10065
 On the propagation of a weak shock front: Theory and application.....11068
 Shock waves in boiling liquids.....11069
 Pseudospectral solutions of one- and two-dimensional inviscid flows with shock waves.....12081
 The effect of water droplets on the relaxation zone developed behind strong normal shock waves.....12082
 Formation of the Mach-type reflection of shock waves.....12083
 Shock waves in noble gases and their mixtures.....12084
 Shock shape over a sphere cone in hypersonic high enthalpy flow.....12085
 Attenuation of an air shock wave by perforated baffles.....12086
 Questions of the theory of diffusion under the effect of a shock.....12087
 Damping of short-duration shock waves in condensed substances.....12088
 Anomalies in the shock and isentropic compressibilities of water.....12089
- 164-D Sonic boom
- Investigation of the possibilities of trailing edge shock waves intensity reduction by means of the edge geometry modification.....2171
- 164-E Blast
- Characteristic method applied to blast waves in a dusty gas.....2172
 Spurt of gas from a hole into air.....10066
- 164-F Reflection, refraction, diffraction, & scattering
- Interaction of oblique shock and detonation waves.....185
 Calculation of reflection of a blast wave by a plane.....1210
 Experimental verification and measurement of recompression waves induced by bulk cavitation.....2173
 Shock diffraction in channels with 90° bends.....3287
 Regular reflection of a strong shock wave by the surface of a wedge.....5821
 On regular reflection of detonation waves.....5822
- 164-G Chemically reacting flows
- A study of the steady-state reaction-zone structure of a homogeneous and a heterogeneous explosive.....1211
 A theory for spontaneous Mach stem formation in reacting shock fronts, I. The basic perturbation analysis.....3288
- 164-H Stratified flows
- The structure of the internal wave Mach front generated by a point source moving in a stratified fluid.....4467
- 164-L Contact fronts
- Example of exact solution of a problem of gas compression by a spherical shell.....6996
- 164-M Inviscid-viscid (shock) interaction
- Analysis of viscous-inviscid interaction in transonic internal flows.....186
 Three-dimensional nonequilibrium viscous shock-layer flow over the space shuttle orbiter.....6997
- 164-N Vibration of compressible fluids in containers
- Nonlinear resonant wave motion of a weakly relaxing gas.....3289
 Dynamic behavior of liquid free surface in a cylindrical container subject to vertical vibration.....11070
- 164-Y Computational techniques
- Evolution scheme to compute periodic solutions of first-order nonlinear equations containing translation operators.....187
 Propagation of a long wave in a curved duct (II)
 Applications of matched expansion to long wave propagation through a hole with variable cross-section.....188
 Weakly nonlinear high frequency waves.....2174
 An investigation of the Mach disc and the Riemann wave formation in impulse jets.....3290
 Ray methods in multidimensional gasdynamics.....4468
 Behavior of the flow through a numerically captured shock wave.....4469
 Numerical study of the motion of a gas compressed by a spherical piston converging to its centre.....5823
 Localization of gasdynamic processes in the isentropic compression of a gas in a regime with peaking.....5824
 Highly implicit finite-difference schemes for gasdynamics.....8026
 Convergence of finite-difference schemes for one-dimensional gasdynamics problems with thermal conductivity.....8027
 A note on discontinuous numerical solutions of the kinematic wave motion.....9056

166 Solid-Fluid Interaction

166-A General theory

- The deformation of a viscous particle surrounded by an elastic shell in a general time-dependent linear flow field.....1212
 Fluid-structure interaction via boundary operator method.....3291
 Impact of a liquid mass on a perfectly plastic solid..5825

166-C External flow

- Interpolation and extrapolation of hydrodynamic coefficients.....1213
 Design against wind-excited vibration.....5826
 Hydraulic drag of tube bundles vs the angle of attack of a viscous fluid.....5827
 Row depth effects on vortex shedding and turbulent buffeting formation.....6998
 Propagation of free waves in a three-layered cylindrical shell with a fluid.....10067

166-D Internal flow

- Buckling of a turbulent jet surrounded by a highly flexible duct.....4470
 Flow induced bifurcations to three-dimensional oscillatory motions in continuous tubes.....10068
 Boundary value problem for fluid-filled elastic tubes.....11071
 Interactions between self and parametrically excited motions in articulated tubes.....12090

166-E Vibrations of structures in fluids

- Effect of the vessel wall on the stability of floating bodies.....189
 Hydrodynamic added-mass identification from resonance tests.....190
 Oscillations of impinging shear layers.....191
 Ovaling oscillations of cantilevered and clamped-clamped cylindrical shells in cross flow: An experimental study.....1214
 An analytical model for ovaling oscillation of clamped-clamped cylindrical shells in cross flow.....1215
 Resonant oscillations of fluid-loaded struts.....2175
 Experiments on the determination of immersed shell structure mobilities via scale modeling.....2176
 Vibrations of a circular cylinder in the flow field of a compressible viscous fluid.....2177
 Surface- and interface oscillations of freely floating spheres of immiscible viscous liquids.....3292
 Nonlinear analysis of a dynamical system being pulled by cables.....3293
 Dynamics of a cluster of flexibly interconnected cylinders. Part 1: In vacuum.....3294
 Dynamics of a cluster of flexibly interconnected cylinders. Part 2: In axial flow.....3295
 Fluid-structure interaction — A survey with emphasis on its application to nuclear steam systems design.....4471
 Natural frequencies of tube bundle in an incompressible fluid.....4472
 The effect of tube layout on the fluid-elastic instability of tube bundles in crossflow.....4473
 The use of porous baffles to control acoustic vibrations in crossflow tubular heat exchangers.....4474
 Low frequency acoustic radiation and vibration response of locally excited fluid-loaded structures.....4475
 Calculation of the vibration of an elastically mounted cylinder using experimental data from forced oscillation.....4476
 Hydroelastic instability of orthotropic panels with infinite width under shearing load.....5828
 Dynamical response of bar-fluid-shell system simulating hydraulic cylinder subjected to arbitrary axial excitation.....5829

- Hydroelastic instabilities of square cylinders.....5830
 Stability of tube arrays in crossflow.....5831
 Statistical analysis of vibrations of tube bundles, induced by crossflow of a viscous liquid.....5832
 Vortex shedding and velocity fluctuations in staggered tube bundles in crossflow of air.....5833
 Study on the fluidelastic vibration of tube arrays using modal analysis technique.....6999
 Effect of the compressibility of a viscous fluid on the free vibrations of an elastic cylindrical shell interacting with it.....7000
 Dynamics of coupled fluid-structure multiplate systems.....7001
 Interaction of vertical-walled vibrating structures with water, analyzed from the viewpoint of added mass and damping.....7002
 The effect of seabottom proximity of the vortex-induced vibrations and fatigue life of offshore pipelines.....8028
 Forced-vibration study of the aeroelastic instability of a square-section cylinder near vortex resonance.....8029
 Generation of hydroelastic fluctuations in two-phase flow in tube bundles.....8030
 Vibrations of a body in a bounded volume of viscous fluid.....8038
 Buffeting of a slender circular beam in axial turbulent flows.....9057
 The occurrence of negative added mass in free-surface problems involving submerged oscillating bodies.....9058
 Vibration of a plate with arbitrary shape in contact with a fluid.....10069
 The effect of tube mass on the flow induced response of various tube arrays in water.....10070
 Guidelines for the instability flow velocity of tube arrays in crossflow.....10071
 Concerning a mechanism of excitation of vibrations of a circular cylinder in crossflow.....10072
 Analysis of vibration of a group of rods in a fluid by approximation of flow-path network (Report I. Simplified vibration model of a group of rods).....11072
 Analysis of vibration of a group of rods in a fluid by approximation of flow-path network (Report II. Continuous body model of a group of rods).....11073
 Axisymmetric vibrations of shells of revolution in a fluid under concentrated stimuli.....11074
 Nonlinear inertia forces on slender cylindrical members.....12091
 The nonlinear dynamics of long, slender cylinders.....12092
 On the resonance frequencies of water-loaded circular plates.....12093
 Hydroelastic response of a circular tube in eccentric annular flows.....12094
- 166-F Wave/flexible structures interaction
- A ring-source/integral-equation method for the calculation of hydrodynamic forces exerted on floating bodies of revolution.....192
 Prediction, measurement and comparison of fluid-structure interaction using mathematical and experimental models.....193
 On the wavetrains associated with elastic jumps on fluid-filled elastic tubes.....1216
 Expected fatigue damage and expected extreme response for Morison-type wave loading.....1217
 The dynamics of a flexible articulated column in waves.....1218
 The low wavenumber wall pressure spectrum on a flexible surface.....2178
 Analysis of transient processes in the interaction of elastic solids of revolution with a liquid.....2179
 The question of the influence of initial stresses on the "backward wave" in a prestressed compressible cylinder-fluid system.....2180
 Oscillations of the free surface of a liquid in a cylindrical container with longitudinal vibrations.....2181
 Propagation of small perturbations in a system consisting of a prestressed compressible solid and a viscous compressible fluid.....3296
 Nonlinear dynamic analysis of deep water risers.....4477

- An analysis of chain forces of a SBS under regular wave action.....5834
- Hydrodynamic forces on a circular cylinder placed in wave-current co-existing fields.....5835
- Streaming of fluid under a near-bottom membrane.....7003
- Jet flow of ideal fluid past a flexible shell.....7004
- One mechanism of interaction of an elastic wall with a flow.....9059
- Oscillations of immiscible liquids in a rectangular container: A new damper for excited structures.....9060
- Dynamic motions of marine pipelines on the ocean bottom.....10073
- Analytic determination of the buckling speed of towed slender cylindrical beams.....12095
- 166-G Multicomponent flow**
- Engineering approximation of beam flutter.....7005
- 166-H Flexible tanks & containers**
- Approximate analysis of natural frequencies of a circular cylindrical tank.....194
- Sloshing frequencies.....2182
- The effect of viscosity on the forced vibrations of a fluid-filled elastic shell.....3297
- Added mass for beam mode response.....4478
- Waves in nonlinear fluid filled tubes.....5836
- Compression of fluid-filled spherical shells by rigid indenters.....5837
- Numerical calculation of the translational forced oscillations of a sloshing liquid in axially symmetric tanks.....5838
- Dynamic analysis of cylindrical shells and liquid storage tanks.....7006
- Approximate dispersion equations for thin walled liquid-filled tubes.....9061
- Application of a variational method to the solution of nonlinear problems of the dynamics of combined motions of a tank with fluid.....11075
- Wave propagation in a thin-walled liquid-filled initially stressed tube.....12096
- 166-I Pipes with flowing fluids**
- Investigation of water hammer in hydrodynamic shock tubes.....5839
- A numerical approach for flow-induced vibration of pipe structures.....5840
- Stabilizing effect of damping on the stability of nonconservative systems conveying fluid.....5841
- Nonlinear problems of the statics of heavy hoses with a flowing fluid under vertical concentrated forces.....8031
- Influence of fluiddynamic parameters upon fluid-hammer forces and spectra.....9062
- Vibrations in piping systems conveying dense fluids.....9063
- Use of acoustic intensimetry for identifying pressure pulse sources in piping systems.....9064
- Pressure propagation in viscoelastic media during motion in tubes of elastoviscous material.....10074
- Simplified pipe whip dynamics.....11076
- Linearized two-dimensional fluid transients.....12097
- Wave propagation in fluid lines.....12098
- Computation of unsteady pipe flow with respect to visco-elastic material properties.....12099
- 166-J Turbomachine blades excitation**
- Prediction of aerodynamically induced vibrations in turbomachinery blading.....4479
- An aeroelastic analysis of the Darrieus wind turbine.....7007
- The coupled response of turbomachinery blading to aerodynamic excitations.....8032
- A study of unsteady pressures near the tip of a transonic fan in unstalled supersonic flutter.....10075
- 166-K Ocean structures**
- Experimental study of forces on a cylinder in oscillatory flow with a cross current.....4480
- Hydrodynamic coefficients of a harmonically oscillated tower.....4481
- Linearization methods and the influence of current on the nonlinear hydrodynamic drag force.....4482
- On the elimination of de-stabilizing motions of articulated mooring towers under steady sea conditions.....7008
- The influence of boundary layer velocity gradients and bed proximity on vortex shedding from free spanning pipelines.....10076
- The solution of large flutter problems on small computers.....11077
- Hydrodynamic coefficients of a mooring tower.....12100
- Subharmonic and chaotic motions of compliant offshore structures and articulated mooring towers.....12101
- The motions of adjacent floating structures in oblique waves.....12102
- Vortex-induced vibrations of a flexible cylinder near a plane boundary exposed to steady and wave-induced currents.....12103
- Vortex shedding induced dynamic response of marine risers.....12104
- 166-L Wing/tail/control surface flutter**
- On the energy characteristics of the aerodynamic matrix and the relationship to possible flutter.....1219
- Rigid-body structural mode coupling on a forward swept wing aircraft.....2183
- Transonic time-response analysis of 3-degree-of-freedom conventional and supercritical airfoils.....2184
- Transonic flutter model study of a supercritical wing and winglet.....2185
- Airfoil shape and thickness effects on transonic airloads and flutter.....8033
- Flutter analysis using nonlinear aerodynamic forces.....8034
- Aeroelastic flutter and divergence of stiffness coupled, graphite/epoxy cantilevered plates.....8035
- A root locus-based flutter synthesis procedure.....9065
- Time-marching transonic flutter solutions including angle-of-attack effects.....9066
- Evaluation of four subcritical response methods for on-line prediction of flutter onset in wind tunnel tests.....9067
- Effects of angle of attack on transonic flutter of a supercritical wing.....9068
- Divergence boundary prediction from random responses: NAL's method.....11078
- A flutter eigenvalue program based on the Newton-Raphson method.....12105
- 166-M Panel flutter**
- Unified panel flutter theory with viscous damping effects.....195
- Minimum-weight design of an orthotropic shear panel with fixed flutter speed.....196
- Flutter loads of a Timoshenko beam-column under a follower force governed by two variants of equations of motion.....197
- Flutter of orthotropic panels in supersonic flow using affine transformations.....1220
- The effect of a normal shock on the aeroelastic stability of a panel.....3298
- Unified aeroelastic flutter theory for very low aspect ratio panels.....4483
- Nonlinear panel flutter using high-order triangular finite elements.....4484
- Subsonic flapping flutter.....5842
- Effect of elastically suspended masses on stability of elastic panels in a supersonic flow.....5843
- Eigenvalue problem for integro-differential equation of supersonic panel flutter.....10077
- 166-N Propeller & rotor flutter**
- Investigation of the stall flutter of an airfoil with a semi-empirical model of 2-D flow.....2186
- Formulation and solution of rotary-wing aeroelastic stability and response problems.....2187
- Investigations of hingeless rotor stability.....2188
- Flutter of mistuned turbomachinery rotors.....8036

- Cascade flutter analysis of cantilevered blades.....8037
Finite element analysis for bearingless rotor blade
aeroelasticity.....9069
A simplified model of the influence of blade elastic
pitch variations on helicopter rotor flapping
dynamics.....10078
Helicopter rotor lag damping augmentation through
individual-blade-control.....10079
Blade bending flutter in started supersonic flow.....11079
Limit cycle oscillations of a nonlinear rotorcraft
model.....12106
- 166-O Whole body vibration modes
On the cross flow response of cylindrical structures..5844
- 166-P Flutter control & suppression
The synthesis of an active flutter suppression law
based on an energy criterion.....4485
Active suppression of aeroelastic instabilities on a
forward-swept wing.....8039
- 166-Q Static aeroelasticity (divergence)
Design, analyses, and model tests of an
aeroelastically tailored lifting surface.....1221
Static aeroelastic behavior of curved helicopter
blades in hovering and axial flight.....5845
Control of aeroelastic divergence.....9070
- 166-R Buffeting, gust, & turbulence effects
Measurements of the coherence of the fluctuating
pressure field on a square prism placed in a
turbulent flow.....1222
The distortion of turbulence by a flat plate and its
relevance to the pressure fluctuation on the
obstacle.....1223
Limit amplitude of galloping bluff cylinders.....9071
- 166-S Aeroelastic effects on flight loads & stability
Optimization of structures subjected to aeroelastic
instability phenomena.....3299
Aeroelastic characteristics of a cascade of mistuned
blades in subsonic and supersonic flows.....7009
Unsteady 3-D loads on elastic flat panels undergoing
arbitrary small motions in a supersonic
electrically conducting flow field.....7010
Dynamic stability of flexible forward swept wing
aircraft.....9072
- 166-Y Computational techniques
Systems of integrodifferential equations describing
nonstationary motion of bodies in a continuous
medium.....1224
Application of a new complex root-finding technique
to the dispersion relations for elastic waves in a
fluid-loaded plate.....2189
Doubly asymptotic approximations as non-reflecting
boundaries in fluid-structure interaction problems..2190
A finite element quasi-Eulerian method for three-
dimensional fluid-structure interactions.....3300
The stability of explicit difference schemes for
solving the problem of interaction between a
compressible fluid and an elastic shell.....5846
A study of displacement-based fluid finite elements
for calculating frequencies of fluid and fluid-
structure systems.....10080
Direct method of solving problems on the combined
spatial motions of a body-fluid system.....10081
Deterministic identification of turbulent loads for
general mechanical structures with uncertain state
measurements.....10082
- 166-Z Experimental techniques
Ultrasonic attenuation in pipes with moving liquid...10083
- 168 Astronautics (Celestial and Orbital Mechanics)
- 168-A General theory
On integrability of the GII'den-Meshcherskii problem..1238
Engineering science and mechanics, Parts I & II,
Proc. of an Intl. symp. held Dec. 29-31, 1981 in
Tainan, Taiwan, under joint sponsorship of the
Nat'l. Cheng Kung Univ. and the Am. Astronaut. Soc.
(Adv. in the Astronaut. Sci., v. 50) (Book).....2191
Determination of autonomous three-dimensional force
fields from a two-parameter family of orbits.....3301
Modern view on LaPlace's problem.....3302
Regularization and linearization of the equations of
motion in central force-fields.....3303
The gravitational potential due to uniform disks and
rings.....3304
Periodic solutions of the restricted problem that
are analytic continuations of periodic solutions
of Hill's problem for small.....3305
Rotational dynamics with geometric algebra.....3306
Celestial mechanics with geometric algebra.....3307
Geometry of spinor regularization.....3308
A second fundamental model for resonance.....3309
Mission analysis techniques for attached shuttle
payloads.....4486
Dynamical trapping and evolution in the solar
system, Proceedings of the 74th Colloquium of the
International Astronomical Union held in Gerakini,
Chalkidiki, Greece, 30 Aug. - 2 Sept., 1982
(Astrophysics and Space Science Library, v 106)
(Book).....5847
Periodic orbits in a two-dimensional galactic
potential.....5848
The solution of Kepler's equation, II.....5849
The solution of Kepler's equation, I.....5850
A general algorithm for the determination of T
and Z in Hori's method for non-canonical
systems.....5851
Hamiltonian systems in the neighbourhood of an
equilibrium solution. I: Periodic orbits in
cases of resonance.....10084
Hamiltonian systems in the neighbourhood of an
equilibrium solution. II: The stability of
periodic solutions.....10085
Astrodynamics 1983 (Advances in the Astronautical
Sciences, vol. 54, Part I and Part II) (Book).....11080
On Szebehely's equation and its connection with
Dinelly's-Whittaker's equations.....12107
Szebehely's equation and principle variations.....12108
- 168-B General perturbations
Complete second-order satellite perturbations due to
and , compactly expressed in spherical-polar
coordinates.....3310
A method for computation of perturbations.....8040
Stability of periodic oscillations of a quasi-
axisymmetric satellite in the plane of an
elliptical orbit.....8041
- 168-C Special perturbations
A noncanonical analytic solution to the perturbed
two-body problem.....2192
Orbital perturbations due to radiation pressure for
a spacecraft of complex shape.....2193
An analytic solution for the perturbed
equatorial orbit.....3311
- 168-D Celestial mechanics
The secular accelerations in Glyden's problem.....2194

Inertia coefficient considerations and the structure of Jovian planets.....2195
 Perturbation of an orbiter of a Galilean satellite by the other satellites.....3312
 Classification of orbits with regard to collision hazard in space.....4487
 On the three-dimensional lunar problem and other perturbation problems of the Kepler problem.....7011
 The definition of the ecliptic.....8042
 Motion of two planets with periods commensurable in the ratio 2:1 solutions of the Hori auxiliary system.....12109
 On the Szebehely-Bond equation. Generalized Sundman's transformation for the perturbed two-body problem.....12110
 Semi-analytic solution of a two-body problem with drag.....12111

168-E Three- & N-body problems

Impossibility of the capture of retrograde satellites in the restricted three-body problem.....1225
 Generalized F and G series and convergence of the power series solution of the N-body problem.....2196
 Equations of motion of the restricted problem of three bodies with variable mass.....2197
 Stability criteria in many-body systems. III. Empirical stability regions for corotational, coplanar, hierarchical three-body systems.....2198
 Stability criteria in many-body systems. IV. Empirical stability parameters for general hierarchical dynamical systems.....2199
 Evolution with the mass parameter of families of asymmetric periodic solutions of the restricted three body problem.....2200
 Orbits near triple collision in the three-body problem.....2201
 Motion near quadruple collision in the trapezoidal 4-body problem.....3313
 Three-dimensional regions of stability about the triangular equilibrium points.....3314
 Existence of the solution of Szebehely's equation in three dimensions using a two-parametric family of orbits.....3315
 Elimination of the nodes in problems of n bodies.....3316
 Families of periodic collision orbits in the general three-body problem.....3317
 Families of asymmetric periodic solutions of the restricted problem of three bodies for the Sun-Jupiter mass ratio and their relationship with the symmetric families.....3318
 On topological stability in the general three-body problem.....5852
 On the stability of hierarchical four-body systems.....5853

 High-order resonances in the restricted three-body problem.....10088
 The restricted problem of n + v bodies.....10089
 The stability of masses during three-body encounters.....10090
 Virtual oscillations of celestial bodies. III. The solution of the evolutionary problem in non-Newtonian time scale.....10091
 On simultaneous double collision in the collinear four-body problem.....11081
 Homoclinic orbits and oscillation for the planar three-body problem.....11082
 On the problem of three rigid bodies.....12112
 Effect or perturbations on the location of equilibrium points in the restricted problem of three bodies with variable mass.....12113

Almost-square orbits in the restricted problem of three bodies.....12114
 Special cases of restricted three-body problems.....12115

168-F Variable mass body

Two-stage Earth to-orbit vehicles with dual-fuel orbiter propulsion.....7012
 Roundtrip interstellar travel using laser-pushed lightsails.....8045
 The effect of orbital eccentricities on the shape of the Hill-type analytical stability surfaces in the general three-body problem.....10092

168-G Orbit determinations

Mathematical modelling and analysis of the fluid dynamics of upper atmosphere dumbbell satellites.....198
 The possible motions of a satellite about an oblate planet.....1226
 About the non-existence of additional analytical integral in the problem of satellite's motion under the gravitational attraction of a triaxial rigid body.....1227
 Generalization of Szebehely's equation.....1228
 Orbit determination program, application to Earth observation satellites.....1229
 Solution of equations of problem of motion of a heavy rigid body about a fixed point in the Kowalevskaya's case using η -function.....1230
 The rotation number of bounded orbits in a central field.....1231
 The critical inclination problem with small eccentricity. II: Application to Earth satellites.....2202
 Periodic motion of a satellite in the gravitational field of a rotating planet.....2203
 Symmetric rectilinear periodic orbits of three bodies.....3319
 Secular orbit-orbit resonance between two satellites with non-zero masses.....3320
 Results on the optimal in-orbit manoeuvres of an observation satellite.....3321
 A model for the evolution of the on-orbit man-made debris environment.....4488
 Study of satellite situations mission.....4489
 Inverse problem with two-parametric families of planar orbits.....5856
 Gravitational orbit-attitude coupling for very large spacecraft.....5857
 The genealogy of periodic orbits in a plane rotating galaxy.....5858
 Almost rectilinear halo orbits.....8046
 Three-dimensional, periodic, "halo" orbits.....8047
 A simple derivation of capture probabilities for the J + 1: J and J + 2: J orbit-orbit resonance problems.....10093
 Elimination of the perigee in the satellite problem.....10094
 A problem of libration with two degrees of freedom.....12116
 Precession dynamics in spin-orbit coupling: A unified theory.....12117

168-H Orbit transfer

Lambertian invariance and application to the problem of optimal fixed-time impulsive orbital transfer....3322
 Optimum low thrust transfer to geosynchronous orbit....4490
 Comparison of potential electric propulsion systems for orbit transfer.....7013

168-I Attitude control & stabilization

Analysis of a double gimbaled reaction wheel spacecraft attitude stabilization system.....2204
 Parametric excitation of a high altitude gravity gradient satellite.....2205
 On the solar pressure damping and attitude control....4491
 Effect of dissipative magnetic moment on rotation of a satellite relative to the center of mass.....5859
 Recursive attitude determination from vector observations: Direction cosine matrix identification.....7014

168-J Trajectory optimization

- Problems optimale in dinamica zborului spatial
(Optimal problems in the dynamics of space flight)
(Book).....2206

168-K Guidance & control

- AMF Phasing — A precise control of the ignition
timing of AKM for reduction of the injection error.....1232
Dynamics and control of a large space antenna.....7015
Guidance and control 1983, Proceedings of the Annual
Rocky Mountain Guidance and Control Conference
held Feb. 5-9, 1983, Keystone, Colorado, (Advances
in the Astronautical Sciences Vol. 51) (Book).....12118

168-L Navigation

- Limiting capabilities for utilizing constant-height
information in an inertial navigation system.....5860
Autonomous satellite navigation at five times
synchronous altitude.....7016
Equations of small oscillations of an inertial
navigation system with allowance for the
ellipsoidal shape of the Earth.....8048

168-M Rendezvous

- Orbit prediction and shuttle rendezvous strategy for
EURECA.....4492
Strategies and schemes for rendezvous on
geostationary transfer orbit.....4493
Cataulting mass from planetary objects.....4494

168-N Reentry

- A review of roughness-induced nosetip transition.....1233
Algorithms for the transport spacecraft descending
stage lateral motion control.....2207
Sustained resonance for a nonlinear system with
slowly varying coefficients.....4495

168-Y Computational techniques

- Transformations of the perturbed two-body problem to
unperturbed harmonic oscillators.....1234
Note on the relation between the equinox and
Quinot's non-rotating origin.....1235
Lagrange variational equations from Hori's method
for canonical systems.....1236
The reduction to the rotation for planar perturbed
Keplerian systems.....1237
Discrete mechanics: Some remarks.....2208
A linear solution of the equations of motion of an
Earth-orbiting satellite based on a Lie-series.....2209
The KS-transformation in hypercomplex form.....2210
A unified treatment of some expansion procedures in
perturbation theory: Lie series, Paa di Bruno
operators, and Arbogast's rule.....3323
Periodic orbits in a dynamical system with three
degrees of freedom.....5861
First-order resonances in three-degrees-of-freedom
systems.....5862
Application of quaternions in inertial navigation.....5863
A type of second order linear ordinary differential
equations with periodic coefficients for which the
characteristic exponents have exact expressions.....8049
An extension of Szebehely's problem to holonomic
systems.....8050
Necessary condition for the existence of algebraic
first integrals. I: Kovalevski's exponents.....8051
Necessary condition for the existence of algebraic
first integrals. II: Condition for algebraic
integrability.....8052
Reductions, Brouwer's Hamiltonian, and the critical
inclination.....8053
Intrinsic formulation of Szebehely's equation.....10095
Development of spinor descriptions of rotational
mechanics from Euler's rigid body displacement
theorem.....10096

- A new matrix development of the potential and
attraction at exterior points as a function of the
inertia tensors.....10097
Equivalence of the generalized Lie-Hori method and
the method of averaging.....12119
Laplace's problem in mathematical aspect.....12120

168-Z Experimental techniques

- Vacuum chamber trajectory measurement by high speed
cinematography.....7017

170 Explosions and Ballistics

170-A General theory

- The induction period of a thermal explosion in a gas
between infinite parallel plates.....199

170-B Physical explosion

- Quasi-static pressure, duration, and impulse for
explosions (e.g. HE) in structures.....200
Large-scale explosion in the inhomogeneous
atmosphere of the Earth with allowance for
spectral radiation.....7018
Source parameters and efficiency of underground
explosions.....11083
Thermal explosion under phase transformation
conditions.....12121
Physicochemical transformations in gas detonation
powder deposition.....12122

170-C Detonation

- Flame velocity for the onset of detonation.....201
Detonation waves in pipes with variable cross-
section.....202
Theory of unstable one-dimensional detonations.....1239
An asymptotic theory of deflagrations and
detonations. I. The steady solutions.....1240
Folding detonation waves.....1241
Weakly nonlinear detonation waves.....2211
Approximate solutions for strong spherical
detonation.....2212
Applicability limits of the stationary combustion
model in the study of explosive initiation.....2213
Parameters of the equilibrium gas flow in a
detonation equipment.....2214
State parameter distribution of spherical detonation
products.....2215
A model for the reaction zone of detonation.....3324
High-speed laser visualization of particles thrown
by detonation waves.....3325
Detonation propulsion experiments and theory.....4496
Detonation in the incidence of a shock wave at a
wall.....4497
Shock initiation of detonation in a dilute explosive..5864
Numerical computation of the divergence of
detonation products.....5865
Loss of detonational stability in elongated charges..5866
Dependence of the critical energy of detonation
initiation by impact on the mass of the impacting
plate.....5867
Measurement of pressure behind a detonation wave
front in a heterogeneous gas-film system.....5868
Critical initiation of a gas detonation.....5869
Motion of a detonation front governed by a celerity-
curvature relation.....9075
Critical diameter for stationary detonation in a
high-density explosive: Shell effects.....9076
Detonation mechanism for gas-filled watery gels.....9077
Possibility of stationary detonation of condensed
high explosives (HE) in charges without shells in
connection with shock polar properties.....9078
Detonation parameters and regimes of condensed HE.....9079
Pulsating detonation front.....9080
Certain critical phenomena in detonation associated
with momentum losses.....9081

- Stimulating of explosive initiators by laser radiation.....11084
 Use of chemical kinetics to predict critical parameters of gaseous detonations.....11085
 Parameters of detonation waves in a gas, excited by concentrated energy liberation.....11086
 Transition of powdered explosive convective combustion into detonation.....12123
- 170-D Deflagration
- Estimation of pressure fields in combustion of vapour clouds.....2216
 Deflagrations and detonations for small heat release.....11087
- 170-F Dust & vapor detonation & explosion
- Explosion hazards and evaluation (Fundamental studies in engineering 5) (Book).....3326
 The homogeneous thermal explosion with dissociation and recombination.....3327
 Vapor explosion in a mixture of two liquids.....3328
- 170-G Explosion & implosion hydrodynamics
- Heterogeneous development of decomposition reactions of shock-compressed homogeneous explosives.....2217
 Effect of the shape of the free surface on the ground throwout process by an explosion.....3329
 Quasientropic compression of the medium.....5870
 Analysis of the explosion of gas mixtures with a shift in the chemical equilibrium of the products taken into account.....5871
 Some problems in hydrodynamic explosion theory.....5872
- 170-L Guns
- Flow field measurements of an unsteady reacting muzzle exhaust flow.....4498
- 170-M Interior ballistics
- Internal ballistics of partially modified heptatubular powders.....8054
 Numerical analysis of the properties of a solution of the fundamental problem of interior ballistics for a two-stage launcher.....11088
- 170-N Exterior ballistics
- Interaction of gun exhaust flowfields.....9082
- 172 Acoustics
- 172-A General theory
- Distortion of finite amplitude ultrasound in lossy media.....203
 Propagation of a long wave in a curved duct (I) Basic analysis of long wave propagation in a curved duct with variable cross section.....204
 Finite amplitude method for the determination of the acoustic nonlinearity parameter B/A.....1242
 Propagation of finite-amplitude ultrasonic waves in air - I. Spherically diverging waves in the free field, II. Plane waves in a tube.....1243
 A selective two microphone acoustic intensity method.....1244
 Time domain study of the terminated transient parametric array.....1245
 Boundary-value problems for the wave equation.....2218
 Propagation in air of N waves produced by sparks.....2219
 Nonlinear mixing of surface acoustic waves propagating in opposite directions.....2220
 A series expansion of the acoustic power radiated from planar sources.....2221
- Determination of the acoustic nonlinearity parameter B/A from phase measurements.....3330
 Field of a finite-amplitude focusing source.....3331
 Parameter sensitivity of a T-junction sea model. The importance of the internal damping loss factors.....3332
 A numerical model of acoustic choking. Part I: Shock free solutions.....3333
 Thermally driven acoustic oscillations, Part VI: Excitation and power.....3334
 Field of a parametric focusing source.....3335
 Eventual partition of conserved quantities in wave motion.....3336
 The effects of non-ideal elements and geometry on the performance of the Chelsea dipole active attenuator.....4499
 Generalized reaction principles and reciprocity theorems for the wave equations, and the relationship between the time-advanced and time-retarded fields.....4500
 A restoration procedure for (non-stationary) signals from moving sources.....5873
 Prony's method applied to estimate noise source locations and their sound powers.....5874
 A recursive approach to prony parameter estimation.....5875
 Superposition principle in acoustics.....7019
 Effect of gas content and temperature of fluid on the acoustics of boiling and bubbling.....7020
 Distortion and harmonic generation in the nearfield of a finite amplitude sound beam.....8055
 Nearfield of a large acoustic transducer. Part III: General results.....8056
 Oscillation modes in single-step Hartmann-Sprenger tubes.....8057
 The acoustic analogy—Thirty years on.....8058
 Nearfield of a large acoustic transducer. Part IV: Second harmonic and sum frequency radiation.....10098
 Sound field of a parametric focusing source.....10099
 The first order non-linear sound field of a two-frequency spherical source.....11089
 Sound radiation from interaction of a vortex ring with a fixed sphere.....11090
 The loading-frequency relation of linear conservative systems via a direct energetic (action) method.....12124
- 172-B Sound generation by moving surfaces
- Sound propagation in multistage axial flow turbomachines.....205
 Derivation of the fundamental equation of sound generated by moving aerodynamic surfaces.....206
 Resonant acoustic frequencies of flat plate cascades.....1246
 Doubly asymptotic approximations for vibration analysis of submerged structures.....1247
 Nonlinear oscillations of gas bubbles in liquids: An interpretation of some experimental results.....1248
 A technique for the prediction of the noise field from an arbitrary vibrating machine.....2222
 Acoustic waves emitted by radial oscillations of a spherical bubble in viscous compressible heat conductive liquids.....2223
 Sound radiation from beams at low frequencies, (Letters to the Editor).....2224
 Sound radiation by a plate reinforced by a set of projecting stiffener ribs subjected to a periodic system of forces.....3337
 Sound radiation from periodically connected double-plate structures.....3338
 Sound radiation from a housing containing a vibration source.....3339
 An analytical model for noise generated by axial oscillations of unbaffled cylindrical elements.....4501
 Acoustic streaming due to an oscillatory source near a plate.....4502
 Response of elastic cylinders to convective flow noise I. Homogeneous, layered cylinders.....4503
 Pressure oscillations during re-expansion of gases in rotary vane compressors by a modified Helmholtz resonator approach.....4504
 Transient acoustic radiation from impacted beam-like structures.....4505

- Acoustic coupling between a pulsating and an oscillating sphere.....4506
 Propeller tone bursts.....4507
 Correction of fan noise for effects of forward flight.....4508
 The combined effects of fluid loading and compliant coating on the acoustic and structural fields of an infinite plane elastic surface.....5876
 A note on the acoustic radiation from point-forced elastic beams.....5877
 Acoustic radiation from a viscoelastic beam impacted by a steel sphere.....5878
 On the radiation impedance of a rectangular piston.....5879
 Sound radiation from an impact-excited clamped circular plate in an infinite baffle.....5880
 Pressure radiated by an infinite plate driven by distributed loads.....5881
 Calculation of the sound pressure produced by structural vibration using the results of vibration analysis.....7021
 Acoustic effects produced by cavitation on a ship propeller screw.....7022
 Acoustic radiation from fluid-loaded infinite circular cylinders with doubly periodic ring supports.....8059
 Wave-front dislocations in the soundfield of a pulsed circular piston radiator.....8060
 A theoretical analysis of transient sound radiation from a clamped circular plate.....9083
 Acoustic radiation from vibrating surfaces at characteristic frequencies.....9084
 Noise emission of submersible axial pumps.
 Possibilities of noise diminution.....9085
 Multiple modal resonances of thin cylindrical shells vibrating in an acoustic medium.....10100
 Propagation and radiation of sound from flanged circular ducts with circumferentially varying wall admittances, I: Semi-infinite ducts.....10101
 Propagation and radiation of sound from flanged circular ducts with circumferentially varying wall admittances, II: Finite ducts with sources.....10102
 The calculation of the acoustical quantities of railway wheels.....10103
 Progress in rotor broadband noise research.....10104
 The prediction of helicopter rotor discrete frequency noise.....10105
 Radiation from noncircular cylindrical shells in a fluid.....10106
 Generation of acoustic waves by an impulsive point source in a fluid/solid configuration with a plane boundary.....11091
 Theoretical and experimental study of the contribution of radial modes to the pulsed ultrasonic field radiated by a thick piezoelectric disk.....11092
 Acoustic radiation from a semi-infinite annular duct in a uniform subsonic mean flow.....12125
 The calculation of transonic rotor noise.....12126
- 172-C Sound generation by flow
- A note on various formulations for four-pole parameters of a pipe with mean flow.....207
 A study on mufflers with air flow. (1st Report). Generation of noise from expansion cavity type mufflers due to mean flow.....208
 The modulated ultrasonic whistle as an acoustic source for modeling.....209
 Edge tones in high-speed flows and their application to multiple-jet mixing.....210
 Analytical model of jet shielding.....1249
 Turbofan engine blade pressure and acoustic radiation at simulated forward speed.....1250
 Acoustic environment in large enclosures with a small opening exposed to flow.....1251
 Sound generation by turbulence near an elastic wall.....2225
 Acoustic propagation in wall shear flows and the formation of caustics.....3340
 Acoustical source characterization studies on a multi-cylinder engine exhaust system.....3341
 Studies of acoustical performance of a multi-cylinder engine exhaust muffler system.....3342
 Shock-associated noise in supersonic jets.....3343
- Acoustic wave radiated by head-on collision of two vortex rings.....3344
 The spatial coherence of sound scattered from a wind-driven surface: Comparison between experiment, Eckhart theory, and the facet-ensemble method.....4509
 Underwater sound generation by breaking wind waves.....4510
 Supersonic jet screech tone cancellation.....4511
 Noise generation by a low-Mach-number jet.....4512
 Noise generated by airfoil profiles placed in a uniform laminar flow.....4513
 The "whistler-nozzle" phenomenon.....4514
 Effect of edge-tone noise on supercritical airfoil data.....4515
 Further measurements in the initial region of an annular jet.....5882
 High frequency Green function for aerodynamic noise in moving media, Part I: General theory.....5883
 High frequency Green function for aerodynamic noise in moving media, Part II: Noise from a spreading jet.....5884
 Separated flow noise of a flat plate at large attack angles.....5885
 Jet noise modification by the "whistler nozzle".....7023
 Influence of inhomogeneity on the nonlinear stabilization of acoustic vibrations of a heat releasing medium in a confined space.....7024
 Sound generated by instability waves of supersonic flows. Part 1. Two-dimensional mixing layers.....7025
 Sound generated by instability waves of supersonic flows. Part 2. Axisymmetric jets.....7026
 Experimental observations of the dependence of impedance tube behavior upon gas phase losses and propellant self-noise.....9086
 The effect of forward flight on the noise and flow field of inverted profile jets.....9087
 Review of sound induced by vortex shedding from cylinders.....9088
 An experimental approach to the vibratory and acoustic problems involved in fast pumps. An examination of the hydro-elastic phenomena.....9089
 Noise associated with the operation of various turbomachines.....9090
 Influence of cavitation on noise in modern hydrostatic circuits.....9091
 Jet noise at low Reynolds number.....10107
 Generation of acoustic oscillations during the growth and breakoff of air bubbles.....10108
 Discrete frequency noise generated from a flat plate in parallel with a uniform oncoming flow.....11093
 An improved impulse method for studies of acoustic transmission in flow ducts with use of signal synthesis and averaging of acoustic pulses.....12127
 Mechanisms of the generation of external acoustic radiation from pipes due to internal flow disturbances.....12128

 A study of -source active attenuator arrays for noise in ducts.....4561
 Power requirements for active noise control in ducts..5912
 Noise emission of road vehicles: Evaluation of some simple models.....5913
 Aircraft interior noise models: Sidewall trim, stiffened structures, and cabin acoustics with floor partition.....5914
 Active noise control in finite length ducts.....5915
 On linear acoustic solutions of high speed helicopter impulsive noise problems.....5916
 On the prediction of impact noise, V: The noise from drop hammers.....5917
 Forecasting noise emissions of industrial plants and buildings.....8069
 Development and application of multiple-input models for structural noise source identification of forge hammers. Part I: Development.....9111
 Development and application of multiple-input models for structural noise source identification of forge hammers. Part II - Application.....9112
 Shielding of prop-fan cabin noise by the fuselage boundary layer.....9113
 Problems connected with the production and transmission of low frequency, high amplitude noise in industrial circulation systems.....9114
 Methods of reducing noise in high pressure hydraulic system.....9115
 Measurements of noise produced by hydraulic equipment used in the building industry.....9116
 Flight effects on fan noise with static and wind-tunnel comparisons.....11118
 Design and flight test of a Kevlar acoustic liner.....11119
 Reduction of discrete frequency noise in small, subsonic axial-flow fans.....11120
 Specification, design, and test of aircraft engine isolators for reduced interior noise.....11121
 A method for the prediction of noise and velocity levels in ship constructions.....11122
 Evolution and design principles of low noise, lightweight engines.....11123
 Characteristics of microphone arrangements for sound intensity measurement.....12133
 The analysis of basic causes of noise generation of single-phase induction motors.....12134

Increase in noise by starting induction motors.....12135

172-Y Computational techniques

- Analytical consequences of the extended boundary condition.....1269
 The analytic continuation of solutions of the generalized axially symmetric Helmholtz equation....1270
 On the condition number of integral equations in acoustics using modified fundamental solutions.....2250
 Finite element formulations for acoustical radiation..2251
 Application of Chebyshev-Laguerre polynomials to the study of the interaction of a thick-walled elastic sphere with an acoustic medium.....2252
 The general theory of R-separation for Helmholtz equations.....3390
 A finite-difference treatment of interface conditions for the parabolic wave equation: The irregular interface.....3391
 Wave envelope and infinite elements for acoustical radiation.....4562
 A new rigorous expansion for the velocity potential of a circular piston source.....4563
 T-matrix approach to study the vibration frequencies of elastic bodies in fluids.....4564
 Numerical evaluation of the radiation from un baffled, finite plates using the FFT.....4565
 Modified Green's functions and the third boundary value problem for the Helmholtz equation.....4566
 An inverse problem in the theory of wave propagation in a nonuniform semi-infinite waveguide.....4567
 A finite element scheme for acoustic transmission through the walls of rectangular ducts: Comparison with experiment.....5918
 Duct acoustics—a numerical technique for the higher order mode solution of three-dimensional problems with rigid walls and no flow.....5919
 Numerical solution of the equation for non-linear acoustics of confined beams.....5920
 The stability of an economic difference scheme for solving the boundary value problem of diffraction...5921
 Prediction of aircraft interior noise using the statistical energy analysis method.....7028
 Point-source representation for laser-generated ultrasound.....8070
 Finite element approach to propagation in elliptical and parabolic waveguides.....9117
 A finite difference solution for the propagation of sound in near sonic flows.....9118
 An improvement in the range resolution of ultrasonic pulse echo systems by deconvolution.....9119
 PERUSE: A numerical treatment of rough surface scattering for the parabolic wave equation.....10124
 Application of two-variable Taylor series to the ray theory of propagation in an unbound medium.....10125
 A coupled structural-acoustic finite element model for vehicle interior noise analysis.....10126
 Half-order derivative of a sine-wave burst: Applications to two-dimensional radiation, photoacoustics, and focused scattering from spheres and a torus.....11124
 Application of the Schur algorithm to the inverse problem for a layered acoustic medium.....11125
 The forward and backward projection of acoustic fields from axisymmetric ultrasonic radiators using impulse response and Hankel transform techniques.....11126
 Exact computation of spherical harmonics.....11127
 On the use of the autocorrelation method of pitch estimation for noisy speech.....11128

172-Z Experimental techniques

- An improved Schlieren system and some new results on acoustically excited jets.....223
 Nonlinearity acoustical parameter and its relation with Rao's acoustical parameter of liquid state.....224
 Phase shift errors in the theory and practice of surface intensity measurements.....1271
 Relationship between static, flight, and simulated flight jet noise measurements.....9120
 The application of cepstral techniques to the measurement of transfer functions and acoustical reflection coefficients.....9121

- Noise emission of road vehicles: Reconstitution of the acoustic signature.....9122
 Comparison of outdoor microphone locations for measuring sound insulation of building facades.....9123
 Acoustic radiation pressure in the near field.....11129
 The effect of the modulation transfer function on the image in an acoustic microscope.....11130

AUTOMATIC CONTROL

200 Systems Theory and Design

200-A General theory

- Efficient square root algorithm for measurement update in Kalman filtering.....225
 What are complex systems, how do they originate, and what specific problems do they pose for control engineering?.....226
 Dinamica sistemelor mari (Large-scale systems dynamics) (Book).....2253
 Optimal L₂-approximation with fixed poles.....2254
 Spectrum control in systems described by linear equations in Hilbert spaces.....5922
 Reliability of the performance evaluation of systems in the monitored range of values of the parameters..5923
 Controller design by successive pole assignment.....5924
 Reliability of systems.....5925
 Measuring, modeling, and augmenting reliability of man-machine systems.....7029
 Geometric conditions for generic structure of multivariable root-loci.....7030
 Alternative bond graph causal patterns and equation formulations for dynamic systems.....7031
 Zeros of sampled systems.....8071
 Synthesis of stable control systems optimal by mean-square performance criteria.....8072
 Robustness quantification for nonlinear sampled-data systems with dynamic multiplicative perturbations..10127
 Stochastic methods for solving minimax problems.....10128
 The equilibrium theorem from the view of information theory.....11131
 Design of invariant systems by the method of separation of motions.....12136
 Order reduction of linear systems by means of expanding the transfer function into a continued fraction.....12137

200-B Controllability & observability

- A Lyapunov-like characterization of asymptotic controllability.....1272
 Design for a controller with memory for a linear discrete system.....1273
 Local controllability, rest states and cyclic points..3392
 Observability of nontrivial small solutions for neutral systems.....3393
 Spectral representation of the region of controllability of a dynamic system.....3394
 Recursive estimation based on an extended observation vector.....5926
 Modal measures of controllability, observability, dominance-connections, drawbacks and a new approach.....5927
 Modal synthesis of multivariable systems with observers of specified order.....7032
 Determination of the kinematics of a manoeuvring target.....8073
 A degree of controllability definition: fundamental concepts and application to modal systems.....10129
 Reduced order state estimation for linear systems with exact measurements.....10130
 Total controllability to affine manifolds of control systems.....10131
 Systems with a simplified observing device.....11132

200-C Realizability

- Realization of fast digital controllers of high order with signal processors.....5928

200-D Stability

- Robust stabilization of uncertain systems.....227
 Stabilization of linear systems by noise.....228
 State feedback for uncertain dynamical systems.....229
 Asymptotic behavior of the closed loop poles of linear optimal multivariable systems.....2255
 Decentralization of a stabilizing multivariable feedback controller.....2257
 Conic sectors for sampled-data feedback systems.....3395
 Stability criteria for a class of non-linear feedback systems.....5929
 Instability of systems with aftereffect.....5930
 A simple selftuning controller for stably invertible systems.....7033
 Stabilization of polynomially parametrized families of linear systems. The single-input case.....7034
 Method of power transformations for analysis of stability of nonlinear control systems.....7035
 Linear time-variable systems: Stability of reduced models.....8074
 Output feedback and generic stabilizability.....9124
 Vibration control in rotating or translating elastic systems.....9125
 Analytical calculation of limit cycles in PFM control loops.....10132
 Parametric stabilization is easy.....11133
 An alternative to Liapunov's stability method.....11134
 On the influence of neglected modes in distributed parameter control systems.....11135
 Stability analysis and input design of a two-link planar biped.....11136
 Eigenvalue placement for generalized linear systems.....11137
 A class of absolutely stable systems.....12138
 Stability analysis of large scale systems whose subsystems may be unstable.....12139

200-E Identification & estimation

- Parameter estimation methods for autoregressive-moving average processes.....230
 On the parameter identification of low-pass transfer elements.....231
 Discrete-time observers and parameter determination for distributed parameter systems with discrete-time input-output data.....1275
 A new class of stabilizing controllers for uncertain dynamical systems.....2258
 Application of new identification procedure for determining the weight in a passive oscillatory system.....2259
 Estimation of delays and other parameters in nonlinear functional differential equations.....2260
 Design of optimal algorithms of simultaneous multialternative detection and estimation of parameters with unknown probabilities of the signals to be detected.....2261
 A study on parameter determination method of large-scale and complex dynamic systems with judgment functions (No. 2)-Applications.....2262
 A study on parameter determination method of large-scale and complex dynamic systems with judgment functions (No. 1)-Theory.....2263
 Program package for statistical estimation and optimal control of industrial processes.....2264
 A new solution to the identification problem.....2265
 Strategies for the simplified evaluation of experiments for the example of static systems identification.....2266
 Identification of structural dynamics systems using least-square lattice filters.....3396
 On the application of direct digital control in power stations.....3397
 On the evaluation of results from parameter estimation methods.....5931
 Identification of multi-variable systems. Part 1: Modelling.....5932
 On the influence of the exciting test signal on the result of parameter estimation methods.....5933
 Iterative linear estimation with a controlled amount of data.....5934
 Quasioptimal algorithm for estimating process with measurable parameters.....5935
 Optimal parameter estimation algorithms in identification problems.....5936

- Optimal control and parameter identification of structures with convex or non-convex strain energy density. Applications to elastoplasticity and to contact problems.....5937
 Solution and parameter estimation in linear time-invariant delayed systems using Laguerre polynomial expansion.....7036
 Optimal finite-dimensional recursive identification in a polynomial output mapping class.....7037
 On the parameter estimation of linear dynamic models by use of periodical test signals.....8075
 A modified quasioptimal identification algorithm.....8076
 A design methodology for nonlinear systems containing parameter uncertainty.....9126
 Simple self-tuning strategy for discrete control systems with a zero to the left of the unit circle.....11138
 Methodology of selecting the model structure for plant identification.....11139
 Nonparametric algorithm for identification of weakly nonlinear static distributed-parameter systems.....11140
 A method of synthesizing simple adaptive filters.....11141
 Consistency of least-square estimates of parameters of linear difference equations with autocorrelation noise.....11142
 Identification and estimation of parameters in stochastic systems described by partial differential equations.....12140
 Some robust estimation methods in heuristic self-organization algorithms.....12141
 Accuracy and noise stability of multipoint discrete transformtins.....12142

200-G Filtering techniques

- Bounds on performance of nonstationary continuous-time filters under modelling uncertainty.....8077
 Amount of information in problems of filtering the components of Markov processes.....8078
 Nonparametric methods of nonlinear filtering of stationary random sequences.....8079
 Kalman filtering theory (University Series in Modern Engineering) (Book).....10133
 A calibration and estimation filter for multiply redundant measurement systems.....11143
 Design of conditionally optimal filters based on optimal nonlinear filtering equations.....12143
 An adaptive quasioptimal filter with discontinuous parameters.....12144
 Comparative analysis of estimation-process dynamics for ordinary and stationary Kalman filters.....12145

200-H Design methods

- Design of a digital controller for compensation of a disturbance acting at the system output.....10134

200-I Simulation

- Using simulation for policy evaluation in the electric utility industry.....2267
 A CAD method of multivariable control systems using generalized Gershgorin bands.....5938

200-J Adaptive & learning systems

- Adaptive control with a compact parameter set.....232
 Model reference adaptive control of large structural systems.....233
 Optimal adaptive control of linear-quadratic-Gaussian systems.....234
 An economical algorithm of adaptive control of a multidimensional static plant.....235
 Digital self-adjusting regulator for single-parameter dynamic systems.....236
 On low frequency and long-run effects in self-tuning control.....2268
 Locally optimal control of plants with unknown parameters.....2269
 A nonlinear dynamical controller with adaptive properties.....5939
 Controller adaptability and two-level algorithms of adjustment of adaptive control system parameters.....5940

- Adaptive control of nonlinear static objects with
implicit specified response.....5941
- Nonlinear parametric model of nonsearching self-
adjusting systems with a reference model and its
use in the design and analysis of the self-
adjustment circuit.....5942
- Adaptation gain adjustment and effect of input DC
component for MRAS industrial processes.....5943
- On parameter convergence in adaptive control.....7038
- On-line implementation of simulation models by an
active experiment of functional system
identification.....7039
- Predictor-based self-tuning control.....8080
- Optimal adaptive control and stabilization of
families of linear systems.....11144
- Discrete-time adaptive control for deterministic
time-varying systems.....12146
- Use of the method of least squares for designing an
adaptive optimal control for a linear dynamic
plant.....12147
- Behaviour of the output error identification
algorithm for small stepsize gains.....12148
- Design of algorithms of adaptive control with
identification.....12149
- Stochastic approximation algorithms operating in the
adaptation loop of a discrete stochastic linear
dynamic system. I.....12150
- Modifications of regularized adaptive control
algorithms.....12151
- Estimation of efficiency of adaptive-control
algorithms in data communication network.....12152
- Robustness enhancement of adaptive controllers by
incorporation of process a priori knowledge.....12153
- 200-K Large scale systems
- An iterative algorithm for computing the invariant
zeros of large scale systems as eigenvalues.....3398
- The partitioned multiobjective risk method (PMRM)....12154
- 200-M Nonlinear systems
- Riccati representation of nonlinear systems and some
measurement technique consequences.....1274
- Identifiability of nonlinear systems with hysteretic
elements.....7040
- Some comments on global linearization of nonlinear
systems.....12155
- 200-N Discrete systems
- A multivariable normal-form for model reduction of
discrete-time systems.....2270
- On the limiting zeros of sampled multivariable
systems.....2271
- Stability, parametric, and postoptimality analysis
of discrete optimization problems.....10135
- State decoupling response and observability in multi-
modal systems.....11145
- 200-O Distributed parameter & delayed systems
- On the function space controllability of linear
neutral systems.....237
- Structural representation of physically
inhomogeneous systems.....238
- On the design and properties of multivariable dead
time compensators.....2256
- The principle of absence of bounded modes in the
problem of absolute stability of distributed
systems.....3399
- Variational methods of investigating systems with
distributed and lumped parameters.....3400
- First order solution of the optimal regulator
problem for a distributed parameter elastic system..4568
- Discrete approximation methods for parameter
identification in delay systems.....7041
- Decoupling and arbitrary coefficient assignment in
time-delay systems.....7042
- On stabilizing uncertain linear delay systems.....8081
- Feedback stabilization of parabolic distributed
parameter systems by discrete-time input-output
data.....11146
- Linear distributed parameter systems: Closed-loop
exponential stability with a finite-dimensional
controller.....12156
- A digital adaptive control law for a parabolic
distributed parameter system.....12157
- 200-P Decentralized systems
- Characterizations of decentralized fixed modes for
interconnected systems.....2272
- 200-Q Stochastic systems
- Stability of motion with respect to some of the
variables for stochastic systems.....8082
- Stability of discrete systems with random structure
under steadily acting disturbances.....8083
- Asymptotic reliability analysis of semi-Markov
systems.....10136
- Optimal interpolation for linear stochastic systems..11147
- Estimation of spectral density of stochastic
processes in identification, filtering, and
prediction.....11148
- Rastest detection of the time at which the
probability characteristics of a random sequence
change.....12158
- Methods of detecting instants of change of random
process properties.....12159
- A modified algorithm for filtering measurement
noises in problems of controlling vibration tests..12160
- 200-Y Computational techniques
- Implementation of a discrete Fourier transform
method based on the use of rectangular periodic
functions.....5944
- Generalized method of decomposing algorithm
flowcharts.....5945
- Optimization of information allocation and user
assignment for distributed data bases in a
computer network.....5946
- Stability in linear multistep methods for pure delay
equations.....7043
- Necessary and sufficient conditions for the
convergence of iterative methods for the linear
complementarity problem.....7044
- Three-dimensional object regeneration by contour
curves with color data.....10137
- Progress towards a general purpose hydraulic system
simulation language.....11149
- Some methods of integrating ordinary differential
equations on a multiprocessor computer.....11150
- Technology of differentiating functions of many
variables on an electronic computer.....11151
- ## 202 Optimal Control Systems
- 202-A General theory
- Optimal selection of observation times in the
linear-quadratic Gaussian control problem.....239
- On optimal stabilization of controlled systems.....1276
- Control system synthesis with response insensitivity..2273
- Synthesis of control functions for variable-
parameter systems.....2274
- Controlling the coherent states of a quantum
oscillator.....2275
- Multipoint necessary conditions of optimality of
quasisingular controls.....2276
- On a method of extremal control.....3401
- Disturbance error reduction in multivariable optimal
control systems.....3402
- On the development of control engineering.....3403
- The theory of the control of linear systems with
time-lag.....4569

Minimizing the control variable by pole shifting.....	5947
Optimization problem with phase constraints at different times.....	5948
Using the Kramer method to identify a subset of the Pareto-optimal set in multicriterial optimization.....	5949
Method of evaluation of multicriterial decisions.....	5950
A method for the design of linear multivariable control systems.....	5951
The linear weighted sum decision principle as a parametric decision principle.....	5952
A complete optimality condition in the inverse problem of optimal control.....	7045
Optimal switching for ordinary differential equations.....	7046
Asymptotic behavior of the closed loop poles of linear optimal multivariable systems.....	7047
The time-optimal control problem for parabolic variational inequalities.....	8084
Generalized Hessian matrix and second-order optimality conditions for problems with C, data.....	8085
Controllability for a class of nondiagonal hyperbolic distributed bilinear systems.....	8086
Pole assignment with output feedback.....	8087
Optimal control in some variational inequalities.....	9127
Scalarizing vector optimization problems.....	9128
Theorems of the alternative and optimality conditions.....	10138
Sufficient conditions for optimality of the control of deterministic systems with a restricted set of precise measurements.....	10139
Optimal model control and observation.....	10140
Buildup of deviations with terminal phase constraints.....	10141
A class of optimal process control problems described by ordinary differential equations with a discrete set of controls.....	10142
Mathematical theory of networks and systems, Proceedings of the MTNS-83 International Symposium, Beer Sheva, Israel, June 20-24, 1983 (Lecture Notes in Control and Information Sciences, vol. 58) (Book).....	11152
Second order necessary conditions in optimization.....	11153
Extremal control of plants with a threshold performance criterion.....	11154
Hermite-type canonical forms and the computation of dominant Hermite-indices for structured systems.....	11155
Robustness tests for feedback control systems using multidimensional uncertainty bounds.....	11156
Why modern controllers can go unstable in practice.....	12161
Analysis of multiobjective decision problems by the indifference band approach.....	12162
Singular perturbations and time-scale methods in control theory: Survey 1976-1983.....	12163
Autonomy in multivariable systems with discontinuous controls.....	12164
The solution of the linear-quadratic feedback control problem in Volterra and Riccati representation.....	12165
Optimal coordination of multimodel interconnected systems with slow and fast modes.....	12166

202-B Optimization techniques & algorithms

Automatic optimization of oscillations in a vibratory system.....	240
Multivariable multipurpose controllers.....	2277
Minimum norm output feedback design under specified eigenvalue areas.....	2278
Output feedback design by the aid of the invariant parameter-vectors.....	3404
Design of combined cascaded state feed-back controls.....	5953
Comparison of control algorithms in automation systems.....	5954
Control of a hyperbolic problem with pointwise stress constraints.....	7048
Model order reduction of linear state space models by parameter optimization.....	8088
Generalized conjugate directions for unconstrained function minimization.....	8089
Dual approximations in optimal control.....	9129
A refinement of an optimality criterion and its application to parametric programming.....	10143
Generalized Newton algorithm to minimize a function with many variables using computer-evaluated exact higher-order derivatives.....	10144

Pseudo-conjugate directions for the solution of the nonlinear unconstrained optimization problem on a parallel computer.....	10145
Rapidly converging algorithm for the identification of a linear system with limited noise.....	10146
Direct accurate algorithm for design of optimum control in a linear problem.....	10147
The stochastic quasigradient projection method.....	10148
Numerical methods of construction of Lyapunov functions and absolute stability criteria in the form of numerical procedures.....	11157
Controller design using a reduced model.....	11158
Method of solution of extremal combinatorial problems with nonlinear structure.....	11159
On the use of the table method in constrained optimization.....	12167
Some investigations in a new algorithm for nonlinear optimization based on conic models of the objective function.....	12168
Optimization synthesis of control mechanisms with limitation of contour speed in pattern-roller pair.....	12169
Determination of optimal characteristic polynomial in automatic control systems.....	12170
Planar quasi-Newton algorithms for unconstrained saddlepoint problems.....	12171

202-C Nonlinear systems

Optimal control of nonlinear systems.....	2279
Design of nonlinear systems with deadbeat-response.....	3405
Control of a hyperbolic problem with pointwise stress constraints.....	5955
Extremal selection of nonlinearities in dynamic control systems, I.....	5956
Local duality of nonlinear programs.....	7049
The existence problem of optimal control for nonlinear processes.....	10149
Nonlinear natural control of an experimental beam.....	12172

202-D Discrete systems

Optimal control of periodic motions of linear systems with impulsive action.....	1277
Theoretical developments in discrete-time control.....	2280
Optimization of discrete time systems — The upper boundary approach, (Lecture Notes in Control and Information Sciences) (Book).....	5957
Finite method for solving the linear problem of optimum control of a discrete system.....	5958
Probabilistic models of dynamic control of a discrete system.....	5959
Suboptimal control of a linear discrete dynamic object under conditions of a priori indeterminacy.....	12173

202-E Distributed parameter systems & delayed systems

Linear-quadratic optimal control of hereditary differential systems: Infinite dimensional Riccati equations and numerical approximations.....	241
Experimental demonstration of static shape control.....	1278
Boundary stabilization of linear elastodynamic systems.....	2281
Feedback stabilization of linear diffusion systems.....	2282
Nonlinear optimal control problems in heat conduction.....	3406
How to drive a delayed response, stochastic system close to equilibrium.....	3407
A method of synthesizing a regulator for a class of objects with distributed parameters.....	3408
Feedback control of dissipative hyperbolic distributed parameter systems with finite dimensional controllers.....	4570
Control theory for distributed parameter systems and applications (Lecture Notes in Control and Information Sciences, vol. 54) (Book).....	5960
Deadbeat controllers for multivariable systems with time delays.....	5961
Finite dimensional compensators for parabolic distributed systems with unbounded control and observation.....	7050
Difference equation state approximations for nonlinear hereditary control problems.....	7051

Optimal control of linear distributed parameter systems by shifted Legendre polynomial functions.....	7052
Linear optimal control of systems with state and control variable delays.....	8090
Feedback control of second order evolution equations with damping.....	9130
Ritz-Galerkin approximation of the time optimal boundary control problem for parabolic systems with Dirichlet boundary conditions.....	9131
Simultaneous optimization of impulse moments and intensities in control problems for parabolic equations.....	11160
Digital stochastic control of distributed-parameter systems.....	12174
Robust control of self-adjoint distributed-parameter structures.....	12175
Optimal control of a class of systems with continuous lags: Dynamic programming approach and economic interpretations.....	12176
A distributed optimal control problem in a piezoelectric slim bar due to a point load.....	12177
The frequency method of analyzing distributed control systems.....	12178

202-F Stochastic systems

Structural properties of optimal linear stochastic systems with delays in the controls.....	2283
On the approximation of optimal stochastic controls.....	2284
Controlled Markov chains and stochastic networks.....	2285
Approximation of solutions of strongly nonstationary stochastic extremal problems in continuous time.	
I. Principles of design of algorithms.....	2286
Strategies using an observer for steering a random motion of a point in a multitarget environment.....	4571
Stochastic optimal linear feedback control systems using available measurements.....	5962
Approximation of solutions of strongly nonstationary stochastic extremal problems in continuous time.	
II. Convergence of algorithms.....	5963
Sequential method for nonlinear estimation of random process parameters.....	5964
On optimal control of a Brownian motion.....	7053
Stochastic optimal linear feedback control systems using available measurements.....	7054
Problem of maintaining engineering system parameters in given tolerances.....	12179

202-G Differential games

Properties of a differential game's potential.....	1279
On stochastic programmed design of strategies in a differential game.....	3409
On qualitative differential games with two targets.....	8091
Generalization of the main equation of differential game theory.....	12180

202-I Large scale systems

Suboptimal control of large scale linear quadratic problems using time-scale decomposition.....	242
Design of large scale systems control laws by aggregation and perturbation methods.....	243

202-J Decentralized systems

Optimality of decentralized control for large-scale systems.....	2287
A decentralized cooperative control method.....	3410
Decentralized regulator and observer for a class of large scale nonlinear mechanical systems.....	12181
On the design of optimal decentralized controllers under control path constraints.....	12182

202-K Filtering techniques

A fast computational approach in optimal distributed-parameter state estimation.....	244
An adaptive robustizing approach to Kalman filtering.....	2288
Adaptive Kalman filter for tracking maneuvering targets.....	2289

Selfoptimizing digital controllers represented in the time domain.....	5965
--	------

202-Y Computational techniques

The control engineering program library RASP.....	245
Algorithm for the solution of many-dimensional multiple-criterion optimization problem.....	2290
A dual optimization procedure for linear quadratic robust control problems.....	2291
An optimal problem in parallel computing.....	2292
Combination of heuristic and regular methods for solving high-dimension optimization problems.....	3411
Stability of continuous subgradient algorithms.....	5966
A method of construction of randomized algorithms.....	5967
Interactive multiobjective decision-making for nonconvex problems based on the weighted	
Tchebycheff norm.....	5968
A multilevel iterative method for symmetric, positive definite linear complementarity problems.....	8092
Characterization of properly efficient solutions by generalized scalarization methods.....	8093
Piecewise constant orthogonal functions and their application to systems and control (Lecture Notes in Control and Information Sciences, vol. 55) (Book).....	9132
A conditional gradient method for a class of time-lag optimal control problems.....	9133
Computational aspects of discrete-time optimal control.....	11161
Iterative solution of optimal control problems with fast and slow motions.....	11162
Digital modeling of discrete-data-continuous-control dynamic control systems.....	12183
Design of a speed-optimal control realizable on a digital computer.....	12184

204 Systems and Control (applications)

204-B Guidance

Parameter-plane analysis for large-scale systems.....	246
Design and analysis of a digitally controlled integrated flight/fire control system.....	2293
Feedback control and simulation of a wheelchair.....	2294
Dynamic modeling of a wheelchair on a slope.....	2295
A Kalman filter algorithm for terminal-area navigation with sensors of moderate accuracy.....	3412
Experience with flight test trajectory guidance.....	3413
Support of an inertial navigation system by ground elevation measurements.....	3414
Minimum inertial guidance assessment: The next best thing to flight tests.....	3415
GPS performance in marine applications.....	3416
Adaptive ship autopilot with wave filter.....	3417
An algorithm for finding the trajectories of aircraft in an automated air traffic control system.....	3418
Active controls in ground transportation - A review of the state-of-the-art and future potential.....	4572
Predictive guidance for systems with controllability index n.....	5969
Optimal control problem for an automatic transmission.....	7055
Gain indexing schemes for low-thrust perturbation guidance.....	7056
A simulation study with a combined network and production systems model of pilot behavior on an ILS-approach.....	7057
Contributions of congruent pitch motion cue to human activity in manual control.....	7058
Predictive guidance for systems with controllability index n.....	7059
Feedback control and simulation of a wheelchair.....	7060
Dynamic modeling of a wheelchair on a slope.....	7061
Adaptive steering of ships-A model reference approach.....	8094
Estimation enhancement by trajectory modulation for homing missiles.....	10150
Terrain-aided navigation of an unpowered tactical missile using autopilot-grade sensors.....	10151

- Bayesian adaptive filter for tracking with
uncertain elements of uncertain origin.....10152
Optimal guidance law in the plane.....12185
Kinematics of rendezvous maneuvers.....12186
Target acceleration modeling for tactical missile
guidance.....12187
Adaptive noise estimation for homing missiles.....12188
Space and time referencing in scientific research.....12189

204-C Aircraft & aerospace vehicles

- Optimization theory applied to higher harmonic
control of circulation controlled rotors.....247
A unifying framework for longitudinal flying
qualities criteria.....1280
Design of space structure control systems using on-
off thrusters.....1281
Effects of energy addition and dissipation on dual-
spin spacecraft attitude motion.....2297
Piloted simulation of hover and transition of a
vertical attitude takeoff and landing aircraft.....2298
Space shuttle stability and control derivatives
estimated from the first entry.....2299
Stability of aircraft motion in critical cases.....2300
Onboard orbit estimation with tracking and data
relay satellite system data.....2301
Altitude transitions in energy climbs.....2302
Ground simulation investigation of helicopter
decelerating instrument approaches.....3419
An optimal control approach to pilot/vehicle
analysis of the Neil-Smith criteria.....3420
A model-based investigation of manipulator
characteristics and pilot/vehicle performance.....3421
Space shuttle response to ascent wind profiles.....3422
Control of reflector vibrations in large spaceborne
antennas by means of movable dampers.....3423
Controllability of inherently damped large flexible
space structures.....3424
Control systems synthesis for a large flexible space
antenna.....3425
Development and test of an integrated sensory system
for advanced aircraft.....3426
Control techniques to improve space shuttle solid
rocket booster separation.....3427
Heavy-lift airship dynamics.....3428
A hardware demonstration of control for a flexible
offset-feed antenna.....4573
On positioning of actuators and sensors with
simultaneous controller design for the control of
large flexible space-craft structures.....5970
Flight imitation algorithm for a reference-type
dynamic trainer.....5971
Qualitative differences between shuttle on-orbit and
transition control.....7062
Science platform and attitude subsystem in-flight
calibration for the Galileo spacecraft.....7063
Tethered satellite retrieval with thruster augmented
control.....7064
Calculation of trim settings for a helicopter rotor
by an optimized automatic controller.....7065
In-flight investigation of large airplane flying
qualities for approach and landing.....7066
Influence of roll command augmentation systems on
flying qualities of fighter aircraft.....7067
Analysis of aircraft attitude control systems prone
to pilot-induced oscillations.....7068
Bifurcation analysis of aircraft pitching motions
about large mean angles of attack.....7069
Determination of critical parameters in large
flexible space structures with uncertain modal
data.....7070
Digital autopilot for thrust vector control of the
shuttle orbital maneuvering system.....7071
Analyses of shuttle orbiter approach and landing.....7072
Dynamic stability testing of the orbiter flight
control system/flexible body interaction.....7073
An error criterion for the pointing of axially
symmetric spacecraft payloads.....7074
Dynamics and control of a deformable gyrost,at,
utilizing continuum vehicle modes.....7075
Preliminary design of a device for stabilizing a
load suspended under a hovering helicopter.....7076
Satellite attitude dynamics and control in the
presence of environmental torques - a brief survey.....7077

- Application of nonlinear transformations to
automatic flight control.....8095
Dynamics of longitudinal motion of an aeroplane with
a deformable control system.....9134
Dynamics of RC helicopter and control.....10153
Autonomous satellite navigation by stellar
refraction.....10154
Highly efficient, very low-thrust transfer to
geosynchronous orbit: exact and approximate
solutions.....10155
Optimal low-thrust transfers to synchronous orbit.....10156
Quadratic synthesis of integrated active controls
for an aeroelastic forward-swept-wind aircraft.....10157
Effects of displacement and rate saturation on the
control of statically unstable aircraft.....10158
On the number and placement of actuators for
independent modal space control.....10159
The generalized response of servovalve-controlled,
single-rod, linear actuators and the influence of
transmission line dynamics.....11163
Terminal control of movable objects.....11164
Dynamics of spatial motion of an aeroplane with
fixed controls.....11165
Optimal short-range trajectories for helicopters.....12190
Effects of time delays on systems subject to manual
control.....12191
Design of the Galileo scan platform control.....12192
Attitude stabilization of flexible spacecraft during
stationkeeping maneuvers.....12193
Optimal distributed control of a flexible spacecraft
during a large-angle maneuver.....12194
Critical parameter selection in the vibration
suppression of large space structures.....12195
Impact of magnetic bearing rotor design on satellite
nutational stability.....12196
A parametric study of the behavior of the angular
momentum vector during spin rate changes of rigid-
body spacecraft.....12197
Optimal control applied to aircraft flutter
suppression.....12198
On the equilibria of rigid spacecraft with rotors.....12199
A prediction algorithm for a control system with a
nonideal integrating drive.....12200
Solution of the basic control problem (BCP).....12201

204-D Process control

- Towards the factory of the future, Emergence of the
computerized factory and its impact on society,
presented at The Winter Annual Meeting of The
American Society of Mechanical Engineers, Chicago,
IL, Nov. 16-21, 1980 (Book).....248
Identification code of MAC devices in the R&I system
with the implementation of distributed process
control systems.....249
A contribution to dynamic process simulation.....250
Stochastic problem of optimal control for a cascade
of water reservoirs.....1282
The implementation of distributed control functions
by using mobile control sources.....2303
Optimal control of alternative activities in
continuous process industries.....2304
Simulations of adaptive controllers for a paper
machine headbox.....2305
On an on-line dynamic direct coordination method in
process industry.....2306
Design hierarchy of an automation plant by means of
the automation system "auditec".....2307
On the control of complex production systems with
variable structure.....3429
Optimal coordination of solutions in two-level
control systems.....3429
Differential pressure control of a pendulum mill for
Guano grinding.....5972
Research concerning feedforward water level control
taking self-evaporation of hot water in piping
into consideration.....5973
Optimal control of thermodynamic processes. I.....5974
Response of two-mass hydraulic servos with limited
supply flow.....5975
Novel systemtechnical solution for a process control
machine with free configuration.....5976
Programming of process control tasks with the help
of a block programme language.....5977

- Problems in the application of digital automation systems in the process industry.....5978
- General decoupling theory of multivariable process control systems (Lecture Notes in Control and Information Sciences #53) (Book).....7078
- Fault location using digraph and inverse direction search with application.....7079
- Weld pool impedance identification for size measurement and control.....7080
- Determination of the temporal and spatial points in control of industrial processes.....7081
- Estimation of probability of cutoff of renewal process during a fixed time by statistical simulation.....7082
- Constrained linear quadratic Gaussian control with process applications.....8096
- Fastest and economical metal heating taking into account the effect of oxidation on the heat exchange.....8097
- Investigations of a dynamical model for excenter check-valves on analog- and digital computers.....10160
- Linearization method for optimal control of a continuous process industry.....10161
- Real time vibration control of rotating circular plates by temperature control and system identification.....11166
- Estimating the admissible plant model errors in the linear static optimization problem for a continuous process industry.....12202
- Real-time simulation methods, network state observation and predictive control with the process guidance of mineral gas distribution nets..12203
- Actual automation problems and their solution possibilities in energy engineering.....12204
- Structural model for complex automation systems and its application in the power station automation....12205
- 204-E Power systems**
- Computer-aided procedures for optimization of engine controls.....1283
- Optimal control of thermodynamic processes. III.....2308
- Optimization of power plant control by consistent application of mathematical models.....2309
- Determination of parameters characterizing the transfer response of blending-controlled air-heaters.....2310
- An adaptive multivariable control system for hydroelectric generating units.....3431
- Optimal load allocation.....3432
- An alternative model of an interconnected power system in polynomial matrix form.....3433
- Simulation of observer structures of full order for power station-type multivariable problems in energy economics.....8098
- Nuclear power plant optimal control by successive linear programming.....9135
- Dynamic turbocharged diesel engine simulator for electronic control system development.....9136
- Recollections of the evolution of realtime control applications to power systems.....10162
- Practical-optimal control of a drum boiler power plant.....10163
- Nonlinear state affine identification methods: Applications to electrical power plants.....10164
- Remarks on the application of a multivariable feedback control with a large steam generator.....12206
- Optimization of the combustion air feed of lignite firing steam generators by means of the cross correlation method.....12207
- Test of a model-adaptive microcomputer controller by the model of a nuclear reactor.....12208
- Structural coherency in interconnected power systems.12209
- 204-F Fluidic systems**
- Modern flow measurement.....251
- Multiprocessor computer modeling of transonic flow....1284
- A fluidic regenerative filtration system for hot gas cleaning.....2311
- Optimizing the flow distribution in a network with losses.....5979
- Pseudo bond graph representation of PWR pressurizer dynamics.....7083
- Efficient use of directional-control valves in fluid-logic circuits.....7084
- A fluidic regenerative filtration system for hot gas cleaning.....7085
- The application of sensitivity analysis to electrohydraulic position control servos.....7086
- Influence of some design parameters of the fluid-flow arrangement on the operation of a controllable fluid coupling.....7087
- Control of high-speed pumps, including cooling water pumps.....7088
- Optimum design of one-dimensional journal bearings....8099
- Optimal control of a sink-float mineral concentration process.....8100
- Effects of thermal damping on the dynamic response of a hydraulic motor-accumulator system.....9137
- Vortex flow controllers in sanitary engineering.....11167
- The development of the measurement, testing and control of controlled gaseous air.....11168
- A transfer function method of modeling systems with frequency-dependent coefficients.....12210
- Fluidic control systems for projectiles.....12211
- Frequency response of a pneumatic valve-controlled cylinder with an uneven-underlap four-way valve: Part III. The case of a valve with different port widths.....12212
- Frequency response of a pneumatic valve-controlled cylinder with an uneven-underlap four-way valve: Part IV. Simplified calculation of frequency response.....12213
- 204-G Digital control systems**
- Digital process control systems: Which interface should be standardized from the view of the user?....252
- Theory and application of digital control, Proceedings of the IFAC Symposium, New Delhi, India, 5-7 January 1982 (Book).....1285
- Digital control of a rotary dryer in the sugar industry.....2296
- Test demonstration of digital control of wing/store flutter.....3434
- Problems with the application of digital automation systems in the process industries.....3435
- Remarks on structures of digital automation systems...5980
- Digital simulation of a Coulomb-damped hydraulic servosystem.....7089
- Centrifugal compressor supervisory control for building automation systems.....7090
- Signal processor controls type-wheel drive.....8101
- A direct digital control of a process for tracking a reference input.....8102
- Secure digital communications, (CISM Courses and Lectures no. 279) (Book).....11169
- Microcomputers for the automation of mechanical engineering processes.....12214
- An algorithm for testing consistency of a database scheme in relational databases.....12215
- Time-optimizing transformations of flowcharts of microprogram control algorithms.....12216
- Implementation of algorithms for programmable special-purpose processors.....12217
- 204-H Control components**
- The application of sensitivity analysis to electrohydraulic position control servos.....2312
- Systematic design of state controllers in the frequency domain.....5981
- Stability considerations for existing conventional autopilots on modern ship types.....10165
- Self-tuning state controllers.....10166
- 204-I Instrumentation**
- Automatic diagnosis of airplane board equipments....3436
- Use of force and attitude sensors for locomotion of a legged vehicle over irregular terrain.....5982
- Optimised auto-ranging in a new industrial crosscorrelator.....5983

- Computer evaluation of controlled pantographs for current collection from simple catenary overhead equipment at high speed.....7091
 Principal developments in the adaptive control of machine tools.....7092
 A control strategy for computer numerical control machine exhibiting precision and rapidity.....9138

206 Robotics

206-B End effectors

- Adaptive manipulator control (movement learning algorithms).....2313
 Minimum-time control of a manipulator with two-degrees of freedom.....5985
 The deflection and compensation of general purpose robot arms.....5986
 An adaptive manipulator with force sensors.....5987
 Controller design for flexible, distributed parameter mechanical arms via combined state space and frequency domain techniques.....7093
 A geometrical representation of manipulator dynamics and its application to arm design.....7094
 Wrist-partitioned, inverse kinematic accelerations and manipulator dynamics.....8103
 The use of Kane's dynamical equations in robotics.....8104
 Generation and evaluation of the workspace of a manipulator.....8105
 Active control of robot structure deflections.....9139
 Computer assisted sensitivity model generation in manipulation robots dynamics.....9140
 The effect of link parameter on the working space of general 3R robot arms.....9141
 Resolved motion adaptive control for mechanical manipulators.....11170
 On the elliptic path of an end-effector for an anthropomorphic manipulator.....11171
 A kinematic CAD tool for the design and control of a robot manipulator.....11172
 The Jacobian matrix of a "manipulator-nonfree object" system, a kinematic method for its determination, and application to dynamic analysis of the system.....12218
 Aspects of control in automatic manipulators for control of resistance forces.....12219
 Synthesis of an algorithm for controlling the motion of a manipulator along a given trajectory on the basis of a dynamic model of the control mechanism.....12220

206-C Actuators (prime movers)

- A dynamic model of a concentric LADD actuator.....2314
 The six-legged walking robot capable of terrain adaptation.....5988
 A dynamic model of a concentric LADD actuator.....7095

206-D Locomotion (mobility)

- Dynamical walk of stilts type biped locomotion.....253
 Obstacle avoidance by a robot manipulator under limited information about the environment.....2315
 Nonlinear running and walking of biped robot.....2316
 Is dynamic control needed in robotic systems, and, if so, to what extent?.....5989
 The stabilization of the position of the body of walking machines.....5990
 Analysis of rider and single-track-vehicle system — Its application to computer-controlled bicycles.....7096
 Experiments in balance with a 2D one-legged hopping machine.....9142
 Computer-aided design of a leg for an energy efficient walking machine.....9143
 Mechanics of locomotion.....11173
 Configuration design of the adaptive suspension vehicle.....11174
 Dynamic walk of a biped.....11175
 Experiments in balance with a 3D one-legged hopping machine.....11176
 A study of design and control of a quadruped walking vehicle.....11177

206-E Kinematics

- A geometrical representation of manipulator dynamics and its application to arm design.....2317
 Manipulators with variable link lengths: Kinematics and possibilities.....5991
 Planning collision-free motions for pick-and-place operations.....8106
 On the piano movers' problem: III. Coordinating the motion of several independent bodies: The special case of circular bodies moving amidst polygonal barriers.....8107
 Optimal trajectory control of robotic manipulators.....9144
 Robots in space.....11178
 Control of plane motions of an elastic manipulator element.....11179
 Dynamics and control of motion of a hopping robot.....11180
 Dynamic behavior of pneumatically driven manipulation devices.....12221
 Coupled motion of a robot with two degrees of freedom and a common energy source of limited power.....12222

206-F Sensing &/or controls

- Homogeneous control structure for an adaptive robot-manipulator.....2318
 Control of a direct-drive arm.....2319
 An adaptive model following control for robotic manipulators.....2320
 A torque-sensitive tactile array for robotics.....5984
 Position and velocity transformations between robot end-effector coordinates and joint angles.....5992
 Dynamic sensing for robots: An analysis and implementation.....5993
 Evolutionary adaptation of control processes in robots operating in nonstationary environments.....5994
 The adaptive control of manipulator arms.....5995
 Robotics research and advanced applications, presented at the Winter Annual Meeting of the American Society of Mechanical Engineers, Phoenix, Ariz., Nov. 14-19, 1982 (Book).....7097
 Control of a direct-drive arm.....7098
 An adaptive model following control for robotic manipulators.....7099
 An optical sensor for measuring overall direction of action by using a projected image.....8108
 Pyroelectric sensing station for automatic recognition of position and orientation of objects.....11181
 Automatic synthesis of fine-motion strategies for robots.....11182
 Multiprocessor control of a telemanipulator with optical proximity sensors.....11183
 Energetically optimal control of plane turning of a rigid body.....11184

206-G Position applications

- On propelling a rod to a maximum vertical or horizontal distance.....2321
 On the "piano movers" problem. I. The case of a two-dimensional rigid polygonal body moving amidst polygonal barriers.....2322
 Positioning by measurement of visual angles and its application.....3437
 Design and implementation of a microcomputer-based control algorithm for weapon pointing and stabilization.....5996
 Contribution to the dynamic, strength and stiffness analysis of the manipulator pedestal type.....5997
 Development of measuring equipment for location and direction (MELODI) using ultrasonic waves.....7100
 Experimental evaluation of the preview servo scheme for a two-axis positioning system.....9145
 Dynamic scaling of manipulator trajectories.....9146

206-I Miscellaneous applications

- Development of measuring equipment for location and direction (MELODI) using ultrasonic waves.....2323

Principal developments in the adaptive control of machine tools.....	2324
The adaptive control loop in the system of human motion. Part 2: Validating the adaptive control loop experimentally and theoretically.....	5998
Man's role in man-machine systems.....	7101
Structural archetypes for coherency: A framework for comparing power system equivalents.....	12223
Learning microcomputer controls for industrial robots.....	12224

MECHANICS OF SOLIDS

250 Elasticity

250-A General theory

Relaxed Saint-Venant problem for a beam with microstructure, having a symmetric stress tensor.....	1286
Asymptotic equipartition of energy for equations of elasticity.....	1287
Certain a priori inequalities and a peculiar elastic material.....	1288
Ordinary and strong ellipticity in the equilibrium theory of incompressible hyperelastic solids.....	1289
Perturbation method in boundary-value problems of the mechanics of deformable bodies.....	1290
A nonconvex generalization of the notion of superpotential and applications.....	2325
Dynamical stress function tensor.....	2326
Two problems with mixed boundary conditions for an incompressible isotropic hyperelastic material.....	3438
A hidden variable approach to constrained solids.....	3439
Symmetry and bifurcation in three-dimensional elasticity. Part II.....	4574
An interpretation of Baker-Ericksen inequalities in uniaxial deformation and stress.....	5999
Positive, negative and neutral shear moduli of elastic media.....	6000
The classification of isotropic points in stress fields.....	7102
Statically admissible stress fields in incompressible media.....	8109
Remarks on uniformity in hyperelastic materials.....	8110
One representation of the laws of elasticity and plasticity in plane problems.....	8111
Suggestion of a new definition of angular strain.....	10167
Canonical decomposition of fourth rank tensors of elasticity.....	11185
Eigenstrain problems in a finite elastic body.....	12225
On Ericksen's problem of elasticity.....	12226
Elastostatics as a limit of elastodynamics - a matrix formulation.....	12227
Energy expressions for singular elastic states.....	12228

250-B Linear theory

Stress distribution in an infinite elastic strip under torsional displacements by two coplanar rigid punches.....	254
An axisymmetric problem for a solid cylinder of finite length with weight.....	3440
Introduction to linear elasticity (Book).....	6001
Examination of the loading conditions of sheared elements.....	8112
Elastic materials of coaxial type and inequalities sufficient to ensure strong ellipticity.....	11186

250-C Nonlinear & finite deformation theory

A note on the solution of two finite plane strain problems.....	255
On the role of the strong ellipticity condition in nonlinear elasticity.....	256
On non-linear Beltrami-Mitchell equations.....	257
Large strain inelastic behaviour of cylindrical tubes.....	258
The occurrence of surface instabilities and shear bands in plane-strain deformation of an elastic half-space.....	1291
Some uniqueness and continuous dependence theorems for nonlinear elastodynamics in exterior domains.....	1292

Regular and singular problems for large elastic deformations of tubes, wedges, and cylinders.....	1293
Mathematical problems in elastic equilibrium with finite deformations.....	1294
Voprosy mekhaniki neuprugikh tel (Questions of the mechanics of inelastic bodies) (Book).....	2327
Gibbs' principle and thermodynamic inequalities for nonlinear elastic bodies.....	2328
Equilibrium solutions in finite elasticity.....	2329
A class of operator equations in nonlinear mechanics.....	2330
Existence of solutions for a system of equations of nonlinear elastic materials.....	3441
The deformation of a nonlinear-elastic hollow cylinder under tangential shear - Theory and experiment.....	3442
Objectivity of incremental constitutive relations over finite time steps in computational finite deformation analyses.....	3443
Two families of finite deformations with constant strain invariants.....	3444
Prediction of bending rupture strength of non-linear materials with different behavior in tension and compression.....	4575
Incremental elastic modulus for isotropic elastic bodies with application to arteries.....	6002
Non-linear relations in terms of principal stresses and strains.....	6003
Elasticity relation for an anisotropic solid whose deformation characteristics depend on the form of the stressed state.....	6004
A numerical analysis of contact and limit-point behavior in a class of problems of finite elastic deformation.....	8113
The compatibility equations and the pole to the Mohr circle.....	8114
On barrelling for a special material in finite elasticity.....	9147
On the compatibility condition of displacement field for finite deformation of continuum.....	10168

250-D Three-dimensional problems

A note on Saint-Venant's principle.....	1295
Hybrid method analysis of state of stress in three-dimensional bodies.....	1296
Stress state in nonaxisymmetric disks.....	3445
A three-dimensional problem for a deformable cone with an asymmetrically perturbed surface.....	3446
A numerical solution for layered solid contact problems with application to bearings.....	4576
The stress field in an elastic half space having a spheroidal inhomogeneity under all-around tension parallel to the plane boundary.....	6005
Torsional response of an elastic half space to a nonuniformly expanding ring source.....	6006
Center of pressure of pyramidal bodies.....	8115
The torsion problem of a cylindrical rod composed of semi-infinite solid and hollow cylinders.....	11187
Three dimensional contact problem of a rigid ring bonded to an elastic hollow cylinder.....	11188
Three-dimensional problems of the theory of elasticity for multiply connected plates: Survey.....	11189
Torsion of a nonuniform half-space with an elastic cylinder.....	11190

250-E Stress concentrations & singularities

On the state of stress of an orthotropic elastic plane region in the neighborhood of a corner point.....	259
Effects of couple-stress on stress concentrations of notched bar. (Indirect fictitious-boundary integral method).....	260
Determination of the stress concentrations at a circular hole in a transversally isotropic plate under a uniaxial extension and a pure shear.....	262
A closed-form solution of a slant crack under biaxial loading.....	1297
Nonaxisymmetric deformation of an elastic mass with a toroidal cavity.....	2331
Stress system in a plate with a crack under biaxial load.....	2332
Stationary singular points induced by discontinuous external forces in one-dimensional materials with internal variables.....	3447

- Second order elastic effects in a Pascal's limaconal hole under uniform normal pressure.....3448
- Stress state in a strip with four adjacent circular holes.....3449
- Circular welding problems with a crack.....4577
- Elastic behaviour of shrink-fitted forming die assemblies. Part II: Numerical application and results.....4578
- Singular stresses in an infinite solid with a flat annular crack around a spherical cavity under tension.....4579
- Stress concentrations in a hybrid composite sheet.....6007
- Stress analysis around circular hole in infinite plate with rigid disk (case of load applied to disk).....6008
- On the validity of the singular integral equations of elasticity problems at points of loading discontinuities.....6009
- On the stress concentration problem of a shaft with an annular groove of a circular-arc form under tension.....7103
- Shear cracks at edge of a flat punch.....7104
- Surface displacement of an elastic half-space due to a vertically buried point-source load.....7105
- On singularities due to a concentrated pressure loading of a cylindrical cavity.....8116
- Determination of stress concentration around an oblique hole by a finite-element technique.....9148
- Torsion of an elastic solid cylinder with one or two semicircular grooves.....10169
- On the stress concentration in a strip with a row of circular holes subjected to tension.....10170
- Horizontal stresses in semi-infinite elastic mass on the axis of superficial normal load applied on a circular area.....10171
- Stress concentration and stress intensity factors for an infinite plane with several rows of elliptic holes and cracks.....10172
- Stress concentration near circular hole in a shallow shell.....10173
- Theoretical and experimental investigations of the stress state of elastic cylinders with grooves.....10174
- Stress distribution around an oblong hole in a uniaxially loaded plate.....11191
- Stress concentration in a transversely isotropic medium near a hyperboloid notch in pure shear and bending.....11192
- Stress concentration in the neighborhood of nearly spherical cavities.....11193
- Plane problem of the theory of elasticity for an arbitrary system of cracks in a circle with displacements specified on its boundary.....11194
- Stress concentration around two circular holes connected by a narrow slit.....12229
- 250-F Elastic imperfections (dislocations, etc)
- Axisymmetric reinforcement of holes in orthotropic plates.....261
- Non-linear elastic models of single dislocations.....263
- The mechanisms of accommodation of deformation at grain boundaries in BCC materials.....264
- The dynamic stress intensity factor due to arbitrary screw dislocation motion.....3450
- Dynamic analysis of dislocation generation due to sudden indentation.....4580
- Mechanical interaction of spheroidal defects with the boundary surface of an elastic solid.....9149
- The elastic stress field associated with a curved dislocation in a two-phase medium with a planar interface.....10175
- The edge dislocation inside an elliptical inclusion.....10176
- Approximating surface deformation from a buried strike-slip fault or shear crack in a mildly uneven half-space.....12230
- Elastic-plastic analysis of small defects - voids and inclusions.....12231
- 250-G Variational & energy methods
- Virtual work principles for two elastostatic contact bodies.....2333
- A note on the minimum complementary energy theorem.....2334
- On the work theorems for finite and incremental elastic deformations with discontinuous fields: A unified treatment of different versions.....3451
- Solution of problems of the theory of elasticity by the method of coordinate descent.....6010
- 250-H Contact problems & inclusions
- On the elastic fibre pull-out from a fixed and flat surface: asymptotic and numerical results.....265
- Contact stresses in two elastic bodies. (Elastic bodies are finite hollow cylinders).....266
- Compression of an elastic cylinder between two rigid planes. (Application of the indirect fictitious-boundary integral method to a contact problem).....267
- Contact stresses of an elastic half-space pressed on a rigid base with a smooth projection.....268
- An integral equation approach for simultaneous solution of rectangular hole and rectangular block problems.....269
- The interaction between a system of circular punches on a nonhomogeneous elastic half space.....270
- Solution of plane-periodic contact problem for nonhomogeneous half-space.....271
- Some useful results in the classical Hertz contact problem.....1298
- Some useful results in the tangentially loaded Hertzian contact problem.....1299
- Punch and crack problems in transversely isotropic bodies.....1300
- A numerical solution of the annular stamp problem.....1301
- Interpolational approach to the approximate solution of multiparameter contact problems.....1302
- Special analytical solutions for use in debond stress analysis.....1303
- The problem of a rigid punch sliding on an elastic or a viscoelastic layer.....1304
- Analysis of a thin-walled pressurized torus in contact with a plane.....1305
- On an analytic approach to three-dimensional contact problems of elasticity theory.....1306
- A four-part boundary value problem in elasticity - indentation by a discontinuously concave punch.....1307
- Discrete interaction of a plate with a compressed-tensioned rod.....1308
- The role of microstructure in the wear of selected steels.....2335
- Contact problem of elasticity theory for a wedge.....2336
- Contact problem for an elastic ring pressed into a circular hole in an isotropic plate.....2337
- Slip between a layer and a substrate caused by a normal force moving steadily over the surface.....2338
- Interface slip caused by a surface load moving at constant speed.....2339
- A theoretical and experimental study of the state of stress and strain in a contact between an indenter and a solid lubricant plating.....2340
- Explicit equations for the stresses beneath a sliding spherical contact.....2341
- Asesimmetrichnye kontaktnye zadachi teorii uprugosti i termouprugosti (Axisymmetric contact problems in the theory of elasticity and thermoelasticity) (Book).....3452
- An axisymmetric Neumann potential problem for the circular annulus.....3453
- Three-dimensional contact problem of the motion of a stamp with friction.....3454
- Interaction between a rigid indenter and a near-surface void or inclusion.....3455
- Smooth contact between a rigid indenter and an initially stressed orthotropic beam.....3456
- Method of numerical solution of the problem of impressing a moving stamp into an elastic half-plane, taking heat generation into account.....3457
- Contact problem of a rigid indenter in second order elasticity theory.....3458
- The accuracy of plane strain models for the elastic contact of three-dimensional rough surfaces.....3459
- Some aspects of post-yield contact problems.....3460
- Asymptotic solutions of contact problems of elasticity theory for media inhomogeneous in depth.....3461
- Annular punch on a transversely isotropic layer bonded to a half-space.....3462

- Solving a contact problem of elasticity theory by the finite-element method.....3463
- Elastic equilibrium of a half-plane with a system of linear inclusions.....3464
- Elastic interaction of a tensioned strip with a submerged circular inclusion.....3465
- Problem of intersection of two half-planes with reinforced edges.....3466
- Indentation of a half-space with a rigid indenter.....4581
- A note on the Hertz contact problem: A correlation of standard formulae.....4582
- Adhesive contact and kinetics of adherence between a rigid sphere and an elastomeric solid.....4583
- Simplified solution for stresses and deformations.....4584
- The elastic distortion of rollers under combined radial and thrust loads.....4585
- Numerically efficient procedures for dynamic contact problems.....6011
- On the approach to steady state for frictional contact under moving loads.....6012
- Contact stress of an elastic layer pressed on a rigid base with a smooth protrusion.....6013
- Contact stresses of an elastic layer indented by a concave rigid punch.....6014
- Approximation of the Signorini problem with friction, obeying the Coulomb law.....6015
- Calculation of an inhomogeneous elastic half space and a plate placed on it.....6016
- Contact problems of discrete interaction between a plate and rod.....6017
- Mixed problems for a strip partially coupled to a rigid base.....7106
- Certain plane contact problems of elasticity theory for strongly anisotropic media.....7107
- Axisymmetric contact problem in the presence of a wedge.....7108
- The contact problem of an orthotropic non-homogeneous elastic half space.....7109
- An approximate hybrid type of virtual work principle for two elastostatic contact bodies.....7110
- An integral equation method for problem of load acting perpendicularly on the surface of a half space with rigid horizontal level.....7111
- The body force induced separation at a frictionless precompressed transversely isotropic elastic interface.....7112
- Axisymmetric twisting of elastic half-space with elastic disk.....7113
- Stressed state of a piecewise-homogeneous plate with an elastic inclusion.....7114
- An experimental method for determining the dynamic contact law.....8117
- On certain spectral relationships associated with Carleman integral equation and their applications to contact problems.....8118
- On the motion of an ellipsoid on a rough surface with slippage.....8119
- Modelling the characteristics of interface surfaces by the finite element method.....8120
- Closed form solutions to dynamic punch problems by integral transform method.....8121
- Plane contact problem for a half-space with a Poisson's ratio that varies with depth.....8122
- Investigation of adhesion between wheel and rail in consideration of the operation conditions of underground railways.....8123
- Contact deformations of elastic bodies in conditions of adhesion interaction.....8124
- The influence of tangential tractions at the surface on the stresses in contacting bodies during a rolling/sliding motion.....8125
- Microdisplacements in plane contact of machine elements under eccentric shift.....8126
- Properties of normal stresses and displacements near a perturbed boundary of a contact zone.....8127
- Contact stresses between two thick plates with a circular hole and a sandwiched solid-metal flat gasket.....9150
- Transient response of an inhomogeneous elastic solid to a moving torsional load in a cylindrical bore.....9151
- Some annular disc inclusion problems in elasticity.....9152
- On contact problems in an inhomogeneous half-space.....9153
- Variational formulation of the roller contact problem.....9154
- A modified conjugate gradient method for frictionless contact problems.....9155
- Longitudinal shear of an anisotropic body with a sharp-ended anisotropic inclusion.....9156
- The fundamental problem of elastokinetics for a half-space bounded by a vertical perfectly smooth plane.....9157
- A 2-D solution of the contact problem in the capstan/tape/roller mechanism of magnetic recorders.....10177
- Contact stresses between two disks and a sandwiched solid-metal flat gasket.....10178
- The axisymmetric contact problem of an elastic layer on a rigid base with a cylindrical protrusion or pit.....10179
- The terms and shapes of TNE functions necessary for calculation of the dissipated power in the problem of indentation of a punch into a two-ply material.....10180
- Real area of elastic contact of anisotropic rough-surface with smooth surface.....10181
- Analysis of stress state of elastic coating in contact with cylindrical counterbody.....10182
- On the interconnection between some contact characteristics and the variable elastic properties of contacting bodies.....10183
- On the mutual influence of microasperities during contacting.....10184
- Two contact problems of the theory of elasticity for a layer with a Winkler-type coating.....10185
- Self-similar problem of indentation of a plane stamp into an elastic halfspace.....10186
- Calculation of the actions of rigid smooth stamps on a simply connected elastic body.....10187
- Plane problem for an anisotropic body with a sharp-ended anisotropic inclusion.....10188
- Contact stresses between two rectangular plates and a sandwiched solid-metal flat gasket.....11195
- On the characteristics of bolted joints with gaskets (Stress analysis of a metal flat gasket interposed between two hollow cylinders).....11196
- A contact problem for the elastic quarter space.....11197
- Elastic study of multiple contacts: Interaction between asperities.....11198
- Contact problem in the theory of elasticity for cylindrical bodies with wear.....11199
- Pressure of a system of stamps onto a nonhomogeneous elastic half space.....11200
- Solving one two-dimensional contact problem for rough bodies.....11201
- Reduction problem for an elastic space weakened by a system of cylindrical pores.....11202
- Axial compression of a circular cylinder by rigid dies with allowance for friction.....11203
- The elastic inclusion with a sliding interface.....12232
- The rotation of a rigid elliptical disc inclusion embedded in a transversely isotropic elastic solid.....12233
- Microdisplacements between two elastic bodies separated by a thin film of polystyrene.....12234
- Subsurface stress evaluations under rolling/sliding contacts.....12235
- An axial-symmetric contact problem of the asymmetric theory of elasticity.....12236
- Plastic-elastic deformation transition in rolling and sliding.....12237

250-I Anisotropic media

- Bifurcation of an elastic slab having inclined anisotropy-axes under axial loads.....272
- Interfacial operators in the mechanics of composite media.....273
- Shear modulus of transversely isotropic materials.....1309
- Effective Lamé's moduli of cubic arrays of elastic spheres embedded in an elastic matrix.....1310
- Uniqueness in the boundary-value problems for the static equilibrium equations of a mixture of two elastic solids occupying an unbounded domain.....3467
- Application of a random-walk method for stresses in polycrystalline metals.....6018
- Distribution of stresses and displacements near a crack in a homogeneous body with straight-line anisotropy of general form.....10189
- Dynamics of gyroelastic continua.....12238
- Stereological determination of structural anisotropy.....12239

250-J Nonhomogeneous media

- Propagation of the interface in the stress-induced austenite-martensite transformation.....1311
 Bounds for the non-local effective properties of random media—II.....2342
 Determination of stresses in a diffusion coating applied to a rod under tension.....2343
 Stress-strain state near the tip of a butt joint.....3468
 Fundamental solutions in micropolar elasticity.....6019
 Expression of elastic deformation of inhomogeneous medium by dislocations distributed in homogeneous elastic medium.....6020
 Stress state of an inhomogeneous orthotropic hollow cone.....7115
 Approximate solution of problems on the deformation of almost-cylindrical composites.....7116

250-K Residual stresses

- Evaluation of residual stresses in inhomogeneous disks.....3469
 Development of approximate methods of calculating residual stresses formed in the heat treatment of glass components of complicated form.....3470
 Relation between three-dimensional and plane residual stressed states of cylindrical components and their elements under a radial stress gradient.....11204

250-Y Computational techniques

- Reflections on the computational approximation of elastic incompressibility.....274
 On integral equation methods for elastic boundary value problems. (1st. Report, Direct methods for static problems).....275
 Investigations of a two-dimensional integral equation in the theory of elasticity and electrostatics.....1312
 Investigation of some integral equations of St.-Venant's torsion problem.....1313
 Homogenization and asymptotic expansions for solutions of the elasticity system with rapidly oscillating periodic coefficients.....1314
 The solution of elasticity problems for the half-space by the method of Green and Collins.....1315
 Efficient method of solving the problem of stamp pressure on an elastic half-space.....2344
 A boundary-element method for elastostatics in a plane region bounded by a smooth curve.....3471
 On a method of obtaining spectral relationships for integral operators of mixed problems of mechanics of continuous media.....3472
 A conjugate gradient algorithm applied to plane stress-strain problems.....3473
 On quasiperiodic boundary value problems and their applications in the theory of elasticity.....3474
 A conformal mapping problem arising in elasticity, II.....3475
 Numerical solution of a three-part mixed boundary value problem of linear elastostatics.....3476
 Use of coefficients of influence to solve some inverse problems in plane elasticity.....3477
 Use of the method of elemental cells for numerical solution of problems of the theory of elasticity. Report no. 2. Network model of an elastic body.....3478
 Computing the stresses on the surface of an elastic body.....3479
 Use of the method of elementary cells for numerical solutions to problems of elasticity theory. Report 1. General assumptions of the method of elementary cells.....3480
 The analysis of incompressible hyperelastic bodies by the finite element method.....4586
 Convergence of the Richardson method in problems of nonlinear elasticity theory.....4587
 Iteration method of solving stochastic boundary-value problems of elasticity theory.....4588
 Uniform asymptotic solutions of two-dimensional problems of elasticity for the domain exterior to a thin region.....6021
 Finite element method for orthotropic micropolar elasticity.....6022

- Boundary integral equation method in micropolar elasticity.....6023
 A new boundary element technique for solving plane problems of linear elasticity: 1. Theory.....6024
 On integral equation methods for elastic boundary value problems (2nd Report, Indirect methods for static problems).....6025
 Hybrid experimental-numerical stress analysis.....6026
 Numerical solution of problems of mechanics of inhomogeneous deformable solids.....6027
 Averaging of the eigenvalues and eigenfunctions of a boundary-value problem of elasticity theory in a perforated domain.....6028
 Finite-difference numerical solution of some axially symmetric problems in the mathematical theory of elasticity.....6029
 One form of the integral equations for the solution of three-dimensional axisymmetric problems of elasticity.....6030
 Solution of the equations of applied elasticity by the method of variational iterations.....6031
 Inverse problem of three-dimensional elasticity.....6032
 One solution method for the plane problem of elasticity for perforated plates.....6033
 A numerical method for unilateral problems.....7117
 A numerical method for solving equilibrium problems of compressible hyperelastic bodies in large deformations.....7118
 On the Kolosov-Muskhelishvili analog for the three-dimensional state of stress.....7119
 On the completeness of the Papkovitch potentials.....8128
 Weighted residuals as a basis of a general solution method in elasticity.....9158
 Solution of minimax filtration problems for certain mechanical systems with distributed parameters.....10190
 A method for conformal mapping of a two-connected region onto an annulus.....10191
 Numerical solution of problems in incompressible finite elasticity by augmented lagrangian methods
 II. Three-dimensional problems.....11205
 Cuvigliano's theorem and stiffness matrices.....11206
 A mixed Eulerian-lagrangian displacement model for large-deformation analysis in solid mechanics.....11207
 Reconstruction of the internal state of displacement in solids from boundary values.....11208
 Determination of elastic stresses by the potential method in the three-dimensional case.....11209
 Minimum norm solutions to linear elastic analysis problems.....12240
 Existence of solutions of Signorini problems with friction.....12241
 On a variational principle for elastic displacements and pressure.....12242

252 Viscoelasticity

252-A General theory

- On the motion of a viscoelastic solid in presence of a rigid wall. Part I -Darboux and general Cauchy problems for a third-order hyperbolic operator: Explicit Riemann function and maximum principles.....276
 An analogy between rectilinear flow of plastic solids and Saint-Venant torsion.....277
 A thought-experiment concerning an endochronic-type theory.....278
 Nonexistence of smooth solutions for shearing flows in a nonlinear viscoelastic fluid.....1316
 Predicting the long-term strength of anisotropic materials on a polymer base.....1317
 The derivation of the constitutive equations of the materials with fading memory defined on locally convex spaces.....2345
 Nonlinear theory of viscoelastic isotropic bodies.....2346
 The asymptotic rest property for materials with memory.....3481
 Note on the applications of the Frechet derivative.....4589
 A hereditary type, discrete memory, constitutive equation with applications to simple geometries.....6034
 Calculation of deformation of structures considering viscoelastic properties of materials.....6035
 Regularization and inverse problems in viscoelasticity.....9159

- On the appearance of the fractional derivative in the behavior of real materials.....12243
 Applications of fractional calculus to the theory of viscoelasticity.....12244
 On the existence of solutions to nonstrictly hyperbolic problems in nonlinear viscoelasticity...12245
 Behaviour of stationary singular points in one-dimensional materials with memory.....12246
 A rule of nonsymmetric anisotropic hardening for composite materials.....12247

252-B Linear theory

- Stress-orientation-strain relationships in non-crystalline polymers. Part 1. Strategy for a model.....11210
 Stress-orientation-strain relationships in non-crystalline polymers. Part 2. The two-component model developed and applied to rubber-like deformation.....11211
 Stress-orientation-strain relationships in non-crystalline polymers. Part 3. Towards a description of glassy deformation.....11212

252-C Nonlinear & finite deformation theory

- When is a nonlinear viscoelastic material hyperelastic?.....2347
 One variant of the model of a viscoelastic body at large deformations.....7120
 A simplified viscoelastic constitutive equation applied to a dynamic finite deformation problem.....8129
 Nonlinear compressive deformation of viscoelastic porous materials.....10192
 Nonlinear constitutive equations for transient creep of viscoelastic polymers including the effect of hydrostatic pressure.....12248
 Constitutive potentials for dilutely voided nonlinear materials.....12249

252-D Nonlinear materials

- Application of the principle of temperature-time analogy to describe the viscoelastic properties of polyethylene terephthalate magnetic tapes.....2348

252-E Three-dimensional problems

- Strain-rate effect in rapid triaxial loading of concrete.....1318
 The periodic and eigen solutions of the equation governing a nonrotating viscoelastic earth model under transient force.....8130

252-F Creep

- Strength and longevity under creep. Report 2. Application of the modified Lepin model.....279
 Conservation laws for materials exhibiting power-law creep.....280
 Stress redistribution in structures during creep.....281
 Creep and consolidation around circular openings in infinite media.....282
 Elastic-plastic state of bodies of revolution under variable nonisothermal loading, taking account of creep.....283
 Investigation of material damage under creep and creep strength.....284
 Investigation of the thermoplastic-plastic state of shells of revolution with creep strain taken into account.....285
 Statistical linear regression analysis of prediction models for creep and shrinkage.....1319
 The creep of silicon carbide fibres.....1320
 Statistical modeling of the creep characteristics of structural materials.....1321
 Theory of steady-state creep with a complex stress state.....1322
 Estimation of creep deformation in components from short-term proof test data.....2349

- Inversion of creep response for retardation spectra and dynamic viscoelastic functions.....3482
 Notion of continuum damage mechanics and its application to anisotropic creep damage theory.....3483
 An analysis of the Volterra problem for the steady state creep material using complex stress and pseudo-stress functions.....3484
 Use of the characteristic point for calculating the creep of an oval cross section tube.....3485
 On the finite element creep rupture analysis of structures.....4590
 Geometrically non-linear eccentrically compressed columns of uniform creep strength vs optimal columns.....4591
 Optimal trusses transmitting a force to a given contour in creep conditions.....6036
 An experimental study of the ratcheting and creep of thick flanged tubes subjected to steady axial mechanical loading and transient thermal loading.....6037
 Analysis of physical parameters of secondary creep for metals over a wide range of temperature and stresses.....6038
 Description of long-term strength under load applied in steps.....6039
 Predicting the long-term creep of organic-fiber-reinforced plastics.....6040
 On the theory of creep of hardening materials.....6041
 System of kinetic equations for the nonsteady creep of metallic materials.....7121
 Structural model of creep allowing for loading history.....7122
 Study of the creep of a cylindrical shell weakened by a hole.....7123
 Theory of cyclic strength under multicyclic high-temperature loading conditions.....7124
 Creep in face-centered polycrystals with cubic symmetry under low stresses.....7125
 Creep of thin-walled circular cylinder under axial force, bending, and twisting moments.....8131
 Creep life of AISI 316 stainless steel subjected at 550 C to step changes in tensile load.....8132
 Power law steady state creep in / titanium alloys.....8133
 Nonlinear problems of creep of accreting bodies subject to aging.....8134
 High temperature strength of oxide dispersion strengthened aluminium.....9160
 Intercrystalline cracking, grain-boundary sliding, and delayed elasticity at high temperatures.....9161
 The viscoplasticity theory based on overstress applied to the analysis of beams under monotonic and cyclic creep loading.....9162
 An experimental and theoretical investigation into the creep properties of a simple structure of 316 stainless steel.....9163
 Non-stationary stress distribution in a ceramic bending beam during constant load creep.....9164
 Evolution of internal stresses and substructure during creep at intermediate temperatures.....10193
 A unified phenomenological description of work hardening and creep based on one-parameter models..10194
 Incorporation of the Suzuki and the Fisher interactions in the analysis of creep behavior of solid solution alloys.....10195
 Improvement of creep strength in a nickel-base single-crystal superalloy by heat treatment.....10196
 On the applicability of a phenomenological relationship to creep at low stresses and intermediate temperatures.....10197
 Creep deformation with multicyclic loading.....10198
 A note on stationary stress distributions during nonlinear creep.....10199
 Rubber toughening of plastics. Part 7. Kinetics and mechanisms of deformation in rubber-toughened PMMA.....11213
 On the creep-hardening rule for metals with a memory of maximal prestress.....11214
 Prediction of stress-rupture strength on the basis of the phenomenological theory of damage of a material in creep.....11215
 Power-law creep of a material being compressed between parallel plates: a singular perturbation problem.....12250
 On the experimental modelling of the growth of damage in the tertiary creep of metals.....12251

- Investigation of creep in beams based on a structural analogy between the equations of state of the materials and design elements.....12252
 Analysis of long-term creep curves.....12253
 Question of determining the creep of metallic materials for long service lives by a multistage process.....12254
 The high temperature creep of metals and Orowan and Bailey-Orowan equations.....12255

252-G Stress relaxation

- Relaxation of stresses in steels in tempering.....2350
 Relaxation in elastic and viscoelastic materials.....9165
 Internal stresses and two-step stress relaxation of polyethylene.....10200
 Current carried by dislocations during stress relaxation of NaCl single crystals.....12256

252-H Contact problems & inclusions

- Evaluation of a uniaxial, nonlinear, second-order differential overstress model for rate-dependence, creep and relaxation.....286
 Contact problem for a two-layer aging viscoelastic foundation.....2351
 One solution of the contact problem of nonlinear steady creep for a half-plane.....3486
 On the contact between a rigid, smooth cylinder and a viscoelastic beam.....8135
 The sliding with Coulomb friction of a rigid indenter over a power-law inhomogeneous linearly viscoelastic half-plane.....12257

252-I Material characterization

- Analysis of yield criteria for perforated plates.....4592
 Some effects of the fabric elastic constant on the dynamics of fabric formation.....8136

252-J Anisotropic media

- 48 hour multiaxial creep and creep recovery of 2618 aluminum alloy at 200 C.....9166
 Multiaxial creep of 2618 aluminum under proportional loading steps.....9167
 Cyclic creep acceleration and retardation in polycrystalline copper tested at ambient temperature.....10201
 Organization of the optimal nonsteady cooling process for a thick-wall cylindrical shell of a viscoelastic composite material.....10202

252-K Nonhomogeneous media

- Deformation of a nonhomogeneous visco-elastic hollow sphere.....3487
 On the theory of viscoelasticity of structurally inhomogeneous media.....7126

252-L Physical theory & mechanisms

- Modelling of adiabatic shear band development from small imperfections.....2352
 Role of internal stress for continuous yielding of dual-phase steels.....9168

252-M Computational techniques

- Nonlinear viscoelastic stress analysis - A finite element approach.....287
 Riemann and Goursat problems for one-dimensional classical plasticity.....288
 Numerical integration of rate constitutive equations in finite deformation analysis.....3488
 A tangent modulus method for rate dependent solids.....8137
 Dissipative materials and variational formulations.....9169

252-Z Experimental techniques

- Method of studying viscoelastic properties of porous polymer films.....7127

254 Plasticity and Viscoplasticity

254-A General theory

- A thermodynamic theory of plasticity derived from the Clausius-Duhem inequality.....289
 Cyclic torsion and second order effect in the scheme of hereditary structure of anelastic continuum.....290
 Elastic plastic deformation.....291
 The derivation of J-integral conservation law from the principle of virtual work.....292
 Finite plastic strain in annealed mild steel during proportional and non-proportional loading.....293
 Extremum principles for the energy-release problem of elastic-perfectly plastic body subjected to prescribed change of material properties.....294
 Modification of the theory of plastic flow based on a shear-strain mechanism.....295
 Approximate calculation of binding forces for plastic flows.....309
 Superplasticity: A review of data.....1323
 Elasto-plastic behaviour in plane strain problems for granular media.....1324
 A theory of non-linear anisotropic hardening.....1325
 Couette Flow of rigid/hardening solids.....1326
 The structure of stress-strain relations in finite elasto-plasticity.....1327
 Theories of nonlocal plasticity.....1328
 Rate sensitivity of plastic flow and implications for yield-surface vertices.....1329
 On the existence of the rates of stress and displacement for Prandtl-Reuss plasticity.....1330
 Theorems on the limit analysis dealing with the yield condition expressed by the sum of the homogeneous linear form of stress tensor and the homogeneous quadratic form of stress tensor.....2353
 Extended bounding theorems of limit analysis.....2354
 The plastic: The large elastic-plastic deflection of a strut.....2355
 Crystal plasticity.....3489
 Dynamic plasticity.....3490
 On finite plastic flow of crystalline solids and geomaterials.....3491
 Kinematic hardening models at finite deformation.....3492
 On the nonequivalence of the stress space and strain space formulations of plasticity theory.....3493
 Hardening and degradation rules for metals under monotonic and cyclic loading.....3494
 A third-invariant plasticity theory for frictional materials.....3495
 Ductile versus brittle behavior of amorphous metals.....3496
 Examples of estimation of the plastic deformation localization state.....3497
 Plastic materials with continuous transition between loading and unloading states.....3498
 The mathematical theory of plasticity (Book).....4593
 Applications of a hereditary constitutive law of discrete memory type.....4594
 Constitutive equations for large plastic deformation of metals.....4595
 Application of the improved endochronic theory of plasticity to loading with multi-axial strain-path.....4596
 On the characteristic equations of elasto-plastic flow.....4597
 On the definition of the rate of elastic deformation in a large elasto-plastic transformation.....4598

258-C strings & wires

- Some static problems for the nonlinear elastic string.....1359
 Mechanics of high speed twisting. Part I:
 Theoretical analysis of belt twisting.....1360
 Mathematical foundation of the method used in
 computation of the tensile force in threads moved
 in viscous fluid.....1361
 Elastic strings under vertical loads.....2383
 Multiple equilibria of elastic strings under central
 forces: Highly singular nonlinear boundary value
 problems of the Bernoulli.....2384
 Statistical theory of the strength of fiber bundles...3534
 Iterative solution of a non-linear boundary value
 problem for a rotating string.....8163

258-E Ropes, cables, & belts

- Static analysis of geometrically and physically
 nonlinear cable-beam structures.....330
 Numerical simulation of towed cables.....2385
 Stresses in multilayered cables.....6083
 Nonlinear and hysteretic twisting effects in ocean
 cable laying.....6084
 The numerical solution of the pre-elimination models
 of cable configurations.....7147
 Elasto-plastic behaviour of a flat net.....7148
 Non-uniformity of loads acting on lift rope bands.....7149

258-F Beams, (bending & torsion)

- An updated Lagrangian formulation for Timoshenko
 beams including non-conservative loads for
 divergence-type systems.....331
 Flexure of beams with certain curvilinear cross
 sections.....332
 Constant twist deformations of cables.....333
 Carrying capacity of fibre bundles with varying
 strength and stiffness.....1362
 On a simple variational analysis of small finite
 deformations of prismatical beams.....2386
 The problem of elastica of a thin straight and
 prismatic rod with constant initial twist.....2387
 A second order theory for large deflections of
 slender beams.....2388
 Theoretical and experimental investigation of the
 nonlinear torsion and extension of initially
 twisted bars.....3535
 A note on broken pencil points.....3536
 Concerning the Rayleigh-Ritz treatment of Flugge's
 equations.....3537
 Relaxation of a rectangular beam and circular shaft...3538
 Shear analysis of thin-walled rods of variable
 cross-section.....3539
 Inelastic torsion of plane rods.....6085
 Torsion of a rectangular beam with circular cavities..6086
 Torsion of rods of hardening material with almost-
 circular cross section.....6087
 Numerical calculation of torsional problem for
 circular shaft with variable diameters using non-
 orthogonal curvilinear coordinates.....6088
 On singularities of the stress function at the
 corner points of the transverse cross-section of a
 twisted bar with a thin reinforcing layer.....7150
 Simplified discrete method for the design of helical
 rectangular beams of very large width.....8164
 Computation of statically indefinite beams having
 variable moments of inertia by means of
 approximate polynomials.....9214
 The method of evaluating the moments applied to the
 pole during the pole-vault.....11240
 Evaluating the limiting state of shearable elements..11241

258-G Beams on foundations

- An elastic beam contained in a frictionless channel...3540
 Bending of a free beam on an elastic foundation.....3541
 An analytical and experimental investigation of rail
 fastening systems in travelling cranes.....6089
 The flexure of an infinite strip of finite width
 embedded in an isotropic elastic medium of
 infinite extent.....8165

- Torsion of a long cylindrical elastic bar partially
 embedded in a layered elastic half space.....9215
 Single-loaded elastic beams on non-linear continuous
 foundations.....9216

258-H Thin walled beams

- A finite element model for thin-walled members.....1363
 The elastic theory of thin-walled open cross
 sections with local deformations.....2389
 Asymptotic behavior of the flexure of a thin
 crosspiece at small loads.....2390
 Nonlinear analysis of thin walled bars of open
 cross-section.....4618
 On the torsional rigidity for a hollow shaft with
 outer or inner keys.....6090
 Folded plates with deformable end cross-sections.....6091
 Mechanism of action of thin-walled steel plate
 girders during loading processes.....6092
 The effects of shear deformations on the shear
 centre of open-section thin-walled beams.....8166
 Initial imperfection shape and material properties
 and their influence on non-linear behaviour of box
 girder compression flanges of steel structures.....8167
 The application of the thin-walled box beam element
 to multibox bridge analysis.....8168
 A Vlasov theory for fiber-reinforced beams with
 thin-walled open cross sections.....8169
 Elastoplastic slender web subjected to compression—
 Incremental method.....8170
 Analysis of total deflection of reinforced concrete
 box beams under repeated loading.....9217
 To question of non-uniformity of stress distribution
 in sections of steel box-beams of load-carrying
 bridge structures.....10252
 The geometric non-linear analysis of thin-walled
 structures by finite strips.....11242
 Analysis of thin-walled structures by finite strip
 and finite layer methods.....11243
 The behaviour of a channel cantilever under combined
 bending and torsional loads.....11244

258-I Anisotropic beams

- Analysis of curved laminated beams of bimodulus
 composite materials.....3542
 Boundary layer problems in the bending of
 orthotropic beams.....8171
 Deflection of thick beams of multimodular materials..9218
 Stress analysis in multilayered beams under
 transverse dynamic bending.....12279

258-J Nonhomogeneous beams

- Some tests on a new type of composite column.....6093

258-K Nonuniform beams

- Bending of laminated thick beams of bimodular
 material.....1364

258-L Curved beams & rings

- Pure twist of a solid circular ring sector.....334
 Nonlinear finite element computation of the
 equilibrium, stability and motion of the
 extensional beam and ring.....2391
 State of stress in a circular ring inserted in a
 circular hole of an extended plate.....2392
 Free rotation of a circular ring about a diameter...2393
 Stress analysis of helical coil springs.....3543
 Practical analysis of the continuous beam curved in
 plan by the force method.....4619
 Maximum stresses and flexibility factors of smooth
 pipe bends with tangent pipe terminations under
 in-plane bending.....4620
 General solution of multi-valued displacement
 problem of an eccentric circular ring.....4621
 A strip method for the stress analysis of helicoidal
 systems.....6094

- A method for determining the permissible loading of brick and masonry arches.....8172
 A direct method for the stress analysis of the ring beam and shell of a cooling tower.....11245

258-M Rotating shafts

- The equilibrium states of a heavy rotating column.....4622

258-Y Computational techniques

- Galerkin method as a tool to investigate the planar and non-planar behavior of curved beams.....335
 A finite element method for elastic-plastic beams and columns at large deflections.....3544
 Numerical formulations of elasto-viscoplastic response of beams of accounting for the effect of shear.....9219
 A simple element for static and dynamic response of beams with material and geometric nonlinearities.....11246

260 Plates, Shells, and Membranes

260-A General theory

- Investigations of axisymmetric deformation of geometrically nonlinear, rotationally orthotropic, circular plates.....336
 Large deflections of rectangular plates.....337
 A theory of shells with small strain accompanied by moderate rotation.....1365
 Linear theory of thin shells on the basis of the concept of added vectors.....1366
 An integral equation approach to finite deflection of elastic plates.....2394
 A note on two-dimensional finite-deformation theories of shells.....2395
 An edge problem having no singularity at the corner.....4623
 Periodic and bi-periodic solutions of equations of the engineering theory of elasticity of a cylindrical shell.....4624
 Realization of nonaxisymmetrical moment-free state in shells of revolution.....6095
 Comparison of the calculations of three-convolution circular arc corrugated diaphragms by toroidal shell theory and by orthogonal anisotropy plate theory.....10253
 Refined theory of shells with allowance for curvature of the normal.....10254
 A refined theory for isotropic plates.....11247
 Incremental formulation of the non-linear theory of thin shells in the total Lagrangian description...12280

260-B Nonlinear & finite deformation theory

- Studies of nonlinear theories for thin shells.....338
 The large deflection problem of circular thin plate with variable thickness under uniformly distributed loads.....339
 Non-linear dynamic analysis of shallow spherical shells on elastic foundations.....340
 Highly non-linear cylindrical deformations of rings and shells.....341
 An existence theorem for a non linear shell model in large displacements analysis.....1367
 Numerical plastic shakedown analysis of plates and shells of revolution by equilibrium finite elements.....1368
 Refined theory of plates for finite deflections.....1369
 Variational solutions for the nonlinear deflexion of an annular membrane under axial load.....2396
 On the Dirichlet problem for the Marguerre equations..2397
 The nonlinear characteristics of U-shaped bellows - Calculation by the method of perturbation.....4625
 Large deflection of circular plate under compound load.....4626
 Finite deflection analysis of transversely loaded annular plates.....7151
 Basic nonlinear and linearized equations of the theory of imperfect ribbed shells of revolution.....7152

- A method of constructing deformation characteristics in nonlinear shell theory.....7153
 Non-linear bending of annular sector plates using a matrix method.....8173
 The large elastic deflection of thin strips in V-die bending and the onset of plasticity.....8174
 Geometrically nonlinear theory of viscoelastic multilaminate piezoelectric plates and shells.....10255
 Geometrically nonlinear analysis of plates and shells using perturbation techniques and incremental procedures.....11248
 Nonlinear equations of thin shell theory.....11249
 Incremental model for the large deflexion of elastoplastic plates.....12281

260-C Plates (flexure & torsion)

- Further applications of the singularity function method to plate problems.....342
 Analysis of symmetrically loaded thin circular plates.....343
 Basic principles of plate theory (Book).....1370
 Bending of plates based on improved theory.....1371
 On minimum-principles for the initial-boundary-value problem of elastic-plastic plates with moderate rotations.....1372
 Large deflection of a circular plate under a concentrated load - a new approach.....1373
 Investigation of the flexure of a rectangular plate with mixed boundary conditions, taking account of transverse shear.....2398
 Solution of the bending problem of a circular plate with a free edge by using paired equations.....3546
 Elastic state of a plate with a circular plug and a rectilinear thin elastic inclusion.....3547
 The calculation of bending and stability of a thin rectangular plate for variable rigidity.....3548
 A free boundary value problem in plate theory.....3549
 Initially stressed thick plates subjected to a moving load.....3550
 A simple, refined theory for bending and stretching of homogeneous plates.....4627
 Optimization of openings in plates under plane stress.....4628
 A twelfth order theory of transverse bending of transversely isotropic plates.....4629
 Large deflection analysis of clamped annular sector plates.....6096
 On the asymptotic theory of plates.....6097
 Bending of plate in form of annular sector under combined action of lateral loads and in-plane forces.....6098
 Approximation of non-unique solutions of a homogeneous elastic plate model.....6099
 Closed-form, axisymmetric solution of the von Karman plate equations for Poisson's ratio one-third.....6100
 Influence of initial deflection shape on behaviour of plate subjected to multiple critical eigenload...6101
 Asymmetric bending of corner-supported rectangular plates.....6102
 Use of the method of continuing the solution with respect to the length of the segment of integration in calculations for corrugated circular plates.....6103
 Problem on the contact of two elastic plates.....7154
 On the theory of Berger plates.....7155
 Solution of the bending problem of elastoplastic plates.....7156
 Bending of cracked plate under shearing forces.....7157
 Kantorovich method for parallelogram bending plate...7158
 State of stress of plate with a thin-walled inclusion along the arc of a circle.....8175
 A systematic development of corrected plate equations.....8176
 Analytical solution, with boundary collocation, of Kirchhoff's differential equation for the infinitely extended solid plate with articulated hole edge support.....8177
 Ultimate load behaviour of stiffened web panels subjected to combined stress.....8178
 A nonlinear theory for elastic plates with application to characterizing paper properties.....9221
 A new model for thin plates with rapidly varying thickness.....9222

- A simple model of elastic-plastic plates.....9223
 A new, comprehensive theory for bending and buckling
 of stiffened plates.....9224
 Classification and unfolding of sequential
 bifurcations.....10256
 An asymptotic method for construction of plate
 theories: Cylindrical bending of a homogeneous
 plate.....10257
 Load carrying capacity of perforated plates in
 bending.....10258
 Large deflections of thin orthotropic plates - A new
 approach.....10259
 Full-range response of uniformly loaded clamped
 circular steel plates: comparisons between theory
 and experiment.....11250
 The stress functions of point loadings in Reissner's
 plate theory.....11251
 Strength of perforated plates subjected to in-plane
 loading.....11252
 On obtaining a solution to optimization problems for
 solid, elastic plates by restriction of the design
 space.....11253
 Contact between plates and unilateral supports.....12282
 A non-classical approximate bending theory of
 laminated plates.....12283
 Non-linear axisymmetric static analysis of
 orthotropic thin annular plates.....12284
 Suppression of anticlastic curvature in isotropic
 and composite plates.....12285
- 260-D Shells (membrane theory)
- Statics, formfinding and dynamics of air-supported
 membrane structures (Book).....344
 An accurate algorithm for computing the eigenvalues
 of a polygonal membrane.....345
 Homogeneity conditions for elastic membranes.....346
 The nonlinear circular membrane under a vertical
 force.....1374
 Nonlinear finite element shell formulation
 accounting for large membrane strains.....1375
 Design of membrane structures.....1376
 Isoperimetric inequalities in the torsion and
 clamped membrane problems for convex plane domains..3551
 Observations on the steady-state solution of an
 extremely flexible spinning disk with a transverse
 load.....3552
 Wrinkling phenomenon in structures. Part I: Model
 formulations.....3553
 A general solution for the ruled membrane shell.....4630
 Small deflections of linear elastic circular
 membranes under lateral pressure.....6104
 A viscoelastic correspondence principle for plane
 membranes subjected to lateral pressure.....6105
 Variation principles and bounds for the approximate
 analysis of plane membranes under lateral pressure..6106
 The distribution of pressure behind a soft contact
 lens.....7159
 Yield line analysis of rectangular hypar footings.....7160
 Nonlinear deflection of a thin elastic sheet on a
 liquid foundation.....8179
 A numerical solution of the membrane eigenvalue
 problem.....8180
 Exact solution for circular sandwich plate with
 large deflection.....8181
 An efficient analysis for thin plates of general
 quadrilateral shape subject to bending stresses....10260
 Pounding instability of air-supported elastic
 spherical membranes.....10261
 Nonaxially symmetric deformation of a torus.....10262
 Rotation shells of equal strength.....11254
 Influence of the change of rise on the deformation
 of an elliptical paraboloid with eccentric
 stiffeners.....11255
 Effect of out-of-roundness on stresses in a cooling
 tower.....11256
 Large axisymmetric deformations of elastic circular
 membranes.....12286
- 260-E Shells (bending theory)
- Contact problem of stress concentration calculation
 at cylindrical shell.....347
- End stress calculations on elastic cylinders.....348
 Determining optimum thickness of circular plate for
 flexure.....349
 Cylindrical shells of bimodulus composite material....1377
 Finite element computation of large rubber membrane
 deformations.....1378
 Energy-consistent large rotation shell theories in
 Lagrangian description.....1379
 Comparison of elasticity, shell core, and sandwich
 shell theories.....1380
 Analysis of circular cylindrical shells.....2399
 Determination of the meridian and stresses of the
 drop-shaped tank.....2400
 Stresses in an internally pressurized thin
 rectangular prismatic duct, (Research Note).....2401
 On some variational principles of shells.....2402
 Asymptotic behavior of the solution of elasticity
 theory problem for shell of positive curvature and
 small thickness.....2403
 Computerized analysis of shells - Governing
 equations.....3554
 Imperfect, laminated, cylindrical shells in torsion
 and axial compression.....3555
 Basic relations for piezoelectric shells of variable
 stiffness.....3556
 Load-carrying capacity of metal shells with weakened
 sections.....3557
 Limiting point load applied to an arbitrary point of
 a shell.....3558
 Clamped spherical shell subject to partially applied
 hydrostatic pressure.....3559
 Nonlinear bending and collapse analyses of a poked
 cylinder and other point-loaded cylinders.....4631
 Shell analysis with assured convergence.....4632
 On some treatment of the equations of motion for
 cylindrical shells based on an improved theory.....4633
 Deformation and strength of orthotropic ring-
 stiffened cylindrical shells under dynamic
 compressive loads.....4634
 Variational inequalities in the theory of hollow
 shells.....4635
 Axisymmetric bending of axisymmetric shells.....6107
 Three-dimensional stressed state of longitudinally
 corrugated elastic cylinders.....6108
 Description of finite deformations of thin shells by
 means of coordinates of the reference and actual
 configurations.....6109
 Determination of the width of a boundary layer from
 the condition of minimum energy.....6110
 An approach to the solution of geometrically
 nonlinear problems of applied shell theory.....7161
 Bending torsion of circular cylinder with radial
 crack system.....7162
 One class of contact problems for a cylindrical
 shell.....7163
 Nonaxisymmetric deformation of flexible variable-
 thickness conical shells.....7164
 Shells of revolution with local deviations.....9220
 Displacements and stresses in cylindrical shells
 based on an improved theory.....9225
 A Flugge-type theory for the analysis of anisotropic
 laminated non-circular cylindrical shells.....9226
 General helicoidal shells undergoing large, one-
 dimensional strains or large inextensional
 deformations.....9227
 Non-linear analysis of pipes and shells.....9228
 On the potential boundary load in the nonlinear
 theory of thin shells.....9229
 On the torsion of the slit circular cylindrical
 shell.....9230
 An approximate method of estimation of bending
 stresses in circular cylindrical shells under
 tension.....9231
 Developments in thin-walled structures - 2 (Book)....10263
 Deformation and stress in a cylindrical shell
 hanging on ropes.....10264
 Lagrangian description and incremental formulation
 in the non-linear theory of thin shells.....10265
 The method of composite expansions applied to
 boundary layer problems in symmetric bending of
 the spherical shells.....10266
 Stressed state of anisotropic shells of revolution
 with transverse shear.....10267
 Approximate method of calculations for a helically
 corrugated tube.....10268

- Stress-strain state of tubular shells under uniform pressure.....10269
 Bending of a conoidal shell.....11257
 The construction of a generalized theory of shells from thermopiezoelectric material.....11258
 Bending of a freely supported plate in the presence of cracks.....11259
 Solutions of equations for loaded axially symmetric plane circular membranes.....11260
 Description of the simple edge effect by shell theory and by the three-dimensional theory of elasticity.....11261
 Stress-strain state of shell-like rocket engine structures with viscoelastic filler of arbitrary shape.....12287
 On elastomechanics of thick composite shells.....12288

260-F Anisotropic membranes, plates, & shells

- Bending of a seminfinite anisotropic plate weakened by curvilinear cuts.....350
 Stresses in rectangular cantilever crystal plates under transverse loading.....1381
 The two-dimensional, linear orthotropic plate.....1382
 Solvability of boundary-value problems of the generalized theory of anisotropic shells.....2404
 On anisotropic continuous damage of plates in flexure.....4636
 A boundary-layer theory for the orthotropic plate.....4637
 Approximate methods for the solution of problems of stress concentration near holes in orthotropic plates made out of composite materials. 4.
 Stress concentration in plates made out of directionally reinforced fiber composites.....4638
 Optimal accumulators of mechanical energy of the shell type, prepared by winding.....4639
 Anisotropic cylindrical shell element based on discrete Kirchhoff theory.....6111
 Optimum quasi-rectangular holes in infinite orthotropic plates under inplane loading.....6112
 Effect of shear modulus on the elastic behavior of strongly anisotropic plates.....6113
 Choice of optimal orientation of axes of elastic symmetry for an orthotropic plate.....6114
 Nonlinear static and transient analysis of orthotropic thin circular plates with elastically restrained edge under central load.....7165
 Contact rigidity of laminated cylindrical shells.....10270
 Thin rectangular simply supported bimodular laminated plates on elastic foundations - some exact flexural results.....10271
 Numerical solution of nonlinear problems of the axisymmetric deformation of laminar anisotropic shells of revolution.....12289
 Problems of the strength of shell designs fashioned from wound composites.....12290
 Stressed state and energy capacity of rotating shells built from composites wound along geodesic trajectories.....12291
 Analytical solutions to problems of optimum reinforcement for multilayer plates made of composite materials.....12292

260-G Stiffened & sandwich plates & shells

- Analysis of laminated shells with laminated stiffeners using rectangular shell finite elements...351
 On the problems of sandwich shells having the form of a surface of revolution and face layers of non-equal thicknesses.....352
 Three dimensional stress state in an internally-pressurized hollow cylinder with a reinforcing ring.....353
 Calculation of the stress-strain state of a composite pressure cylinder with an elastic interlayer between the shell and flange.....354
 Influence of filler stiffness on the thermoplastic stress state of cylindrical sandwich shells.....355
 A corrugated core theory of sandwich plates.....1383
 On the accuracy of interlaminar stress calculation in laminated plates.....1384
 Stress state of a two-layered cylindrical shell caused by assembly of cowlings with deviations from circular shape.....1385

- Hybrid-stress eight-node elements for thin and thick multilayer laminated plates.....2405
 On the three dimensional analysis of thick laminated plates.....2406
 Effect of initial residual stress on bending stress-strain relation of laminated inhomogeneous metals...2407
 Pure plastic bending of sheet laminates under plane strain condition.....2408
 Shell-core method for the analysis of a long circular cylindrical sandwich shell subjected to axisymmetric loading.....2409
 Solving nonlinear boundary-value problems of the statics of flexible laminated shells in the supercritical region.....3545
 Stress analysis of multilayered plates around circular holes.....3560
 Effective rigidities of composite plates.....3561
 On the validity of sandwich shell theory.....3562
 Study of the bending of a multilaminar plate on the basis of finite-shear theory.....3563
 Analysis of stressed state of laminate-sound cylindrical shell with friction taken into account...3564
 Stress-strain state of orthotropic multilayer shells...3565
 Membrane theory for layered ellipsoidal shells.....4640
 A parametric approach for the stress analysis of orthogonally stiffened rectangular plates.....4641
 Interaction between a bonded stiffener and a plate fashioned from a composite material.....4642
 Solution of the problem of bending of a laminar inhomogeneous hollow cylinder.....4643
 The ultimate load behaviour of longitudinally stiffened web panels subjected to shear stress.....6115
 Ring stiffener behaviour and its interaction with cylindrical panel buckling.....6116
 Optimum rigidity of a longitudinal rib stiffening a compression plate.....6117
 A note on the cracked plates reinforced by a line stiffener.....6118
 Stress-strain state of a cylindrical shell reinforced with ribs.....7166
 Numerical study of the stress-strain state of one- and three-layer plates and shells of complex geometry.....7167
 Investigation of the elastic equilibrium of corrugated cylinders of finite size.....7168
 Constructing a theory of bending for laminated plates having layers with significantly differing characteristics.....8182
 Finite element analysis of three layer sandwich plates.....10272
 An equilibrium method for assessing the strength of plate girders with reinforced web openings.....11262
 Stress state of a transversely isotropic corrugated cylinder of finite dimensions.....11263
 Investigation of the stress-strain state of cylindrical shells on the basis of equations of the theory of elasticity.....11264
 Stressed state of multilayer thick-walled longitudinally corrugated cylindrical shells.....11265
 The finite deflection equations and linear stability problem of shallow sandwich shells of composite materials.....12293
 A hand calculation of the shear lag effect in stiffened flange plates.....12294

260-H Plates & shells on foundations

- Solutions of plates on a heterogeneous elastic foundation.....1386
 Contact stresses in two elastic bodies (Elastic bodies are rectangular plates).....1387
 Cylindrical flexure of plate on linearly deformable base with action of longitudinal forces.....2410
 Variational formulation of a contact problem for linearly elastic and physically nonlinear shallow shells.....3566
 Design of plates reinforced with equally stressed fibers of constant cross section.....3567
 Initial relationships for an investigation of the behavior of thin-walled plates with physicochemical peculiarities in an oblique-angled coordinate system.....3568
 Bending of a wall in an elastic half-plane.....3569

- Nonlinear stress-strain and strength response of axisymmetric bimodulus composite material shells....4644
- Non-linear dynamic analysis of orthotropic annular plates resting on elastic foundations.....8183
- Complete solutions of nonhomogeneous plastic plates resting on nonrigid beams.....10273
- 260-I Thick plates & shells**
- Subregion generalized variational principles for elastic thick plates.....356
- Thick rectangular plates-I. The generalized Navier solution.....1388
- Thick rectangular plates-II. The generalized Levy solutions.....1389
- Axisymmetric stress state of thick-walled elastic near-spherical shells.....3570
- The thick-walled plane hollow cylinder under arbitrary loading.....7169
- Investigation of the stress state of thick-walled cylindrical shells with nonuniform boundary conditions.....7170
- The creep in moderately thick shells of revolution under asymmetrical loading.....9232
- Stress state of thin-walled noncanonical nearly spherical shells.....10274
- Three-dimensional elastic stresses in thick plate. (Comparison with classical plate theory solution).....12295
- An elastic circular finite cylinder under torsion by a pair of annular rigid stamps.....12296
- 260-J Inflatable membranes**
- Experimental stress analysis of a thin walled pressurized torus loaded by contact with a plane....4645
- 260-K Rotating discs, blades, & shells**
- Stresses and displacements in a rotating skew-faced disk.....2411
- Elasto-plastic analysis of an anisotropic rotating disc.....3571
- Tresca's yield condition and the rotating disk.....3572
- Stress analysis of rotating disc with FEM—Emphasis on stresses at contours of dissimilar holes at the rim.....4646
- Stress distribution in a rotating elastic-plastic tube.....6119
- Investigation of the stress-strain state of turbine blade root attachments by the finite-element method.....6120
- Method of calculating the strength of rotating components of machines with a specific type of symmetry.....6121
- Approximate closed solutions of the axisymmetric problem of deformation of an inhomogeneous disk of arbitrary profile.....6122
- The elastic-plastic stress distribution in the rotating annulus and in the annulus under external pressure.....12297
- 260-Y Computational techniques**
- Hybrid-stress reduced Mindlin isoparametric elements for the analysis of thin plates.....357
- Geometrically nonlinear formulation for the curved shell elements.....1390
- Alternate stress and conjugate strain measures, and mixed variational formulations involving rigid rotations, for computational analyses of finitely deformed solids, with application to plates and shells - I.....1391
- Finite element analysis of 3-ply laminated conical shell for flutter.....1392
- An optimally integrated four-node quadrilateral plate bending element.....1393
- Quality of trial functions in quadratic isoparametric representation of an arc.....1394
- A solution to the C continuity problem in plate bending.....2412
- FORTRAN computer program for inextensional bending of a doubly curved shell triangular element.....2413
- A finite strip method for the geometrically nonlinear analysis of plate structures.....2414
- Nonlinear bending analyses of heated sandwich plates and shells by the boundary element method.....2415
- A note on locking in a shear flexible triangular plate bending element.....2416
- A curvilinear triangular finite element for plate bending by a hybrid method of assumed displacements supplemented with assumed stresses.....3573
- Analysis of swept plates with structural reduction using transition element concept.....3574
- A natural numerical differential geometry scheme for a doubly curved shell element.....3575
- Numerical solution of the plate bending and free vibrations problems.....3576
- Analysis of finite element methods for the nonlinear dynamic analysis of shells.....3577
- Discrete Kirchhoff plate element and work equivalent loads.....3578
- Method of finite elements in the solution of boundary-value problems for anisotropic plates made out of composite materials. 1. Refined theories of anisotropic plates and finite-element approximations.....3579
- Optimal plastic design of axisymmetric solid plates with a maximum thickness constraint.....4647
- Approximate displacements of exact membrane actions in a shell triangular element.....4648
- Penalty resolution of the Babuska circle paradox.....4649
- Analysis of shallow shells by spline finite strip method.....4650
- The analysis of elastic-plastic plates: A quadratic programming problem and its solution by finite elements.....6123
- A numerical method for solving orthogonally anisotropic rectangular plates with variable thickness.....7171
- A finite element method for construction of dynamical theories of layered plates.....8184
- An optimally constrained 4 node quadrilateral thin plate bending element.....8185
- A quadratic Mindlin element using shear constraints...8186
- Deflection and stress analysis of orthotropic plates in flexure.....8187
- A conoidal shell analysis by modified isoparametric element.....8188
- A boundary-integral equation method for bending of orthotropic plates.....8189
- Hellinger-Reissner principles for plate and shell finite elements.....9233
- An assumed stress hybrid curvilinear triangular finite element for plate bending.....9234
- An invariant eight-node hybrid-stress element for thin and thick multilayer laminated plates.....9235
- Solution of some plate bending problems using the boundary element method.....9236
- On the analysis of unilaterally supported plates by finite element models.....9237
- Computation of laminar plate systems using the method of finite bands.....9238
- Comparison of certain analytical-numerical methods on the example of statical analysis of plates of arbitrary shape.....10275
- Choice of collocation points for axisymmetric nonlinear two-point boundary value problems in statics of shallow spherical shells.....10276
- Application of series-expansion method as a parameter for physically nonlinear problems in the theory of shallow shells.....10277
- An application of the spline finite points method to the static, dynamic and stability problems of circular cylindrical shell.....10278
- Comparative numerical analysis of axially symmetric shell-plate structures by the displacement and hybrid methods of finite elements.....10279
- Effective nonlinear analysis of arbitrary thin shells by simple finite elements.....11266
- Some comments on the paper "Problems of nonlinear bending of circular plates solved by the method of consecutive loading".....12298
- 260-Z Experimental techniques**
- Method of measuring large elastic-plastic strains of dynamically loaded plates and shells.....7172

262 Structural Stability (buckling, postbuckling)**262-A General theory**

- Effect of static preloading on the dynamic stability of structures.....358
- Tensile stability of cylindrical membranes.....359
- Buckling of an axially compressed incompressible half space.....360
- Three-dimensional theory of inelastic stability (General questions).....1395
- Phenomenon of internal instability in mixtures.....1396
- The idealized structural unit method and its application to deep girder structures.....3580
- On buckling paradox.....4651

262-B Nonlinear & finite deformation theory

- Symmetry and bifurcation in three-dimensional elasticity, Part I.....2417
- Inelastic buckling of thin, prismatic flat-walled structures.....4652
- On the crushing mechanics of thin-walled structures...6124
- A stability problem of nonlinear elasticity in plane strain and some applications.....7173
- Buckling problems in finite plane elasticity-harmonic materials.....8190
- Bifurcation and stability of irreversible systems obeying to the maximum dissipation principle.....11267

262-C Postbuckling theory

- Postbuckling behavior of rectangular orthotropic plates with two free side edges.....361
- Buckling of a heavy lamina by an edge displacement.....362
- Postbuckling state of a ring under three static pressures.....1397
- Note on the postbuckling analysis of cross-ply laminated plates with elastically restrained edges and initial curvatures.....2418
- Post buckling behavior of transverse cracked columns.....3581
- Imperfection post-buckling analysis of cracked columns.....3582
- Postbuckling analysis of moderately thick elastic circular plates.....3583
- Buckling and postbuckling of the lying sheet.....9239
- Post-buckling behavior of a thick circular plate.....9240
- Postbuckling behavior of anisotropic laminated plates under pure shear and shear combined with compressive loading.....10280
- On the stability and postbuckling behaviour of elastic beams.....11268

262-D Imperfection sensitivity

- Plastic symmetry of Koorda's frame.....2419
- Buckling and postbuckling of imperfect cylindrical shells under axial compression.....3584
- Computation of imperfection-sensitivity at two-fold branching points.....3585
- Stability of the planar form of bending a compound bar under the effect of initial irregularities.....3586

- Instability of cantilever beams with non-linear elements: Butterfly catastrophe.....11273
- Elastic interaction of local and lateral buckling in beams.....11274
- The ultimate load sensitivity of lipped channel columns to column axis imperfection.....11275
- Lateral, local and distortional buckling of I-beams...11276
- Divergence of cantilever columns under combined conservative and follower loads.....12301

262-F Rings & arches

- On the buckling and imperfection-sensitivity of arches with and without prestress.....1402
- Stability of the natural shapes of sinusoidally loaded uniform shallow arches.....1403
- Postbuckling behavior of inelastic inextensional rings under external pressure.....3590
- Instability analysis of pressure-loaded thin arches of arbitrary shape.....3591
- Algorithm of stability analysis for variable-thickness rings under nonuniform load.....7176
- Buckling of masonry arches.....8193
- Buckling of thin concrete domes.....8194
- Initial buckling of curved panels of generally layered composite materials.....10282
- Buckling of composite plates.....10283
- Postbuckling behaviour of curved panels of generally layered composite materials.....10284
- Stability of an incompressible space with a vertical circular cylindrical cavity containing a fluid in the case of large uniform subcritical deformations...10285
- Stability of a rotating ring under external pressure.12302

262-G Framed structures

- Instability analysis of space trusses.....3592
- On the interaction between local and overall buckling of an asymmetric portal frame.....4655

Displacement analysis in elastic-plastic frames at plastic collapse.....	6128
On some stability problems of steel box girder bridges.....	6129
Stability of deck flooring with a biregular system of beams.....	6130
3rd International Colloquium on Stability, Proceedings of the First Session, Timisoara 16th October 1982 (Book).....	7177
Optimization of shallow trusses against limit point instability.....	7178
The influence of axial and shear deformations on buckling of arches and frames due to arbitrary loading.....	9242

262-H Plates

Generic buckling curves for specially orthotropic rectangular plates.....	366
Postbuckling behavior of a thick plate.....	367
Stability of thin plates with cracks under biaxial tension.....	368
Model studies on plate girders.....	1404
A finite strip analysis of locally buckled plate structures subject to nonuniform compression.....	1405
Numerical analysis of local instabilities in elastic and elasto-plastic prismatic plate assemblies.....	1406
Buckling of sinusoidally corrugated plates under axial compression.....	1407
Elastic buckling of isotropic triangular flat plates by finite elements.....	2424
Effect of stiffener restraint on plate stability.....	2425
Effect of transverse shear deformation on anisotropic plate buckling.....	3593
Effect of shear deformation on the yielding of circular plates.....	3594
Effect of initial imperfections in geometry on the elastic-plastic stability of a thin annular plate.....	3595
Method of averaging in the problems of stability of elastic plates processing fine periodic structure.....	3596
Postbuckling of orthotropic composite plates loaded in compression.....	4656
Buckling and vibration of any prismatic assembly of shear and compression loaded anisotropic plates with an arbitrary supporting structure.....	4657
Doubly symmetric interactive buckling of plate structures.....	4658
Buckling of thin plates using the collocation least-square method.....	4659
An equilibrium model finite element analysis for buckling of moderately thick plates.....	6131
Repeated buckling tests of stiffened thin shear panels.....	6132
Asymptotic approximations for buckling loads of stiffened rectangular plates with various edge conditions.....	6133
Buckling of composite plates with a free edge in edge-wise bending and compression.....	7179
The stability of a rectangular three-layer plate under unidirectional lineary variable compression.....	7180
Elastic buckling of isotropic triangular flat plates by finite elements.....	8195
Stability of an anisotropic trapezoidal plate due to large deflections.....	8196
Incipient buckling of elastoplastic thin plates.....	10286
Stability and postcritical analysis of elastic-plastic annular plate.....	10287
The stability of annular sandwich plates.....	10288
Stability of annular sector plates with variable thickness.....	10289
Influence of additional point support at any point in a plate on stability of the thin rectangular plate.....	10290
Elastic buckling of perforated plates under shear.....	11277
Stability of annular plates under shear.....	11278
Viscoelastic analysis of laminated plate buckling.....	12303
Hydroelastic instability of infinite strips under shearing load on an elastic foundation.....	12304
Bifurcation theory of the time-dependent von Karman equations.....	12305
Effects of localized imperfections on compressive strength of long rectangular plates.....	12306
Stability of plates near a sharp defect in an initial biaxial plane stress state.....	12307

Stability analysis for simply supported rectangular orthotropic plates subjected to off-axis compressions by the finite element method.....	12308
---	-------

262-I Shells

Experimental investigation of the buckling of shallow spherical shells.....	369
A semi-analytical method for the post-local-torsional buckling analysis of prismatic plate structures.....	370
Dynamic instability of cylindrical shells under longitudinal kinematic perturbation.....	371
The creep effects of the buckling of shallow shells.....	372
On the transition from a diamond mode to an axisymmetric mode of collapse in cylindrical shells.....	373
Combined axial and pressure buckling of end supported shells of revolution.....	1408
Stability of flexible sloping shells in a temperature field.....	1409
Stability of thin-walled ribbed conical shells.....	1410
Stability of nonuniform spherical shells.....	1411
Shell stability.....	2426
Use of the Southwell method to predict buckling strengths of stringer stiffened cylindrical shells.....	2427
Buckling of anisotropic shells I.....	2428
Buckling of anisotropic shells II.....	2429
Post-buckling dynamic behavior of periodically supported imperfect shells.....	2430
Nonaxisymmetric bulging of nonhollow elastic shells of revolution.....	2431
Stability of reinforced toroidal panels in an external radial pressure.....	2432
Stochastic stability and nonstability of a linear cylindrical shell.....	3597
Stability of three-layered cylindrical shells with a discrete filler in axial compression.....	3598
Method of discrete approximation of the functional in stability problems of shells of revolution.....	3599
Experimental study of the stability of ribbed spherical shells under external pressure.....	3600
Geometrical theory of stability of shells.....	3601
Deformation and stability studies of thin-walled domes under uniform external pressure.....	4660
Method of orthogonal trial run to solve equations of shell stability.....	4661
Loss of stability by compressed longitudinally reinforced cylindrical shells in the case of finite displacements, with allowance for local buckling of stiffener plates.....	6134
Dynamic elastic buckling of complete spherical shells with initial imperfections.....	7181
Stability of a cylindrical sandwich shell under torsion.....	7182
Stability of three-layered spherical shells.....	7183
Some variational formulations for buckling analysis of circular cylinders.....	9243
Moisture and temperature effects on the instability of cylindrical composite panels.....	9244
Instability of laminated cylinders in torsion.....	9245
Finite polar dimpling of shallow caps under sub-buckling axisymmetric pressure distributions.....	10291
An elastic stability analysis for spherical shells.....	10292
Stability of triple-layer anisotropic cylindrical shells.....	10293
On design procedures for the buckling of cylinders under combined axial compression and external pressure.....	11279
On the determination of the propagation pressure of long circular tubes.....	11280
The effect of length: Diameter ratio on collapse of casing.....	11281
On the stability and post-buckling of thin elastic shells with unrestricted rotations.....	11282
Buckling behaviour of a liquid storage tank.....	11283
Equilibrium stability of an inside-out elastic sphere.....	11284
On symmetric buckling of a finite flat-lying heavy sheet.....	12309
On the non-linear buckling and post-buckling analysis of thin elastic shells.....	12310
Non-linear stability problem of an open conical sandwich shell under external pressure and compression.....	12311

- Imperfect spherical shell stability analysis based
on a refined buckling pattern.....12312
Stability of geometrically non-linear elastic-
plastic shells.....12313

accelerations.....2437
An integral equation method for non-self-adjoint
eigenvalue problems and its applications to non-
conservative stability problems.....6141
Multiple-parameter reduced basis technique for
bifurcation and post-buckling analyses of
composite plates.....6142
The FEM of lateral buckling of elastic beams
subjected to follower forces.....7192
Closed-form and asymptotic solutions for an
interactive buckling model.....9250
A way of estimating lower bounds for eigenvalues in
buckling and vibration problems.....10298
Modifications of Timoshenko's technique for
estimating buckling loads.....10299
Finite element method in structural stability.....11290

262-Z Experimental techniques

- Review of experimental techniques for thin-walled structures liable to buckling. Part I — Neutral and unstable buckling.....1416
 An experimental study on inelastic lateral-torsional buckling of H-shaped beam-columns permitted to sway.....6143
 Review of experimental techniques for thin-walled structures liable to buckling, Part II — Stable buckling.....8199

264 Electromagneto Solid Mechanics

264-B Continuum theory

- Three dimensional constitutive relations for ferroelectric materials in the presence of quasi-static domain switching.....380
 Acceleration waves in elastic dielectrics with polarization gradient effects.....381

264-C Magnetoelasticity

- The finite rotation parameter of a deformable body and gyromagnetic effect.....382
 Eigenvalue approach to magnetoelasticity.....383
 Magnetoelastic buckling of magnetically saturated bodies.....384
 Magnetoelastic plane waves in infinite rotating media.....3612
 The construction of two-dimensional vibration theory of finite length thin plate by means of asymptotic integration of magnetoelasticity equations.....6144
 Some aspects of vibrations of plates in a magnetic field.....8200
 Magnetoelastic stability and vibration of ferromagnetic thin plates in a transverse magnetic field.....9251
 On the law of energy conservation in the classical electrodynamics of deformable media—a generalization of the Poynting theorem.....10300
 On the problem of vibrations of non-linear-elastic electroconductive plates in transverse and longitudinal magnetic fields.....10301
 Efficiency of electromagnetic-acoustic excitation for radial resonances in metal rods with transducers of finite dimensions.....10302
 Use of harmonic analysis for inspection of ferromagnetic materials.....10303
 Magnetoelastic buckling of a beam of elliptic cross-section.....11291
 Equations of magnetoelastic vibrations of thin perfectly conducting plates.....11292
 Electromagnetoacoustic excitation of elastic longitudinal cylindrical waves in ferromagnetic bars.....11293
 Laws for harmonic magnetization components of cyclic magnetic reversals in ferromagnetic cores and the possibility of using them. I. Criterion of physical similitude.....11294
 A periodic deformational field within material of a d.c. yoke and its solution by a three-dimensional wave equation.....12319

264-D Electroelasticity

- A theoretical investigation of the electromagnetic radiation in development of a round crack in a dielectric.....11295
 One-dimensional finite amplitude pulse propagation in magnetized electrically conducting elastic media.....12320

264-E Piezoelectricity

- Free and induced oscillations in Poiseuille flow.....385
 Electrically excitable purely mechanical resonances in piezoelectric and ferroelectric materials — geometrical considerations.....2438

- Torsional oscillations of a finite inhomogeneous piezoelectric cylindrical shell.....4665
 Relations of electroelasticity for multilayer piezoceramic shells with thickness polarization of the layers.....6145
 On the application of the method of symbolic integration in the theory of piezoceramic shells.....8201
 On boundary conditions in the theory of piezoceramic shells polarized along coordinate lines.....8202
 Frequencies of piezoelectrically forced vibrations of electroded, doubly rotated, quartz plates.....9252

264-F Elastic stability in electromagnetic fields

- Certain characteristics of electrically excitable mechanical resonances in PZT 65/35.....11296
 On the static and dynamic stability of soft-ferromagnetic elastic plates.....11297

264-Y Computational techniques

- An accurate scalar potential finite element method for linear, two-dimensional magnetostatics problems.....2439

266 Solid Mechanics (basic)

266-B Structure & classification

- On the characterization of the pressure-sinkage relationship of snow covers containing an ice layer.....1417
 Working processes of cyclic-action machinery for soil deformation — Part I.....1418
 Stresses and displacements in cross-anisotropic soils.....2440
 An outline of soil and rock mechanics (Book).....4666
 Analysis of three-component soil structures.....10304
 Interaction of bed-parallel stylolites and extension veins in boudinage.....12321

266-C Constitutive relations & models

- A constitutive model for sand with anisotropic hardening rule.....1419
 Determination of the thermal diffusivity of a dry soil from the temperature in situ measurement.....3613
 A mathematical model for granular soils.....6146
 Plasticity model for inherently anisotropic behaviour of sands.....8203
 Parameter estimation of a static geotechnical model using a Bayes' approach.....8204
 Stress, dilatancy and fabric in granular materials.....9253
 On the stability of the Rendulic-Roscoe clay.....10305

266-D Pore pressure, phase movement

- Cyclic strength and deformation of normally consolidated clay.....386
 Axisymmetrical stress state of a gas-saturated mass in the vicinity of a spherical working.....387
 The application of the finite element method to solving Biot's consolidation equation.....2441
 Pore pressure response of earth dams in random seismic environment.....12322

266-E Mechanical properties

- Dynamic properties of soils from in-situ tests.....388
 A device for cyclic loading of soil specimens.....389
 Cyclic undrained stress-strain behavior of dense sands by torsional simple shear test.....4667
 Evolution of the bearing capacity of dry sand with its density.....10306

266-F Expansive clays

- Multi-laminate model of clays - A numerical evaluation of the influence of rotation of the principal stress axes.....3614
- Experimental study on thermal properties of frozen soils.....3615
- Study in physics of clay behaviour.....7193
- Strain fields in and around boudins in a clay experiment.....8205
- Peculiarities of the nonequilibrium distribution of moisture in the freezing and thawing of disperse soils.....10307

266-G Consolidation, settlement, & compaction

- Nonlinear analysis of optimized structure with constraints on system stability.....390
- A theory of anisotropic consolidation.....391
- Cap models for clay strata to footing loads.....392
- Fracture initiation pressures in permeable poorly consolidated sands.....2442
- The consolidation problem treated by a consistent (static) finite element approach.....3616
- Relationship between clayey soil's consolidation characteristics and its pore water properties - Laboratory consolidation test.....4668
- Time effects on the lateral soil resistance to pipeline movement.....6147
- Forecasting deformation of swelling soils.....6148
- Mathematical model of soils considering influence of primary and secondary consolidation.....7194
- On the theory of consolidation with double porosity - III. A finite element formulation.....8206
- Rapid expansion of a cylindrical cavity in a rate-type soil.....8207
- Rapid shearing in a rate-type soil surrounding a cylindrical cavity.....8208
- An investigation of numerical errors in the analysis of consolidation by finite elements.....12323
- Elastic consolidation around a lined circular tunnel.....12324

266-H Soil & sand liquefaction

- Repeated load test set-up for determining plastic deformation characteristics of subgrade soil.....2443
- Water migration induced by thermal loading of a granitic rock mass.....2444
- A mixture model for the compaction of saturated sand.....10308

266-J Plasticity, viscoelasticity, & viscoplasticity

- Finite element analysis of elastic-plastic layered soil using discrete Fourier series expansion.....393
- Elastic-plastic shear deformation of frictional granular materials.....1420
- Slip zones for discontinuities parallel to circular tunnels or shafts.....1421
- Axisymmetrical elasto-plastic behaviour of reinforced earth.....3617
- Extrusion tests on plastic soils.....7195

266-K Dynamics

- Rapid gravity flow of cohesionless granular materials down inclined chutes.....394
- Slope safety prediction under static and seismic loads.....1422
- Dissipation of blast waves and the dynamic compressibility of soils.....6149
- Simplified dynamic model of subsoil.....8209

266-L Frost & permafrost

- Sublimation of ice and vaporization of dispersed nonfrozen water at subzero temperatures.....395
- Undisturbed sampling of saturated sands by freezing.....397
- Freezing effects on soils: Comprehensive summary of the ISGF 82.....3618
- Effects of salt concentration on strength and creep behavior of artificially frozen soils.....3619

- Comparison of U.S.S.R. codes and U.S. Army Manual for design of foundations on permafrost.....10309
- Uniaxial compressive strength of frozen silt under constant deformation rates.....12325
- Field dielectric measurements of frozen silt using VHF pulses.....12326
- Dielectric measurements of frozen silt using time domain reflectometry.....12327
- 266-Y Computational techniques

- Isotropic points and lines in strain fields.....8210
- A theory of finite strain variation through contrasting layers, and its bearing on cleavage refraction.....8211
- Theoretical strain patterns in ductile zones simultaneously undergoing heterogeneous simple shear and bulk shortening.....8212
- Complex strain patterns developed at the frontal and lateral tips to shear zones and thrust zones.....8213
- A probabilistic model for the persistence of early planar fabrics in polydeformed pelitic schists.....12328

266-Z Experimental techniques

- A multistage triaxial test for unsaturated soils.....396
- Description of a probe designed to measure the thermal properties of superficial layers of the soil. Results of a measurement campaign.....9254
- Deformation by solution-deposition, and re-equilibration of fluid inclusions in crystals depending on temperature, internal pressure and stress.....12329
- Microstructure and texture in experimentally folded single-layer rock salt.....12330

268 Solid Mechanics (applied)

268-B Shallow foundations

- Interactive analysis of foundations on horizontally variable strata.....6150
- Structural analysis of a circular raft on yielding soil.....6151
- Interaction between circular foundation mat of chimney and soil base.....7196
- Performance of cast-in-place concrete foundations in interaction with the soil.....9255

268-C Deep foundations, piles

- Prediction of load bearing capacity of a bored pile during its construction.....2445
- Foundation engineering (Book).....7197
- Nesushchaya sposobnost osnovanii portovikh sooruzhenii (Bearing capacity of foundations of harbour structures) (Book).....7198
- Interpretation of results of pile test loading based on graphic differentiation of the settlement versus load curve.....7199
- Analysis of pile bearing capacity on the basis of field load tests.....7200
- Investigation of thick slab (pile cap) behavior.....9256
- Statistical analysis of the axial elastic flexibility of piles.....9257
- Determination of the bearing capacity of a single pile based on in situ testing.....9258

268-D Machine foundations

- On the problem of the spring constants and natural frequency of vibrating foundations.....6152
- Method of dynamic earth pressure measurement under concrete footings of machines.....10310

268-E Anchoring

- Shape factor of the rigid footing.....4669

268-F Stability

- Undrained stability of shallow vertical holes.....1423
 Yield condition of oriented porous solid.....1424
 Discussion on: Significance of the probability of failure in slope engineering.....3620
 Slope failure probabilities based on Taylor's analysis.....6153
 Experimental investigation of properties of some structurally unstable soils.....6154
 Kinematically admissible stability analysis of slopes.....7201
 Probabilistic analysis of rock slope stability.....7202
 Determination of the limiting strength of soil under the tips of sunken shafts.....7203
 The effect of discontinuity persistence on rock slope stability.....8214

268-G Earth dams & embankments

- Evaluation of the accuracy of calculating the stability of slopes of earth dams in check calculations of slopes that failed.....2446
 Hydrostatic and hydrodynamic forces in stresses and strains analysis of earth dams by finite elements method.....7204
 Decoupling approximation to the evaluation of earthquake-induced plastic slip in earth dams.....8215

268-H Lateral earth pressures

- Analytical solutions for Terzaghi's wedge theory for earth pressure, and stability of cuts in c-soils.....2447
 Assessing the stability of a propped, in situ retaining wall in overconsolidated clay.....8216
 Selected methods of determining the earth pressure in connection with dimensioning of sheet pile walls.....9259
 Changes in earth stresses around a wellbore caused by radially symmetrical pressure and temperature gradients.....11298

268-I Excavating & tunnelling

- Back analysis of measured displacements of tunnels....4670
 Vibrations of tunnel structure and ground surface caused by running trains.....4671
 Working processes of cyclic-action machinery for soil deformation - Part II.....8217
 Interaction of compaction near mine openings and drainage of pore fluids from coal seams.....9260

268-J Highways, runways, & railways

- Flexible pavement evaluation and overlay design.....398
 Test results on ballasted tracks laid on subgrade of cutting and on reinforced soil subgrade on embankment.....4672

268-K Trafficability

- On the applicability of soil water finite difference models to operational trafficability models.....10311

268-Y Computational techniques

- Soil-structure interaction using periodic infinite elements.....7205
 Dynamic-stiffness matrix of soil by the boundary-element method: Conceptual aspects.....11299
 Dynamic-stiffness matrix of soil by the boundary-element method: Embedded foundation.....11300

268-Z Field testing & sampling

- Proceedings of the 4th International Conference on Applications of Statistics and Probability in Soil

and Structural Engineering held at the Università di Firenze (Italy), June 13-17, 1983 (Vol. 1, 2 & 3) (Book).....11301

270 Rock Mechanics

270-B Mechanical properties

- Non-associative constitutive laws for low porosity rocks.....1425
 Discontinuity frequency in rock masses.....2448
 Joint compliances as a basis for rock mass properties and the design of supports.....2449
 A physical modelling technique for simulating the behaviour of coal pillars.....2450
 A material model for inelastic rock deformation with spatial variation of pore pressure.....3621
 Rock anisotropy and the theory of stress measurements (Lecture Notes in Engineering, 2) (Book).....4673
 Elasticity and thermal expansion of a natural garnet up to 1,000 K.....7206
 Patterns of folding and strain influenced by linearly anisotropic bands.....8218
 Determination of the anisotropic elastic moduli of coal.....9261
 A method for evaluating the effect of crack geometry on the mechanical behavior of cracked rock masses...9262
 Methods for describing and determining rock stratification.....9263
 Changes in in situ ultrasonic properties of rock on strain relaxation.....10312
 The equivalent channel model for permeability and resistivity in fluid-saturated rock - a re-appraisal.....10313
 Time domain IP equipment and method for source discrimination.....12331
 Triboluminescence during frictional sliding of quartz glass.....12332

270-C Elasticity

- The intersected Mohr-Coulomb layer, compressed under frictional conditions between elastic half-spaces...1426
 A general harmonic coordinate transformation to simulate the states of strain in inhomogeneously deformed rocks.....8219
 Stress state of unbroken rock beds.....10314

270-D Viscoelasticity

- Acoustic emission during creep of brittle rock.....1427

270-E Plasticity

- The elasto-plastic constitutive relation of generalized cap model for rock medium.....399
 Rock bursting as a surface instability phenomenon....11302

270-F Anisotropy & nonhomogeneity

- Estimation of strength anisotropy using the point-load test.....1428
 A statistical method to evaluate homogeneity of structural populations.....2451

270-G Failure mechanisms

- Folding of rock layers under tracking surface loads...1429
 Fracture toughness of coal under quasi-static and impact loading.....2452
 Statistical analysis of rock mass fracturing.....2453
 Crack field characterization by ultrasonic attenuation—Preliminary study on rocks.....2454
 Time-independent and time-dependent deformation of small tunnels—III. Pre-failure behaviour.....2455
 The concept of "continuous failure state" triaxial tests.....4674

- Rock fracture mechanics (CISM Courses and Lectures no. 275) (Book).....8220
 A study of the mechanism of hydraulic fracturing.....9264
 Observations of crack growth in hard rock loaded by an indenter.....10315
 Stress fields and subsurface crack propagation of single and multiple rock indentation and disc cutting.....11303
 Numerical simulation of rock burst processes treated as problems of dynamic instability.....11304
 Echelon structure as a form of loss of stability of rock.....11305
- 270-I Rock strengthening (bolts, etc.)
 Synthetic resin grouted tube anchors.....4675
 A study of the behaviour of vertical rock anchors using the finite element method.....10316
- 270-J Drilling
 Stability of drill wells.....2456
 Thermal expansion and cracking of three confined, water-saturated igneous rocks to 800 C.....4676
- 270-K Comminution (blasting, grinding, etc.)
 On dynamic fracture of rock under bit impact loads.....400
 An analytical solution for underground structure-country rock dynamic interaction.....10317
- 270-L Excavations (tunnelling, etc.)
 Strength of gas-saturated rock mass around preparatory excavation.....401
 An empirical method for predicting the probability of chimney cave occurrence over a mining area.....2457
 Analysis of the volumetric stress state around a mine working of finite length.....4677
 Mining subsidence engineering, (translated by Fleming, R. F. S.) (Book).....10318
 Evaluation of excavation-induced changes in rock permeability.....11306
- 270-Y Computational techniques
 A comparison of two indirect boundary element formulations incorporating planes of weakness.....2458
 A finite element analysis of rock progressive failure and the program NOLM.....6155
 Finite strain estimation using "anti-clustered" distributions of points.....8221
 Modelling rock strength in three dimensions.....9265
 Two-dimensional strain from the orientation of lines in a plane.....12333
- 270-Z Experimental techniques
 Appropriate techniques for triaxial testing of saturated soft rock.....1430
 X-ray fractography on fatigue fractured surface.....2459
 A rapid field method for recording joint roughness profiles.....2460
 Continuous strain monitoring in the rock foundation of a large gravity dam.....4678
 The observation of crack development around an underground rock chamber by borehole television system.....4679
 Determination of the deformation properties of bedrock under turbine foundations.....8222
 Strain analysis using the shape of expected and observed continuous frequency distributions.....8223
 A ring swell test for measuring swelling and shrinkage characteristics of rock.....11307
 Estimation of viscosity contrast and finite strain from deformed elliptical inclusions.....12334
 A comparison of methods used in measuring finite strains from ellipsoidal objects.....12335

272 Material Processing

272-B Applications of plasticity theory

- Development of a friction element for metal forming analysis.....402
 Analysis of axisymmetric upsetting based on flow pattern observations.....403
 Viscoplasticity solution of deformation problems: Data handling procedures.....1431
 Injection moulding of thermoplastics: Freezing during mould filling.....2461
 Punch press monitoring with acoustic emission (AE)
 Part I: Signal characterization and stock hardness effects.....4680
 Punch press monitoring with acoustic emission (AE)
 Part II: Effects of process variables.....4681
 The effect of strain hardening on the critical angle for abrasive (chip formation) wear.....4682
 A model for bending bimetallic strip.....7207
 Memory effect during the hot torsion of aluminium at varying strain rates.....8224
 Mechanisms of hot-isostatic pressing.....10319
 Shear localization during metal cutting.....10320
 The origins of failure instability in metal-working processes.....10321
 Stamping rectangular plates into doubly-curved dies.....12336
 Effect of charge pattern on flow state of BMC.....12337

272-C Forging

- Application of FEM modeling to simulate metal flow in forging a titanium alloy engine disk.....4683
 The force in a die forging hammer.....4684
 A method for in-process failure prediction in cold upset forging.....4685
 Flow of metal in constrained plane-strain extrusion-forging: Part I.....8225
 The influence of flash design on material flow and tool pressure in closed-die forging: A practical example.....8226
 Frictional effects on flow stress determination at high temperatures and strain rates.....11308
 Application of boundary element method to cold forging die design.....11309

272-D Extrusion

- Analysis of hydrofilm extrusion of elliptic shapes using perturbation method.....404
 On the equivalent friction factor in hydrofilm extrusion.....408
 Radial flow simulation of drawing and extrusion of rigid/hardening materials.....2465
 Hydrofilm extrusion of tubes through optimized curved dies.....4686
 Cold impact extrusion-mechanism of formation of a bimetallic wall.....4687
 Approximate solutions for preform design in shell nosing.....4688
 Extrusion cutting of brass strips.....4689
 Analysis of hydrofilm extrusion of three-dimensional shapes from round billets.....6156
 Upper-bound analysis of hot extrusion of axisymmetric rods and tubes. II. Hot extrusion of tubes.....7208
 Some finite element studies of extrusion.....7209
 Upper-bound analysis of hot extrusion of axisymmetric rods and tubes. I. Mathematical modelling of hot extrusion.....7210
 Deformation of graphite during hot extrusion of cast aluminum-silicon-graphite particle composites.....10322
 Pass design and redundant strains in forward tube extrusion.....11310
 Shaping of a ribbon of liquid metal. Computations and experiments.....11311
 Backward extrusion of internally shaped tubes from round billets.....12338

272-E Rolling

- Some numerical slipline field solutions for drawing through circular dies.....2462
- An upper bound solution for the force of combined backward-forward extrusion.....2463
- Analysis of the rolling process assuming materials described by hyperbolic sine law.....4690
- An analytical rolling model including through thickness shear stress distributions.....7211
- A study on plastic flow and residual stress distribution in carbon steel caused by rolling contact.....7212
- Examination for effect of pass schedule on energy consumption in rolling process.....7213
- Hot forming of stepped steel shafts by wedge rolling with three rolls.....8227
- The evaluation of load and torque in hot flat rolling from slip line fields.....8228
- The (pseudo) isotropic Young's modulus, rigidity modulus and Poisson's ratio of anisotropic rolled sheets.....8229
- Steckel rolling of a strain hardening material.....9266
- Study of friction in cold strip rolling.....10323
- Rolling theory of a rheological material.....10324
- Strain-temperature correlations obtained in rolling.....10325
- The developments in texture in stainless steels.....11312
- Deformation and fractography of high carbon-chromium steels at (a+Fe C) region.....11313

272-F Drawing

- An investigation of the shell nosing process by the finite-element method. Part 1: Nosing at room temperature (cold nosing); Part 2: Nosing at elevated temperatures (hot nosing).....405
- Dislocation densities in EC aluminum during wire drawing.....406
- Boundary condition difficulties encountered in the simulation of bulging during the continuous casting of steel.....1432
- Developments in high-speed viscoplastic flow through conical converging dies.....3622
- Effects of temperature on deep drawing of sheet metals.....3623
- Contribution to mathematical modeling of cup drawing: The upper-bound analysis for inward pull (case II) in ring forming.....4691
- On generation of auto-oscillations during fibers formation.....7214
- An analysis of deep drawing circular blanks through a conical die without blankholding.....7215
- Effects of boundary conditions on the stability of slender viscous fibers.....9267
- Plane strain drawing of a strain hardening material through circular dies.....9268
- Dieless drawing of metals.....11314
- The study of distorted grid patterns for flow-through conical converging dies by the multiaxial velocity field.....12339
- Prediction of limit drawing ratio for deep-drawn plastic sheet.....12340

272-G Sheet metal forming

- Tests of beams made by cold forming by bending of thin sheet.....1433
- Formability limits of relatively thick sheet metal as determined by the Fukui conical cup test.....4692
- A new approach to preform design in metal forming with the finite element method.....4693
- Measurement aspects and improvement of surface profile in thin gauge molded sheet molding compounds.....6157
- Proceedings of the 2nd Joint Polytechnics Symposium on Manufacturing Engineering, 11-13 June 1979, Lancaster Polytechnic, Coventry (Book).....8230
- The prediction of deformation length in cold roll-forming.....8231
- Stamping and springback of circular plates deformed in hemispherical dies.....9269
- Calculation of the forming limit curve at fracture.....9270
- Forming limits.....9271

- Measurement of contact pressure in metal forming by pressure sensitive film.....10326
- Computer aids to data preparation for cost estimation.....11315
- A theoretical analysis of the bending into cylindrical dies of metal strips.....12341
- Calculation of technological parameters of simple stretch-wrap forming.....12342
- Forming low-stiffness parts by shot peening.....12343

272-H Machining

- A stochastic approach to thermal modeling applied to electro-discharge machining.....3624
- Mechanics of wobble broaching. Part 1.....3625
- Mechanics of wobble broaching. Part 2.....3626
- Optimization of the cutting parameters with the generalized reduced gradient method.....3627
- Surface texture and machining conditions. Part 1: Model building logic in view of process control.....4694
- Surface texture and machining conditions. Part 2: Development of mathematical model based upon pattern recognition.....4695
- Relative assessment of the dynamic behavior and cutting performance of a bonded and a cast-iron horizontal milling machine.....4696
- Instability parameter for machined parts.....4697
- A mathematical model for split point drill flanks.....4698
- Further developments in applying the finite element method to the calculation of temperature distributions in machining and comparisons with experiment.....4699
- Mathematical model for multifacet drills.....4700
- Cylindrical flank twist drill points.....4701
- Development of a new milling cutter for aluminium honeycomb.....4702
- The effect of runout on cutting geometry and forces in end milling.....4703
- The matrix of power spectra levels of turned surfaces roughness.....4704
- The mechanics of continuous chip formation in oblique cutting in the absence of chip distortion. Part 1—Theory.....4705
- The mechanics of continuous chip formation in oblique cutting in the absence of chip distortion. Part 2—Comparison of experimental data with deductions from theory.....4706
- Pulse excitation technique for determining frequency response of machine tools using an on-line mini computer and a non-contacting electromagnetic exciter.....4707
- A simulation model of machining economics incorporating stochastic variability of work and tool properties.....4708
- The nature of chip formation in orthogonal machining.....7216
- A mathematical model for the prediction of shape wear during electro-discharge machining.....7217
- Process modeling of orthogonal cutting by the rigid-plastic finite element method.....10327
- Turning long workpieces by changing the machining parameters.....10328
- Optimization methods for metal cutting.....10329
- An experimental study of abrasive jet machining.....10330
- Calculation of face profile for rotary tools.....10331
- Analysis of material removal by shaped diamond wheels.....10332

272-I Grinding

- Optimum design of plano-milling machine structure using finite element analysis.....3628
- Analysis on simultaneous double-sided grinding stock removal distribution on a thin disk.....4709
- Discussion of stresses in plain and reinforced cylindrical grinding wheels.....4710
- The effect of continuous dressing on the occurrence of chatter in cylindrical grinding.....11316
- The selection of optimal stable geometrical configuration in centerless grinding.....11317
- Electrocontact discharge grinding of cutting tool metals.....11318

272-J Casting

- Method of determining the solidified shell thickness in continuous casting.....1434
 Studying the thermomechanical state of continuously-cast solids.....2464
 Solidification times of hollow plate-shaped castings in sand moulds—a generalised solution.....3629
 Stabilization of the continuous casting regime in the electromagnetic mould using regression models...6158
 Flux and the continuous casting of steel.....8232
 Effect of carbon equivalent and inoculation on residual stresses in grey iron castings.....8233
 Mathematical simulation of centrifugal casting of pipes.....9272
 Structural characterization of laser-processed molybdenum steel.....10333

272-K High deformation rate forming

- Assessments of the kinetic and dynamic loads sustained by stationary tools during high rate plastic forming.....6159
 Study on the frictional boundary conditions at the edge of a tool-material interface in massive forming (Prediction of the deformation characteristics by slip-line field method and the friction testing apparatus for plane strain forging).....6160
 Testing the plastic behaviour of metals by torsion of solid and tubular specimens.....8234
 Explosive welding, forming and compaction (Book).....9273
 Rate effects in steady forming processes of plastic materials.....11319
 Analysis of stress-strain state in inner deformation zone during forming with heating.....12344

272-L Residual stresses

- The effect of peening and re-peening upon partially fatigued components.....6161
 Effect of shot size on peening intensity for local peening.....6162
 Effect of the honing drum upon the inducement of compressive residual stresses.....6163
 Effect of burnishing of components made of the LRI5 steel on distribution of residual stresses.....8235
 Studies of nucleation mechanisms and the role of residual stresses in the grain boundary cavitation of a superalloy.....10334

272-M Wrapping & laying-up (comp. mat.)

- Temperature dependence of strength of roving cloth FRP in flatwise direction (Effect of strength of fiber/matrix interface).....7218

272-N Powder metallurgy

- Effect of porosity on the strength of sintered powder compacts.....407
 Bulging analysis in the disk forging of porous metals.....8236
 Metallic forms: their production, properties and applications.....9274
 An analysis of the ring upsetting of sintered material.....11320

274 Fracture Processes

274-B Initiation

- Fatigue crack growth (physical principles, models and experimental results).....409
 Modelling of fracture process zones and singularity dominated zones.....1435
 Turbine blade nonlinear structural and life analysis.....1436
 A study on fatigue crack initiation in high strength steel.....1437

- Fatigue initiation in a short glass fibre composite...1438
 Crack initiation under low-cycle multiaxial fatigue in Type 316L stainless steel.....2466
 Small fatigue crack initiation and growth behavior of high-strength low alloy steel in various environments.....4711
 J-Integral studies of crack initiation of a tough high density polyethylene.....4712
 Brittle fracture initiation under complex stress states.....4713
 Fracture mechanics approach to fatigue crack initiation from deep notches.....4714
 Estimating initiation times of secondary fatigue cracks in damage tolerance analysis.....4715
 Crack initiation from the ends of partially debonded surfaces of a flat inclusion.....6164
 Reinitiation of an arrested cleavage crack.....6165
 Characteristics of brittle fracture under general combined modes including those under bi-axial tensile loads.....6166
 On the theory of the Bilby-Cottrell mechanism of crack initiation in metals.....6167
 Fatigue crack initiation in aluminium alloys under programmed block loading.....8237
 The mechanical properties and tensile fracture characteristics of partially annealed low carbon mild steel sheet.....9275
 Gross crack initiation and propagation in brittle thin solid and annular disks subjected to impact loading.....10335
 Prediction of fatigue threshold of notched components.....10336
 An atomistic model of slip formation.....10337
 Difference between bending and tensile strength of cracked brittle material.....10338
 A study of the whole process of uniaxial stretch deformation and fracture of ultrahigh strength steels.....10339
 The dependence of Mode III fracture initiation toughness on strength and microstructure.....11321
 On a statistical approach to brittle rupture for multiaxial states of stress.....11322
 Development of fractographic features during shear failure of an HSLA steel.....11323

274-C Subcritical crack propagation

- Influence of an overload on the fatigue crack growth in steels.....410
 Growth of ring-shaped edge cracks under reversed torsional fatigue.....411
 Near-threshold fatigue crack propagation of several high strength steels.....412
 Variations of various fracture parameters during the process of subcritical crack growth.....413
 Key curve analysis of crack-growth-resistance curves.....1439
 Micromechanisms of fatigue crack growth retardation following overloads.....3630
 The transition between stress corrosion crack growth and plastic fracture.....3631
 On the probabilistic modeling of fatigue crack growth.....3632
 Propagation of "small fatigue crack" initiated from notch-root.....4716
 Correlations among growth law of small cracks, low-cycle fatigue law and applicability of Miner's rule.....4717
 Model of fatigue crack propagation by damage accumulation at the crack tip.....4718
 Fatigue crack propagation in steels.....4719
 On the influence of environment on the load ratio dependence of fatigue thresholds in pressure vessel steel.....4720
 A synergistic fracture mechanics approach to fatigue life evaluation.....4721
 Fatigue crack growth in a fillet welded joint.....4722
 The effect of environment on crack closure and fatigue threshold.....4723
 Propagation and non-propagation of short fatigue cracks at a sharp notch.....4724
 The influence of age-hardening on fatigue crack propagation behaviour in 7075 aluminium alloy in vacuum.....4725

Short crack propagation and closure effects in A508 steel.....	4726
A critical study of the crack closure effect on near-threshold fatigue crack growth.....	4727
Segmented fitting of fatigue crack growth data.....	4728
Closure behaviour of surface cracks.....	4729
On the transition from near-threshold to intermediate growth rates in fatigue.....	4730
Mixed-mode fracture mechanisms near the fatigue threshold of AISI 316 stainless steel.....	4731
A finite element analysis of a crack growing under cyclic loading.....	4732
Fatigue crack propagation in a cast magnesium alloy.....	4733
Fatigue crack propagation behavior of two-layered low carbon steel-stainless steel composite plates.....	6168
Effects of crack growth on the load-displacement characteristics of precracked specimens under bending.....	6169
Prediction of fatigue crack propagation in flat specimens and thin-walled structural members of the skin of the aircraft wing in programmed loading.....	6170
Subcritical crack growth in brittle materials in microcracking conditions.....	6171
Fatigue crack growth in thin section type 316 stainless steel.....	7219
Fatigue analysis of an edge crack specimen: Hysteresis strain energy density.....	7220
Fatigue and crack propagation analysis of mechanically fastened joints.....	8238
Fatigue crack tip mechanics of a powder metallurgy aluminum alloy in vacuum and humid air.....	8239
Predicting the endurance of piezoelectric ceramic elements from characteristics of subcritical crack growth.....	8240
Interference optical measurements during continuous and discontinuous crack propagation in fatigue loaded polymers.....	9276
Singular propagation behavior of cracks in stiffened cylindrical shells.....	9277
Direct observations of crack propagation in brittle materials.....	9278
A model for fatigue crack advance based on crack tip metallurgical and mechanics parameters.....	10340
Threshold stress intensity and dislocation structures surrounding fatigue cracks in polycrystalline copper.....	10341
Application of fracture mechanics to heterogeneous systems - prediction of fatigue life of ceramics.....	10342
Fatigue crack growth rate behaviour of stainless steel claddings in air and under vacuum at 300 C.....	10343
Acoustic emission during fatigue crack propagation in the aluminum alloys 2024 and 2124.....	10344
The influence of mean stress on fatigue crack propagation in dual phase low carbon steel.....	10345
On subcritical crack growth in ceramics as influenced by grain size and energy-dissipative mechanisms.....	10346
Fatigue crack growth and crack closure behavior of structural materials.....	11324
Mechanics of fatigue crack propagation by crack-tip plastic blunting.....	11325
The influence of compression loads and of dK/da on the crack propagation under variable amplitude loading.....	11326
Kinetics of defect cumulation in uniaxial tensile loading.....	12345

274-D Dynamic processes

Enhancement of strength in composites reinforced with previously stressed fibers.....	1440
Fracture kinetics of rails subject to dynamic loading.....	1441
Brittle fracture of plates in tension - relative significance of boundary reflected body and Rayleigh waves.....	1442
The anisotropy of carbon steels due to compression and the Charpy impact value.....	8241
A rule to estimate overload effects on a cracked body of steel.....	9279
Effect of inclusions and states of stress on the mechanics of fracture in a quenched and tempered Ni-Cr-Mo steel.....	10347

Effect of strain rate on shear strength of aluminum and alloys similar to 4340 steel under torsional impact test.....	11327
---	-------

274-E Fatigue

A study of cumulative fatigue damage in aluminum alloy 2011-T3.....	414
Effect of low-intensity ultrasound on the fatigue limit of siliceous iron.....	415
Defects and crack shape development in fillet welded joints.....	416
On fatigue strength and fatigue crack propagation behavior under impact program load condition.....	417
On life behavior under spectrum loading.....	418
Resonance controlled fatigue crack propagation.....	419
Path dependent nature of fatigue crack growth.....	420
Quantitative evaluation of fatigue strength of metals containing various small defects or cracks.....	421
Modeling of the frequency effect on fatigue crack propagation in PMMA.....	422
Investigation of the mechanism of failure under low-cycle nonisothermal load.....	423
Planning and statistical processing of the results of tests for plotting quantile fatigue curves.....	424
Fatigue crack propagation in random short-fiber SMC composite.....	1443
Fatigue strength of steel pipe-base plate connections.....	1444
Transition from fatigue crack to ideal crack.....	1445
Influence of residual stresses introduced by shot peening upon the fatigue life of materials.....	1446
Influence of initial deflection of plate girder webs on fatigue crack initiation.....	1447
Digitized measurements of the shape of corner cracks at fastener holes.....	1448
Grain boundary sliding at high temperatures in torsional fatigue.....	1449
Laws of plastic strain and fatigue fracture of metals in torsion.....	1450
Discreteness and self-similarity of failure in stable fatigue crack growth.....	1451
Application of the kinetic strength concept to determination of the longevity of specimens with a stress raiser under static load.....	1452
Fatigue crack growth measurement and data analysis (A symposium sponsored by ASTM Committees E-9 on Fatigue and E-24 on Fracture Testing, American Society for Testing and Materials, Pittsburgh, PA, 29-30 Oct. 1979) (ASTM STP 738) (Book).....	2467
Methods and models for predicting fatigue crack growth under random loading (Sponsored by ASTM Subcommittee E24.06 on Fracture Mechanics Applications, American Society for Testing and Materials) (ASTM Special Technical Publication 748) (Book).....	2468
Further trials of a strain hardening index of fatigue damage.....	2469
An experimental K-analysis on the fatigue crack near the interface where plate thickness varies discontinuously - thin to thick type.....	2470
Resonance controlled fatigue crack propagation in a beam under longitudinal vibrations.....	2471
A fracture mechanics study of the fatigue of rubber in compression.....	2472
Determination of the cyclic life of machine parts working under complex loading programs.....	2473
The energetic interpretation of symmetry features of fatigue failures in the research into causes of breakdowns of machinery.....	2474
Initial strain field and fatigue crack initiation mechanics.....	3633
A study on the notch effect on the low cycle fatigue of metals in creep-fatigue interacting conditions at elevated temperature.....	3634
Fatigue life prediction of notched members based on local strain and elastic-plastic fracture mechanics concepts.....	3635
A note on small semi-elliptic cracks in notched and plain specimens.....	3636
Different criteria of equivalent plastic-strain range in the theory of low-cycle fatigue.....	3637
Probability evaluation of strength under variable loads from median endurance limits of different-size specimens.....	3638

- Prediction of endurance on the basis of characteristic loading parameters.....3639
 A model for fatigue crack closure.....4734
 Improved fatigue-life prediction by acoustic emission.....4735
 Contact fatigue crack initiation under repeated oblique force.....4736
 Interaction diagram for time dependent fatigue.....4737
 Fatigue life prediction for complex load versus time histories.....4738
 Constraint effects on the prediction of fatigue life of surface flaws.....4739
 The cyclic -integral as a criterion for fatigue crack growth.....4740
 Probabilistic analysis of the uncertainty in the fatigue capacity of welded joints.....4741
 Influence of overloads and block loading sequences on Mode III fatigue crack propagation in A469 rotor steel.....4742
 The effect of mode III loading on fatigue crack growth in a rotating shaft.....4743
 The behaviour of fatigue cracks subject to applied biaxial stress: A review of experimental evidence.....4744
 Fatigue strength of a rotor steel subjected to torsional loading simulating that occurring due to circuit breaker reclosing in an electric power plant.....4745
 The scaling laws of stage II fatigue fracture.....4746
 Developing fatigue crack growth data using the round compact tension specimen.....4747
 Engineering formulae for fatigue strength reduction due to crack-like notches.....4748
 Fatigue crack growth of a corner crack in an attachment lug.....4749
 A hyperbolic relationship for stress vs life.....4750
 Size effect on rotating bending fatigue in steels.....6172
 The fatigue behavior of large-scale as-welded and stress-relieved tubular T joints.....6173
 Fatigue strength of welded tubular T joints under variable amplitude loading.....6174
 Fatigue tests and design of offshore tubular joints.....6175
 A reliability based fatigue damage theory for safe design.....6176
 Fatigue behavior of pipes containing multiple flaws in inner surface.....6177
 Mechanisms of growth of small fatigue cracks in torsion.....6178
 Fatigue crack growth in flat specimens of ferrosilicon in air and vacuum.....6179
 Calculation of fatigue and life of crack-bearing structural elements under cyclic load.....6180
 Evaluating the limiting state of a steel under combined low-cycle loading and diffusion of sorbed hydrogen.....6181
 Evaluating the durability of materials on the basis of thermal fluctuation theory.....6182
 Analysis of damage accumulation in gas-turbine engine blades subject to thermal cycling and vibration in a gas stream.....6183
 Determination of longevity under a two-frequency load (review). Report 1.....6184
 Effect of step duration on the evaluation of the fatigue limit of welded steel structures.....6185
 Low-cycle fatigue under symmetrical nonproportional deformation.....6186
 Initiation and propagation behaviors of surface fatigue cracks on smooth cylindrical specimen.....7221
 Propagation of microscopic fatigue crack under periodic overstepping.....7222
 Retardation of fatigue crack propagation under plane strain condition due to a single overload.....7223
 An exploratory study into the fatigue of composites under spectrum loading.....7224
 A method for fatigue computation of structural elements under conditions of stochastic loads.....7225
 Resistance of materials to low-cycle fatigue under nonisothermal loading.....7226
 Theoretical analysis of the effect of short cracks on the fatigue limit of materials.....7227
 Fracture toughness of structural alloys under cyclic loading. Communication 1.....7228
 Fracture toughness of structural alloys under cyclic loading. Communication 2.....7229
 Resistance to fatigue fracture with random and harmonic vibrations.....7230
 Probability estimation of the characteristics of fatigue strength and acting stresses in machine components in connection with calculations of strength in high-cycle loading.....7231
 The influence of nitrogen on high temperature low cycle fatigue behaviour of austenitic stainless steels.....8242
 Tensile fatigue failure of acrylic bone cement.....8243
 Fatigue in offshore cranes.....8244
 Equations of growth of fatigue cracks.....8245
 Self-similar nature of fatigue failure: Damage accumulation.....8246
 Fatigue-crack advance mechanisms in polymers. Part 2 Semicrystalline polymers for TKT (polybutylene terephthalate).....9280
 Fatigue failure of an orthotropic plate with a circular hole.....9281
 Statistical crack propagation in fastener holes under spectrum loading.....9282
 Near-threshold fatigue crack growth behavior in metals.....9283
 Sliding mode crack closure and mode III fatigue crack growth in mild steel.....9284
 Mixed-mode crack opening in fatigue.....9285
 Fatigue crack growth rates for very short cracks developing at fastener holes in 7075 and 7010 aluminum alloys.....9286
 Low cycle fatigue of aluminum at elevated temperatures.....9287
 The influence of the static I load mode and R ratio on mode III fatigue crack growth behaviour in mild steel.....9288
 A dislocation model for the rate of initial growth of stage I fatigue cracks.....9289
 On the nature of craze development and breakdown during fatigue.....9290
 A new approach to predicting fatigue life behavior under the action of mean stresses.....10348
 Short crack fatigue behaviour in a medium carbon steel.....10349
 Small fatigue crack growth behaviour under two stress level multiple loading.....10350
 Fatigue behavior of a rail steel.....10351
 The effect of rest periods on the fatigue strength of Ti-6Al-4V.....10352
 Stress and strain concentration factor evaluation using the equivalent energy concept.....10353
 Dynamic strain aging during fatigue deformation in type 304 austenitic stainless steel.....10354
 Cleavage fatigue strength of wood-epoxy resin bond system.....10355
 Dynamic fatigue of brittle materials containing indentation line flaws.....10356
 Low temperature fatigue fracture of metals and alloys.....10357
 Fatigue characterization for probabilistic design of submarine pipelines.....10358
 High temperature low cycle fatigue of MAR-M 509 superalloy. I: The influence of temperature on the low cycle fatigue behaviour from 20 to 1100 C.....10359
 A damage law for predicting the elevated temperature low cycle fatigue life of a martensitic stainless steel.....10360
 Low cycle fatigue behaviour of cast nickel-base superalloy IN-738LC in air and in hot corrosive environments.....10361
 A study of the fatigue crack growth law for I-II mixed mode crack.....10362
 Crack growth for the double slip plane and the modified DSP crack model-II. Fatigue crack growth with and without blunting.....10363
 Estimation of parameters for a generalized fatigue curve of carbon fiber plastics under tension.....10364
 Uniform description of creep and fatigue.....10365
 Kinetics of plastic deformation zone development in fatigue failure of 20 steel.....10366
 Curve of discrete crack growth under conditions of self-simulation.....10367
 Mathematical models of fatigue crack growth.....10368
 Mixed mode fatigue crack growth.....10369
 Influence of precracking load on critical stress intensity factor of mild steel.....10373
 Effects of thermal cycling on mechanical properties of graphite polyimide.....11328

Growth rate and closure of fatigue cracks ranging from incipient short crack to elastic-plastic long one.....	11329
Fatigue crack growth and closure behaviors of high-tensile strength steel in vacuum.....	11330
Fatigue crack growth rate under mixed modes I and II.....	11331
Initiation and propagation behaviors of fatigue cracks at the toes of butt welded joints.....	11332
Torsional fatigue strength of shaft with a key groove.....	11333
Relationship between fatigue crack growth and fracture mechanism of particulate filled polyvinyl chlorides.....	11334
Comparison of fatigue processes between rotating bending and plane bending in an annealed steel.....	11335
Effect of precipitation on resistance to crack growth in rotary bending- and cyclic torsional fatigues.....	11336
X-ray fractography of fatigue fracture of steels.....	11337
Small fatigue crack initiation and growth behavior of high-strength low alloy steel in various environments.....	11338
Crack propagation behavior and fracture modes of austenitic stainless and ferritic low-alloy steels in elevated temperature low cycle fatigue.....	11339
Effect of temperature change on behavior of lattice defects during low-cycle fatigue.....	11340
Crack initiation and propagation in gas carbonitrided unnotched Cr-Mo steel specimens under reversed plane bending.....	11341
Relation between fatigue crack propagation and residual stress distribution near crack measured by X-ray.....	11342
Study on fatigue behavior of adhesive-bonded butt joint (Effect of dispersed bubbles in adhesive on fatigue strength).....	11343
Effect of cold surface-rolling pressure on fatigue strength of S 35 C steel press-fitted axles.....	11344
Numerical analysis of fatigue striations.....	11345
Torsional fatigue strength of induction hardened steels.....	11346
Effect of frequency ratio of overstress to understress on cumulative damage below fatigue limit (When low level stress has tensile mean stress).....	11347
On the factors governing statistical fluctuation of fatigue in fatigue crack propagation process.....	11348
Influence of initial residual stress on fatigue crack propagation.....	11349
Surface crack growth during push-pull fatigue of smooth specimens.....	11350
Observation of fatigue fracture surface of carburized steel.....	11351
The behavior of thermal fatigue crack initiation in smooth bar of low-alloy steels.....	11352
The effect of programmed load spectrum parameters on the fatigue life.....	11353
Accelerated tests of determining the endurance limit as an efficient method of evaluating the accepted design and technological solutions.....	11354
Influence of temperature and loading cycle asymmetry on the crack resistance characteristics of heat-resistant steels.....	11355
A study of cumulative fatigue damage in aluminum alloy 2024-T4.....	12346
An examination of mixed fatigue-tensile surface crack growth in rails.....	12347
Fatigue of glass: crack growth or sharpening of crack tip?.....	12348
Fatigue crack nucleation sites in commercial pure iron and their dependency on grain orientation.....	12349
Statistical distributions of fatigue life and fatigue strength of low carbon steel in long life region.....	12350
Distributions of fatigue life and fatigue strength in notched specimens of carbon eight-harness-satin laminate.....	12351
Estimating longevity under nonisothermal low-cycle loading with holds.....	12352
A probability model of the development of the fatigue crack.....	12353
Use of correlation function in calculations of endurance under random loading.....	12354
Fatigue strength in stress-concentration zones with small radii of curvature.....	12355

Determination of the crack path and intensity of elastic energy released during cyclic loading taking account of welding stresses.....	12356
On the COD in fatigue loading condition.....	12357

274-F Stress corrosion

Nucleation mechanism of stress corrosion cracking from notches.....	2475
Predicting stress corrosion crack growth rates when linear elastic fracture mechanics conditions are not operative.....	4751
Experimental investigation on denting in PWR steam generators: Causes and corrective actions.....	4752
Chemical neutralization to control denting in nuclear steam generators.....	4753
Dependence of distribution of stress corrosion cracking life of a high strength steel on various factors (Prediction based on statistical natures of crack initiation and propagation lives and its experimental examination).....	7232
A statistical study of stress corrosion cracking life by separating crack initiation and propagation lives.....	7233
Predicting stress corrosion crack growth rates at high stress levels. II: The general yield situation.....	9291
The effect of loading pattern on the growth rate of a stress corrosion crack at high stress levels.....	10370
Compression fracture statistics of compacted cement cylinders.....	10371
Propagation of stress corrosion cracks in aligned glass fibre composite materials.....	10372
The study of variations in stress corrosion cracking velocities in aluminum alloy 7075-T651 by acoustic emission.....	10374
The effects of low frequency load cycles on crack initiation in low alloy steels.....	10375
Evaluation of the growth and stability of stress corrosion cracks in sensitized austenitic piping.....	11356
Crack growth during cyclic stress corrosion cracking in aluminum alloy.....	11357
Applicability of fracture mechanics parameters to stress corrosion cracking of SUS 304 stainless steel.....	11358
Stress corrosion cracking of 304L stainless steel in molten salts media.....	11359
The improved corrosion resistance of steel in water after abrasive blasting with alumina.....	11360
Crack geometry factor and the structural sensitivity of the corrosion crack resistance of low-alloy steels in long-term loading.....	11361
Interrelationship between the electrochemical characteristics of the surface of high-strength steel and its tendency toward corrosion cracking.....	11362
Influence of silicon, copper, and cobalt on the corrosion cracking and pitting corrosion of 09Kh18Ni9 steel.....	11363
Influence of the density of grain boundary precipitates and factors related to it on the corrosion cracking resistance of Al-Zn-Mg and Al-Zn-Mg-Cu system alloys.....	11364
Local corrosion damage of aluminum alloys.....	11365
Features of the corrosion failure of steels in the presence of fouling organisms.....	11366
Growth mechanism of stress corrosion cracking in high strength steel.....	12358

274-G Environmental embrittlement

Environmental cracking: A review of the role of residual stresses and their measurement.....	425
On the theory of stress-assisted diffusion, II.....	426
The influence of hydrogen on plain carbon and low alloy steels containing strain induced cavities.....	1453
Rain erosion damage in brittle materials.....	1454
The role of the liquid in environmental stress cracking of polyethylene.....	1455
Environmental stress cracking behavior of glass fiber reinforced epoxy resins.....	2476
Statistical failure prediction models for brittle materials.....	4754
The behaviour of 316L stainless steel in hydrogen.....	9292

- A phenomenological model of embrittlement of metals under conditions of the adsorption action of liquid metal media.....9293
- The isostress extrapolation of creep rupture data.....9296
- A fractographic study of gaseous hydrogen embrittlement and liquid-metal embrittlement in a tempered-martensitic steel.....10376
- Hydrogen trapping by TiC particles in iron.....10377
- Fatigue crack growth and surface reactions for titanium alloys exposed to water vapor.....10378
- The interaction of hydrogen with iron oxide inclusions in iron.....10379
- Overview no. 30: Gaseous hydrogen embrittlement in FeSi- and Ni-single crystals.....10380
- A new statistical model of the hydrogen embrittlement of steel.....10381
- Overview No. 27: The solubility and diffusivity of hydrogen in well-annealed and deformed iron.....10382
- The effect of hydrogen on the initiation of shear localization in plain-carbon steels.....10383
- Environment sensitive cracking of a nickel-aluminum bronze under monotonic and cyclic loading conditions.....10384
- A comparative study of monotonic fracture, environmentally assisted fracture and fatigue behaviour of cast and forged high strength steels.....10385
- Influence of hydrogen on fracture toughness and subcritical crack development in + -titanium alloys.....10386
- Influence of polarization on the intensity of hydrogen absorption of the vicinity of a corrosion crack tip and on the cracking of high-strength steels.....10387
- Effect of sulfur content on fracture toughness behavior of Ni-Cr-Mo-V steel.....11367
- Cracking behavior of high strength steel due to hydrogen embrittlement and analysis of its fracture morphology.....11368
- Environmentally-induced cracking of magnesium.....11369
- The relationship between the corrosion resistance and impurity content of aluminum oxide layers.....11370
- Effect of thermal history on environmental stress cracking in low-density polyethylene.....11371
- Relationship between hydrogen embrittlement behavior and hydrogen content of high strength steel.....11372
- Influence of hydrogen on fatigue-crack propagation in titanium and its alloys.....11373

274-H Corrosion fatigue

- Mechanism of corrosion fatigue crack propagation in high strength steels.....427
- Development of engineering codes of practice for corrosion fatigue.....2477
- The effects of load ratio on environmentally assisted fatigue crack growth.....4755
- Difference between threshold stress intensity for stress corrosion cracking for decreasing and increasing loading modes.....4756
- Influence of Cl⁻ concentration on corrosion fatigue crack growth of an austenitic stainless steel.....6187
- Fatigue crack retardation of low carbon steel in saltwater.....7234
- A Monte Carlo analysis model of corrosion fatigue process characterized by initiation, growth and coalescence of distributed small cracks.....8247
- Fatigue crack growth in corrosive environments.....8248
- Behaviour of mild steel under very low frequency loading in sea water.....10388
- Rate-determining processes for corrosion fatigue crack growth in ferritic steels in seawater.....10389
- Kinetics and mechanism of corrosion-fatigue crack growth in ferritic-pearlitic class steels. Report I: High-strength steels with a martensitic structure.....10390
- Mathematical model of corrosion fatigue.....10391
- Acoustic emission monitoring of corrosion fatigue crack growth in offshore steel.....11374
- Microstructure, toughness and stress corrosion cracking behavior of aluminum alloy 2020.....11375
- Corrosion fatigue crack growth of a high-tension steel in NaCl solution.....11376
- Effects of corrosive environments on near-threshold fatigue crack growth behavior of Ti-6Al-4V.....12359

274-I Fretting, wear, & erosion

- Erosion of metallic plate by solid particles entrained in a liquid jet.....4757
- Solid impingement erosion mechanisms and characterization of erosion resistance of ductile metals.....11377

274-J Creep

- Isovector fields and self-similar solutions for power law creep.....428
- Creep of structures - A continuous damage mechanics approach.....429
- A criterion for predicting creep fracture mechanisms.....430
- Creep and rupture strength with a nonuniform stress state.....1456
- A review on the law of continuous damage parameter for non-ageing materials.....1457
- The sensitivity of the macroscopic consequences of void growth in ductile materials to various mechanical and geometrical micro-parameters.....2478
- Estimation of the residual life of metals on the basis of kinetic concepts.....2479
- A creep damage equation for polymeric materials.....2480
- Study of the creep activation area using an incremental step creep test.....3640
- Steady state and transient creep of Al at 400 K - an analysis in terms of recovery controlled by thermally activated glide.....3641
- An analysis of crack distribution under creep.....3642
- Relationship of the time until failure in long-term loading under conditions of the plane stressed state to the minimum rate of creep deformations.....3643
- Heat-to-heat variations in creep-rupture properties of annealed 2 1/4 Cr-1 Mo steel.....4758
- Elastic-plastic-creep behaviour of a compact-tension specimen.....4759
- Creep life of AISI 316 stainless steel loaded at constant strain rate.....4760
- A method of creep damage summation based on accumulated strain for the assessment of creep-fatigue endurance.....4761
- A crack-tip-zone interaction model for creep-fatigue crack growth.....4762
- The characteristic cross section for flow: An alternative formulation of the creep equation.....4763
- Solution procedures for the creep crack growth parameter C_{cr}.....4764
- Quick method of evaluating the residual safe life of structural elements working under creep conditions.....6188
- Calculation of the stress-strain state and time for the start of failure for structural elements taking account of material damage vulnerability during creep.....6189
- Temperature-time dependence of the cyclic-creep activation energy of heat-resistant alloys.....6190
- Fracture criteria under creep conditions.....6191
- Determining the critical number of revolutions for a disk equal in strength during creep.....6192
- Analytic-experimental determination of kinetic damage and failure at a sharp notch tip in creep conditions.....7235
- Asymptotics near the tip of a crack of the state of stress and strain of inhomogeneously aging bodies.....8249
- Damage and fracture criteria during creep.....8250
- On the role of cavity nucleation in creep deformation and fracture.....9294
- Creep fracture in polymers: Technique and data handling for a statistical characterization.....9295
- An assessment of time and strain to creep fracture in a low alloy heat-resistant Cr-Mo-V steel based on a physical-metallurgical approach.....10392
- Creep-fatigue studies under a biaxial stress state at elevated temperature.....10393
- Overview no. 33: Interface controlled diffusional creep.....10394
- Diffusive intergranular cavity growth in creep in tension and torsion.....10395
- A study of intergranular cavity growth controlled by the coupling of diffusion and power law creep.....10396
- Effects of triaxial stressing on creep cavitation of grain boundaries.....10397

Determination of transient creep parameters for HPSN by dynamic bending tests.....	11378
The effect of cold work on low temperature (0.35T) creep crack growth in C-Mn steels.....	11379
Experimental study on the stress range of Class I behaviour in the creep of Al-Mg alloys.....	11380
Effect of transition from small scale creep to large scale creep on time-dependent fatigue crack propagation in Inconel 718.....	11381
Applicability of creep J-integral to microcrack propagation of creep in 304 stainless steel.....	11382
Creep crack propagation behavior of Type 321 stainless steel after long service in boiler.....	11383
On the thermodynamic foundations of strain-dependent creep damage and rupture in three dimensions.....	11384
Creep deformation behavior and estimation of creep damage under creep-fatigue condition.....	11385
Accuracy of creep rupture strength by extrapolation.....	12360
Influence of stress field nonstationarity on crack growth under creep.....	12361

274-L Spallation

Extension of the principles of the kinetic conception of strength to the process of spalling fracture.....	6193
On the fracture physics parameter - Cleavage fracture stress.....	6194
Dynamic fracture (spalling) of metals.....	10398
Conditions for the initiation of oxide-scale cracking and spallation.....	11386
Models of spall fracture.....	11387
Measurement of the tensile stresses behind a spalling plane.....	12362
Critical conditions for microdamage initiation in a spalling metal.....	12363
Investigation of spalling fracture under shock deformation. Model of a damaged medium.....	12364

274-M Micromechanisms

The effects of ferrite grain size on fracture of low carbon steel under mixed Modes I and II.....	1458
Crack healing in metals by crossed electric and magnetic fields.....	3644
Microcrack formation under conditions of developed plastic strain.....	3645
Micro-mechanical modelling of mode III fatigue crack growth in rotor steels.....	4765
The effect of water vapor on fatigue crack tip mechanics in 7075-T651 aluminum alloy.....	4766
A proposed criterion for fatigue threshold: Dislocation substructure approach.....	4767
Surface microcrack closure in fatigue: A comparison of compliance and crack sectioning data.....	4768
Analysis of microdeformations in a structure of polycrystals.....	9297
X-ray microanalysis and acoustic emission studies on the formation mechanism of secondary cracks in PMMA.....	9298
Brittle fracture of bimetals: Dependence of strength on defect size distribution.....	9299
Direct observations of the failure and toughness of hybrid composites.....	9300
The influence of the crack tip stress field on the nucleation and growth of voids.....	9301
The effect of microstructure and stress state on the fracture behaviour of wood.....	9302
Influence of internal microstresses in martensite of near-threshold fatigue crack growth.....	9303
Void growth in spheroidized carbon steels.....	10399
Effects of microstructure on fatigue crack growth in duplex ferrite-martensite steels.....	10400
Size effects and micromechanics of a porous solid.....	10401
Effects of rigid grains separation on the diffusive growth of crack-like cavities on grain boundaries.....	10402
Analysis of failure mechanism of natural building materials during cutting with diamond saws.....	10403
The role of microcracking during crack growth in brittle materials.....	10404
Failure processes in elastomers at or near a rigid spherical inclusion.....	11388
Restoration of contact between crack edges.....	11389

274-Z Experimental techniques

Detection of general yielding in A516 steel by acoustic emission.....	431
Simultaneous measurements of stress intensity and toughness for fast-running cracks in steel.....	4769
Fine-grid method for large-strain analysis near a notch tip.....	4770
Crack-tip stresses as computed from strains determined by stereodimaging.....	4771
Specimen size dependence of low frequency fatigue tests in high-pressure hydrogen.....	4772
Use of scale models to study ductile tearing.....	4773
A simple velocity gauge for measuring crack growth.....	4774
A new fatigue crack growth rate testing method.....	6195
Realistic testing of welds by fatigue bending at low temperature.....	11390
Residual stress and half-value breadth of fatigue-fractured surfaces of various structural steels measured by X-ray diffraction.....	11391
Experimental study on crack stable growth in center-cracked aluminum-alloy sheets.....	12365

276 Fracture Mechanics

276-A General theory

Mechanics of cracks screened by dislocations.....	432
The relation between surface energy and effective fracture energy for grain boundary fracture.....	433
Structural strength and strength in the presence of cracks.....	1459
Overview No. 24: The propagation of cracks by cavitation: A general theory.....	1460
Some remarks on elastic fracture mechanics.....	1461
Thermodynamics of the propagation process of quasibrittle cracks.....	1462
Mechanisms of energy losses during fracture of Homalite 100.....	2481
Two finite length cracks moving between strips under plane extension.....	2482
Fundamentals of the phenomenological theory of nonlinear fracture mechanics.....	2483
Antiplane shear interactions between a circular boundary and a radial crack.....	3646
Comparison of the criteria for mixed mode brittle fracture based on the preinstability stress-strain field. Part I: Slit and elliptical cracks under uniaxial tensile loading.....	3647
Elastic moduli of a cracked body.....	3648
On the fundamental basis of fracture mechanics.....	3649
Theoretical and experimental studies on the extension of cracks subjected to concentrated loading near their faces to compare the criteria for mixed mode brittle fracture.....	3650
The geometry dependence of the J curve for the growth of a deep crack in a solid subjected to bending deformation.....	3651
Unified theory of fracture, (Materials science surveys, no. 1) (Book).....	6196
A study of interference of three parallel cracks.....	6197
A generalized Griffith criterion for crack propagation.....	6198
Deformation and thermodynamic response for a crack dislocation model of brittle fracture.....	6199
Statistical fracture theory for multiaxial stress states using Weibull's three-parameter function (Part 2: Fracture under biaxial stress state).....	6200
Introduction to fracture mechanics (Book).....	9304
Atomic simulation of cracks under mixed mode loading.....	9305
A general mathematical description of hydrogen diffusion in steels - I. Derivation of diffusion equations from Boltzmann-type transport equations.....	9306
A general mathematical description of hydrogen diffusion in steels - II. Numerical study of permeation and determination of trapping parameters.....	9307
Numerical simulation of post yield fracture mechanics experiments as a basis for the transferability to components.....	10405
Time dependence of J-integral.....	10406

Ductile fracture of edge-cracked beam under dynamic electromagnetic bending force.....	12377
A failure assessment diagram for strain hardening materials under cyclic and monotonic loading.....	12378
A higher-order approximation for the T-criterion of fracture in biaxial fields.....	12379
A new approach to determination of CTOD and axis of rotation in small scale yielding situation.....	12380
Some problems in the J-integral.....	12381
Analysis of strain rate effects on ductile fracture of metals.....	12382

276-G Composites & nonhomogeneous media

Application of the principles of linear fracture mechanics to the composite materials.....	447
Mechanical conditions for fracture of anisotropic bodies and their geometry in stress space.....	448
Energy criteria for the brittle fracture of composite materials with initial stresses.....	449
Continuum theory of fracture in the compression of composite materials with a metallic matrix.....	450
Statistical treatment of stress concentration factors in damaged composites.....	1476
Fatigue of graphite/epoxy [0/90/45/-45]s laminates under dual stress levels.....	1477
A model for predicting fracture resistance of fiber reinforced concrete.....	1478
A growth law for propagation of arbitrary shaped delaminations in layered plates.....	1479
Problem of a crack in an orthotropic strip.....	1480
Rigid inclusions in Griffith cracks in a granular solid.....	2502
Crack resistance of interlayers in joints of different moduli subjected to static tensile loading.....	3666
Failure strength of notched composite laminates.....	3668
The fracture diagram: A new design tool for stiffened panels.....	3685
The crack problem for a nonhomogeneous plane.....	3686
Fracture of random short-fiber SMC composite.....	3687
Arbitrarily oriented cracks in a layered media.....	3688
Influence of radial compressive stress owing to pressure on the failure modes of composite tube specimens.....	3689
Fracture mechanics for delamination problems in composite materials.....	3690
Theoretical stress analysis for a non-isotropic body of cylindrical configuration containing a row of cracks.....	3691
Mathematical modeling of damage in unidirectional composites.....	3692
Effect of friction on the process of separation of dissimilar materials.....	3693
Modeling the failure of thin-walled structural elements made of laminated multidirectional composite materials.....	3694
A criterion of fracture caused by damage cumulation in a three-component laminated composite.....	3695
Probabilistic static failure of composite material.....	4809
Exterior star-shaped crack in a bone medium.....	4810
The crack and wedging problem for an orthotropic strip.....	4811
short-fiber SMC composite.....	9329

Probability distributions for the strength of composite materials IV: localized load-sharing with tapering.....	4812
An analysis of the energy release rate for non-coplanar crack growth in fiber reinforced composite materials.....	4813
Elastostatic interaction of multiple arbitrarily shaped cracks in plane inhomogeneous regions.....	6227
A note on the solution of a time-dependent crack problem in an elastic composite.....	6228
Fracture mechanics of syntactic foam composites.....	6229
Analysis of stresses near cracks in composite materials.....	6230
Geometrically nonlinear analysis of adhesively bonded joints.....	7251
J integral as fracture criterion for short fibre composites: An experimental approach.....	7252
Buffer strips in composites at elevated temperature.....	7253
Adhesive bonded orthotropic structures with a part-through crack.....	7254
The effect of the interface strength on the strength of the aluminum-boron composite.....	7255
Fracture, longevity, and damage tolerance of graphite/epoxy filamentary composite material.....	8254
Nonuniform motion of an edge dislocation in an anisotropic solid. I.....	8255
Effect of moisture on static and fatigue behavior of aramid composites.....	8256
Crack-growth resistance of laminated hybrid SMC composites.....	9328
Shear fatigue degradation and fracture of random Damage development near the edges of a composite specimen during quasi-static and fatigue loading.....	9330
Pores as fracture origins in ceramics.....	10429
A dislocation model for crack tip blunting in slightly predeformed low alloy steels.....	10430
Some aspects of crack growth and failure in fibre reinforced composites.....	10431
An edge crack in a bielastic strip.....	10432
Capillary and fissile materials, Part 5: Finite uniform strain. Metastable structure.....	10433
Biaxial-load effects on isopachies for a crack at the interface of dissimilar media.....	11427
Fracture mechanics evaluation of filament wound case materials subjected to operational environments.....	11428
Fractographic features of alumina-particulate-filled epoxide composite.....	11429
Singularities at the tip of a crack normal to the interface of an anisotropic layered composite.....	11430
Interaction of a crack and in inclusion in a piezoceramic half-space.....	11431
Fracture energy of glass fiber reinforced cement composites: Method of determination.....	12383
The effect of specimen size on the fracture energy of concrete.....	12384
Fracture toughness of unidirectional fibre reinforced composites in mode II.....	12385
Predicting the creep of a unidirectional hybrid composite with allowance for the effect of fiber breakage.....	12386

276-H Crack stability & crack branching

Dynamic kinking of a crack in plane strain.....	451
Growth and stability of interacting surface flaws of arbitrary shape.....	1481
The effect of nonuniform bending on the stability of circumferential growth of a through-wall crack in a pipe.....	2503
Crack generated wave fronts.....	2509
Fracture mechanics in design. Particular reference to the thickness effect on the risk of unstable fracture.....	3696
A new method for calculating the elastic component of the crack opening displacement (COD).....	3697
Multiple fractures produced by the bending of brittle beams.....	3698
Shear crack extension through an incident influence.....	3699
Analysis of cracks with multiple branches.....	4814
Condition for stable growth of branched cracks.....	4815
Further studies on dynamic crack branching.....	8257
Influence of temperature rise at the crack tip on crack bifurcation.....	9331
The stability of a penny-shaped crack in a solid subject to an applied tensile stress.....	10434

- Description of an atomistic model of environmentally assisted fracture in terms of catastrophe theory...10435
 Determination of the outset of a stable propagation of cracks.....10436

276-I Impulsive loading & impact

- Sudden twisting of an external circular crack in an infinite medium with a cylindrical inclusion.....1482
 The mechanics of splitting a strip through penetration with a sharp wedge.....2504
 Impact response of a cracked orthotropic medium.....3700
 Elastic impact loading of notched beams and bars.....4816
 Torsional impact response of a penny-shaped crack lying on a bimaterial interface.....4817
 Torsional impact response of an external circular crack in a thick walled hollow cylinder.....4818
 Determination of the initiation toughness prior to ductile tearing during rapid loading.....4819
 Application of instrumented impact testing for studying dynamic fracture behaviour of rotor steels.....6231
 Transition of Hertzian fracture to flexure fracture produced in glass plates by impact.....6232
 Fracture behavior of brittle circular rings subjected to concentrated impulsive loading.....8258
 Load carrying capacity of axis-symmetric elements with angular notches subject to impact tension.....10437
 Calculations of impact stresses in polycrystalline graphite rods.....11432
 Damage in aluminum, zinc and tin from a nanosecond electric pulse discharge.....11433
 Axisymmetric elastodynamic response of a flat annular crack to normal impact waves.....11434
 The dynamic behaviour of an oblique edge-crack under impact loading.....11435
 Hybrid effects and impact properties of CF/GF composite materials.....11436
 Relationship between fracture toughness characteristics for cyclic and dynamic loadings.....11437
 Formation of external circular crack by normal impact or by sudden twisting.....12387
 Torsional impact response of a penny-shaped interface crack in a layered composite.....12388
 Dynamic problem of an elastic shaft containing circular cracks.....12389

276-J Dynamic crack propagation

- A note on the dynamic stress field near a propagating crack.....452
 Dynamic crack-tip fields in rate-sensitive solids.....453
 Memory effect of crack resistance during slow crack growth in notched Al O bend specimens.....1483
 Evaluation of dynamic crack instability criteria.....1484
 Upper and lower bounds for the energy-release rates in an elastic body.....1485
 An analysis of dynamic crack propagation and arrest in a nuclear pressure vessel under thermal shock conditions.....2505
 An analysis of dynamic fracture in an impact test specimen.....2506
 Crack patterns in cylinders explosively loaded at an hemispherical end.....3701
 Brittle-to-ductile transition in steels and the critical transition temperature.....3702
 A finite element model for the analysis of tailored pulse stimulation of boreholes.....3703
 Comparison of static and dynamic energy release rates for different fracture specimens.....3704
 Elastic wave radiation from cleavage crack extension.....4820
 Impact fatigue fracture of axle-steel and tire-steel.....4821
 Mode II dynamic fields near a crack tip growing in an elastic-perfectly-plastic solid.....6233
 Strain energy density fracture criterion in elastodynamic mixed mode crack propagation.....6234
 Axisymmetric problem of a crack growing in an elastic medium at a variable rate.....6235
 Behavior of the solutions of dynamic problems in the neighborhood of the edge of a cut moving at transonic speed in an elastic medium.....6236
 Path-independent integral and moving isoparametric

- elements for dynamic crack propagation.....7256
 A theoretical evaluation of the backfill effect in fracture of gas pressurized pipelines.....7257
 High-frequency acceleration radiated by unsteadily propagating cracks and its near-source geometrical attenuation.....7258
 The locus of environmental crack growth in bonded aluminium alloy joints.....8259
 Correlation between energy characteristics of fracture-crack propagation and cleavage.....8260
 Interrelation between static and dynamic stress intensity factors and their evaluation by caustics.....9332
 Resonance effects for a crack near a free surface.....9333
 Transient stress intensity factors of an interfacial crack between two dissimilar anisotropic half-spaces. Part I. Orthotropic materials.....9334
 Surface motion excited by acoustic emission from a buried crack.....9335
 Mode III and mixed mode I-II crack kinking under stress-wave loading.....9336
 An inductive method for automatic crack length recording.....9337
 The study of dynamic fracture propagation using a special finite element technique.....9338
 An elastodynamic analysis of the single edge notch specimen.....9339
 On the determination of fracture-mechanics data using the nearfield at the tip of dynamically loaded cracks.....10438
 The dynamic properties of moving cracks.....10439
 Dynamic fields near a crack tip growing in an elastic-perfectly-plastic solid.....10440
 A modified stress distribution for a subsonic moving dislocation.....10441
 Path of a crack in a beam due to dynamic flexural fracture.....11438
 The effect of pore size and heat treatment on the fracture toughness of pressed and sintered Ancoloy SA powdered steel.....11439
 On the theory of crack growth under cyclical loads.....11440
 On a hybrid method to determine strain fields around propagating cracks.....12390
 On the crack propagation in micropolar elastic solids.....12391
 Plane strain dynamic crack bifurcation.....12392
 Unstable ductile fracture of rotating disk with crack or sharp notch.....12393
 Peak and root-mean-square accelerations radiated from circular cracks and stress-drop associated with seismic high-frequency radiation.....12394

276-K Crack arrest or retardation

- Crack arrest by reinforcement of a fibre in a composite material.....2507
 An engineering interpretation of pop-in arrest and tearing arrest in terms of static crack arrest, K_{IC}4822
 Effect of side-grooves on fatigue crack retardation.....4823
 Crack deceleration and arrest phenomena at an oblique bimaterial interface.....4824
 Experimental study of retardation of a crack in an optically active epoxy layer.....6237
 Fatigue-crack arrest in mild steel specimens under constant amplitude loading.....8261
 Shear fracture arrestability of controlled rolled steel X70 line pipe by full-scale burst test.....10442
 Effect of crack closure and evaluation of the cyclic crack resistance of constructional alloys.....10443
 Influence of composite protection on the cyclic crack resistance of medium-carbon steel in a corrosive medium.....10444
 Fatigue crack closure and its dependence on fracture features.....11441

276-L Micromechanisms

- Stress activated Raman scattering and microcrack detection.....454
 Overall moduli of solids with microcracks: Load-induced anisotropy.....1486
 Micromechanics of fracture in a Ni-Cr-Mo alloy.....2508
 Microstructural changes associated with yielding and plastic flow in fcc metals and alloys.....3705

- Distribution function of dislocations and condition of finite stress for the dislocation-free zone model of fracture.....3706
- Allowance for the linking of microcracks in a statistical kinetic failure model of a material under uniaxial tension.....3707
- Estimation of a micro crack trajectory in orthogonal cutting of ceramics by the finite element method.....7259
- Controlled interfacial bonding on the strength and fracture toughness of Kevlar and carbon fibre composites.....8262
- The ductile fracture of metals: A microstructural viewpoint.....9340
- Acoustic emission from the aluminium alloy 6061-T651.....10445
- Influence of nucleation and growth of voids on limit load capacity of a thick cylinder.....12395

276-Y Computational techniques

- Finite-element analysis of the stress distribution near a crack by the energy and direct methods.....455
- A probabilistic treatment of brittle fracture under non-monotonically increasing stresses.....1487
- Influence of crack closure on the stress intensity factor for plates subjected to bending-A 3-D finite element analysis.....1488
- The Cholesky method in substructuring with an application to fracture mechanics.....2510
- Fracture mechanics - Chiles-T program.....2511
- A substructuring application of the virtual crack extension method.....3708
- A singular element for a new experimental method of fracture toughness determination.....3709
- An investigation of the stress intensity factor for a finite internally cracked plate by using variational method.....3710
- Volume, surface and interface fracture statistics of brittle materials under flexure.....3711
- The use of the method of lines in 3-D fracture mechanics analyses with application to compact tension specimens.....4825
- Solution of plane notch problems for a finite plate by the generalized variational method.....6238
- Numerical evaluation of stress intensity factor and J integral in three-point bend specimen.....6239
- The use of finite element creep solutions to obtain J integrals for plane strain cracked members.....6240
- The generalised weight function method for crack problems with mixed boundary conditions.....6241
- Evaluation of finite element calculations in a cracked cylinder under internal pressure by speckle photography.....6242
- An extended weight function method for mixed-mode elastic crack analysis.....6243
- Stiffness derivative finite element technique to determine nodal weight functions with singularity elements.....7260
- A central crack at the interface between two different media in a rectangular sheet under anti-plane shear.....7261
- Line-spring analysis of the double-torsion specimen.....7262
- The three-radius and two-radius method for determining stress intensity factors from isochromatic fringes.....7263
- Elastic-plastic behavior of coldworked holes.....8263
- Statistical characteristics of m and C in fatigue crack propagation law $da/dN=C(K)$ (2024-T3 Al alloy).....8264
- Application of fuzzy graph theory to analysis of structural integrity.....8265
- A finite element analysis of the mixed mode bi-material fracture mechanics problem.....8266
- Loss of specular reflection due to nonlinear crack-face interaction.....8267
- Pure opening mode stress-intensity factor computation for elliptical crack fronts.....9341
- Thermal and mechanical modelling of pellet-clad interaction with the FRAGEMA fuel computing system COCCINEL/TITUS.....9342
- Boundary integral equation stress analysis of a rotating disc with a corner crack.....9343
- Elastic-plastic stress analysis of a cracked thick-walled cylinder.....9344
- A central crack element in fracture mechanics.....9345

- A collocation procedure for determining fracture mechanics parameters at a corner.....10446
- Computer simulation of fracture using long range pair potentials.....10447
- Dislocation enhancement and inhibition induced by films on crack surfaces.....10448
- A method of boundary interpolation in problems of fracture mechanics.....10449
- Use of the finite-element method in fracture mechanics.....10450
- Effect of side grooves for three-point bending fracture toughness specimens - Three-dimensional elastic-plastic finite element analysis.....11442
- Surface integral finite element hybrid (SIFEH) method for fracture mechanics.....11443
- Double nodding technique for mixed mode crack propagation studies.....11444
- The finite difference technique for solving crack problems.....11445
- Solutions of multiple crack problems of a circular region for antiplane elastic problem or torsion problem by using Fredholm integral equation approach.....11446
- Construction of mapping functions for nonsymmetric defects with different kinds of angular reentry points on a contour.....11447
- Both independent integrals for computing stress intensity factors at sharp notches in elastic plates.....12396
- The effect of an inclusion or a hole on an approaching crack in the three-point bend specimen.....12397
- J-integral analyses of plate and shell structures with through-wall cracks using thick shell elements.....12398
- Analysis of the distribution of time to failure in stochastic failure process.....12399
- Calculation of stress intensity factors by natural triangular elements.....12400

276-Z Experimental techniques

- Acoustoelastic determination of forces on a crack in mixed-mode loading.....3712
- Load-shedding techniques for fatigue-threshold determination.....3713
- A new method of determining J of steel by means of single specimen.....3714
- On experimental two-dimensional models of intercrystalline sliding and fracture in polycrystalline metals.....3715
- Application of a new velocity gage to fracture at high crack velocities.....3716
- Effect of the dimensions of specimens on the crack resistance of creep-resisting hull steels.....3717
- Photoelastic investigation of the double-torsion specimen.....4826
- Caustics in plane strain-evaluation of COD and the core region.....4827
- Computer controlled decreasing K fatigue threshold test.....4828
- Photoelastic determination of stress intensity factors for single and interacting cracks and comparison with calculated results. Part I: Two-dimensional problems.....6244
- Photoelastic determination of stress intensity factors for single and interacting cracks and comparison with calculated results. Part II: Three-dimensional problems.....6245
- On the unloading compliance method for crack length measurement.....6246
- Acoustic emission due to nucleation of a microcrack in the proximity of a microcrack.....6247
- Measurement of stress-intensity factors K and K by shearing interferometer.....6248
- A new formula for calculating K of DCB specimen under fixed displacement.....6249
- Effect of specimen thickness on Mode I stress intensity factor in photoelastic investigations.....6250
- Photoelastic analysis of practical Mode I fracture test specimens.....7264
- Fracture toughness of blunt-notched CT specimens of ductile cast iron.....7265
- Laser micro-speckle interferometry and its application in the measurement of inplane displacement in the vicinity of a crack tip.....7266

- An experimental investigation of effects of cracks on vibrational characteristics of thin cylindrical shells with two fixed ends.....7267
- Experimental stress-intensity distributions in three-dimensional cracked-body problems.....8268
- Relationships between crack opening displacement, alloy variables, and crack detection sensitivity.....8269
- Determination of stress intensity factor by surface reflected caustics.....9346
- Crack growth resistance evaluation of ductile material using DCB specimen.....9347
- Crack length calculation formula for three point bend specimens.....9348
- The experimental evaluation of the biaxiality factor k in cracked plates by the method of reflected caustics.....9349
- The two dimensional analysis of surface markings in brittle plastic plates (An application of the velocity equation at constant force).....10451
- Transferability of post yield fracture mechanics properties from small scale specimens to large scale specimens and components.....10452
- Validity of compliance calibration to cracked concrete beams in bending.....11448
- J fracture toughness test on Charpy-size specimens and its application to evaluation of heat-affected-zone toughness in steel plates.....11449
- Effect of clustered small flaws on unstable fracture of large rotor forging.....11450
- Effects of stress triaxiality and temperature on ductile fracture process and fracture toughness.....11451
- DC potential technique for surface crack growth monitoring.....11452
- Surveillance program for evaluation of material degradation after long term service in the petroleum refining reactor pressure vessel (1 1/4Cr-1/2Mo).....11453
- Impact testing of laser glazed Charpy samples.....11454
- Impact testing of laser glazed Charpy samples.....11455
- Experimental study of fracture under combined modes K - K.....11456
- Drop in K due to load shift in single-edge-notch tests with compliant drawbars.....12401
- Effect of loadline shift on applied crack tip stress intensity in WOL specimens.....12402
- Experimental measurement of the J-integral.....12403
- Application of an elastic-plastic model to the use of small specimen strength ratio for measuring fracture toughness.....12404
- Monitoring the onset of stable crack growth by ultrasonic method and a single specimen evaluation of elastic-plastic fracture toughness.....12405
- 278 Experimental Stress Analysis
- 278-D Photoelasticity
- Crack-tip measurements in photoelastic models.....456
- Photoelastic determination of complex stress intensity factors for slant cracks under biaxial loading with higher-order term effects.....457
- Dynamic crack curving - A photoelastic evaluation.....1489

- A comparison of residual-stress measurements using blind-hole, abrasive-jet and trepan-ring methods....1501
 Through-thickness measurement of residual stresses in thin tubes.....4841
 Comparison of two methods of measuring residual stresses arising from surface treatment.....6270
 A Fourier transform technique that measures phase delays between ultrasonic impulses with sufficient accuracy to determine residual stresses in metals...6271
 Measurement of residual strains and stresses in transparent materials.....7271
 A consistent-splitting model for experimental residual-stress analysis.....8291
 Both surface removal-both surface X-ray diffraction method for residual stress measurement in a hollow cylinder.....9356
 Residual strength of impact damaged composites.....9357
 Single surface removal-both surface X-ray diffraction method for residual stress measurement in a hollow cylinder.....11473
 Non-destructive determination of residual stresses in circular silicon wafers.....11474
- 278-P Dynamic stress measurements
- Cepstrum analysis of the vibrations of rotor machines.....10467
 Shear-vibration transducers for determining the properties of highly absorbing media.....10468
- ## 280 Material Test Techniques
- 280-B Axial loading
- Method for measuring the yielding of the testing system machine-specimen.....466
 Mathematical modelling of dynamic handling of road articulated vehicles.....3722
 An anisotropic generalization of the Bridgman analysis of tensile necking.....4842
- 280-C Bi- & triaxial loading
- The effects of material rotations in tension-torsion testing.....467
 A study of yield surface upon reversal of loading under biaxial stress.....3723
 A biaxial stress transducer for fabrics.....8292
- 280-D Flexural loading
- The failure of steel bars containing blunt notches....1502
- Quantitative ultrasonic nondestructive evaluation methods.....2520
 Tensile strength of concrete.....8293
 Measurement of low corrosion rates: Comparison of A.C. impedance and thin layer activation methods...11475
- 280-E Shear & torsional loading
- The Iosipescu shear test as applied to composite materials.....1503
- 280-F Combined loading
- Tensile creep acceleration by superimposed cyclic torsional strain in polycrystalline metals.....10469
 Continuous failure state direct shear tests.....11476
- 280-G Determination of elastic constants
- Optimization of the computation of elastic constants from the measurements of ultrasonic velocities.....468
 Determination of the elastic properties of fibers.....2521
 Measurements of elastic constants of wood by means of numerical ultrasonic interferometer and their optimization.....3724
 Vibration of thick circular plates—Determination of elastic properties through the resonant behaviour...4843
 Determination of certain elastic characteristics of materials with the use of parabolic interpolation of strain curves.....6272
 Why not 3 X 6 inch cylinders for testing concrete compressive strength?.....9358
 High fly ash concretes.....9359
 Effective elastic properties of axial textures.....10470
 Investigation on determination of Young's modulus of metal S with the static method.....10471
 Mechanical properties of paper.....11477
- 280-H Repeated loading (fatigue)
- Method of low-cycle fatigue testing.....469
 Crack growth kinetics under symmetric and pulsating load.....1504
 The influence of the time scale of a stochastic wide-spectrum straining process on the fatigue strength of the test piece.....1505
 Evaluation of service load by micro-fractography of fatigue fracture.....1506
 Fatigue life of concrete under varying repeated compressive load.....1507
 Correlation between the rate of damage and energy absorption of structural steel during fatigue testing.....2522
 Statistical cumulative damage theory for fatigue life prediction.....3725
 Application of a peak-valley detector for secant stiffness measurements.....8294
 The effect of preload on fatigue strength of residually stressed specimens.....8295
 Computer-aided verification of fatigue-machine performance.....8296
 Shakedown at finite displacements — A note on Melan's theorem.....11478
- 280-I Dynamic loading (impact)
- An analysis of shot peening.....2523
 Determination of dynamic properties of elastomers over broad frequency range.....4844
 Fracture properties of metals under rapid heating and loading.....4845
 Fragmentation of metal rings by electromagnetic loading.....8297
 On the adiabatic shear of Ti-6Al-4V ballistic targets.....10472
 Strain rate history effects and observations of dislocation substructure in aluminum single crystals following dynamic deformation.....10473

280-K Creep & stress relaxation

- Creep and shrinkage: Their effect on the behavior of concrete structures (Book).....1508
 Influence of stress cycling on creep behaviour of an Al-Mg alloy under strain ageing conditions.....3726
 Application of the incremental step creep test for the determination of a creep damage coefficient.....7272
 Stress relaxation in bending of type AISI 304 and A-286 steels at 773 K.....11479
 Creep fracture mechanism and rupture life of 1.3 Mn-0.5 Mo-0.5 Ni steel.....11480
 Creep characteristic of glass fiber reinforced composites.....11481

280-L Plastic flow

- Plane-stress fracture testing of finite sheets under biaxial loads.....4846
 The effect of thermal loading on the yield surface of aluminium. An experimental investigation.....9360
 Variations in ductility produced by strain rate changes in tensile testing.....9361
 The influence of interfacial friction on the deformation of high density polyethylene in a split Hopkinson pressure bar.....12408

280-M Fracture toughness

- Determining the fracture toughness of ductile steels...470
 Study of fracture toughness evaluation of FRP.....471
 Fracture toughness of concrete: K revisited.....1509
 Evaluation of fracture toughness by stretched zone method in machine structural steels.....1510
 Fracture toughness determination of bearing steel using chevron-notch three point bend specimen.....2524
 Study of the relationship between fracture toughness (J) and bulge ductility.....2525
 Temperature dependence of fracture toughness and ductility for BCC materials in the transition region.....3727
 Measurement of dynamic fracture toughness J by instrumented Charpy test.....4847
 A model for predicting the influence of warm pre-stressing and strain ageing on the cleavage fracture toughness of ferritic steels.....4848
 An energy approach to evaluating the crack resistance of materials.....6273
 Determination of the resistance to brittle fracture of steels on samples with a circular notch.....6274
 Determination of fracture-toughness characteristics under a pulsed loading.....6275
 The use of stretch zone width measurements in the determination of fracture toughness of low strength steels.....7273
 Method of testing metals for fracture toughness with vibrational loading and high temperature.....8298
 Fracture toughness of Kevlar-epoxy composites with controlled interfacial bonding.....9362
 The fracture toughness of tough polyethylenes by a novel high pressure technique.....9363
 On the dependence of fracture toughness on metallurgical factors.....10474
 An instrumented microtome for improved histological sections and the measurement of fracture toughness.....10475
 Dynamic toughness: Fracture mechanics interpretation of the drop-weight (NDT) test.....11482
 J test procedures in transition temperature region.....11483
 Determination of dynamic fracture toughness of PMMA by impact bending test.....11484
 Fracture of round bars loaded in Mode III and a procedure for K determination.....11485
 Measurement of dynamic fracture toughness by a split Hopkinson bar technique.....11486
 A mixed mode fracture specimen for mode II dominant deformation.....12409
 The scatter in K -results.....12410

280-N Hardness

- On the use of hardness tests to estimate the extent of plastic deformation.....4849

- On the relations between ball indentation hardness measurements and the tensile flow behaviour of some ferrous and non-ferrous metals.....9364
 Investigation of the nature of micro-indentation hardness gradients below sliding contacts in five copper alloys worn against 52100 steel.....11487
 Vickers indentation curves of magnesium oxide (MgO).....12411

280-O Abrasion & wear

- A new approach for testing concrete curing efficiency.....9365

280-P High pressure

- The mechanical properties of PVC under high pressure.....10476

280-Q Vacuum

- Use of vacuum metallography methods for evaluating the effectiveness of materials with protective coatings.....472
 Some characteristics of the cutting of construction materials in vacuum.....12412

280-R Other extreme environments

- The physical interpretation of the parameters measured during the tensile testing of materials at elevated temperatures.....9366
 An extensometer for axial strain measurement at high temperature.....9367
 Questions of the diagnostics of high-temperature material testing regimes by using inverse problems.....11488

280-S Nondestructive techniques

- A note on the smallest defect that can be detected using ultrasonics.....6276
 The influence of skin depth on crack measurement by the ac field technique.....6277
 Characterization of localized surface elastic defects by nonspecular reflection at the Rayleigh angle.....6278
 Infrared scanning thermography for a quantitative detection of cavities in a plane slab and a rectangular prism.....6279
 Measurement of acoustoelastic coefficients of Rayleigh waves in steel alloys.....6280
 The impedance method of non-destructive inspection.....8299
 Feasibility of inclusion detection and characterization in titanium powder compacts using ultrasonics.....8300
 Dynamic effects during vibrothermographic NDE of composites.....8301
 Computer-controlled system for nondestructive thickness measurement of corroded steel structures.....8302
 Diagnosing in situ concrete by ultrasonic pulse technique.....8303
 Quantitative characterization of flaws near a surface using inverse Born approximation.....8304
 Near surface flaw detection by ultrasonic critical angle imaging.....8305
 Two-dimensional radiographic imaging analysis.....8306
 New procedures in non-destructive testing (Proceedings of the Germany-U.S. Workshop Fraunhofer-Institut, Saarbrücken, Germany, Aug. 30-Sept. 3, 1982) (Book).....9368
 Experimental examination of the electromagnetic field of a defect having the form of a cylindrical cavity.....9369
 Special features of application of aqueous solutions of commercial detergents in capillary flaw inspection.....9370
 In-process tool fracture detection.....10477
 Estimation of the parameters of flaws in real time in case of random perturbations.....10478
 Assessment of in situ concrete strength by various non-destructive tests.....11489

Effect of scattered radiation on the sensitivity of
photon neutron inspection.....11490
Accessory attachment to an ultrasonic flaw detector
for monitoring the state of the acoustic bond.....11491
Phased linear array with excitation system.....11492
Standard-free ultrasonic pulse-echo thickness gauge.....11493
Estimation of the influence of fluctuations in the
geometrical dimensions of testpieces on the
results of acoustical measurements.....11494
Examination of the distribution of the
electromagnetic field and calculation of the force
acting on moving magnetizing circuits of a flaw
detector in the inspection of transmission
pipelines.....11495
Eddy-current flaw detector for inspecting pipes in
the manufacturing line of a forming-welding mill.....11496
Technological features of the optical absorption
method of leak testing of vessel structures.....11497
Ultrasonic testing of materials, third edition
(Book).....12413

280-T Instrumentation

Impact-tension compression test by using a split-
Hopkinson bar.....11498
A modified instrumented Charpy test for cement-based
composites.....11499

282 Structures (basic)

282-A General theory

Theory of related structures.....473
Principle of virtual work for a general deformable
body - a simple proof.....2526
Note on the design differentiability of the static
response of elastic structures.....2527
Nonlinear inverse perturbation method in dynamic
analysis.....3728
Some recent developments in structural control.....3729
Wrinkling phenomenon in structures, Part II:
Wrinkling criteria.....6281
Problems of the statics and dynamics of modern
engineering designs. Status of the problem, new
problems, and prospects.....6282
A coordinate reduction technique for dynamic
analysis of spatial substructures with large
angular rotations.....7274
Structural theory of distributed systems (Translated
by L. W. Longdon) (Book).....8307
Approximate higher-order sensitivities in structural
design.....9371
Design sensitivity analysis strain energy via
distribution.....9372
Methods of reference basis for identification of
linear dynamic structures.....9373
Linear system identification via Poisson moment
functionals.....9374
Comparison of modal combination methods.....10479
Law of total work conservation and principle of
total performance.....10480

282-C Limit design (shakedown)

Effect of the fluid film profile on the performance
of magnetohydrodynamic bearings.....474
On exactness of the kinematical approach in the
structural shakedown and limit analysis.....1511
Extensional collapse modes of structural members.....3730
Limit analysis and homogenization.....3731
Numerical determination of limit loads for an
axisymmetrical orthotropic material in plane
strain.....4850
Limit state design of tall, reinforced concrete
frames.....6283

282-D Structural optimization

Optimality conditions in axisymmetric problems of
elasticity theory.....475

Optimal design of elastic plates with a constraint
on the slope of the thickness function.....476
Optimum design of reinforced concrete water tanks.....477
Parametrical optimization of plastic beams in the
post-yield range.....478
Minimum weight plastic design of continuous beams.....479
A stress versus compliance constraint in a minimum
weight design.....480
Minimum mass design of elastic frames subjected to
multiple load cases.....481
Stress constraints and screening for optimality
criteria design.....482
Interaction of the joint and of the lateral bracing
stiffnesses for the optimum design of unbraced
frames.....483
Optimal plastic design of stiffened shells.....484
Variational approach by means of adjoint systems to
structural optimization and sensitivity analysis -
I. Variation of material parameters within fixed
domain.....485
Optimal forms of shallow arches with respect to
vibration and stability.....486
Optimal modification of shape for two-dimensional
elastic bodies.....487
Optimizing reinforced cylindrical shells with local
loads from strength conditions.....488
Structural optimization to include material
selection.....1512
An iterative method for finite dimensional
structural optimization problems with repeated
eigenvalues.....1513
Optimal strength design of beam-columns.....1514
On structural optimization.....2528
Optimum rigidity of stiffeners of steel girders.....2529
An algorithm for engineering design optimization.....2530
A decomposition procedure for large-scale optimum
plastic design problems.....2531
Design with several eigenvalue constraints by finite
elements and linear programming.....2532
Design sensitivity analysis in structural mechanics.
III. Effects of shape variation.....2533
Optimal design of a plastic circular plate.....2534
Numerical optimum design of elastic annular plates
with respect to buckling.....3732
Strength optimization of the shape of a viscoelastic
inhomogeneously-aging reinforced rod.....3733
Shape design sensitivity analysis of elastic
structures.....3734
Optimum design of crane runway girders.....3735
Optimal shape of a reinforced column built up at a
random rate.....3736
Optimal design of rigid-plastic beams of stepwise-
constant height under impulsive loading.....3737
Optimal structural remodeling of multi-objective
systems.....4851
Minimum weight design of tapered steel I-columns.....4852
Aspects of analysis and optimization of structures
under proportional and variable loadings.....4853
Optimum design sensitivity based on approximation
concepts and dual methods.....6284
Instability of optimal equilibria in the minimum
mass design of uniform shallow arches.....6285
Explicit optimum design technique for linear elastic
trusses.....6286
Design object optimizational analytic-structural
model.....6287
Minimum-weight thin-walled cylinders of given
torsional and flexural rigidity.....6288
Hybridization of reinforcement to optimize part
performance and molding in reinforced
thermoplastics.....6289
Some applications of dual methods to optimal design
of elastic structures.....7275
Optimality criteria for materials with nonlinear
behaviour: application to beams in bending.....7276
Instability of optimal equilibria in the minimum
mass design of uniform shallow arches.....7277
A hierarchical method for large-scale two-
dimensional layout.....7278
Optimum design of variable-material flywheels.....7279
Optimal plastic design of a cross section under
torsion with small bending.....7280
Hole shape optimization in circular discs with two
neighbouring holes.....8308
Structural optimization in the industrial design
process.....8309

- Optimal structural design under multiple eigenvalue constraints.....8310
 A computational study of transformation methods for optimal design.....9375
 Multilevel synthesis of standard building structures.....9376
 Minimum-weight design of trusses by an optimality criteria method.....9377
 Optimum reinforcement of a circular hole under an arbitrary stress system at infinity.....9378
 An interpretation for min-max structural design problems including a method for relaxing constraints.....9379
 Sensitivity analysis for beams and plates (the elementary solution approach).....9380
 Design sensitivity analysis and optimization of dynamic response.....10481
 Some optimal and inverse problems for orthotropic noncircular cylindrical shells.....10482
 On the existence of solutions to some problems of optimal design for bars and plates.....10483
 The optimum design of pin-jointed space structures with variable shape.....11500
 A recursive quadratic programming method with active set strategy for optimal design.....11501
 Bicriterion optimum design method for elastic trusses.....11502
 An efficient technique in shape optimization.....11503
 Three-dimensional shape optimization of arch dams with prescribed shape functions.....11504
 Minimum weight design for structural eigenvalue problems by optimal control theory.....11505
 A variational formulation for multicriteria structural optimization.....11506
 Analytical determination of higher buckling modes for unimodal optimal columns.....11507
 Optimization of a composite conical ring-reinforced shell under external pressure.....11508
 Optimal nonequal-strength shapes of beam cross sections.....11509
 Novel concepts for constraint treatments and approximations in efficient structural synthesis.....12414
 Variational approach by means of adjoint systems to structural optimization and sensitivity analysis - II. Structure shape variation.....12415
 Bimodal optimal design of clamped-clamped columns under creep conditions.....12416
 Structural error synthesis of a four-bar function generator using the reliability concept.....12417
 Multi-modal analysis of critical forces on tangentially loaded structures.....12418
- 282-E Probabilistic design
- A probabilistic analysis of steel beam-columns.....489
 Probability of failure of thermoelastic reinforced shells.....3738
 A new approach to probability in engineering design and optimization.....10484
 Estimation of fatigue life of airframe structural elements from operation and overhaul data.....12419
- 282-F Nonlinear theory
- Nonlinear analysis of optimized structure with constraints on system stability.....490
 Polzuchest kristallichesikh tel pri nezkikh temperaturakh (Creep of crystalline bodies at low temperatures) (Book).....1515
 Geometrically nonlinear mode approximations for impulsively loaded homogeneous viscous beams and frames.....2535
 Nonlinear behaviour of non-integral infilled frames.....3739
 To the question of specified and design strengths of concrete.....10485
- 282-G Reliability design
- Reliability of aluminum beam-columns.....491
 Computing the reliability of anisotropic shells from the probability of infrequent excursions of a random vector field beyond the limiting surface.....3740
- Damage tolerant design using collapse techniques.....4854
 Investigation of reliability and load-carrying capacity of steel structures.....6291
 Critical imperfection territory.....7281
 Relationship of calculation models and reliability conditions of design of structures.....8311
 A general method for estimating reliability of machine elements subjected to fluctuating load.....9381
 Strengthening effect of the fibre.....9382
- 282-H Concrete (reinforced)
- Nonlinear analysis of multi-cell reinforced concrete box girder bridges.....492
 Basic models for torsion of structural concrete: Extension to multiple box sections.....493
 Time-dependent behavior of a skew reinforced concrete box girder bridge.....494
 Adaptability of plasticity a structuralor dia beton armat (Plastic adaptability of reinforced concrete structures) (Book).....1516
 Cracking in concrete tension flanges of composite T-beams.....1517
 Stress-strain relations of steel fiber reinforced concrete under repeated compressive load.....1518
 A study of flexure in reinforced masonry beams.....1519
 Detection of failures on concrete structures in sea water.....1520
 Standard practice for the use of shrinkage-compensating concrete.....1521
 Experiments on closing reinforced concrete corners.....2536
 Influence of shrinkage on state of stress of reinforced concrete cross-section.....2537
 Flexural-concrete elements confined by binders.....2538
 Cracking, cover, and corrosion of reinforcement.....2539
 Suggestions for the design of R/C lapped splices for seismic loading.....2540
 Bamboo reinforcement in concrete.....2541
 A finite element for the analysis of reinforced concrete structures.....3741
 Towards an optimum model for the response of reinforced concrete beams to cyclic loads.....3742
 On the multiaxial behaviour of concrete exposed to high temperature.....3743
 Interpretation of results of Meppen slab tests—Comparison with parametric investigations.....3744
 Shear resistance of reinforced concrete beams with non-prismatic sections.....3745
 Finite element analysis of reinforced and prestressed concrete structures including thermal loading.....4855
 The effect of concrete bond on the stress intensity factors for an edge crack in a reinforcing bar.....4856
 Review of ACI code for design with high-strength concrete.....6292
 Some factors affecting strength characteristics of steel fibre-reinforced concretes.....6293
 Tests on concrete beams in biaxial bending, axial compression and torsion.....6294
 Multilevel optimal design of reinforced concrete structures.....6295
 Long-term deformation of reinforced concrete slabs under different loading levels.....6296
 Reinforcement anchorage in aerated concrete elements subjected to sustained load effects.....6297
 Refined calculation of deflections of reinforced concrete elements subjected to many times repeated loading.....6298
 Diagnosis of reinforced concrete slabs for highway bridges.....7282
 Reinforced concrete beams with small opening in bending and torsion.....8312
 Use of bond stress-slip data for studying the effect of high temperatures on the bond in the anchorage zone of reinforced concrete structures.....8313
 The short-term moment-curvature relationship for reinforced concrete beams.....8314
 Deformation and failure in large-scale pullout tests.....8315
 Simplified cracked section analysis.....8316
 Combined bending and torsion in reinforced concrete beams with rectangular openings.....8317
 Considerations in the prevention of damage to concrete frozen at early ages.....8318

- Mixed torsion analysis of reinforced concrete channel beams - A Fourier Series approach.....8319
 Behavior of earthquake resistant structural walls before and after repair.....8320
 Properties of recycled aggregate concretes as affected by admixtures in original concretes.....9383
 Prevention and repair of voids around congested reinforcement.....9384
 Ductility of plain and confined concrete under different strain rates.....9385
 Corrosion of steel in concrete (CBI Forskning PO 4-82) (Book).....10486
 A system of automated testing of concrete.....10487
 Failure of reinforced beams in combined loading.....10488
 Reinforced concrete deep beam panels with high depth/span ratios.....11510

282-I Concrete (prestressed)

- An approximate nonlinear design procedure for partially prestressed concrete beams.....495
 Design and calculation of strength of heat-treated concretes.....1522
 Ultimate flexural capacity of partially or fully prestressed cracked arbitrary concrete sections under axial load combined with biaxial bending.....1523
 Effect of heavy nonsymmetric reinforcement on the delayed deformation of a prestressed structure.....1524
 Nordic concrete research (Publication no. 1) (Book).....2542
 A design procedure for post-tensioned concrete pavements.....2543
 Recommendations for concrete members prestressed with unbonded tendons.....4857
 Ultimate torsional properties of prestressed concrete beams.....7283
 Anisotropy of elastic properties of concrete with tabular gravel.....8321
 Rheology of prestressed circularly symmetric discs.....10489

282-J Sandwich structure

- Maximum stiffness beam-columns subjected to concentrated moments.....6299

282-L Dynamic & random loading

- Probabilistic yield design.....6290
 A model for elasto-plastic dynamic response analysis of space frame structures taking into consideration horizontal-torsional coupling vibration due to earthquake.....10490
 Mechanical properties of the shuttle orbiter thermal protection system Strain Isolator Pad.....11511

282-M Thermal loading

- Experimental evaluation of the radiative heat flux from rocket plumes on satellite structures.....4858

282-Y Computational techniques

- Improvement of a large analytical model using test data.....496
 Statica constructiilor, III, Formulări si metode matricale in statica liniara. Comportarea si calculul neliniar al structurilor (Structural statics, Vol III, Matrix formulation, matrix methods in linear statics and nonlinear behavior and (Book).....3746
 Approximations method for space frame synthesis.....4859
 Using combined finite element method for analysis of load-carrying capacity of slender webs.....6300
 A general methodology for nonlinear structural analysis by mathematical programming.....7284
 Use of theory of graphs for analysis of trusses.....7285
 Theoretical stiffness matrix correction by using static test results.....9386
 Rational approximations in structural design reanalysis.....10491
 Sequential quadratic programming approach in engineering structural optimization.....10492

- A stiffness matrix extrapolation strategy for nonlinear analysis.....10493

282-Z Experimental techniques

- Laboratory evaluation of ultrasonics for crack detection in concrete.....2544
 Statistical investigation of repeated events with respect to loads of structures.....2545
 The use of the hertzian dimension in wear scar analyses (application to four-ball results).....4860
 Investigations of the engineering properties of OPC/pulverized fuel ash concrete: strength development and maturity.....11512

284 Structures (ground)

284-B Bridges

- Anchorage plates for cable-stayed bridges.....497
 A simplified analysis of cable-stayed box bridges.....1525
 Moment redistribution in skewed slab bridges.....6301
 Static analysis of right box girder bridges by spline finite strip method.....6302
 Windmills, bridges, & old machines, discovering our industrial past (Book).....7286
 Interface shear stresses in composite plates under wheel loads.....7287
 A two-stage procedure for the non-linear analysis of slab bridges.....8322
 Elastomeric bridge bearings specifications: Review of the present and proposals for the future.....8323
 Routine maintenance of concrete bridges.....8324
 Bridge response with tractor-trailer vehicle loading.....8325
 The role of time integration in suspension bridge dynamics.....9387
 To the question of consideration of co-operating width in thin-wall bridge-deck orthotropic structures.....10494
 Three-dimensional analysis of curved girder bridges.....10495
 Stability of steel arch-bridges a state-of-the-art report.....12420

284-C Dams & spillways

- Existing schemes for constructing high concrete dams and ways to improve them.....2546

284-D Tunnels

- Investigation of the performance of lattice girders in tunnelling.....11513

284-E Frames, trusses, & arches

- Dynamic characteristics of frame-wall systems.....498
 Deflection of elastic-plastic frames at finite spread of yielding zones.....499
 On plane Prager-structures - I.....500
 On plane Prager-structures-II. Non-parallel external loads and allowances for selfweight.....501
 Remarks on minimum-volume designs of a three-bar truss.....502
 A development in the automated design and fabrication of portal framed industrial buildings.....1526
 Fully stressed design of a superstatic truss with multiple loads (I).....2547
 Design studies on unbraced, multistorey steel frames.....2548
 Hencky-Prandtl nets and constrained Michell trusses.....2549
 Plastic theory of non-integral infilled frames.....6303
 Stocky plate girders subjected to edge loading.....6304
 Planar wall-frame structural interaction.....8326
 Optimal synthesis of frameworks under multilevel performance constraints.....8327
 Three-dimensional equivalent frame analysis of shearwalls.....8328
 Optimality criterion techniques applied to frames having general cross-sectional relationships.....9388

- On the influence of the discretization density in the nonlinear analysis of frames.....10496
 The beam-like behavior of space trusses.....10497
 The behaviour and design of haunched steel portal frame knees.....11514
 Unresolvable statically determinate trusses and mechanism buildup groups.....11515
 On the design of web-tapered, unequal-flanged structural steel columns.....12421
 Flexibly-jointed unbraced portal frames.....12422

284-F Buildings (tall)

- A simplified model for lateral load analysis of asymmetrical buildings.....1527
 Optimum design of multistory multispan frames for prescribed elastic compliance.....7288
 Plastic theory of infilled frames with finite interface shear strength.....8329
 Some dynamic characteristics of a tall building.....8330
 The influence of structural performance on the distribution of wind loads on buildings.....9389
 Computer-aided algorithms for multistory buildings.....11516

284-G Buildings (miscellaneous)

- Industrial buildings — portal or spaceframe.....1528
 Simplified analysis of lateral load distribution in structures consisting of frames, coupled shear walls, and cores.....1529
 Simplified interactive analysis of long framed buildings on raft foundations.....6305
 Structuri pentru constructii, teorie si calcul, Vol. 1 (Building structures, theory and analysis, Vol. 1) (Book).....8331
 On the stiffness properties of masonry.....8332
 Frame analysis of concrete buildings.....9390
 Mechanical properties of timber joints with metal plate connectors.....10498
 Effect of local elastic wall deformations on the interaction between floor slabs and shear walls.....11517
 Investigations concerning the behaviour and load-bearing capacity of built-up light-gauge structures.....11518
 Modeling of shear wall buildings.....12423

284-H Chimneys & towers

- Wind-loaded reinforced-concrete cooling towers: buckling or ultimate load?.....1530
 Support technique for a large silo in poor rock.....11519

284-I Roofs, floors, & grillages

- Arching action in transverse laterally loaded masonry wall panels.....7289
 Structural design of cable-suspended roofs, M. N. Pavlovic, translation ed., (Ellis Horwood Series in Engineering Science) (Book).....12424

284-K Underground structures

- Correlation between exposure years and deterioration on the basis of field test stakes treated with oil-borne preservative.....10499
 The burial of a slender elastic vertical cylinder.....10500

286 Structures (ocean and coastal)

286-C Marine applications

- On propagating buckles and their arrest in sub-sea pipelines.....1531
 Coupled dynamics of tensioned buoyant platforms and mooring tethers.....4861
 Design philosophy of marine structures. A report of the Design Philosophy Committee of the International Ship Structures Congress.....7290

- Design philosophy of marine structures. A report of the Design Philosophy Committee of the International ship structures congress.....7291
 Analysis of heaving and yawing motion of a floating breakwater by finite element method.....8336

286-D Offshore (fixed platforms, etc.)

- Surge response of tension leg platforms.....1532
 Expected value analysis for the quasi-static response of offshore structures.....2550
 Dynamic behaviour of offshore jacket platforms.....2551
 The force exerted by a moving ice sheet on an offshore structure. Part 1. The creep mode.....3747
 A design basis for the J-tube method of riser installation.....6306
 Axial stretching oscillation of an 18,000-ft vertical pipe in the ocean.....6307
 Rig jacking on soft soil foundations: Improvements in safety and speed by monitoring leg loads.....6308
 An analysis of the thermal fixation of pilings.....6309
 Laminated rubber articulated joint for the deep water gravity tower.....8333
 Load spectra for slender offshore structures in waves and currents.....8334
 Contract writing in engineering, pipeline hydraulics offshore structure technology, (A workbook for engineers), Presented at 39th Petroleum Mechanical Engineering Workshop and Conference, September 11-13, 1983, Tulsa, Oklahoma (Book).....10501
 Reliability and safety of tension leg platforms.....10502
 Structural response analysis of tension leg platforms.....10503
 Stiffness and energy dissipation characteristics of guyed tower with dynamic mooring properties.....10504
 Investigation of the Alexander L. Kielland failure — metallurgical and fracture analysis.....10505
 Selection and evaluation of high-strength steel for Hutton TLP tension leg elements.....10506
 The influence of tension, pressure and weight on pipe and riser deformations and stresses.....10507
 The stress analysis and experimental research of tubular joints of offshore drilling platform.....10508
 Evaluation of structural steel castings for the Hutton tension leg platform.....12425
 Improved modeling of tubular brace elements under severe cyclic loading.....12426

286-E Offshore, mobile

- Stresses in stiffened tubular T joint of an offshore structure.....6310
 Nonlinear dynamic analysis of guyed tower platforms.....6311
 Interaction of ice floes with columns of a semi-submersible platform.....8335
 Optimal design of semi-submersible form by minimizing its motion in random seas.....10509

286-F Underwater structures/habitats

- The usefulness of static condensation in the finite element analysis of stiffened submersible cylindrical hulls.....4862

286-Y Computational techniques

- Reliability analysis of total systems using component failure data.....6312

286-Z Experimental techniques

- Damage detection in offshore structures by the random decrement technique.....10510

288 Structures (mobile)

288-B Ground vehicles (including tires)

- Validation of rail vehicle system dynamic models.....1533
 Spectrum analysis of road roughness for earthmoving machinery.....1534
 Computational methods in ground transportation vehicles, presented at The Winter Annual Meeting of The American Society of Mechanical Engineers, Phoenix, AZ, Nov. 14-19, 1982 (AMD-Vol.50) (Book)...2552
 Preliminary approximate analysis of bending stresses in lattice-like vehicle structures.....6313
 Tyre radial properties.....6314
 A mathematical model for steady state tyre forces.....7292
 Technological advances in vehicle design (Book).....8337
 Analysis of vehicle structures.....8338
 A design procedure for the optimization of vehicle suspensions.....8339
 Active damping in road vehicle suspension systems.....8340
 Semi-active control of wheel hop in ground vehicles...8341
 Steady and transient turning of tractor-semitrailer and truck-trailer combinations: A linear analysis...8342
 Thrust and slip line analysis on a swamp shoe.....8343
 Analytical model for dust generated by air-cushion vehicles.....8344
 Identification of vehicle and collision impact parameters from crash tests.....10511
 Problems of stress concentration in nodal points of bus frames.....10512
 Prediction of sinkage and motion resistance of a tracked vehicle using plate penetration test.....10513
 Effect of strain-aging after cold surface rolling on fatigue strength at interference fitted axles.....12427

288-C Ships

- Effect of ship main dimensions and properties of hull material on deflection, shear force and bending moment.....2553

288-E Airplanes

- Analytical comparison of two wing structures for Mach 5 cruise airplanes.....8345
 Calculation of the characteristics of service life of aircraft structures on the basis of fracture mechanics.....10514
 Nonlinear finite element method in crashworthiness analysis of aircraft seats.....11520
 Analytical and experimental investigation of bird impact on fan and compressor blading.....11521
 Movement of airplane skis over soil. I.....12428

288-H Deceleration systems (parachutes, etc.)

- Added fluid mass and the equations of motion of a parachute.....1535
 Aerodynamic characteristics of a square parachute.....2554
 Research in structures and materials for future space transportation systems—An overview.....503
 Multipurpose communication satellite solar array.....4863
 Stability of large flexible damped spacecraft modeled as elastic continua.....7293
 Dynamic analysis of structures with friction forces at sliding junctures.....8346
 Effect of solar radiation disturbance on a flexible beam in orbit.....9391
 Present-day space and spacecraft mechanics problems..11522

288-J Deployable structures

- Experimental measurement of passive material and structural damping for flexible space structures....3748

290 Structures (containment)

290-B Pressure vessels (reactor vessels, etc.)

- Stress analysis of nozzles in cylindrical vessels with external load.....2555
 Experimental investigation of cylindrical shell stresses due to penetration loads where $R/T = 1264$..2556
 The stress analysis of rectangular structures subjected to internal pressure.....2557
 Crack opening areas in pressure vessels and pipes.....4864
 A guide for determining postweld heat treatment requirements for ASME Code Section VIII pressure vessels.....7294
 Recipient sub pressure. Analiza starii de tensiune si deformatie (Pressure vessels. Stress and strain analysis) (Book).....8347
 The design of ends of cylindrical pressure vessels in glass reinforced plastic.....9392
 Strain-based finite elements for the analysis of cylinders with holes and normally intersecting cylinders.....10515
 Strength calculation of thick-wall pressure-tight vessels, using the method of finite elements.....10516
 Development of B and C stress indices for trunnion elbow supports.....11523

290-E Composite vessels

- Stiffening effects on thin-walled piping elbows of adjacent piping and nozzle constraints.....504
 Optimum design of helically wound composite pressure vessels.....10517
 Towards a life prediction technique for carbon fibre filament wound structures subjected to steady pressures.....10518

290-F Wirewound vessels

- Simple calculations for the stability of soft, thin-walled mandrels during filament winding.....11524

290-I Piping

- The trans-Alaska pipeline system synthetically insulated workpad—An evaluation of present conditions.....6315
 Design guidance for elastic followup.....7295
 Thermal stratification in steam generator feedwater lines.....7296
 Requirements on the fracture toughness of metal of pipes for transmission pipelines.....7297
 Stress deformation in curved pressure pipes.....8348
 An acoustic system for pipeline profile measurement...8349
 The application of real time flow modeling to pipeline leak detection.....8350
 Post-yield strain tests of 20-in. casing with weld-on connectors.....8351
 Analysis of tubular connections using a thin cylinder approximation - Part I.....8352
 Analysis of tubular connections using a thin cylinder approximation - Part II.....8353
 Analysis and testing of factors affecting collapse performance of casing.....8354
 Effect of thickness variation on stress analysis of piping elbows under internal pressure.....8355
 A simple approach for failure bending moments of straight pipes.....9393
 Solutions for small slope pipeline lifting problems..10519
 Investigation of API 8 Round casing connection performance - Part I: Introduction and method of analysis.....10520
 Investigation of API 8 Round casing connection performance - Part II: Stresses and criteria.....10521
 Investigation of API 8 Round casing connection performance - Part III: Sealability and torque.....10522

290-K Containers (tanks, silos, bins, bunkers, etc.)

- Loading of silo compartments by collapse of stored material.....4865
Wall pressures in bottom-unloading farm silos.....9394

290-Y Computational techniques

- Simulation of electrical, temperature, and thermal-stress fields in a high-pressure apparatus by the finite-element method.....10523

290-Z Experimental techniques

- The technical basis of the external pressure section of BS5500.....11525

292 Friction and Wear

292-A General theory

- Elastomer friction.....3749
Stability of steady frictional slipping.....3750
Prediction of the resistance of structural materials to the cavitation erosion.....7298
Kinematics of abrasive particle interaction with friction surfaces.....8356
Some controversial questions in friction theory.....10524
Interactions among friction, wear, and system stiffness—Part 1: Effect of normal load and system stiffness.....12429
Interactions among friction, wear, and system stiffness—Part 2: Vibrations induced by dry friction.....12430
Interactions among friction, wear, and system stiffness—Part 3: Wear model.....12431

292-B Friction

- Movement of spheres on rotating discs—A new method to measure coefficients of rolling friction by the central drift.....505
The influence of tangential tractions at the surface on the stresses in contacting bodies during rolling-sliding contact.....1536
Sliding friction behaviour of polymer-polymer material combinations.....1537
Study of rolling friction - Behaviour of the small displacement of starting rolling friction.....2558
The frictional behaviour of materials.....3751
Use of typical mechanical characteristics of materials for prognosis of friction pairs wear by empirical functions.....3752
The effect of punch friction on plate narrowing process.....3753
A suggestion of establishing a friction standard.....3754
The properties of the friction contact.....3755
Analysis of general plane motion with Coulomb friction.....4866
Sliding wear and transfer.....4867
Surface topography changes in polymer-metal sliding—II.....4868
Investigation of friction and wear of dynamically loaded hydrodynamic bearings with abrasive contaminants.....4869
An experimental investigation of tribological effects on costdown phenomena in horizontal rotating machinery.....4870
Energy dissipation in Schallamach waves.....4871
Interactions between dynamic normal and frictional forces during unlubricated sliding.....4872
On the mechanism of boundary friction.....6316
External friction forces with high contact temperature.....6317
Methods for solution of contact problems with friction.....6318
A procedure for estimating loads on radial friction bearings.....6319
The mechanism of friction against ice.....6320

- Variation of contact area during motion of an elastic beam along an elastic plane subject to wear.....6321
The effect of flat-on-ring sample alignment on sliding friction break-in curves for aluminum bronze on 52100 steel.....8357
Effect of heat treatment and electron beam surface melting on the friction and wear behavior of a Cu-12wt.%Al alloy.....8358
A study of the relationships governing starting rolling friction.....8359
Friction in cold strip rolling.....8360
Plastic flow characteristics of metals during friction and their influence on the friction and wear processes.....10525
Vector analysis of the wear process.....10526
Contact problems with nonlinear wear law for bodies with coatings. I.....10527
Probabilistic model for metal-polymer friction.....12432
Estimation of flash temperatures in dry sliding.....12433

292-C Adhesion

- Microscopic aspects of adhesion and lubrication, Proceedings of the 34th International Meeting of the Societe de Chimie Physique, Paris, 14-18 September 1981 (Book).....2811
Investigation of wear intensity of tool steel for hot work.....3756
Effects of bulk thermal properties on polymer transfer.....4873
Material adhesion and transfer in polymer friction.....6322
Dynamic mechanical and thermal analysis for the determination of RFL morphology.....8361
The nature and origin of wear particles from boundary lubrication with a zinc dialkyl dithiophosphate.....12434

292-D Wear (unintentional)

- Observations of in-service wear of railroad wheels and rails under conditions of widely varying lubrication.....506
The properties of a thermal semielastohydrodynamic oil film with fully flooded and with starved lubrication.....507
Detecting wear and migration of solid-film lubricants using simultaneous exoelectron emission...508
Wear asymmetry - A comparison of the wear volumes of the rotating and stationary balls in the four-ball machine.....509
A study of sliding wear of metals.....510
Wear mitigation by antiwear additives in simulated valve train wear.....511
Mechanisms of material removal during erosion of a stainless steel.....1538
Experimental study on the effects of specimen sizes on erosion.....2559
A study of wear characteristics of different materials.....2560
A metallurgical study of the wear of hand-saw blades...2561
An experimental study of three-body abrasive wear.....2562
Wear characteristics of composites: Effect of fiber orientation.....2563
Vibratory cavitation erosion in aqueous solutions.....3757
A study of crater volumes produced by single particles at low impact velocities.....3758
Wear in cylinder liners.....4874
Methods for characterization of erosion by gas-entrained solid particles.....4875
On the importance of work hardening in the design of wear-resistant materials.....4876
A study of the surface deterioration due to erosion.....4877
Erosion pattern of twisted blades by particle laden flows.....4878
Ion implanting bearing surfaces for corrosion resistance.....4879
Corrosive wear of steel with gasoline-ethanol-water...4880
Preliminary results on the abrasability of porous, sintered seal material.....4881
Effect of wear debris on wear in rolling-sliding motion.....4882
Nozzle wear during the flow of a gas-particle mixture.....4883

- The role of wear debris in the study of wear.....4884
 Some aspects of improving abrasive resistance.....4885
 Direct observation of dry wear.....4886
 Wear of steam turbine journal bearings at low operating speeds.....4887
 The chemostress effect and wear.....4888
 Experimental investigation of the effect of system rigidity on wear and friction-induced vibrations.....4889
 Toward a mechanical wear equation.....4890
 Fretting wear and fretting fatigue—How are they related?.....4891
 Modification in some alloys by sulfide formation.....4892
 Wear and friction of nitrogen ion implanted steel.....4893
 Probabilistic estimation of wear rates based on physicochemical modeling.....6323
 Formation of wear-resistant composite layers using powder additives.....6324
 Wear in the shaft-bushing combination.....6325
 Origins and development of oxidation wear at low ambient temperatures.....8362
 A review of recent American work on gun erosion and its control.....8363
 The significance of the erosion parameter and the mechanisms of erosion in single-particle impacts.....8364
 Effects of ultrasonic vibration on the wear characteristics of a carbon steel: Analysis of the wear mechanism.....8365
 An analytical and experimental investigation of the wear of cemented carbide cutting tools in the presence of dilute organic acids.....8366
 Effect of carbide size on the abrasion of cobalt-base power metallurgy alloys.....8367
 Cavitation erosion of metals and alloys.....8368
 The interaction between two wearing surfaces. II: Copper and Cu-Be sliding on copper.....8369
 Reaction products in and around the wear track in the lubricated mild wear regime.....8370
 Wear characteristics of ceramic cutting tools in machining steel.....8371
 Some observations on profile wear in creep-feed grinding.....8372
 Two profilometric measurements of wear.....8373
 A surface dislocation model of wear.....10528
 A study of wear in Cu-Fe systems.....10529
 The effect of microstructure on the erosion of Ti-6Al-4V by spherical particles at 90° impact angles.....10530
 Surfactant influence on surface strain hardening and wear resistance.....10531
 Mechanism of severe wear onset in dry friction of polyoxymethylene against a steel surface.....10532
 Strength characteristics of crystalline substances and their connection with lattice energy and wear resistance.....10533
 Shaft-sleeve friction pair wear determination.....10534
 Wear of elastic plane by beam with variable bending stiffness.....10535
 Tribological properties of pyrolytic chrome coating in friction against steel.....10536
 Nature of abrasive wear of composite diamond-bearing materials.....10537
 Wear studies on boronized mild steel.....12435
 Comparative dry wear of PTFE liner bearing in cylindrical and spherical geometry.....12436
 Fretting: Load carrying capacity of wear debris.....12437
 Wear of cast Al-Si alloys containing graphite.....12438
 On the critical thickness of protective films at sliding interfaces.....12439
 The wear behaviour of copper alloy-steel and polyamide-steel sliding pairs for heavily loaded cardan joints.....12440
 Rolling-sliding wear damage in rail and tyre steels.....12441
 Clutch wear prediction via a deterministic-stochastic modeling approach.....12442
 Abrasive wear with fine diamond particles of carbide-containing aluminum and titanium alloy surfaces.....12443
 Generalized method for abrasive wear resistance tests of materials for high-speed skids.....12444
 Improving the wear resistance and antifretting properties of rubber-steel friction pairs.....12445
 Experimental evaluation of roller bearing working surface fretting resistance.....12446
 On the mechanical factor in fretting corrosion.....12447
- Influence of internal stresses in boride coatings of high-alloy steels on their wear resistance in vacuum.....12448
 Calculation of the wear of heavily loaded carburized gears.....12449
 Study of influence of laser radiation on the physicochemical characteristics of the surface layers of parts and their abrasive wear resistance.....12450
 Contact problems with nonlinear wear law for bodies with coatings. II.....12451
- 292-E Contact fatigue
- A unified model for rolling contact life prediction...1539
 Mechanics and behaviour of hollow cylindrical members in rolling contact.....1540
 Contact between a sphere and rough plates.....3759
 The influence of the real material and system properties on the traction-creep relationships in rolling contact.....3760
 A pitting model for rolling contact fatigue.....4894
 An acoustic method to predict tooth surface failure of inservice gears.....6326
 Contact-friction fatigue of lubricated materials.....6327
 Effects of molybdenum disulphide and an organic molybdenum compound in gear oil on rolling contact fatigue.....12452
 Failure analysis of liquid-nitrided low carbon steel gears.....12453
- 292-F Thermomechanical effects
- Cumulative plastic deformation observed during cyclic testing in rolling ball-cylinder and static ball-flat plate experiments.....8374
 A new approach to calculating the workpiece temperature distributions in grinding.....10538
- 292-G Friction materials
- On brake system friction element temperature rise measurement with low-inertia temperature sensors...12454
- 292-H Surface effects & topography
- Stylus measurement techniques: a contribution to the problem of parameter variation.....1541
 Effect of surface roughness on the stress-strain state of rubbing bodies.....1542
 Limits of applicability of elastic contact models of rough surfaces.....2564
 Some experimental verification of predicted load-carrying capacities of contacting pairs.....2565
 Theoretical analysis of the plastic yielding of a hard asperity sliding on a soft flat surface.....3761
 Measurement of surface roughness: Comparison between a defect-of-focus optical technique and the classical stylus technique.....3762
 The rolling process effectivity evaluation method based on the spectral analysis of the surface geometrical structure.....8375
 Three dimensional model of contact surface.....8376
 The influence of contact effects on the quality of surface layer of spline shafts during grinding.....8377
 Study of polyethylene surface radioluminescence after frictional interaction with a metal.....10539
 Counterface roughness effect on the dry steady state wear of self-lubricating polyimide composites.....12455
 Assessing the effect of stylus tip radius and flight on surface topography measurements.....12456
 Surface topography of cylinder bores—the relationship between manufacture, characterization and function.....12457
 Analysis of the real area of contact between a polymeric magnetic medium and a rigid surface.....12458
 Roughness-induced transient loading at a sliding contact during start-up.....12459
 Comparison of tribological parameters of surfaces determined by the stylus method and by the immersion method of holographic interferometry.....12460

- Movement of airplane skis over the ground. 2.
 Takeoff run.....12461
 Contact of rough bodies and its conductivity.....12462
 Counterbody roughness formation during friction and
 its influence on wear.....12463
- 292-I Wear monitoring
 A review of the abrasive wear of metals.....512
- 292-Z Experimental techniques
 A vibration analysis of a bearing/cartridge
 interface for a fretting corrosion study.....4895
 Continuous wear measurement by on-line ferrography.....4896
 Thermal considerations in the design of tribometers.....4897
 The tribologically induced effect of hydrogen
 effusion and penetration in steels.....12464
 Study of acoustic radiation in the friction contact
 zone of solid bodies.....12465
 Electron microscope study of metal dislocation
 structure in friction.....12466
- 294 Machine Elements**
- 294-C Gears
 Synthesis of cam-follower systems with rolling
 contact.....2566
 Energy efficient cam-follower systems.....7299
 A computer-aided method for optimum design of plate
 cam-size avoiding undercutting and separation
 phenomena—II: Design nomograms.....9395
 Efficiency cam drives.....11526
- 294-D Springs, dampers
 Tolerance allocation on leaf and Belleville spring:
 Chance constrained technique.....7300
- 294-E Couplings
 Triple epicyclic four-clutch six-ratio change-speed
 systems.....2567
 Analysis of a cycloid speed reducer.....6328

 Axisymmetric vortex solution of Navier-Stokes equation.....12523
 Certain phenomena and paradoxes in aerodynamics and hydraulics.....12524
 Flow of a viscous film with free boundaries in the one-dimensional approximation.....12525

354-F Low Reynolds number (including creeping flow)

- Formation of a counter current region near a gravitating sphere in a steady Stokes flow of a viscous ideal gas.....1581
 An axisymmetric Stokes flow: application to linear induction pumps.....1582
 Calculation of the effectiveness of gravitational coagulation of drops with allowance for internal circulation.....2625
 A class of biharmonic end-strip problems arising in elasticity and Stokes flow.....2626
 Unconventional behaviour of highly viscous and anomalous fluids at the discharge through a bottom orifice of a vessel.....2627
 Flow separation in a viscous parabolic shear past a cylinder.....2628
 The Faxen formulae for a rigid particle in an unsteady non-uniform Stokes flow.....3792
 Low Reynolds number oscillatory flow past a slowly rotating sphere.....3793
 Axisymmetric Stokes flow images in spherical free surfaces with applications to rising bubbles.....3794
 On mass flux through a torus in Stokes flow.....3795
 Slow viscous incompressible fluid flow through a wall perforated by periodically distributed holes.....3796
 Orifice flow at low Reynolds number.....3797
 The small Reynolds number expansion of the - dimensional drag coefficient.....3798
 The creeping motion of immiscible drops through a converging/diverging tube.....4925
 Stokes flow past a thin oblate body of revolution: Axially incident uniform flow.....6373
 The coupling of boundary integral and finite element methods for the bidimensional exterior steady Stokes problem.....6374
 Axisymmetric quasi-stationary motion of a torus in the presence of a wall - The Stokes approximation.....6375
 Hydrodynamic interaction of two identical liquid spheres in linear flow field.....7351
 On the motion of spheres in fluid at low Reynolds numbers. Part I. Flow past a solid sphere.....7352
 Numerical and experimental studies of wake interference of two normal flat plates at low Reynolds numbers.....7353
 Force and torque formulae for a sphere moving in an axisymmetric Stokes flow with finite boundaries: asymmetric stokeslets near a hole in a plane wall.....9438
 On the cellular structure of the two-dimensional Stokes flows between indefinite parallel planes, for null mean flow rate.....10578
 Direct calculation of the fall velocity of a spherical grain in a fluid.....10579
 On the slow broadside motion of a flat plate along the center-line of a fluid-filled two-dimensional channel.....12526
 Two-dimensional slow viscous flow past a plate midway between an infinite channel.....12527
 Experimental analysis of two-dimensional cavity flow at very low Reynolds numbers.....12528

354-G Unsteady flow

- The laminar unsteady flow of a viscous fluid away from a plane stagnation point.....3799
 Vortex shedding in unsteady flow.....3800
 Flow separation and reattachment over the sides of a 90 triangular prism.....3801
 The buckling of a vertical liquid column.....4926
 Unsteady flow of anomalous fluids in a nonuniform layered stratum.....6376
 Oscillatory flow through a sharp-edged sudden contraction of a circular tube.....6377
 Experiments on the buckling of thin fluid layers undergoing end-compression.....9439
 Some effects of turbulence on power transfer to an oscillating cylinder in a cross flow.....9440
 Mathematical model for vortex-induced oscillations of continuous systems with circular cross section.....9441
 A nonlinear convective system with oscillatory behaviour for certain parameter regimes.....10580
 Oscillations of a rotating liquid drop.....11560
 Secondary flow induced between oscillating circular cylinders.....12529
 Investigation of the dynamics of a two-dimensional gas-filled cavity near the free surface of a ponderable liquid.....12530
 Spreading out of a viscous liquid over a horizontal surface.....12531

354-H secondary flow

- The elliptic solution of the secondary flow problem.....4927
 Two types of instream stagnation.....7354
 Secondary flow and turbulence in a cone-and-plate device.....7355

354-I Thermal convection flow

- Three-dimensional simulations of convection in layers with tilted rotation vectors.....545
 Free convection from a point heat source in a stably stratified medium.....546
 Convection induced by insulated boundaries in a square.....1583
 Spatial resolution requirements for direct numerical simulation of the Rayleigh-Benard convection.....1584
 Dynamics fluidelor incompressibile (Dynamics of incompressible fluids) (Book).....2620
 An experimental and theoretical investigation of the onset of convection in rotating spherical shells.....2629
 Numerical solution of natural convection in eccentric annuli.....3802
 Observations on thermoconvection for bilayers in containers of arbitrary shape.....3803
 A numerical study of mixed convection flow in enclosures.....3804
 The fluid dynamics of an attic space.....3805
 The onset of cellular convection in a shallow two-dimensional container of fluid heated non-uniformly from below.....3806
 Unsteady natural convection in a porous layer.....3807
 A stream function finite element solution for two-dimensional natural convection with accurate representation of Nusselt number variations near a corner.....4928
 Dislocations in convection and the onset of chaos.....4929
 Thermocapillary convection in a rectangular cavity: asymptotic theory and numerical simulation.....4930
 Unsteady thermal convection in a cylindrical vessel heated from the side.....7356
 Benard convection with time-periodic heating.....10581
 The formation of an intermediate layer by horizontal convection in a two-layered shear flow.....10582
 Natural convection in an inclined square cavity in regions of density inversion of water.....11561
 Theoretical modelling of three-dimensional vortex flows in aerodynamics.....11562
 Flow field due to free convection in dead-end channels.....12532
 Convection motion of a gas resulting from the propagation of a heat wave along the lower boundary of a closed region.....12533

Convective motions of a fluid in a nearly spherical cavity when heated from below.....12534

354-J Stratified flow

A comparison of the formulation for eddy diffusion in two one-dimensional stratification models.....547
Free boundary problem for a two-layer inviscid incompressible fluid.....3808
The establishment and control of density microstructure in stratified flow experiments.....4931
Selective withdrawal through a point sink and pycnocline formation in a linearly stratified flow.....12535

354-K Rotating flow & surfaces

Flow due to an oscillatory free stream past a porous rotating disk.....548
New flows in a circular Couette system with co-rotating cylinders.....549
Oblique instream streamline intersections.....550
Effect of transverse blowing on steady flow between rotating and stationary disks.....551
Fluctuating flow induced by a rotating disk.....1585
Flow and heat transfer on a disk rotating beneath a forced vortex.....1586
Rotation of a cylinder in a viscous liquid.....1587
On centrifugal separation of a mixture.....2630
Rotationally symmetric fluctuating flow about a rotating disk.....3809
Spin-up from rest in a differentially rotating cylinder.....3810
On a point source in a rotating fluid.....3811
The branching of equilibrium states of an isolated rotating liquid mass.....3812
Incompressible flow in a rapidly rotating cylinder with a source/sink distribution in the lateral wall and a free inner boundary.....4932
The effect of source-sink geometry on enrichment in a gas centrifuge.....4933
Flow between rotating disks. Part I. Basic flow.....4934
Inertia effects on the dynamics of a disk levitated by incompressible laminar fluid flow.....4935
The shear-layer structure in a rotating fluid near a differentially rotating sidewall.....4936
Flow of an incompressible fluid in a partially filled, rapidly rotating cylinder with a differentially rotating endcap.....4937
Asymptotic motion of a viscous incompressible fluid filling the cavity of a rotating body.....6378
On the motion due to sources and sinks distributed on horizontal boundaries in a rotating fluid.....6379
Numerical calculations of two-cell and single-cell Taylor flows.....6380
Calculation of the decay rate of oscillations of a low-viscosity fluid rotating in a cylindrical vessel.....7357
Formation of vortices around a sinkhole.....8428
A similar flow between two rotating disks.....8429
Concentration of vorticity and helical vortices.....8430
Free surface on a simple fluid between rotating eccentric cylinders. Part I: Analytical solution.....9442
Free surface on a simple fluid between rotating eccentric cylinders. Part II: Experiments.....9443
About the flow field in a mechanically driven ultracentrifuge for uranium enrichment.....9444
The flow near the edge of a disc at rest in a rotating fluid.....9445
The influence of a side wall on rotating flow over bottom topography.....9446
Flows in a rotating cylinder with a sloping bottom.....10583
Vortex shedding in rotating flows.....10584
Evolution of swirl ratio and Karman number for vortices.....10585
Behaviour of spiral vortices on a rotating cone in axial flow.....11563
Note on the motion of surface films in a rotating cylinder.....11564
Frontal upwelling in a rotating two-layer fluid.....11565
Finite difference solution to the flow between two rotating spheres.....11566
Numerical computation of time-dependent Taylor-vortex flows in finite-length geometries.....12536

Rotating flow past disks and cylindrical depressions.....12537
On the radial filling of a rotating cylinder.....12538

354-L Multicomponent flow

Numerical simulation of liquefied fuel spills: I. Instantaneous release into a confined area.....2631
Numerical simulation of liquefied fuel spills: II. Instantaneous and continuous LNG spills on an unconfined water surface.....2632
Heat transfer by natural convection between enclosed concentric vertical cylinders - A part of inner cylinder is heated.....8431

354-M Chemical reactions

Operator splitting methods for the computation of reacting flows.....1588

354-O Flow around bodies

On the hysteresis of the drag of a sphere in the critical Reynolds number range.....552
Cross flow past successively positioned circular cylinders.....553
Simulation of flows around cylinders by a Lagrangian vortex scheme.....1575
Pressure distribution on a prolate spheroid at incidence.....1589
On the obtaining of axisymmetric flows from plane-parallel flows.....1590
Interference between two circular cylinders forming a cross.....1591
Determination of the potential plane flow around bodies by means of two solutions belonging to different incidence angles.....2633
The approach of a sphere to an interface.....2634
Drag coefficients of a sphere and a bed of spherical elements.....2635
Plane and axis-symmetric stagnation flow of a Maxwellian fluid.....2636
The free-boundary problem for gravity-driven unidirectional viscous flows.....2637
A Lagrangian finite element method for the simulation of flow of non-Newtonian liquids.....2638
Drag coefficients of a slowly moving sphere in non-Newtonian fluids.....2639
The final approach to steady state in an axisymmetric stagnation flow following a change in free stream velocity.....2640
Unsteady flow of viscous incompressible liquid around a cylinder at small Reynolds numbers.....2641
On the slow motion of a solid submerged in a fluid with a surfactant surface film.....3813
Flow past a liquid drop with a large non-uniform radial velocity.....3814
On the force fluctuations acting on a circular cylinder in crossflow from subcritical up to transcritical Reynolds numbers.....3815
On angles of separation in Stokes flows.....3816
Low-Reynolds-number flow past a cylindrical body.....3817
Flow development in the vicinity of the sharp trailing edge on bodies impulsively set into motion. Part 2.....3818
The effects of turbulence intensity and scale on the mean flow past square rods.....3819
Equation of motion for a small rigid sphere in a nonuniform flow.....3820
Cylindrical motion of disks during free-fall.....3821
The flow past a surface-mounted obstacle.....4938
Vortex shedding from a spinning cylinder.....4939
An investigation of the effects of incidence on the flow around a square section cylinder.....4940
Numerical simulation of flow around a three-dimensional turret.....4941
On the strong singular method for the problems of subsonic flow past obstacles.....4942
The standing vortex behind a disk normal to uniform flow at small Reynolds number.....4943
The effect of transverse curvature on the drag and vortex shedding of elongated bluff bodies at low Reynolds number.....4944

Slow viscous flow around an inclined fence on a plane.....4945
 Effects of turbulence on the pressure distribution around a square cylinder and possibility of reduction.....4946
 Pressure fluctuations on the surface of two circular cylinders in tandem arrangement.....4947
 Effect of tumbling and burning on the drag of bluff objects.....4948
 Drag on eccentrically positioned spheres translating and rotating in tubes.....4949
 Effect of flow turbulence and channel blockage on the flow pattern over a cylinder in crossflow of water at critical Re.....6372
 The formation and expansion of a toroidal drop moving in a viscous fluid.....6381
 A numerical-experimental study of confined flow around rectangular cylinders.....6382
 Modelling two-dimensional flow past arbitrary cylindrical bodies using boundary element formulations.....6383
 Entry of a disk into a compressible fluid at an angle to the free surface.....6384
 The effects of turbulence on the mean flow past square rods.....7358
 Influence of channel walls on the formation of vortices behind a wedge.....7359
 Interaction of two spherical particles in a steady flow of viscous fluid when the Reynolds number is not small.....7360
 Hydrodynamic forces acting on a cylinder set in motion abruptly.....7361
 Motion of two pulsating spheres in an ideal incompressible fluid.....7362
 Induced mass of two circular cylinders separated in the flow direction.....7363
 Pressure fluctuations during flow around blunt bodies.....7364
 Motion of a circular cylinder in a rectangular channel.....8421
 On the time-evolution of the flow pattern induced by a circular cylinder impulsively submitted to combined motions of translation and rotation, for Re=200.....8432
 Effect of blockage on the Strouhal number of two-dimensional bluff bodies.....8433
 Motion of a spherical particle in a viscous nonisothermal fluid.....8434
 Aerodynamics of a circular cylinder in crossflow.....8435
 Aerodynamic forces on a smooth rotating cylinder in crossflow.....8436
 Aerodynamic forces on a rotating rough cylinder in crossflow.....8437
 Global PNS solutions for subsonic strong interaction flow over a cone-cylinder-boattail configuration.....8438
 Steady flow past a rotating cylinder.....8439
 Potential flow past axisymmetric bodies at angle of attack.....8440
 Analysis of two-dimensional viscous flow over cylinders in unsteady motion.....9447
 Conting flow theory by finite element and asymptotic analysis of the Navier-Stokes system.....9448
 Steady laminar flows between a ball and a spherical cavity.....9449
 On the wake in the low-Reynolds-number flow behind an impulsively started circular cylinder.....9450
 Wall confinement effects for spheres in the Reynolds number range of 30-2000.....9451
 Stokes drag on a cylinder in axial motion.....10586
 Calculation of the resistance and mobility functions for two unequal rigid spheres in low-Reynolds-number flow.....10587
 Low-Reynolds-number flow past an elliptic cylinder.....10588
 On critical flow around smooth circular cylinders.....10589
 Drag of evaporating or condensing droplets in low Reynolds number flow.....11567
 Anomalous motion of a sphere falling through water.....11568
 Fluctuating forces on a rectangular prism and a circular cylinder placed vertically in a turbulent boundary layer.....12539
 Velocity characteristics of the flow around disks and cones.....12540
 Fine structure of the Stokes flow near the central hole of a torus.....12541

Experimental study of the interaction between a pair of circular cylinders normal to a uniform shear flow.....12542
 Flow around axisymmetric bodies with three constant-velocity sections.....12543
 Calculation of the lift coefficient and other quantities for a circular cylinder in the case of vortex shedding.....12544

354-P Surface tension flow

Oil flow separation patterns on an ogive forebody.....554
 Marangoni-effect velocity distribution due to time-oscillatory temperature gradients in zero-gravity environment.....555
 On the effect of viscosity on some nonwave-motions of liquids with the free surface.....556
 The spreading of a thin drop by gravity and capillarity.....1592
 Steady and oscillatory thermocapillary convection in liquid columns with free cylindrical surface.....1593
 Contact-line problems in fluid mechanics.....2642
 On the problem of dynamic contact angle.....3822
 The meniscus on a needle - a lesson in matching.....3823
 The spreading of a liquid on a rough solid surface.....3824
 On the dynamics of films of viscous and elastoviscous liquids.....3825
 Liquid bridges with thermocapillarity.....4950
 The breaking of axisymmetric slender liquid bridges.....4951
 Axisymmetric meniscus formation: a viscous-fluid model for cones.....4952
 Viscous thermocapillary convection at high Marangoni number.....6385
 Free liquid surface response induced by fluctuations of thermal Marangoni convection.....7365
 On the ability of drops or bubbles to stick to non-horizontal surfaces of solids.....7366
 Deformation of the free surface of a liquid by thermocapillary motion.....7367
 Marangoni convection in a rotating fluid layer with non-uniform temperature gradient.....8441
 Marangoni effect in the Couette flow.....9452
 The effect of surface contamination on thermocapillary flow in a two-dimensional slot.....10590
 Vapor flow into a capillary propellant-acquisition device.....11569
 Wave flow of a thin liquid film with reduced gravitation.....12545
 Laws of capillary spreading.....12546

354-Y Computational techniques

Vortex methods. I: Convergence in three dimensions; II: Higher order accuracy in two and three dimensions.....557
 A vortex sheet method for calculating separated two-dimensional flows.....558
 Singular matrix inversion in fluid dynamics computations.....559
 Upwind schemes and boundary conditions with applications to Euler equations in general geometries.....560
 Efficient computation of volume in flow predictions.....561
 Applications of exponential splines in computational fluid dynamics.....1594
 Comparison of the finite difference and Galerkin methods as applied to the solution of the hydrodynamic equations.....1595
 An implicit, bidiagonal numerical method for solving the Navier-Stokes equations.....1596
 Driven cavity flows by efficient numerical techniques.....1597
 Investigation of solution of Navier-Stokes equations using a variational formulation.....1598
 Numerical solution of viscous flows using integral equation methods.....1599
 Pseudospectral approximation in a three-dimensional Navier-Stokes code.....1600
 Computers in flow predictions and fluid dynamics experiments, presented at The Winter Annual Meeting of The American Society of Mechanical Engineers, Washington D.C., Nov. 15-20, 1981 (Book).....2643

- An open boundary condition for incompressible stratified flows.....2644
- Boundary treatments for implicit solutions to Euler and Navier-Stokes equations.....2645
- Statistical extremal problems and unique solvability of the three-dimensional Navier-Stokes system under almost all initial conditions.....3786
- Domain decomposition methods for nonlinear problems in fluid dynamics.....3826
- A stream function-vorticity finite element formulation for Navier-Stokes equations in multi-connected domain.....3827
- Group properties and new solutions of Navier-Stokes equations.....3828
- Finite difference representations of vorticity transport.....3829
- A finite element method for diffusion dominated unsteady viscous flows.....3830
- Compact finite difference schemes for the Euler and Navier-Stokes equations.....3831

- #### 356-B Subsonic flow
- Flow past a convex corner with a free streamline under large subsonic velocities.....1601
- #### 356-C Transonic flow
- Transonic flow calculations using the Euler equations.....562
- A more accurate transonic computational method for wing-body configurations.....563
- Numerical solution of transonic wing flowfields.....564
- An overrelaxation method for Euler equations in steady transonic flow.....1602
- Example of solving transonic equations for a shock-free flow past a symmetric profile.....1603
- On behavior of the small perturbations of one-dimensional steady transonic flows.....3834
- Perturbation procedures for nonlinear viscous flows.....3835
- Some remarks on transonic potential flow theory.....3836
- A theoretical and experimental investigation of a transonic projectile flowfield.....4963
- Multi-grid calculation of three-dimensional transonic potential flows.....4964
- Embedded mesh multigrid treatment of two-dimensional transonic flows.....4965
- Nonunique solutions to the transonic potential flow equation.....4966

- Solution of the Euler equations for two dimensional transonic flow by a multigrid method.....4967
 Transonic flow calculations by a finite element method.....6394
 An extension of the pressure unitary formula, valid both for compression and expansion, over the whole transonic regime ($M > 1$).....7372
 Nonlinear far field in the case of transonic flow past a nonlifting profile.....7373
 Numerical calculation of unsteady transonic potential flow over three-dimensional wings with oscillating control surfaces.....9455
 Calculations of viscous transonic flow over airfoils, 10596
 Prediction of cascade flow fields using the averaged Navier-Stokes equations.....11578
 An experimental and computational study of transonic three-dimensional flow in a turbine cascade.....11579
 A semi-implicit and unsteady numerical method of viscous-inviscid interaction for transonic separated flows.....11580

356-D Supersonic flow

- Conservative full potential, implicit marching scheme for supersonic flows.....565
 Computation of nonequilibrium, supersonic three-dimensional inviscid flow over blunt-nosed bodies....566
 A split-coefficient/locally monotonic scheme for multishocked supersonic flow.....567
 Impingement of an oblique shock wave on a cylinder....568
 A mixed explicit-implicit antidiffusive method of Navier-Stokes equations for supersonic and hypersonic separated flows.....569
 Variation of the main parameters of the separation regions on the surface in the case of supersonic flow past a body consisting of a spherical segment joined to an inverted cone.....1604
 Performance study of shock tubes with area change at the diaphragm section (Effects on the shock tube performance of diaphragm location, area ratio and convergent angle).....1605
 Flow past an airfoil at an angle of attack to an oncoming sonic stream.....1606
 Forces exerted by a weak shock wave on a wing of complicated shape in plan at supersonic velocities....1607
 Supersonic three-dimensional oscillatory piecewise continuous kernel function method.....2646
 Computation of nonlinear supersonic potential flow over three-dimensional surfaces.....2647
 Implicit boundary conditions for the solution of the parabolized Navier-Stokes equations for supersonic flows.....2648
 Three-dimensional boundary conditions in supersonic flow.....2649
 Comparison of different integration schemes based on the concept of characteristics as applied to the ablated blunt body problem.....2650
 Supersonic flow over a rearward facing step with transverse nonreacting hydrogen injection.....4968
 Separation of the surfaces of discontinuities in the numerical computation of supersonic conical flows....6395
 Compact bend for a supersonic two-dimensional flow....6396
 Supersonic maneuvers without superbooms.....6397
 Investigation of the conical flowfield around external axial corners.....7374
 On flows with vibrational relaxation behind an attached shock wave.....7375
 Numerical solution of space shuttle orbiter flowfield.....7376
 Computational study of nose bluntness effects for spinning shells at supersonic speeds.....7377
 Numerical investigation of "lateral" interaction with an obstacle of an axisymmetric jet exhausting into vacuum.....7378
 Profiling of axisymmetric and planar nozzles that realize a radial supersonic flow.....8450
 Aerodynamic characteristics of bodies with a star-shaped cross section at moderate supersonic speeds....8451
 Conical, noncircular, second-order, potential theory of supersonic flow.....9456
 A new numerical method for calculating viscous mixing in supersonic flows: Application to chemical lasers.....11581

- Weak nonlinear shock waves in steady two-dimensional flow of a non-equilibrium gas along a curved wall...12554
 Modelling turbulent transport processes in the supersonic boundary layer.....12555
 Axisymmetric nonconical supersonic potential flow with embedded subsonic regions.....12556

356-E Hypersonic flow

- Computation of hypersonic viscous flow over a body with mass transfer and/or spin.....570
 Hypersonic viscous flow past general bodies at angle of attack and yaw.....571
 Numerical investigation of flow of a viscous reacting gas past blunt bodies.....1608
 Investigation of flow past blunt bodies with allowance for radiation by the large-particle method.....1609
 Similarity of the flow of strongly underexpanded gas jets exhausting into a hypersonic flow.....1610
 Parametric study of hypersonic body shapes.....6398
 Bodies of minimal wave drag in a swirling hypersonic flow.....8452
 Dusty hypersonic flow past thick wedges.....9457
 Hypersonic large-deflection similitude for quasi-wedges and quasi-cones.....10597
 Calculation of viscous hypersonic flow over a severely indented nosetip.....12557

356-F Unsteady effects

- Collapse of a one-dimensional cavity.....572
 Unsteady transonic small disturbance approximation with strong shock waves.....573
 Theoretical investigation on end correction problems (Part III, Transient properties of open end).....1611
 Unidirectional nonstationary flow of instantaneously heated gas from a cylinder for different positions of the heated zone.....1612
 Transient decay times and mean value of unsteady oscillations in transonic flow.....4969

356-G Viscous effects

- Steady flow of a polarizable viscous compressible fluid past a charged rotating sphere.....574
 Fundamental solutions of the linearized equations of the hydrodynamic of a viscous fluid.....575

356-H Internal flow problems

- Methods of loss estimation in compressible flow through pipe orifices and nozzles.....576
 The problem of a piston in stratified gas with weakly changing parameters.....2651
 Computer flow analysis inside diffuser in the compressible regime.....6399
 Compressible fluid flow in pipes at high pressure drops.....6400
 Influence of nonuniformity of supersonic flow with shock waves on the friction and heat transfer in planar channels.....8453

356-I Flow around bodies

- On the center of pressure of a body.....1613
 Flow of gas in the neighborhood of an axisymmetric vertex.....1614
 Computation of supersonic inviscid flow around wings with a detached shock wave.....2652
 Supersonic flow over a thin wedge intersected by the front of an external plane compression shock.....3837
 Slender axisymmetric cavities in the flow around bodies in a longitudinal gravity force field.....4970
 Transonic separation flow of water past a circular cone.....6401
 Investigation of unsteady supersonic flow past conical bodies.....6402
 Problem of the interaction of a wedge moving with supersonic velocity when it encounters an interface between two gases.....7379

- Base pressure of bodies of revolution when gas is blown through their surface into a supersonic flow..7380
 Supersonic flow past a slender cone with asymmetric nose tip.....8454
 Three-dimensional supersonic flow of ideal gas past a body with tail fins.....8455
 Penetration of a jet blown through a convex cylindrical surface into a supersonic stream.....8456
- 356-J Multicomponent flow
- Invariant solutions of the equations of motion of ionized gas.....1615
 Force action of a supersonic dusty gas flow on a bluff body.....8457
- 356-K Chemical reaction, ionization, & Nonequilibrium effects
- Population inversion of vibrational levels in the case of kinetic cooling of a moving gas.....1616
 The viscosity-capillarity criterion for shocks and phase transitions.....4971
 Gas-dynamic processes in a strongly radiation-heated layer of gas which accelerates a barrier.....7381
 Simulation of a simple reacting gas flow with an upwind scheme.....9458
 Amplification ratio on CO gasdynamic lasers behind nozzles of wedge and profiled geometries. 2. Measurement results. Comparison of experimental and calculated data.....9459
 Analysis of the nonequilibrium flow parameters in a gas-discharge chamber.....9460
 Grain in a CO₂-GDL medium with wedge and profiled nozzles, Part I. Apparatus and pulse gain measurement system.....9461
 Shock-tube measurements of the excitational cross-section in xenon-hydrogen mixture.....10598
- 356-M Rotating fluids & surfaces
- Rotating compressible flow between non torsionally oscillating disks.....2653
 Rotating compressible flow over an infinite disk.....3838
 Comparison between Navier-Stokes and thin-layer computations for separated supersonic flow.....4972
 The effects of curvature on the flow field in rapidly rotating gas centrifuges.....9462
 Energy of formation of a tornadolike vortex.....10599
- 356-Y Computational techniques
- A finite element algorithm for computational fluid dynamics.....577
 A two-dimensional Lagrangian difference method of movable meshes—A computing method for compressible radiational hydrodynamic equations with several materials.....578
 A variation on MacCormack's method for axisymmetric viscous compressible flows.....579
 Finite element methods for transonic flow analysis.....1617
 The initial boundary value problem for the flow of a barotropic viscous fluid, global in time.....1618
 A mixed finite element method for solving transonic flow equations.....1619
 The hybrid model and its application for studying free expansion.....2654
 Homogeneous property and flux splitting in gas dynamics.....2655
 Far field boundary conditions for compressible flows.....2656
 Influence of boundary approximations and conditions on finite-difference solutions.....2657
 Initial-value problem in the large for von Karman's equation.....2658
 Numerical experiments with the Osher upwind scheme for the Euler equations.....3839
 An efficient, full-potential implicit method based on characteristics for supersonic flows.....3840
 A grid overlapping scheme for flowfield computations about multicomponent configurations.....3841
- Expansion of a gas cloud by the discrete velocity method.....4973
 Conservative full-potential calculations for axisymmetric, transonic flow.....4974
 Application of a finite element algorithm to the solution of steady transonic Euler equations.....4975
 A composite velocity procedure for the compressible Navier-Stokes equations.....4976
 An implicit lambda scheme.....4977
 Ray method for flow of a compressible viscous fluid.....4978
 A multigrid strongly implicit procedure for transonic potential flow problems.....4979
 Implicit, nonswitching, vector-oriented algorithm for steady transonic flow.....4980
 A flux splitting method for the numerical simulation of one-dimensional compressible flow.....6403
 On iterative methods of solving difference schemes for the equations of gas dynamics with thermal conductivity.....6404
 Hypersonic Mach number and real gas effects on space shuttle orbiter aerodynamics.....8458
 Numerical method and results for inviscid supersonic flow over a compressive ramp.....8459
 Use of the cubic-spline quadrature formula for calculating potential flow past a system of aerodynamic profiles.....8460
 Finite area method for nonlinear supersonic conical flows.....10600
 Higher-order accuracy difference method for computing viscous gas flows.....10601
 Classification of difference schemes of gas dynamics by the method of differential approximation - II. Two-dimensional case.....11582
 Transonic full potential solutions by an integral equation method.....12558
- 356-Z Experimental techniques
- Investigation of supersonic separated flow in a compression corner by laser doppler anemometry.....4981
 Simultaneous measurement of the stagnation temperature and specific mass flow rate in a hypersonic gas flow.....7382
- 358 Rarefied flow
- 358-B Kinetic theory
- Global boundedness of moments of solutions of the Boltzmann equation for forces of infinite range.....580
 The discrete Boltzmann equation for gas mixtures. A regular space model and a shock wave problem.....581
 Kramers problem in the kinetic theory of gases.....582
 Flow of rarefied gas past a sphere in the presence of blowing from its surface.....583
 A similarity solution of the linearized Boltzmann equation with application to thermophoresis of a spherical particle.....584
 The approach to the Boltzmann distribution in Brownian motion.....585
 Boundary conditions for the equations of two-temperature gas dynamics of a binary mixture with strongly differing masses of the components.....1620
 Nonlinear removal effects in time-dependent particle transport theory.....1621
 On the time evolution of macroscopic system.....2659
 Definition of mean free path for real gases.....4982
 Two hidden symmetries of the equations of ideal gas dynamics, and the general solution in a case of non-uniform entropy distribution.....4984
 An evaluation of some collision models used for Monte Carlo calculations of diatomic rarefied hypersonic flows.....6405
 The long-time tail of the angular-velocity autocorrelation function for a rigid Brownian particle of arbitrary centrally symmetric shape.....7383
 Kinetic model of a gas suspension of particles with internal structure.....8461
 On the classical solutions of the Boltzmann equation.....8462
 Frame-indifferent kinetic theory.....10602

- Analytical solutions of the discrete Boltzmann equation for the steady Couette flow for binary gas mixtures.....10603

 driven two-phase filtration.....9477
 Experimental study of deep bed filtration: A
 stochastic treatment.....10617
 Kinetic equations for suspension separation.....12575
 Combining asymptotic expansions in problems of the
 filtration of a gas-condensate mixture.....12576
- 360-Y Computational techniques**
- Predictions of the structure of turbulent, particle-
 laden round jets.....5006
 Variable time step methods for the dissolution of a
 gas bubble in a liquid.....8489
 Local volume averaging of multiphase systems using a
 non-constant averaging volume.....9478
- 360-Z Experimental techniques**
- A method for measuring the mass concentration of
 solid particles in fluids with the aid of
 transversally vibrating filter bands.....609
 Investigation of two-phase bubbly flows using laser
 Doppler anemometry.....1629
 Kinetics of the interaction of a liquid diffusing
 into another one as studied by reflection
 spectroscopy (ATR).....2678
 Procedure for measuring the thickness and wave
 characteristics of the surface of the liquid film
 in annular-mist flows of steam and water.....2679
 Two-phase flow measurements with sharp-edged
 orifices.....2680
 LDA signal discrimination in two-phase flows.....5007
 The relationship between density and void fraction
 measurement uncertainty in radiation densitometry.....5008
 Fluid-velocity measurements and flow-pattern
 identification by noise-analysis of light-beam
 signals.....9479
 Calculation of the effective permittivity of a two-
 phase stream.....9480
 Measurement of virtual mass and drag coefficients of
 a disk oscillating sinusoidally in a two-phase
 mixture.....12577
- 362 Wall layers (including boundary layers)**
- 362-B Higher Order theory**
- Second-order boundary-layer flow past sharp cones.....3851
 A new theory and its extensive application of the
 multifold series expansion analysis for the
 boundary layer equations.....10618
- 362-C Laminar layers**
- Asymptotic theory of separation flows.....610
 Freestream turbulence effects on attached subsonic
 turbulent boundary layers.....611
 Calculation of three-dimensional boundary layer on a
 triangular plate of finite length in a hypersonic
 stream.....612
 Similarity solutions for boundary-layer equations
 with interaction.....1630
 Stagnation flow with a temperature-dependent
 viscosity.....2681
 Breakdown of boundary layers: (i) on moving
 surfaces; (ii) in semi-similar unsteady flow;
 (iii) in fully unsteady flow.....2682
 Injection slot location for boundary-layer control
 in shock-induced separation.....2687
 Momentum and heat transfer for the laminar flat-
 plate flow with variable fluid properties.....5010
 Unsymmetric corner flows.....7404
 The computation of thick axisymmetric boundary
 layers and wakes around bodies of revolution.....8490
 Theoretical and experimental investigations of the
 flow of a viscous fluid near the line of
 intersection of a cylindrical surface and a flat
 surface.....8491
 A local similarity solution for the viscous
 boundary-layer flow longitudinal to a cylinder.....9481
 The boundary layer induced by a convected two-
 dimensional vortex.....10619
 Axisymmetric stagnation point flow and mass transfer
 for power-law fluids II. Moderate Schmidt number
 correction.....12578

362-D Turbulent layers

- An experimental study of turbulent free convection boundary layer in air along a vertical plate using LDV.....613
- Turbulent separation flows.....614
- An interaction algorithm for three-dimensional turbulent subsonic aerodynamic junction region flow.....615
- Computation of turbulent boundary layer using similarity solution.....616
- Numerical simulation of a compressible turbulent boundary layer over a conductive wall with line heat source.....617
- A simple model of mixing and chemical reaction in a turbulent shear layer.....1631
- Computation of turbulent flow over a moving wavy boundary.....2683
- The shape-factor relationship for turbulent boundary layers.....2684
- The unsteady structure of two-dimensional separated-and-reattaching flows.....3852
- Surface flow patterns on rectangular bodies in thick boundary layers.....3853
- Unsteady turbulent boundary layers in adverse pressure gradients.....5011
- On the cooling of fibers.....5012
- Turbulent boundary layer heat transfer experiments: A separate effects study on a convexly curved wall.....5013
- The response of a turbulent boundary layer to a double step-change in a wall heat flux.....5014
- A review of near-wall similarity models in three-dimensional turbulent boundary layers.....5015
- Near-wall similarity in a pressure-driven three-dimensional turbulent boundary layer.....5016
- Near-wall similarity in a shear-driven three-dimensional turbulent boundary layer.....5017
- The effect of free-stream turbulence on turbulent boundary layers.....5018
- On the skin friction coefficient for a fully rough flat plate.....5019
- Experimental and numerical investigation of a turbulent boundary layer subjected to a sudden transverse strain.....5020
- A theory for boundary layer growth on the blades of a radial impeller including endwall influence.....5021
- Artificially thickened turbulent boundary layers for studying heat transfer and skin friction on rough surfaces.....5022
- Unsteady attachment line flow on a flat plate with attached cylinder.....5023
- The structure of a separating turbulent boundary layer. Part 4. Effects of periodic free-stream unsteadiness.....5025
- Turbulent boundary-layer flow and structure on a convex wall and its redevelopment on a flat wall.....6419
- Turbulent boundary layer on a moving wall: Spectral effect.....6420
- Effect of variability of physical properties and free-stream turbulence on skin friction on a cylinder in longitudinal flow.....6421
- Hydrodynamic structure of accelerated turbulent boundary layers.....7405
- Effect of roughness on three-dimensional turbulent boundary layers.....7406
- Turbulent friction at transonic velocities.....7407
- Flow past forward-facing small step.....7408
- A mixing-length model for the prediction of convex curvature effects on turbulent boundary layers.....8492
- Response of turbulent boundary layer flows to artificial disturbances.....10620
- Possibility of rapid determination of turbulence generation in a laminar boundary layer.....10621
- The thickness of the viscous sublayer in a turbulent boundary layer.....10622
- On the use of an annulus to study mixed-layer entrainment.....11590
- Experimental study of growth of turbulent boundary layer in a smooth rectangular duct.....11591
- On upstream influence in shock wave turbulent boundary layer interaction.....11592
- Turbulence measurements in a compressible reattaching shear layer.....12579
- Fluctuating surface shear stresses on bluff bodies.....12580

362-E Transition & relaminarization

- Shuttle boundary-layer transition due to distributed roughness and surface cooling.....618
- Evidence of Gortler-type vortices in curved film flows.....619
- Boundary-layer transition on a rotating cone in axial flow.....620
- Boundary-layer transition on a rotating cone in still fluid.....621
- Single- and multiple-crater induced nosetip transition.....1632
- Further experiments on shock tube wall boundary-layer transition.....1633
- The linear development of Gortler vortices in growing boundary layers.....5009
- Effect of surface roughness on the delayed transition on 9:1 heated ellipsoid.....5026
- Behaviour of spiral vortices on rotating axisymmetric bodies.....6422
- The resonant interaction of disturbances at laminar-turbulent transition in a boundary layer.....7409
- The control of boundary-layer transition using a wave-superposition principle.....7410
- Experimental study of the effect of a wall heating on the transition and stability of supersonic boundary layers.....7411
- Active control of transition by periodic suction-blowing.....11593
- Laminar-to-turbulent transition on a body of revolution with an extended favorable pressure gradient forebody.....12581
- Investigation of transition from laminar to turbulent boundary layer flow by means of a thermal imaging system.....12582

362-F Compressible & hypersonic layers

- Aerodynamics of axisymmetric bodies in supersonic flow with local blowing.....622
- Nonsimilar boundary layers on the leeside of cones at incidence.....623
- Compressibility effects in turbulent shear layers.....1634
- On hypersonic self-induced separation, hydraulic jumps and boundary layers with algebraic growth.....2685
- Supersonic compressive ramp without laminar boundary-layer separation.....5027
- On local recirculation zones in the supersonic boundary layer on a moving surface.....6423
- Remarks on disputed numerical results in compressible boundary-layer stability theory.....7412
- Flow in the neighborhood of the trailing edge of a plate in a transonic flow of viscous gas.....7413
- Influence of viscosity on the flow in the circulation region in front of a flat obstacle perpendicular to the axis of a supersonic underexpanded jet.....7414
- Influence of boundary layer on unsteady aerodynamic characteristics of blunt cones in a supersonic flow.....7415
- Hypersonic interactions with surface mass transfer - Part I: Steady flow.....9482
- Hypersonic interactions with surface mass transfer - Part II: Unsteady flow.....9483
- Flow in the hypersonic boundary layer on a finite triangular wing in the presence of an angle of attack.....12583

362-G Shock wave boundary layer interaction

- Boundary-layer interaction theory.....2686
- Thermal waves in a supersonic boundary layer with self-induced pressure.....2688
- Shock-induced flow separation and the orbiter thermal protection system.....3854
- Shock wave/boundary layer interaction in dry and wet transonic steam.....5028
- Interaction of a turbulent boundary layer with a shock wave at transonic flow velocities.....6424
- A method of calculating a regime of strong viscous interaction on a delta wing.....7416
- Viscous shock layer on the surface of a blunt body in a diverging supersonic flow.....7417

- Hot-wire investigation of an unseparated shock-wave/turbulent boundary-layer interaction.....9484
 Viscous-inviscid interactions on axisymmetric bodies of revolution in supersonic flow.....9485
 Cylindrical and conical flow regimes of three-dimensional shock/boundary-layer interactions.....10623
 The Baldwin-Lomax turbulence model for two-dimensional shock-wave/boundary-layer interactions.....12584

362-H Three-dimensional layers

- Viscous flow in corner regions with a moving wall and leakage of fluid.....624
 A novel property of the displacement thickness in three-dimensional boundary-layer theory.....2689
 Application of the triple-deck theory of viscous-inviscid interaction to bodies of revolution.....5029
 Three-dimensional turbulent boundary layers on bielliptic bodies in a stream of compressible gas at an angle of attack.....6425
 Effect of boundary layers on solid walls in three-dimensional subsonic wind tunnels.....7418
 Computation of three-dimensional boundary layers on fuselages.....8493

362-I Unsteady layers

- The unsteady collision of free-convective boundary layers.....625
 Forced oscillations of an inclined plane in an exponentially-stratified fluid.....1635
 Application of unsteady laminar triple-deck theory to viscous-inviscid interactions from an oscillating flap in supersonic and subsonic flow.....5030
 Similarity solutions of the boundary-layer equations for a stretching wall.....5031
 Influence of acoustic perturbations on the flow structure in a boundary layer with adverse pressure gradient.....6426
 Asymptotic expansions for the problem of boundary layer formation.....6427
 Unsteady boundary layer with self-induced pressure near rapidly heated segment of flat plate in supersonic flow.....6428
 Solution to unsteady boundary-layer equations.....7419
 The asymptotic solutions of compressible, nonsteady boundary layer.....7420
 Unsteady boundary layers.....8494
 The boundary layer on an impulsively started rotating and translating cylinder.....12585

362-J Thermal boundary layers

- The collision of free-convection boundary layers on a horizontal cylinder embedded in a porous medium.....1636
 Heat transfer in temperature-dependent flow.....2690
 Thermal instability of two-dimensional stagnation-point boundary layers.....3855
 Local heat transfer to staggered arrays of impinging circular air jets.....3856
 Self-similar thermal boundary layers on plane and axisymmetric bodies.....9486
 Experimental investigation of local heat transfer in a turbulent boundary layer at supersonic speed.....12586
 Modeling heat transfer processes in the boundary layer.....12587

362-K Non-Newtonian layers

- Heat transfer in micropolar boundary layer flow over a flat plate.....626
 Heat transfer characteristics of a micropolar boundary layer in a crossflow over a non-isothermal circular cylinder.....2691
 A note on the Falkner-Skan flows of a non-Newtonian fluid.....5032
 The axisymmetric micropolar boundary layer on a long thin cylinder.....6429

362-L Multicomponent layers

- Chemical equilibrium laminar or turbulent three-dimensional viscous shock-layer flows.....5033
 Experimental values of the average variables in a flowing liquid film.....8495

362-M Separation & reattachment

- Modification of subsonic wakes using boundary layer and base mass transfer.....627
 Analytical approximation of two-dimensional separated turbulent boundary-layer velocity profiles.....628
 Experimental and theoretical investigation of backward-facing step flow.....2692
 On an integral equation of marginal separation.....2693
 Interacting flow theory and trailing edge separation - no stall.....2694
 The calculation of separation bubbles in interactive turbulent boundary layers.....2695
 The structure of a separating turbulent boundary layer. Part 5. Frequency effects on periodic unsteady free-stream flows.....2696
 Prediction of separated asymmetric trailing-edge flows at transonic Mach numbers.....3857
 On the calculation of separation bubbles.....3858
 A theory for flow separation.....3859
 The occurrence of separation in oscillatory flow.....5034
 A view of the triple deck.....5035
 Boundary layer separation singularities for an upstream moving wall.....5036
 Applicability of the independence principle to subsonic turbulent flow over a swept rearward-facing step.....5037
 Asymptotic theory of turbulent separation.....7421
 Measurements near a laminar separation point.....7422
 A numerical analysis of unsteady separated flow by vortex shedding model (1st Report, Flow around a square prism).....7423
 Structure of a turbulent separation bubble.....7424
 Mathematical simulation of unsteady separation from a circular cylinder.....7425
 Supersonic separated flow past a cylindrical obstacle on a flat plate.....9487
 Experimental studies of the separated flow over a NASA GA(W)-1 airfoil.....9488
 Subsonic turbulent flow over a rearward facing segmented step.....10624
 Certain features of transverse flow about a cylinder with longitudinal ribs.....10625
 Prediction of transonic separated flows.....12588

362-N Suction & injection

- A note on the asymptotic approach to boundary layers of constant thickness.....629
 Effect of pulsed slot suction on a turbulent boundary layer.....1637
 Influence of suction on the developing wall flow of an impinging jet.....5038
 Corner flow with suction.....6430
 Turbulent boundary layer on a plate in the presence of suction at different angles to the wall.....6431
 Influence of blowing into the boundary layer on supersonic flow past an oscillating cone.....7426
 Drag of a plate with simultaneous unequal mass blowing and suction.....7427
 Improvement of the limiting relative friction law on a permeable plate with blown gas.....8496
 Effect of blowing and suction on characteristics of the viscous sublayer in a turbulent flow.....8497
 Boundary layer control by means of strong injection.....9489
 Instability of compressible boundary layers along curved walls with suction or cooling.....10626
 Injection-induced turbulence in stagnation-point boundary layers.....10627
 Boundary layer with selective suction.....10628
 Calculation of isothermal flow in wake downstream of injection segment.....12589

362-O Surface roughness

- Prediction of rough-wall skin friction and heat transfer.....630
 Wall mass transfer and pressure gradient effects on turbulent skin friction.....5024
 Appraisal of universal wake numbers from data for roughened circular cylinders.....5039
 Boundary-layer development on a circular cylinder with ribs.....5040
 A laboratory study of stratified accelerating shear flow over a rough boundary.....7428
 Certain aspects of numerical simulation of the flow of liquid over a wavy boundary.....7429
 A re-evaluation of Schlichting's surface roughness experiment.....9490
 Turbulent flow over large-amplitude wavy surfaces.....9491

362-P Rotating fluids &/or surfaces

- Computational study of the Magnus effect on a bontailed shell.....631
 The hydromagnetic viscous boundary layer at the free surface of a rotating baroclinic fluid.....1638
 The low Rossby number flow of a rotating fluid past a flat plate.....1639
 Unicity of the polynomial representation of the integral quantities of a compressible boundary layer on a spinning cylinder in axial flow.....2697
 Similar solutions of the compressible boundary layer on a spinning cylinder in axial flow.....2698
 Boundary layers on characteristic surfaces for time-dependent rotating flows.....3860
 Nonsimilar laminar incompressible boundary layer flow over a rotating sphere.....3861
 Three-dimensional turbulent boundary-layer development on a fan rotor blade.....5041
 The boundary layer on an axisymmetric body with and without spin.....5042
 Development of three-dimensional turbulent boundary layer in an axially rotating pipe.....5043
 Boundary-layer transition and the behaviour of spiral vortices on rotating spheres.....7430
 Study on boundary layer transition of a rotating disk.....9492
 Numerical prediction of a laminar boundary layer flow on a rotating sphere.....10629
 The compressible boundary layer on the radial blade rotating at the high speed.....11594
 Boundary layer and loss measurements on the rotor of an axial-flow turbine.....11595

362-Q Heat addition & cooling

- Effects of free convection currents and mass transfer on flow past a vertical oscillating plate.....632
 The influence of side-wall friction on shear-stress driven entrainment experiments.....1640
 Some characteristics of flow pattern and heat transfer past a circular cylindrical cavity.....2699
 Effect of crossflows on the discharge coefficient of film cooling holes.....3862
 On the calculation of momentum, heat, and mass transfer in laminar and turbulent boundary layer flows along a vaporizing liquid film.....10630
 Incompressible fluid boundary layer heat exchange optimization with account for the heat balance equation.....12590
 Interacting boundary layers and heat transfer.....12591

362-R Compliant wall

- A nonlinear structural concept for drag-reducing compliant walls.....7431
 On the interaction of compliant coatings with boundary-layer flows.....9493

362-S Drag reduction

- Riblets as a viscous drag reduction technique.....633

- Reduction of turbulent skin friction by microbubbles.....7432
 Turbulent boundary-layer relaxation with application to skin-friction drag reduction.....12592
 Laminarization of turbulent polymerizing flow in long pipes.....12593

362-T Nonequilibrium effects & chemical reaction

- Frozen plasma boundary-layer flows over isothermal flat plates - parametric study.....10631

362-Y Computational techniques

- Computer extension and analytic continuation of Blasius' expansion for impulsive flow past a circular cylinder.....6432
 Numerical computation of unsteady laminar boundary layers with separation using one-parameter integral method.....6433
 Inverse boundary-layer inviscid iteration technique for supersonic separated flow.....6434
 Mesolayer theory for turbulent flows.....7433
 Local nonsimilarity solutions for boundary layers at lubricated walls.....9494
 A note on the incompressible flow past a semi-infinite flat plate in a stream with uniform shear.....9495
 A note on the solution of a differential equation arising in boundary-layer theory.....9496
 Calculation of entrainment rate, initial values, and transverse velocity for the Batankar-Spalding method.....11596
 Successive approximation method in the boundary layer problem with longitudinal and transverse pressure gradients.....12594
 Higher order strip integral method for three-dimensional boundary layers.....12595

362-Z Experimental techniques

- A technique for evaluation of three-dimensional behavior in turbulent boundary layers using computer augmented hydrogen bubble-wire flow visualization.....5044
 Scaling and modeling of three-dimensional, pressure-driven turbulent boundary layers.....12596

364 Internal flow (pipe, channel, Couette)

364-B Laminar flow

- Steady flow in locally exponential tubes.....634
 Flow characteristics in the curved rectangular channels. (Visualization of secondary flow).....635
 On steady flow through a channel consisting of an uneven wall and a plane wall. Part 1. Case of no relative motion in two walls.....636
 Flow through rotating straight pipes of a circular cross section.....637
 Steady flow through distorted rectangular tubes of large aspect ratio.....638
 Laminar flow in the plane gap with the influence of transverse harmonic force.....3863
 Boundary-layer-free stream interactions in horizontal and sloping open-channels.....5045
 Analysis of transient laminar convective heat transfer inside a circular duct.....5046
 Similar solutions of gas pressure within semi-infinite capillary tubes.....9497
 Flow in a small annulus between concentric cylinders.....9498
 Flow through a helically coiled annulus.....9499
 An analysis on entrance region effect of the laminar radial flow between two parallel disks.....10632
 Entry flow in weakly curved ducts.....10633
 Shear dispersion and residence time for laminar flow in capillary tubes.....11597
 Hydrodynamical entrance length effects for duct flows with arbitrary inlet velocity profiles.....12597

364-C Turbulent flow

- Behavior of air-liquid surface moving downward in a straight pipe.....639
- Flow in an axially rotating pipe. (A calculation of flow in the saturated region).....640
- Frictional resistance in fiber suspensions. (1st Report, Pipe flow).....641
- Frictional resistance in fiber suspensions. (2nd Report, Flow on a rotating disk).....642
- Calculation of fully developed turbulent flows in ducts of arbitrary cross-section.....1641
- Turbulent flows in entrance region of two-dimensional straight channel with inlet disturbance.....2700
- Numerical prediction of wall temperatures for near-critical para-hydrogen in turbulent upflow inside vertical tubes.....3864
- L.D.A. velocity measurements in a turbulent pipe flow at high temperature.....3865
- Prediction of curved channel flow with an extended k -model of turbulence.....5047
- An experimental investigation of the quasisteady turbulent pulsating flow in a pipe.....6435
- Numerical calculations of a convective-dispersion equation in shear flow by method of shifting particles.....6436
- Turbulent flow in a strongly curved U-bend and downstream tangent of square cross-sections.....7434
- A model for turbulent slurry flow.....8498
- Flow structure in pipe elbows.....8499
- Visualization studies of a shear driven three-dimensional recirculating flow.....9500
- Calculation of turbulence-driven secondary motion in non-circular ducts.....9501
- Numerical simulation of turbulent flow in two-dimensional channel with arbitrary inlet disturbance.....9502
- On vortex shedding from circular cylinder with step.....10634
- Experimental study of the mixing of turbulent, oppositely twisted streams in the initial section in an annular channel.....10635
- Fluctuations of the solid spatial concentration in the stationary two-phase turbulent flow of heterogeneous mixtures in pipelines.....11598

364-D Transition & relaminarization

- The forces due to the relative motion of two corrugated plates.....1644
- Development of finite-amplitude perturbations in Poiseuille flow.....8500
- Reorganization of a fluid flow downstream from a curved pipe.....12598
- Time of breakdown of a smooth one-dimensional inviscid fluid flow in a tube.....12599

364-E Unsteady flow

- Unsteady Couette flow and heat transfer in a dusty gas.....1642
- Transient thermal entrance heat transfer in laminar pipe flows with step change in pumping pressure.....2701
- Unsteady-state development of plane Couette flow for viscoelastic fluids.....2702
- Gavitational flow in a channel with oscillatory wall.....2703
- Flow inside a pneumatic tire: A peristaltic-pumping analysis for the thin-tire limit at very low forward speed.....3866
- Thrust augmenting ejectors, Part I.....5048
- Pulsatile flow in a rotating duct of varying gap.....5049
- Pulsating flow through a pipe orifice (2nd report, Flow patterns and wall shear stress).....6437
- Nonsteady processes in cryogenic pipelines.....6438
- Fully developed periodic turbulent pipe flow. Part 1. Main experimental results and comparison with predictions.....7435
- Fully developed periodic turbulent pipe flow. Part 2. The detailed structure of the flow.....7436
- The flow through bends in pneumatic conveying systems.....10636
- Volume-cycled oscillatory flow in a tapered channel.....12600
- Experimental study of the hydraulic line filling process.....12601

364-F Multicomponent flow

- Unsteady flow of dilute suspension in a semi-infinite contracting or expanding pipe.....643
- Experimental study of the drag of a two-phase helium flow in channels.....1643
- Studies on hold-up and pressure gradient in hydraulic conveying of settling slurries through horizontal pipes.....2704
- Cylindrical Couette problem of rarefied binary mixture.....2705
- Two-phase flow in vertical noncircular channels.....2706
- Plug conveying of coarse particles in a horizontal pipe with secondary air injection.....2707
- Analysis of turbulent gas-solid suspension flow in a pipe.....5050
- Frictional pressure losses for single-phase and two-phase flow of drilling muds.....6439
- The influence of air content on the simulation of transient phenomena in a pipeline.....7437
- Two-phase flow in pipelines - I: Steady-state flow.....7438
- Flow structure of annular-mist two-phase flow in tube bends (2nd Report, Gas velocity profile and pressure distribution).....7439
- Slow two-phase flow through a sinusoidal channel.....8501
- Pressure drop fluctuations and bubble-slug transition in a vertical two phase air-water flow.....8502
- Effect of the viscosity of the liquid phase on the true gas content and the region of stratified flow of a two-phase mixture in slightly inclined pipes.....8503
- Two-phase Couette flow.....8504
- Holdup of liquid draining from inclined tubes.....8505
- Flow structure and pressure loss for two phase flow in return bends.....9503
- A theoretical model for core-annular flow of a very viscous oil core and a water annulus through a horizontal pipe.....9504
- Formation of structure in a flow of a suspension of neutrally floating particles.....9505
- On frictional pressure gradient in annular flow.....9506
- Holdup in two phase flow.....12602
- Pressure drop and film height measurements for annular gas-liquid flow.....12603
- Two-phase redistribution in horizontal subchannel flow - turbulent mixing and gravity separation.....12604
- An investigation into the interfacial shear stress contribution in two-phase stratified flow.....12605
- Two-phase (vapor-liquid) flow pattern transitions in ducts of non-circular cross-section and under diabatic conditions.....12606

364-G Nonequilibrium effects & chemical reactions

- Non-isothermal catalytic wall reactions.....6440
- Qualitative study of equations describing quasi-one-dimensional nonequilibrium duct flow.....6441
- Heat transfer and drag in laminar nonisothermal pipe flows of non-Newtonian fluids.....7440

364-H Creeping flow

- Stokes flow between parallel plates due to a transversely moving end wall.....2708
- Motion of a two-dimensional bubble with surface film in a viscous liquid between parallel plates.....8506
- On the Stokes flow problem associated with a general twisted tube with a uniform non-rotating section.....9507
- The creeping motion in the entry region of a semi-infinite circular cylindrical tube.....10637

364-I Swirling flow

- Spin-up in Couette flow.....644
- The swirl in an S-duct of typical air intake proportions.....645
- Swirl characteristics of an S-shaped air intake with both horizontal and vertical offsets.....646
- On the oscillatory phenomena in a swirling pipe flow (1st Rep. Experiments on the precession of the vortex).....6442
- Some additional reflections on the viscous flow in a vortex chamber.....6443

- Proposal for an estimation method of the temperature separation characteristics in a vortex tube.....8507
 A "similarity" solution for laminar swirling core flows.....9508
 Further time-mean measurements in confined swirling flows.....9509
 Axisymmetric character of turbulent swirling flow in a straight circular pipe.....12607

364-J Stratified flow

- Prediction of the transit time of a stably stratified flow in a channel with inclined surface..3867
 Local heat transfer coefficients for condensation in stratified countercurrent steam-water flows.....5051
 Stability of steam-water countercurrent flow in an inclined channel: Flooding.....5052
 A hydrodynamic design of the flooding part of cell separator blood processor and the physical parameters affecting the blood separation.....5053

364-K Rotating fluids &/or surfaces

- Slender channel theory in flow between two cylinders..1645
 The non-dimensional parameters of free-surface vortices measured for horizontal and vertically inverted intakes.....7441
 Experiment on laminar flow in a rotating, curved duct of rectangular cross section.....9510

364-L Heat addition

- A comparison on the stability of horizontal fluid layers with radiative heat generation for two and three porous plates.....647
 Flow through pipes - I - effect of viscosity variation due to variation in temperature and concentration.....6444

364-M Non-Newtonian flow

- Peristaltic transport of a power-law fluid with variable consistency.....648
 Peristaltic flow of viscoelastic liquids.....1646
 Flow of an Oldroyd-fluid in a contracting channel with a moving boundary.....2709
 Multiple solutions and hysteresis in steady parallel viscous flows.....2710
 Pressure drop and mass transfer in dilute polymer solutions in turbulent drag-reducing pipe flow.....2711
 Laminar entrance region flow of the Bingham fluid.....5054
 Excess thermal noise generated during Poiseuille flow of certain polymer solutions.....6445
 Rectilinear oscillatory viscoelastic flow in rectangular ducts.....7442
 Loss of energy in the laminar flow of a Bingham fluid in pipe systems.....7443
 Elastoviscous liquid flow development in a tube under constant pressure head.....8508
 Turbulent heat and mass transfer in non-Newtonian pipe-flow: A model based on the surface renewal concept.....8509
 The evolution of small rotational perturbations to a uniform rotation of a viscoelastic fluid contained between parallel plates.....9511
 Power-law fluid flow in the hydrodynamic inlet region of a straight channel.....10638
 Motion of an elastoviscous liquid within a tube after removal of a pressure differential.....11599
 On the development of non-Newtonian secondary flows in tubes of non-circular cross-section.....12608
 Conjugated heat transfer in the flow of a non-Newtonian fluid with variable properties in a flat duct.....12609

364-N Roughness effect

- Modified friction coefficient and Reynolds number for a system pipeline - liquid - train of capsules.....2712

- Numerical analysis of the flow through a corrugated tube with application to arterial prostheses.....7444
 Hydraulic drag of helically twisted tubes at high Reynolds numbers.....8510

364-O Porous walls

- Exact solution to the problem of flow of slightly compressible fluids in a bounded confined "fracture-pore" medium and its application to well testing.....649
 Solid mechanics of discrete form and the variational principles of the discontinuous form.....650
 Free boundaries in one dimensional flow.....1647
 Laminar flow in a porous tube.....5055
 Application of Brinkman model in viscous incompressible flow through a porous channel.....6446
 Experimental determination of the coefficient of discharge from a channel through perforated walls...7445
 An addition to the concept of uplift pressure: Distribution of the forces exerted in the body of a porous pipeline under the influence of internal pressures.....9512
 Flow development in a porous channel and tube.....12610

364-P Obstructions

- Periodically converging-diverging tubes and their turbulent heat transfer, pressure drop, fluid flow, and enhancement characteristics.....7446
 Flow in semiclosed volumes of stemmed valves and their discharge characteristics.....12611

364-Y Computational techniques

- Bounds on the flow rate for pipe flow.....2713
 A numerical investigation for curved pipe flow at high Reynolds number.....3868
 A modified Dodge algorithm for the parabolized Navier-Stokes equations and compressible duct flows.....5056
 A new method for calculating ducted flows.....5057
 Numerical model for dynamic and thermal developments of a pulsed laminar ducted flow.....7447
 A pipe skin friction law of universal applicability...8511
 A new technique for computing viscous-inviscid interactions in internal flows.....9513
 Numerical solutions for laminar flow and heat transfer in a periodically converging-diverging tube, with experimental confirmation.....10639
 A discrete singularity formulation for solving steady, fully developed duct flows.....12612
 Approximate treatment of plane channel flow.....12613
 Variational method of determining the hydrodynamic parameters in convective heat-transfer problems for separation flows in channels.....12614

366 Internal flow (inlets, nozzles, diffusers, and cascades)

366-B Steady flow

- Shock-fitting bicharacteristic algorithm for three-dimensional scarfed nozzle flowfields.....651
 Nozzle exit flow characteristics for square-edged and rounded inlet geometries.....1648
 Three-dimensional viscous analysis of ducts and flow splitters.....2714
 Thrust augmenting ejectors, Part II.....5058
 Laminar flow in the entrance region of elliptical ducts.....5059
 Studies of flows through N-sequential orifices.....5060
 Calculation of laminar flow of compressible gas in the presence of heat transfer in two-dimensional curvilinear channels.....6447
 The flow from notched nozzles in the presence of a free stream.....10640
 Effects of small-scale, high intensity inlet turbulence on flow in a two-dimensional diffuser...12615

366-C Unsteady flow

- An actuator disc analysis of unsteady supersonic cascade flow.....652
- A method of predicting unsteady turbulent flows and its application to diffusers with unsteady inlet conditions.....653
- The unsteady jet from the metering orifice of a spool valve (The case where the upstream-side wall is oscillating).....2715
- Compressibility effect in two-phase flow and its application to flow metering with orifice plate and convergent-divergent nozzle.....5061
- A study of turbulent flow downstream of an abrupt pipe expansion.....5062
- Unsteady aerodynamics and gapwise periodicity of oscillating cascaded airfoils.....5063
- Rule of forbidden signals in a two-dimensional supersonic compressor cascade.....5064
- Decomposition of a disturbance in parallel shear flows.....5065
- Oscillations of Laval nozzle flow with condensation (Part I, On the range of oscillations and their frequencies).....6448
- Unsteady transonic cascade with a subsonic leading-edge locus.....6449
- Unsteady motion of viscous fluid in an expanding tube.....7448
- Forced oscillation experiments in supercritical diffuser flows.....9514
- An analysis of three-dimensional unsteady subsonic flow through rectilinear cascades.....10641
- Influence of a periodical fluctuation on a profile loss of a cascade. (Part I. Determination of the total pressure loss coefficient).....12616
- Influence of a periodical fluctuation on a profile loss of a cascade. (Part II. Behavior of a boundary layer).....12617

366-D Multicomponent flow

- Laser Doppler velocimeter measurements in unsteady, separated, transonic diffuser flows.....5066
- The flow states of liquid through two series-connected diffusers subject to cavitation.....5067
- Solution of the direct problem of a Laval nozzle working with a two-phase medium.....6450

366-E Nonequilibrium effects & chemical reactions

- Critical flashing flows in nozzles with subcooled inlet conditions.....3869
- The response of normal shocks in diffusers.....5068
- Optimized ejector-diffuser design procedure for natural gas vapor recovery.....6451
- Influence of nozzle profile on the characteristics of a gas-dynamic laser.....7449
- Closed-form model for three-dimensional vacuum plumes from a scarfed nozzle.....9515

366-F Swirling flow

- Calculation of various diffuser flows with inlet swirl and inlet distortion effects.....654
- Effect of swirl on the potential core in two-dimensional ejector nozzles.....655
- Flow in annular diffusers (2nd report, Flow analysis and effect of inlet boundary layer thickness).....6452
- Generalization of experimental data of hydraulic friction inside helically corrugated tubes.....6453
- Effects of swirl on flow separation and performance of wide angle diffusers.....8512
- Understanding and countering the swirl in S-ducts: tests on the sensitivity of swirl to fences.....11600

366-G Secondary flow

- Investigation of the distribution of the static pressure and the tangential stresses on the walls of a curvilinear channel.....6454

366-H Non-Newtonian flow

- Non-isothermal developing flow of a power-law fluid in a converging slit.....656
- Finite element simulation of die swell for a Maxwell fluid.....657
- Laminar entry length problem for power law fluids.....658
- Theoretical and experimental studies on the coefficient of discharge and spray cone angle of a swirl spray pressure nozzle using a power-law non-Newtonian fluid.....659
- The influence of the upper wall on the die entry flow of viscoelastic fluids.....6455
- Initiation of air core in a swirl nozzle using time-independent power-law fluids.....11601

366-I Three-dimensional flow

- Three-dimensional, two-phase supersonic nozzle flows...660
- Experimental study of the three-dimensional flow field in an annular turbine nozzle guidevane.....11602
- Three-dimensional flow simulations for supersonic mixed-compression inlets at incidence.....12618

366-J Separation & reattachment

- Investigation of jet flow past slotted and wedge-shaped nozzles in a shock tube.....661
- Flow in a rectangular diffuser with local flow detachment in the corner region.....5069
- Calculation of losses in diffusers with flow separation.....10642
- The flow development in a shielding jet.....11603

366-L Suction & injection

- The influence of trailing edge ejection on the base pressure in transonic turbine cascades.....3870

366-N Performance & optimization

- The use of optimization techniques to design-controlled diffusion compressor blading.....3871

366-Y Computational techniques

- An inverse time marching method for the definition of cascade geometry.....662
- Semi-elliptic computation of an axi-symmetric transonic nozzle flow.....663
- Time-marching analysis of steady transonic flow in turbomachinery cascades using the hopscotch method..3872
- Unconditionally stable calculation of transonic potential flow through cascades using an adaptive mesh for shock capture.....5070
- A uniformly valid asymptotic solution for unsteady subresonant flow through supersonic cascades.....5071

366-Z Experimental techniques

- Investigation of the two-dimensional performance of supersonic impulse turbine blade cascades (1st Report, General characteristics of blade cascades)..1649
- Stabilization effects in flow through helically coiled pipes.....5072

368 Free shear layers (mixing layers, jets, wakes, cavities, and plumes)

368-B Laminar incompressible

- The shape of low Reynolds number jets.....664
- Development of confined laminar wakes at large Reynolds numbers.....1650
- On an approximate means of determination of the vorticity in a zone of separation for viscosity approaching zero.....1651

Annular jets of different diameter ratios.....	1652
Axisymmetric jet flows.....	1653
An experimental investigation of laminar axisymmetric submerged jets.....	3873
Solutions of incompressible jets.....	5073
Vertical slender jets with surface tension.....	6456
An approximate solution for two dimensional laminar plumes including magnetic effects.....	7450
Universal equation of transient plane jet in concurrent stream.....	7451
Nonstationary wake domain behind slender lifting bodies in incompressible flow.....	8513
Some new results for the integro-differential equation of jet-flap theory.....	8514
On the theory of thin airfoils in nonequilibrium ideal fluids.....	8515
The plane jet as a limit case of the radial jet.....	9516
A similarity between plane and axisymmetric viscous-gravity jets.....	9517
Formation of vorticity fronts in shear flow.....	10643

368-C Laminar compressible

Note on the axisymmetric sonic jet.....	5074
An exact partial solution to the compressible flow problems of jet formation and penetration in plane, steady flow.....	9518

368-D Turbulent incompressible

Subharmonics and vortex merging in mixing layers.....	665
Influence of large vortices on the structure of an axisymmetric turbulent jet.....	666
Decay of streamwise vorticity downstream of a three-dimensional protuberance.....	667
Measurements of nonlinear interactions during natural transition of a symmetric wake.....	668
The structure of a turbulent wake behind a cruciform circular cylinder. (2nd Report. The streamwise development of turbulent flow field).....	669
An experimental investigation of the wake of an axisymmetric body with a slanted base.....	670
Effect of initial conditions on constant pressure mixing between two turbulent streams.....	671
Initial stages in the development of thermals.....	672
Experimental investigation of a turbulent jet in turbulent cross flow.....	1654
Spectral analysis of the thermal field in an axisymmetric turbulent plume.....	2716
On the deformation of the rectangular turbulent jet cross-section.....	2717
Curvature effects on two-dimensional turbulent wall jets.....	3874
Space-time correlation of temperature fluctuations in an axisymmetric thermal plume.....	3875
The effect of strong three-dimensional disturbance on vortex shedding.....	3876
Structure and dynamics of round turbulent jets.....	5075
Preferred modes and the spreading rates of jets.....	5076
Turbulence measurements in confined jets using a rotating single-wire probe technique.....	5077
Effects of main-flow turbulence on the flow structure in a lateral jet.....	6457
On the influence of the exit conditions on the entrainment rate in the development region of a free, round, turbulent jet.....	6458
Asymptotic structure of the interaction in a laminar axisymmetric wake.....	7452
Influence of acoustics and the flow regime in the boundary layer on nozzle walls on the mixing layer of an immersed jet.....	7453
Deformation of the transverse section of a rectangular turbulent jet.....	8516
Laminar length of a non-Newtonian fluid jet.....	9519
Dynamics of vertical annular liquid jets.....	9520
The dynamics of thin liquid jets in air.....	9521
Free-stream turbulence effects on a separation bubble.....	9522
Mean flow patterns around two-dimensional rectangular cylinders and their interpretation.....	9523
Hydrodynamics and heat exchange in turbulent	

momentumless wakes.....	9524
The mixing layer: Deterministic models of a turbulent flow. Part 1. Introduction and the two-dimensional flow.....	10644
The mixing layer: Deterministic models of a turbulent flow. Part 2. The origin of the three-dimensional motion.....	10645
Velocity characteristics in the turbulent near wakes of confined axisymmetric bluff bodies.....	10646
An experimental study of entrainment and transport in the turbulent near wake of a circular cylinder.....	10647
Entrance section of a planar turbulent jet in transverse flow.....	10648
Heat and mass transfer in a submerged axisymmetric twisted jet.....	10652
Numerical calculation of particle dispersion in a turbulent mixing layer flow.....	11604
On an incompressible asymmetric heated plane jet.....	11605
Calculations of a plane turbulent jet.....	12619
Turbulent non-buoyant surface jets.....	12620
Similarity solution of turbulent free jet.....	12621

368-E Turbulent compressible

Unsteady aspects of a low Mach number jet.....	673
Exact solution for a high-temperature jet.....	674
Prediction of the steady surface thermal plume.....	2718
Time-dependent density profiles in a filling box.....	3877
The destruction of temperature fluctuations in a turbulent plane jet.....	5078
Aerodynamic studies on swirled coaxial jets from nozzles with divergent quirls.....	5079
Investigation of supersonic three-dimensional jet flow in a channel.....	6459
Method of designing a vortical diffuser.....	10649
Comparison of temperature and velocity spectra in a slightly heated turbulent plane jet.....	10650

368-F Stratification

Synthetic method in thermal boundary layer transition.....	675
Gravity currents with variable inflow.....	1655
Mechanism for transition to turbulence in buoyant plume flow.....	3878
Shear layers in converging flow of fluid of non-uniform density and viscosity.....	5080
Relations between structure functions of velocity and temperature in a turbulent jet.....	5081
Experimental study of buoyant vortex rings.....	6460
Numerical study of the effect of free convection on the development of vertical turbulence in a semiinfinite gas jet.....	8517
The azimuthal correlations of velocity and temperature fluctuations in an axisymmetric jet.....	10651

368-G Multicomponent

Experimental study of vortex emission behind bluff obstacles in a gas liquid vertical two-phase flow.....	676
Entrainment by a concentric jet with particles in the primary stream.....	677
Investigation of two plane parallel jets.....	678
A technique to enhance entrainment by a particle laden double concentric jet.....	8518
Three-dimensional wall jets from multiple outlets.....	8519
Turbulent two-phase jet and its numerical investigation.....	8520
Use of an equation describing the transport of the energy of turbulent pulsations to calculate two-phase jets.....	8521
Investigation of a condensing injector.....	8522
Investigation of a multijet injector at different ratios of the velocities of the mixing streams and different areas of the mixing chamber exit.....	8523
Experimental study of the startup of a stream-condensing injector in a closed-loop system.....	8524
Two-component LDA measurement in a two-phase turbulent jet.....	9525
Investigation of mixing in a turbofan exhaust duct, Part II: Computer code application and verification.....	9526

- Momentum transfer in a vertical down flow liquid jet ejector: Case of self gas aspiration and emulsion flow.....9527
 Distribution of the disperse fraction of an injected polydisperse jet in a gas flow.....9528
 The fully developed region of a two-phase jet.....11606
 Propagation of a gas jet in a liquid.....12622
- 368-H Rotating fluids &/or surfaces
- Laminar swirling jet with allowance for buoyancy forces.....7454
 Numerical simulation of two-dimensional inlet flowfields.....8525
 Radial jet in rotating outer flow.....12623
- 368-I Jet-solid surface interaction
- Complete velocity profile and "optimum" skin friction formulas for the plane wall-jet.....679
 Strong action of a strongly underexpanded low-density jet on a plane obstacle.....1656
 The velocity field produced by a submerged jet directed upwards at a free surface.....2719
 Loads and pressures due to underexpanded jets impinging on wedges.....2720
 A theoretical prediction of the fluid buckling frequency.....2721
 Experimental investigation of curvature effects on ventilated wall jets.....5085
 An experimental study of the model microjet.....6461
 Modelling the erosion efficiency of cavitation cleaning jets.....6462
 Renetration by high speed oblique jets: Theory and experiment.....6463
 Experimental studies on the combined flow field formed by a moving wall and a wall jet running parallel to it.....7455
 Turbulence effect on the impinging jet on a flat plate.....7456
 Three-dimensional reattached wall jet.....7457
 Cavitating jet as a tool for erosion investigations.....7458
 Auto-oscillations of planar colliding jets.....7459
 Investigation of the length and wave structure of the gas-dynamic section in straight and spreading gas jets.....8526
 Velocity coefficients for free jets from sharp-edged orifices.....9529
 Potential flow from a tapering nozzle impinging on a flat plate.....9530
 Oblique impingement of two turbulent plane free jets.....10653
 Surface pressures on a flat plate with dual jet configurations.....11607
 Laminar wall jet of a non-Newtonian fluid over a curved surface.....12624
 General solution to the jet flow past a wedge.....12625
- 368-J Jet-flow interaction
- A study on oscillatory jet in a cavity (1st Report, Mechanism of oscillation).....680
 Effects of properties and location in the plume on droplet diameter for injection in a supersonic stream.....681
 Visualization of multijet impingement flow.....682
 Effects of artificial excitation upon a low Reynolds number mach 2.5 jet.....683
 Plane jet interaction with three-dimensional disturbances.....684
 Acoustic interaction with a turbulent plane jet - Some effects on turbulent structure.....1657
 Penetration and breakup of slurry jets in a supersonic stream.....1658
 Jets into liquid under gravity.....1659
 Stability of capillary cylindrical jets in external flow.....2722
 A liquid compound jet.....2723
 A study of laminar buoyant jets discharged at an inclination to the vertical buoyancy force.....2724
 Superpotential solution for jet-engine external potential and internal rotational flow interaction.....3879
 Two-dimensional jet subjected to periodic oscillations in the potential core region.....3880
- Measurements of turbulent Prandtl number in a plane jet.....3881
 Toward attenuation of self-sustained oscillations of a turbulent jet through a cavity.....5082
 Interaction of an acoustic disturbance and a two-dimensional turbulent jet: Experimental data.....5083
 Pressure measurements of coaxial jet of high mean-velocity ratio.....5084
 Observations on flow fields generated by opposed free-jets of gas mixtures.....6464
 Experimental investigation of jets in a crossflow.....7460
 Interaction of a jet exhausting from a body with an opposing supersonic stream of rarefied gas.....7461
 Experimental investigation of the interaction of a supersonic annular jet and an obstacle.....7462
 Investigation of the loss of momentum of a slot jet flowing along a curved surface.....7463
 Numerical analysis of the development of a system of jets in the region of mixing of oppositely twisted annular flows.....8527
 On the dynamical equations for liquid jets.....8528
 Extension of the Borda-Carnot formula to the case of mixing of two streams with nonuniform velocity fields.....8529
 Jet trajectories and surface pressures induced on a body of revolution with various dual jet configurations.....9531
 Vortex structure of circular jets in crossflow.....9532
 Effects of viscosity and surface tension on a jet plume in supersonic crossflow.....9533
 Feasibility of producing prescribed distribution of temperature gradient with array of submerged jets.....10654
 Thrust reverser exhaust plume reingestion model tests.....11608
 Interactive phenomena in supersonic jet mixing problems, Part I: Phenomenology and numerical modeling techniques.....12626
 Removal of a thin liquid film from a flat surface using an axisymmetric impinging jet.....12627
 Simple three-dimensional vortex motions in coflowing jets and wakes.....12628
 Non-buoyant and buoyant circular surface jets in coflowing streams.....12629
 Principles of transverse jet mixing.....12630
 Experimental study of the interaction of a pair of hypersonic jets.....12631
- 368-K Heat or mass addition
- Mixed convection in an axisymmetric buoyant plume.....685
 Solutions for the channel plume and the parallel-walled chimney.....7464
 Study of the interaction between a hot gas jet and a liquid bath.....9534
 A time dependent, two-layer frontal model of buoyant plume dynamics.....10655
 Laminar plane wall jet of a non-Newtonian fluid with vectored surface mass transfer.....10656
- 368-L Chemical reaction
- Turbulent effects on the chemical reaction for a jet in a nonturbulent stream and for a plume in a grid-generated turbulence.....6465
 Ignition in gun exhaust plumes.....7465
 Experimental study of the variation in the total pressure along the axis of a submerged liquid jet discharged into a cavitating liquid.....8530
- 368-Y Computational techniques
- Calculation of curved shear layers with two-equation turbulence models.....686
 A study of concentration field of a round jet by a quantitative visualization method.....2725
 Aeroacoustic computation of cylinder wake flow.....5086
 Eddy viscosity models for wakes and separated flows.....5087
 On the calculation of some two-dimensional inviscid jets.....11609

368-Z Experimental techniques

- Speckle velocimetry study of vortex pairing in a low-Re unexcited jet.....2726
 A technique for the direct measurement of volume flux of a plume.....3882
 Water jet photography - techniques and methods.....5088
 Flat supersonic underexpanded jets using a laser Schlieren method.....6466
 An enhanced flow visualization technique for planar free shear layers.....7466
 A conditional-sampling study of the interaction of two turbulent wakes.....9535
 The structure and concentration decay of high pressure jets of natural gas.....10657
 A turbulent mixing layer constrained by a solid surface. Part 2. Measurements in the wall-bounded flow.....10658

370 Flow stability

370-B Solid boundary (internal flow)

- The instability of Poiseuille flow in a circular pipe.....687
 On the nonlinear stability of slow varying time-dependent viscous flows.....688
 On certain aspects of three-dimensional instability of parallel flows.....689
 Steady laminar flow in the inlet region of rectangular ducts.....1660
 Energy stability of thermally modulated Poiseuille flow.....2728
 A note on the stability of low-Prandtl-number Hadley circulations.....3883
 The effect of wall conduction on the stability of a fluid in a right circular cylinder heated from below.....3884
 Instabilities and catastrophes in science and engineering (Book).....5089
 Perturbed bifurcation theory for Poiseuille annular flow.....5090
 Three-dimensional tertiary motions in a plane shear layer.....6467
 Analysis of the boundaries of stability of motion of flow of helium at supercritical parameters in heated channels.....6468
 Inviscid centre-modes and wall-modes in the stability theory of swirling Poiseuille flow.....8531
 An experimental investigation of the stability of Poiseuille flow.....10659
 The effect of heating on the stability of flow over concave walls.....10669
 Instabilities associated with the outlet flow in vortex amplifiers.....11610
 Spatial growth of disturbances in a compressible boundary layer.....12632
 The effect of the transversal velocity on the stability of laminar flow in a cylindrical channel.....12633

370-C Solid boundary (external flow)

- Nonstationary critical layer and nonlinear instability in a planar Poiseuille flow.....690
 Eigenvalues of the Orr-Sommerfeld equation in an unbounded domain.....691
 Secondary instability of wall-bounded shear flows.....1661
 Amplitude-dependent stability of boundary-layer flow with a strongly non-linear critical layer.....1662
 Large-amplitude long waves in a shear flow.....2729
 On the stability of almost parallel boundary layer flows.....2730
 Fluid-property effects on flow-generated waves on a compliant surface.....3885
 Effects of suction on the Gortler instability of boundary layers.....5091
 The evolution of Tollmien-Schlichting waves near a leading edge. Part 2. Numerical determination of amplitudes.....5092

- Numerical investigation of the instability of a shear discontinuity of the velocity in compressible gases.....6469
 On the stability of the decelerating laminar boundary layer.....7468
 Excitation by sound of Tollmien-Schlichting waves in a supersonic boundary layer.....7469
 Stability of preseparation boundary layer on the leading edge of a thin airfoil.....7470
 Analysis of a laminar boundary layer and the stability of plane flow by means of cubic splines.....7471
 Nonlinear resonant interaction of acoustic fields with Tollmien-Schlichting waves.....7472
 The transition from roll to square-cell solutions in Rayleigh-Bernard convection.....10660
 Hydrodynamic instability of the axisymmetric flow of an ideal fluid with an interphase.....10661
 A shear-flow instability in a circular geometry.....10662
 The spatial stability of a class of similarity solutions.....12634
 The stability of two-dimensional linear flows.....12635
 Instability of a two-dimensional wall plume.....12636
 Excitation of unstable waves in boundary layer on a vibrating surface.....12637
 Excitation of Tollmien-Schlichting waves by acoustic and vortex disturbance scattering in boundary layer on a wavy surface.....12638
 Stability of colliding drops of ideal liquid.....12639

370-D Nonlinear theory

- Growth of fluctuations near the Bernard-Marangoni convective instability.....692
 Hydrodynamic stability.....2727
 The cancellation of a sound-excited Tollmien-Schlichting wave with plate vibration.....2731
 On the stability of plane Poiseuille flow to finite-amplitude disturbances, considering the higher-order Landau coefficients.....3886
 Breaking of liquid films and threads.....5093
 Natural instability of free shear layers.....5094
 On the nature of the amplitude modulation of jet shear layer instability waves.....5095
 On the mathematical problem of linear and non-linear hydrodynamic stability with completely perturbed data.....6470
 The effect of Mach number on the spatial stability of adiabatic flat plate flow to oblique disturbances.....7473
 Stability of ideal incompressible flow with constant vorticity in an elliptic cylinder.....12640

370-E Three-dimensional theory

- Instabilities of a cylindrical liquid sheet between two gas streams.....1663
 Secondary instability of plane channel flow to subharmonic three-dimensional disturbances.....2732
 Spinning modes on axisymmetric jets. Part 1.....5096
 Axial coherence functions of circular turbulent jets based on an inviscid calculation of damped modes.....5097
 Effect of the small forced oscillations on the stability of the steady motion of fluid.....7474
 Calculation of three-dimensional instability of a Blasius boundary layer.....10663
 Excitations and development of instabilities in three-dimensional stationary boundary layers.....12641

370-F Multicomponent flow

- Nonlinear Taylor instability of a plane interface between two incompressible fluids with interfacial mass transfer.....693
 Shear-flow instability at the interface between two viscous fluids.....1664
 Stability of two-layer systems with respect to convective mixing.....7467
 Influence of surface tension on the stability of heterogeneous equilibrium of barotropic liquid

- phases.....7475
 Stability of steady plane-parallel convective motion
 of a chemically active medium.....7476
 On instabilities arising during sedimentation of
 two-component mixtures of solids.....11611
- 370-G Non-Newtonian flow
- The stability of two stratified "power-law" liquids
 in Couette flow.....694
 Small-disturbance stability of a non-isothermal tube
 flow of power law fluids. Part 1: Derivation of
 the Orr-Sommerfeld equation extended.....695
 Small-disturbance stability of a non-isothermal tube
 flow of power law fluids. Part 2. Numerical
 solution of the problem.....696
 On the stability of a hot layer of micropolar fluid.....697
 Three-dimensional disturbances of planar viscometric
 flow.....2733
 Stability of plane Poiseuille flow of a viscous
 anisotropic fluid.....6471
 The unstable plane motion of the Poiseuille type for
 Rivlin-Ericksen fluid.....8532
 Hydrodynamic instability of extensional flow.....8533
 Hydrodynamic stability of a generalized nonlinear
 viscoplastic fluid under plane gradient flow.....10664
- 370-H Nonequilibrium effects & chemical equilibrium
- The effects of mass transfer and solute adsorption
 on the stability of liquid jets in liquids to
 asymmetric disturbances.....698
 Nonstationary phenomena in flows of a viscous
 reactive liquid.....6472
 Stability of a laminar premixed supersonic free
 shear layer with chemical reactions.....7477
 Influence of spatial modulation of the temperature
 field on the stability of two-dimensional steady
 flow in a horizontal layer of fluid.....7478
 Finite-amplitude convection in mixtures with heat
 sources proportional to the concentration of one
 of the components.....7479
- 370-I Pendant drops
- A numerical investigation of the bending instability
 of thin jets of dropping liquids.....699
 A boundary perturbation solution for the
 hydrodynamic stability of blood flow in a cone-
 type blood processor.....2734
- 370-J Stratified flow
- Nonlinear stage of the shearing instability in a
 stratified liquid of finite depth.....700
 The stability of quasi-geostrophic fields induced by
 potential vorticity sources.....701
 Equilibrium shape and stability of a liquid cylinder
 in cross flow at low Weber numbers.....702
 The narrow gap stability theory of blood flow
 between two relatively rotating concentric cones.....703
 Viscous stability of compressible axisymmetric jets.....704
 Hydrodynamic stability of the melt during
 solidification of a binary alloy.....1665
 The theory of stability of spatially periodic
 parallel flows.....1666
 Linear stability and stable modes of geostrophic
 fronts.....2735
 Compressible Rayleigh-Taylor instability.....2736
 Stability of stratified shear flows.....3887
 Instabilities in the slit-jet flow field.....3888
 The stability of vertical buoyancy-induced flow in
 cold water.....5098
 Stability of the equilibrium state of a capillary
 liquid with disconnected free surface.....6473
 Three-dimensional baroclinic instability of a Hadley
 cell for small Richardson number.....7480
 Numerical solution of a Rayleigh-Taylor instability
 problem.....8534
 Note on the paper of Kochar & Jain on Howard's
 semicircle theorem.....9536
- Mean motions induced by baroclinic instability in a
 jet.....9537
 Long-wave instability of an isolated front.....9538
 Radiation instability in a stratified shear flow.....10665
 Stability characteristics for flows of the vortex-
 sheet type.....10666
 On the stability of stratified plane Couette flow.....11612
 Asymmetric instabilities in buoyancy-driven flow in
 a tall vertical annulus.....11613
 On the stability of an axisymmetric plume in a
 uniform stream.....11614
 Instability of the flow of two immiscible liquids
 with different viscosities in a pipe.....12642
 Non-uniqueness and stability of the configuration of
 flow of immiscible fluids with different
 viscosities.....12643
- 370-K Rotating flow
- On spatial and temporal stability in three
 dimensional fluid flows.....705
 Prediction of instabilities in compression systems.....706
 On flow between counter-rotating cylinders.....1667
 The linear stability of the flow in the narrow gap
 between two concentric rotating spheres.....1668
 A sufficient condition for the instability of
 columnar vortices.....1669
 General stability conditions for zonal flows in a
 one-layer model on the η -plane or the sphere.....1670
 End effects on the transition to time-dependent
 motion in the Taylor experiment.....1671
 Taylor vortices between almost cylindrical
 boundaries.....2737
 Effect of rotation on the stability of a bounded
 cylindrical layer of fluid heated from below.....2738
 Transition of Taylor-Görtler vortex flow in
 spherical Couette flow.....3889
 An algorithmic approach to the linear stability of
 the Ekman layer.....3890
 On the pointwise stability of a viscous liquid
 between rotating coaxial cylinders.....5099
 Flow between rotating disks. Part 2. Stability.....5100
 Stability of rotating liquid drops I. Uncharged
 drops.....5101
 Baroclinic instability over wavy topography.....5102
 Numerical study of secondary flows and roll-cell
 instabilities in rotating channel flow.....5103
 On the nonlinear stability of rotating Newtonian and
 non-Newtonian fluids.....5104
 On model study of Couette flow.....7481
 Numerical investigation of supercritical Taylor-
 vortex flow for a wide gap.....7482
 Factors affecting the stability of viscous axial
 flow in annuli with a rotating inner cylinder.....8535
 On the existence of nonzonal flows satisfying
 sufficient conditions for stability.....9539
 Barotropic instability of weakly non-parallel zonal
 flows.....9540
 Marginal stability curve and linear growth rate for
 rotating Couette-Taylor flow and Rayleigh-Bénard
 convection.....10667
 Continuous mode in the theory of the barotropic
 instability of zonal flows.....10668
 Three-dimensional stability of an elliptical vortex
 in a straining field.....11615
 Semi-ellipse theorem for the heterogeneous rotating
 flow with respect to three-dimensional
 disturbances.....11616
- 370-Y Computational techniques
- On the growth rate of a perturbation in some
 stability problems.....2739
 On Liapunoff's method in the theory of stability of
 laminar fluid flows.....2740
 A new equation in stability of unconfined flows.....2741
 On stability of non-parallel flows and continuous
 spectrum.....2742
 Non-linear systems of a fluid mechanical type and an
 algebraic model of stability of a stationary flow.
 Part 1 — Theory.....2743

- Non-linear systems of a fluid mechanical type and an algebraic model of stability of a stationary flow. Part 2 — Application.....2744
 A three-dimensional linear stability analysis for two-dimensional free boundary flows by the finite-element method.....8536
 Numerical stability analysis of an axially symmetric incompressible viscous flow under axially symmetric perturbations.....10670
 Nonlinear stability of a diffusion equation.....11617

372 Turbulence

372-B Homogeneous isotropic turbulence

- Functional integrals in Navier-Stokes incompressible fluid turbulence.....707
 Observation of streamwise rotation in the near-wall region of a turbulent boundary layer.....708
 The double velocity correlation function of homogeneous turbulence with constant mean velocity gradient.....5105
 Empirical equations for the structure of isotropic turbulence.....6474
 Introduction to two-dimensional turbulence.....6475
 Turbulent transport as a consequence of two random processes.....6476
 New results concerning the experimental study of the return to isotropy of the Reynolds stress tensor in the case when the third invariant of its deviatoric tensor is positive.....8537
 About a new method giving the closure relation between the linear part of the pressure-deformation correlation tensor and the Reynolds stress tensor in the case of an homogeneous turbulence submitted to a pure strain.....8538
 The anisotropic temperature spectrum in isotropic turbulence with a constant temperature gradient.....9541
 A simple turbulence closure hypothesis for the triple-velocity correlation functions in homogeneous isotropic turbulence.....9542
 Relative diffusion of a pair of fluid particles in turbulence.....11618
 Development of a turbulence near-wall model and its application to separated and reattached flows.....11619
 An approximate determination of some spectral functions in the inertial layer of a fully developed turbulent flow.....11620
 Numerical simulation of homogeneous, isotropic, two-dimensional turbulence in compressible flow.....11621
 A vortex-tube model of eddies in the inertial range.....12644

372-C Homogeneous nonisotropic turbulence

- Oscillating-grid turbulence including effects of rotation.....2745
 The growth of a grid-generated turbulent mixed layer in a two-fluid system.....3891
 A Lagrangian two-time probability density function equation for inhomogeneous turbulent flows.....5106
 The final stage of decay of turbulence in stably stratified fluid.....5107

372-D Nonisotropic turbulence

- Measurement of a recirculating, two-dimensional, turbulent flow and comparison to turbulence model predictions. I: Steady state case.....5108
 Measurement of a recirculating, two-dimensional, turbulent flow and comparison to turbulence model predictions. II: Transient case.....5109
 Distortion of turbulence approaching a plate held normal to the flow.....10671
 An application of the modified zero-fourth-cumulant approximation to homogeneous axisymmetric turbulence.....12645

372-E Compressibility effects

- Supersonic turbulent boundary layers subjected to a pressure gradient: Calculation with a model.....1673
 On behavior of two-dimensional non-plane parallel turbulent flows of inviscid gas.....3892
 Numerical computations of turbulence amplification in shock-wave interactions.....5110
 Turbulent flow behaviour through a shock wave turbulent macroscale evolution.....5111

372-F Free shear layers

- On heat transfer modelling for turbulent shear flows on curved surfaces.....709
 Higher-order statistics of turbulent fluctuations in the plane wake.....710
 Distortion of turbulence in flows with parallel streamlines.....1674
 Experimental investigation of the large-scale structure of inhomogeneous turbulence.....1675
 On the organized motion of a turbulent plane jet.....5112
 Turbulence measurements in a developing mixing layer with mild destabilising curvature.....5113
 Two dimensional grid turbulence in a thin liquid film.....8539
 Statistical theory for the diffusion of a passive scalar in turbulent shear flows.....9543
 Mixing layer produced by a screen and its dependence on initial conditions.....11622
 Probability distributions of the velocity fluctuations in axisymmetrical turbulent wakes.....12646

372-G Boundary layers

- Wall pressure fluctuations in attached boundary-layer flow.....711
 On the role of wall-pressure fluctuations in deterministic motions in the turbulent boundary layer.....712
 Conditional analysis of intermittency in the near wake of a circular cylinder.....713
 The development of intermittent turbulence on a swept attachment line including the effects of compressibility.....714
 Measurement of the statistical characteristics of a turbulent boundary layer in a natural environment.....1676
 On the structure of wall-bounded turbulent flows.....2747
 Calculation of particle trajectories in the presence of a gradient in turbulent-velocity variance.....5114
 Analogies between transitional and turbulent boundary layers.....5115
 On the structure and resolution of wall-pressure fluctuations associated with turbulent boundary-layer flow.....5116
 Measurements of some features of turbulence in wall-proximity.....5117
 Conditionally sampled measurements of coherent structures in the wall region of a turbulent boundary layer.....5118
 Experimental study of axisymmetric turbulent flow of an incompressible fluid over a cylinder.....6477
 The production of turbulent stress in a shear flow by irrotational fluctuations.....7483
 Two-scale semiempirical theory of turbulent boundary layers and jets.....7484
 Measurements of spatial correlations and autocorrelations in separated and reattached flow over a blunt flat plate.....8540
 High-order velocity structure functions in turbulent shear flows.....9544
 Contribution to the Reynolds stress model as applied to near-wall region.....10672
 Turbulence spectra from the viscous sublayer and buffer layer at the ocean floor.....11623
 The main structure of turbulent boundary layers.....11624
 Wave properties and shear stress of a turbulent boundary layer.....12647
 Turbulent fluctuations of shear stress at the wall.....12648

- The integral turbulence scale in calculation of a boundary-layer flow on a penetrable plate.....12649
Influence of nonisothermal profile surface on local heat transfer coefficients.....12650
- 372-H Pipe & channel flow
- Calculation of the loss of the total pressure in channels with variable cross sectional area in the presence of turbulent mixing.....715
Analysis of the characteristics of flow in sudden expansion of similarity approach.....716
Influence of weak undulations on turbulent convection in an axisymmetric pipe flow:
Experiments and numerical prediction.....2748
Turbulence structure in stably stratified open-channel flow.....5119
Transition from laminar to turbulent flow inside an oscillating tank.....6478
Measurement of streamwise vorticity fluctuations in a turbulent channel flow.....7485
Simulation of two-dimensional turbulence in a planar channel.....7486
Effect of polymeric additives on the damping of wall turbulence and on convective heat transfer.....7487
Fluctuations of velocity of cross flow of air in the space between tubes in bundles.....9545
Calculation of the wall-pressure field in a turbulent channel flow.....10673
Balance of turbulent energy in the linear wall region of channel flow.....10674
Turbulent flow in annular axisymmetric tubes.....12651
- 372-I Stratified flows
- Experiments on the transition of homogeneous turbulence to internal waves in a stratified fluid..2749
An experimental study of entraining, stress-driven, stratified flow in an annulus.....2750
On extension of Malkus' theory of turbulence to stably stratified shear flow.....5120
Turbulence in flow with circular streamlines.....5121
Turbulence, heat and mass transfer in very stably stratified liquids.....6479
Turbulent gravity-stratified shear flows.....7488
Effect of gravity waves on turbulence decay in stratified fluids.....9546
Measurements of vertical overturns in a stably stratified turbulent flow.....10675
- 372-J Rotating flows &/or surfaces
- A three-dimensional turbulent flow analysis method for the rotating channels of a centrifugal turbomachine.....5122
High Reynolds number turbulence model of rotating shear flows.....6480
Entrainment by grid-generated turbulence in rotating stratified fluids.....6481
The structure of turbulence in homogeneous and stratified rotating fluids.....6482
Turbulent flow between coaxial cylinders with the inner cylinder rotating.....8541
Reynolds stresses and differential rotation III. Zonal momentum fluxes in rapidly rotating stars.....9547
- 372-K Non-Newtonian flow
- Effect of polymer additives on propagation of turbulence front.....1677
- 372-L Heat & mass transfer
- Mass and heat transfer in a turbulent non-Newtonian boundary layer.....717
The effect of a passive cross-stream temperature gradient on the evolution of temperature variance and heat flux in grid turbulence.....718
Diffusion and mixing of passive impurities in a linear velocity field.....1678
- Statistical characteristics of a passive admixture in a homogeneous isotropic turbulence field.....1679
Spectral relationships between velocity and temperature fluctuations in turbulent shear flows...2751
How rapidly is a passive scalar mixed within closed streamlines?.....3893
Maldistributed inlet flow effects on turbulent heat transfer and pressure drop in a flat rectangular duct.....3894
Turbulent time scales and the dissipation rate of temperature variance in the thermal mixing layer...5123
On the modelling of effects of negative production of temperature-fluctuation intensity in the turbulent mixing layer.....5124
Turbulence in the theory of heat transfer.....5125
A comparison of properties of temporal and spatial temperature increments in a turbulent plane jet.....6483
Mixing to a molecular level in turbulent media.....6484
Influence of two-dimensional turbulence on diffusion...6485
Mechanism of drag reduction by additives and heat and mass transfer in resulting turbulent flows.....7489
Statistical characteristics of velocity, concentration, mass transport, and momentum transport for coaxial jet mixing in a confined duct.....8542
Filmwise condensation for turbulent flow on a vertical plate.....9548
Suction effects on turbulence statistics in a heated pipe flow.....10676
A turbulent-transport model for concentration fluctuations and fluxes.....10677
A two-pass procedure for the calculation of heat transfer in recirculating turbulent flow.....10678
The effect of free-stream turbulence on heat transfer from a rectangular prism.....11625
Points of symmetry in turbulent shear flows.....11626
- 372-M Multicomponent techniques
- Experimental study of velocity and scalar fields in grid-generated turbulence with dilute polymer solutions.....2752
A two-equation turbulence model for two-phase flows...2753
Turbulent flow with polymer additives.....3895
An inertial model of particle separation from a turbulent flow of gas.....9549
- 372-N Geophysical turbulence
- Vortex evolution.....1680
On the structure of turbulent flow over a progressive water wave: theory and experiment in a transformed wave-following coordinate system. Part 2.....2754
On the relevance of two-dimensional turbulence to geophysical fluid motions.....6486
The mixing layer: An example of quasi two-dimensional turbulence.....6487
Finite amplitude evolution of mixing layers in the presence of solid boundaries.....6488
The prevalence of two-dimensional motion in the turbulent mixing layer.....6489
On the initial streakiness of a dispersing tracer in two- and three-dimensional turbulence.....8543
- 372-O Chemical reaction
- Velocity-pressure gradient correlation in reactive turbulent flows.....1681
Chemical reaction in turbulent fluids.....8544
Statistical analysis of the deviation of the Reynolds stress from its eddy-viscosity representation.....11627
- 372-P Intermittency & other flow structure
- Turbulent spots, wave packets, and growth.....719
Spatial periodicity of the mean static pressure gradient in turbulent pulsating flow.....720
Experiments on the turbulence statistics and the structure of a reciprocating oscillatory flow.....2755

Scaling of the bursting frequency in turbulent boundary layers.....	3896
A spanwise structure in the plane shear layer.....	3897
Visual observations on the amplification of artificial disturbances in turbulent shear flows.....	5126
Coherent structures - reality and myth.....	5127
Coherent structures within the plane turbulent jet.....	5128
Has a small-scale structure in turbulence been experimentally verified?.....	5129
A study of the spanwise structure of coherent eddies in the viscous wall region.....	5130
Small-scale structure of the Taylor-Green vortex.....	5131
The characteristics of low-speed streaks in the near-wall region of a turbulent boundary layer.....	5132
Development of spot-like turbulence in plane channel flow.....	7490
Turbulence structure in thermal convection and shear-free boundary layers.....	7491
Natural large-scale structures in the axisymmetric mixing layer.....	7492
The structure of the large eddies in fully developed turbulent shear flows. Part 2. The plane wake.....	7493
Intermittence and structure of the transitional boundary layer at a plate using a laser anemometer.....	7494
Prediction of the intermittency factor for turbulent shear flows.....	9550
The evolution of a flat eddy near a wall in an inviscid shear flow.....	10679
Flow distribution and pressure drop for parallel flow through rod bundles.....	10680
Separability into coherent and chaotic time dependences of turbulent fluctuations.....	11628
Coherent structures in the similarity region of two-dimensional turbulent jets.....	12652
Statistical properties of bursts of turbulent fluctuations.....	12653

372-Q Modeling

Constraints on the invariant functions of axisymmetric turbulence.....	721
Reynolds stresses for unsteady turbulent flows.....	722
Turbulence modeling for computational aerodynamics.....	723
The turbulence problem: A survey.....	1672
Multiple scale concept in turbulence modelling. II. Reynolds stresses and turbulent fluxes of a passive scalar, algebraic modelling and simplified model using Boussinesq hypothesis.....	1682
Turbulence modeling.....	2746
A statistically-derived subgrid model for the large-eddy simulation of turbulence.....	2756
Deterministic and stochastic aspects of turbulence.....	2757
Kinematics of velocity and vorticity correlations in turbulent flow.....	2758
Variational approach to the closure problem of turbulence theory.....	2759
Viscosity renormalization based on direct-interaction closure.....	2760
Asymptotic near-wall stress dissipation rates in a turbulent flow.....	2761
The relation between Markov process theory and Kolmogoroff's theory of turbulence and the extension of Kolmogoroff's laws. I. An analysis of the relation between the two theories.....	2762
Microscales and correlation tensors in the viscous turbulent sublayer.....	3898
Equilibrium statistics of two-dimensional viscous flows with arbitrary random forcing.....	5133
The stochastic, one-dimensional inertial equation, the inviscid Burger's model, and the surface intersection problem.....	5134
Turbulence: space-time statistical properties and behavior in supersonic flows.....	5135
Multiple scale concept in turbulence modelling. I. Multiple-scale model for turbulence kinetic energy and mean square of passive scalar fluctuations.....	5136
Hamiltonian vortex models in the theory of turbulence.....	5137
The turbulence problem: A survey.....	6490
Moment equation in the kinetic theory of turbulent flows.....	6491
A mathematical model of turbulence in flows with uniform stationary velocity gradients.....	7495
One mathematical model of turbulent liquid flow.....	7496

Active modeling of large-scale turbulence.....	9621
Steady solution of forced Burgers equation.....	10681
The mixing layer: deterministic models of a turbulent flow. Part 3. The effect of plane strain on the dynamics of streamwise vortices.....	12654
On the scaling of the turbulence energy dissipation rate.....	12655

372-Y Computational techniques

Technical improvements for direct numerical simulation of homogeneous three-dimensional turbulence.....	724
The relation between the Markov process theory and Kolmogoroff's theory of turbulence and the extension of Kolmogoroff's laws. II. The extension of Kolmogoroff's "2/3 law" and "-5/3 law".....	725
Use of single-point velocity probability distributions in describing turbulent flows.....	726
Large-eddy simulation: retrospect and prospect.....	1683
The calculation of turbulent flow in wide-angle diffusers.....	2763
Tests of subgrid models in the near-wall region using represented velocity fields.....	3899
Parametrisation of virtual scale in numerical simulation of two-dimensional turbulent flows.....	6492
Similarity solutions of free shear flows with mean Reynolds stress turbulence models.....	7497
Local similarity co-ordinates for parallel and almost parallel turbulent shear flows.....	8545
Computational methods for turbulent, transonic, and viscous flows (Book).....	11629
Ergodicity and mixing in four-mode spectral models of two-dimensional turbulence.....	11630
On the finite-element calculation of turbulent flow using the k- model.....	11631
A practical method of two-equation turbulence modelling using finite elements.....	11632
Numerical simulation of particle behavior in a turbulent flow.....	11633
Numerical simulation of turbulence on mini-systems with attached processors (in mono or multiprocessor configuration).....	11634

372-Z Experimental techniques

An examination of hot-wire length corrections.....	727
The effect of the thermal prong-wire interaction on the response of a cold wire in gaseous flows (air, argon and helium).....	1684
A digital technique for the simultaneous measurement of streamwise and lateral velocities in turbulent flows.....	3900
Maximum likelihood estimation of turbulence spectrum parameters.....	5138
Effect of the separation between cold wires on the spatial derivatives of temperature in a turbulent flow.....	5139
Effects of imperfect spatial resolution on measurements of wall-bounded turbulent shear flows.....	7498
Zero-crossings in turbulent signals.....	7499
Influence of red blood cell concentrations on the measurement of turbulence using hot-film anemometer.....	8546
On the detection of turbulence-generating events.....	10682
The spectrum of turbulence.....	10683
Study of turbulent structure with hot wires smaller than the viscous length.....	11635
The application of laser-induced Rayleigh light scattering to the study of turbulent mixing.....	12656

374 Electromagneto fluid and plasma dynamics

374-B Continuum theory

Some mathematical questions related to the MHD equations.....	3901
Radiation processes in two phase plasma jet.....	6493
The dynamics of two-dimensional ideal MHD.....	6494

- The growth of a magnetic field in a three-dimensional steady incompressible flow.....6495
 Determination of the constitutive equations for a magnetic fluid.....7500
 The classification of orthogonal electromagnetofluid-dynamic flows.....9551
- 374-C Plasma theory**
- Heat transfer in a MHD flow between eccentric disks rotating at different speeds.....728
 Dissipation of MHD waves in an inhomogeneous streaming plasma.....729
 Numerical modeling of an explosion plasma generator, taking into account radiative energy transport and evaporation of the walls.....1685
 Galerkin approximations for the one-dimensional Vlasov-Poisson equation.....3902
 Electrical and thermal structure of the argon arc of a two-jet plasmatron.....7501
 Heating and breakdown of protective layer at plasma retaining wall.....7502
 Theoretical study of electron concentration distribution in positive column glow discharge with longitudinal gas stream.....7503
 Calculation of the radiative and gasdynamic processes in a capillary discharge that vaporizes the wall.....7504
- 374-D Flow in magnetic fields**
- Finite difference analysis of MHD free-convection flow past an accelerated vertical porous plate.....730
 On the magnetohydrodynamic flow between eccentrically rotating disks.....731
 Nonlinear self-excited oscillations in MHD flows.....732
 Interaction of a turbulent conducting vortex with a magnetic field.....733
 Steady constantly-inclined MHD flow.....1686
 Free convection and mass transfer flow through a porous medium under the action of a magnetic field..1687
 Interaction of finely dispersed particles with the column of a constricted arc.....1688
 Martin's method applied to variably-inclined plane viscous MHD flows.....1689
 Boundary conditions for a rapidly rotating hydromagnetic system in a cylindrical container.....2764
 The macroscopic magnetohydrodynamics of inhomogeneously turbulent cosmic plasmas.....2765
 On the nonlinear stability of flow of a conducting fluid past a porous flat plate in a transverse magnetic field.....2766
 Azimuthal rotation in the axisymmetric meridional flow due to an electric-current source.....2767
 Flows of magnetizable fluid with a bounded free surface.....2768
 Instability of horizontal fluid interface in a perpendicular electric field: Observational study...2769
 Numerical solution of an electrically conducting viscous incompressible fluid.....2770
 On the pressure balance and plasma transport in cylindrical magnetized arcs.....3903
 An approximate analytical solution of the self-similar flow with frozen-in magnetic field, I.....5140
 Unsteady magnetohydrodynamic Couette flow.....5141
 MHD flow near an asymmetric plane stagnation point...5142
 Steady Couette flow in a strong external field.....6496
 Magnetohydrodynamics of laminar flow in slowly varying tubes in an axial magnetic field.....6497
 A note on the analytical treatment in ferrohydrodynamics.....6498
 Two-component plasma with particles in a magnetic field.....6499
 Flow of a thin layer of liquid covered by a film of magnetizable material.....6500
 Effect of a constant magnetic field on setting a magnetic liquid into motion with a traveling magnetic field.....6501
 A rotating flow in a longitudinal magnetic field.....6502
 MHD free convection flow past an accelerated vertical plate.....7505
 Effect of temperature on the dynamics of electrorheological suspensions.....7506
 Magnetohydrodynamic model of capillary discharge from evaporating wall.....8547
- Two-dimensional aligned-field magnetofluiddynamic flow. Part I: Steady incompressible flow with non-zero charge density.....9552
 Magnetic field generation in an anisotropically conducting fluid.....9553
dynamics and Taylor's constraint.....9554
 Local analysis of thermal and magnetic instabilities in a rapidly rotating fluid.....9555
 A comparative analysis of kinematic dynamo models using perturbation theory.....9556
 Asymptotic solution of the -dynamo problem.....9557
 Liquid-metal flow in a rectangular duct with a strong non-uniform magnetic field.....10684
 Equilibria of field-reversed configuration with subsidiary coils.....10685
 Semi-ellipse theorem for the heterogeneous swirling flow in an azimuthal magnetic field with respect to axisymmetric disturbances.....11636
 Some solutions for finitely conducting viscous MHD plane flows.....11637
 A numerical investigation of magnetic field generation in a flow with chaotic streamlines.....12657
 The Magneto-Boussinesq approximation by scale analysis.....12658
 Semicycle theorem for the rotating flow in an azimuthal magnetic field with respect to azimuthal perturbations.....12659
 Modes of generalized MHD Couette flow.....12660
- 374-E Flow in electric fields**
- Flow of a stream containing charged inertial particles past a conducting sphere.....734
 Role of hydrodynamic interaction of dispersed particles in structuration processes in alternating electric field.....1690
 Stabilization of bubble-liquid processes by an electric field.....1691
 Flow of electrically charged aerosols past bodies.....1692
 Electrohydrodynamics of two-phase media with particles of the dispersed phase charged by an electric field.....1693
 Qualitative analysis of electro-hydrodynamic characteristics of weakly conducting fluids.....2771
 The primary electroviscous effect in a suspension of spheres with thin double layers.....3904
 Investigation of a plane high-current discharge in air.....5143
 Use of an electric field to keep bubbles and drops in a given shape and position in a liquid dielectric.....7507
 A finite element model for temperature induced electrohydrodynamic pumping in horizontal pipes.....7508
 Charging of a low-conductivity liquid flowing through a cylindrical pipe with allowance for the finite rate of a surface electrochemical reaction...8548
 Electric characteristics of a probe in a subsonic plasma flow.....8549
 A new type of electrohydrodynamic instability in nematic liquid crystals with positive dielectric anisotropy. I. The existence of the charge injection and the diffusion current.....10686
 A new type of electrohydrodynamic instability in nematic liquid crystals with positive dielectric anisotropy. II. Theoretical treatment.....10687
 The stability of natural convection in a vertical layer of dielectric fluid in the presence of a horizontal ac electric field.....12661
 An experimental investigation of EGD flow of gas in a corona discharge and its influence on the motion of dispersed particles.....12662
- 374-F Waves**
- Anisotropic surface waves on a viscous liquid under uniform magnetic and current fields.....735
 Excitation of finite-amplitude waves on the surface of a perfectly conducting liquid by a varying magnetic field.....1694
 Interaction of a converging cylindrical shock wave with a transverse magnetic field for large magnetic Reynolds numbers.....1695
 Nonlinear effects on dissipative MHD modes.....2772

Parametric excitation of Alfvén waves in a dissipative plasma.....	2773
Structure of waves in a time dependent hydromagnetic plane Couette flow.....	3905
Nonlinear electrohydrodynamic Rayleigh-Taylor instability. Part I. A perpendicular field in the absence of surface charges.....	5144
Propagation of strong and intensely-radiating shock waves in helium of normal density.....	5145
Investigation of the radiation of strong shock waves in inert gases over a broad spectral range.....	5146
Self-similar strong magnetohydrodynamic spherical shock waves in rotating atmosphere.....	6503
Magnetohydrodynamic flow between torsionally oscillating eccentric disks.....	7509
Steady magnetic waves.....	7510
Simple electrohydrodynamic waves.....	7511
Hydrodynamic effects in water media in electric and magnetic fields.....	7512
Ion acoustic soliton in plasma with negative ion.....	8550
Wave absorption near the electron cyclotron frequency in anisotropic Maxwellian plasma.....	8551
Linear and nonlinear waves in liquid dielectrics.....	8552
Slow hydromagnetic oscillations in a rotating spheroidal shell.....	9558
Hydromagnetic waves in a differentially rotating annulus I. A test of local stability analysis.....	9559
Self-organization in dissipative plasmas.....	10688
The effect of a magnetic field on the modulational instability of capillary-gravity waves.....	11638
Solitary and cnoidal waves in ferrofluid.....	11639
Two problems of unsteady motion of a conducting fluid with a free boundary in an alternating magnetic field.....	11640
Three-wave interactions in a warm plasma.....	11641
Alfvén waves in a thermally stratified fluid.....	12663
Electro-magneto-thermo-elastic plane waves in rotating media with thermal relaxation.....	12664
Turbulent jet of electricity conducting liquid in a strong longitudinal magnetic field.....	12665

374-G Instabilities

Nonlinear electrohydrodynamic Rayleigh-Taylor instability. II. A perpendicular field producing surface charge.....	736
Electrohydrodynamic stability of an insulating liquid lying between two concentric spheres and subjected to a weak unipolar injection.....	737
Free convection in hydromagnetic flows in a vertical wavy channel.....	738
The stabilizing role of differential rotation on hydromagnetic waves.....	1696
Hydromagnetic waves in a differentially rotating sphere.....	1697
Stability of convection rolls in the presence of a horizontal magnetic field.....	1698
Stability of a system of current-carrying jets with currents alternating in direction.....	1699
The stability analysis of a magnetohydrodynamic channel flow with anisotropic conductivity.....	2774
Effect of finite conductivity on the inviscid stability of an interface submitted to a high-frequency magnetic field.....	2775
Plasmas in particle accelerators: A hydrodynamic model of three-dimensional electrostatic instabilities.....	3906
Viscous, resistive magnetohydrodynamic stability computed by spectral techniques.....	3907
Temperature-gradient-driven electrohydrodynamic instability with unipolar injection in air.....	3908
Helmholtz instability in stratified shear flows with magnetic fields.....	5147
Instability of a magnetic liquid in a rotating field.....	6504
Reynolds' problem and stability in MHD.....	6505
Stationary instability in an axisymmetric flow excited by a rotating high-frequency magnetic field.....	6506
One-dimensional stability of combustion in a magnetic field.....	6507
Electrical anisotropic effects on thermal instability.....	7513
Generalized energy methods in electrohydrodynamic stability theory.....	7514

Stability of plane-parallel electrohydrodynamic flows in a longitudinal electric field.....	7515
The temperature and flow field of a free burning arc deflected by a transverse magnetic field.....	8553
Electrohydrodynamic stability of an insulating liquid lying between two concentric spheres and subjected to an arbitrary unipolar injection.....	8554
Rayleigh-Taylor instability of the interface between conducting and nonconducting fluids in an alternating magnetic field.....	8555
An energy method for the stability of solar magnetohydrostatic atmospheres.....	9560
On the stability of vortex motions in the presence of magnetic fields.....	10689
Thermodynamic stability of a suspension of magnetic needles.....	11642
Stability of equilibrium of a magnetic capillary fluid.....	11643
Stochastic self-excited oscillations of magnetohydrodynamic flow.....	11644
Stability of a rotating transverse axisymmetric flow in an axial magnetic field.....	12666
Effect of the Rayleigh-Taylor instability on the electromagnet interaction process of an electrically conducting fluid layer.....	12667

374-H Heat transfer aspects

Magnetohydrodynamic free convective effect for an incompressible viscous fluid past an infinite limiting surface.....	739
Heat and mass transfer of an oscillatory flow with Hall current, II.....	740
MHD free convection past a semi-infinite vertical plate with suction and injection.....	741
Oscillatory magnetohydrodynamic flow and heat transfer between conducting plates.....	1700
Hydromagnetic flow and heat transfer between two horizontal plates, the lower plate being a stretching sheet.....	1701
Heat transfer for MHD flow through a rectangular pipe with discontinuity in wall temperatures.....	2776
Magnetic-flux transport by a convecting layer - topological, geometrical and compressible phenomena.....	3909
MHD free-convection flow in the Stokes problem for a vertical porous plate in a rotating system.....	5148
Quasilinearized solution of axisymmetric hydromagnetic stagnation-point flow and heat transfer.....	6508
The effect of a magnetic field on the heat transfer characteristics of an air fluidized bed of ferromagnetic particles.....	6509
Coupled heat-transfer problem for a controlled laminar boundary layer in a magnetic field.....	6510
Heat transfer to dielectrics boiling in horizontal slots placed in electric fields.....	7516
MHD flow past a steadily moving infinite vertical porous plate with mass transfer and constant heat flux.....	8556
Nonlinear convection in an imposed horizontal magnetic field.....	9561
Heat transfer and temperature distributions in the initial thermal section of a flow of liquid metal in a longitudinal magnetic field.....	11645
MHD heat transfer in the flow between two coaxial cylinders.....	12668
MHD heat transfer in flow past a semiinfinite plate with oscillating plate temperature.....	12669

374-I Liquid metal flow

Motion of a fluid around a cylinder of any conductivity due to crossed magnetic and electric fields.....	742
Equilibrium of magnetic liquids, magnetostatic application.....	2777
Mercury-argon two-phase heat transfer in a vertical annulus under transverse magnetic field.....	2778
Local velocity and mass transfer measurements in molten metals using an incorporated magnet probe.....	2779

376-H Ship stability

- Pupov's frequency domain stability criteria and stability of large amplitude rolling motion.....2783
 Eventual stability of flooded ships.....8565
 Hull stability characteristics for single-screw cargo ships determined by regression analysis.....9567
 On the evaluation of the stability of fast ships in coupled yaw-sway-roll motion.....9568

376-I Ship propulsion

- On the efficiency of optimum finite amplitude sculling propulsion.....5157
 A new generation controllable pitch propeller.....5158
 Actuator disk in a two-dimensional non-uniform flow.....7524
 The autogyro for ship propulsion.....7525
 Fuel saving by asymmetric afterbodies for single-screw vessels.....8566
 Elements of hydrodynamic propulsion (Book).....12672

376-M Multibody interference

- Hydrodynamic interference between floating cylinders in oblique seas.....1703

376-N Hydrofoil fluid dynamics

- The breaking and non-breaking wave resistance of a two-dimensional hydrofoil.....746
 Study on the performance of two-dimensional hydrofoils in dilute polymer solutions.....10691
 The optimum shape of a hydrofoil giving maximum lift in steady two-dimensional partial cavitating flow.....12674
 The optimum shape of a noncavitating hydrofoil of maximum lift.....12675
 The optimum shape of a hydrofoil giving maximum lift in steady two-dimensional fully-cavitating flow.....12676

376-O Surface effect fluid dynamics

- The basic aerodynamics of floatation.....5159
 A method for predicting the flow around the stern of double ship hulls.....7526
 Supercritical planing hulls.....9569

376-P Submarine fluid dynamics

- Prediction of wave forces and moments on a near-surface submarine.....8567

376-Y Computational techniques

- Modelling boat wake loading on long floating structures.....5160
 Mathematical note on the fundamental solution (Kelvin source) in ship hydrodynamics.....8568

376-Z Experimental techniques

- Quantitative measurements with small models of ships in a circulating water channel.....5161

378 Aerodynamics

378-B Wings & airfoils

- The difference between a wing and a planing plate in two-dimensional flow.....747
 Unified unsteady supersonic hypersonic theory of flow past double wedge airfoils.....748
 Separated trailing-edge flow at a transonic Mach number.....749
 A flexible conical wing at supersonic speed with subsonic leading edges.....1704

- Two-dimensional apparent masses for cross-flow sections of wing-store configurations.....1705
 Calculation of potential flow about arbitrary three dimensional wings using internal singularity distributions.....1706
 Optimum design for potential flows.....1707
 Investigation of the influence of the transverse sweepback of delta wings on their vortex structures and aerodynamic characteristics in the case of flow separation at low subsonic velocities.....1708
 Wall influence on the aerodynamic characteristics of an oscillating airfoil.....1709
 Influence of leading-edge thrust on twisted and cambered wing design for supersonic cruise.....2784
 Computational treatment of three-dimensional transonic canard-wing interactions.....2785
 On the application of linearized theory to multi-element airfoils. Part I: Tandem flat plate airfoils.....2786
 A finite state aerodynamic model for a lifting surface in incompressible flow.....2787
 Low-frequency transonic flows past a thin airfoil.....2788
 Transonic effects on helicopter rotor blades.....2789
 Representation of airfoil behaviour.....2790
 The lift on an airfoil in starting flow.....3914
 Aerodynamic characteristics of π -shaped wings at subsonic flight speeds.....5162
 Generic approach to determine optimum aeroelastic characteristics for composite forward-swept-wing aircraft.....5163
 Numerical study of the turbulent flow past an airfoil with trailing edge separation.....5164
 Optimization of waverider configurations generated from axisymmetric conical flows.....5165
 Thickness and camber effects in slender wing theory.....5166
 Separation flows on a concave conical wing.....6519
 Curved lifting-line theory for thin planar wings.....6520
 Lateral aerodynamics of delta wings with leading-edge separation.....7527
 A nonlinear hybrid vortex method for wings at large angle of attack.....7528
 Treatment of supersonic configurations by an updated low-order panel method.....8569
 Computation of the flow around wings with rear separation.....8570
 Close-coupled canard-wing vortex interaction.....8571
 Benefits of dual wings over single wings for high-performance business airplanes.....8572
 A multi-grid method for transonic wing analysis and design.....8573
 Dynamic load measurements with delta wings undergoing self-induced roll oscillations.....8574
 One form of separated flow over a low-aspect-ratio rectangular wing.....8575
 Nonuniqueness of a solution of the problem of flow about a cone with an angle of attack.....8576
 Aerodynamics of wings in supersonic shear flow.....9570
 Thin airfoil theory for planar inviscid shear flow.....9571
 Vortex flow over delta and double-delta wings.....9572
 Correction to the wing source velocity error in Woodward's USSAERO Code.....9573
 Observations and implications of natural laminar flow on practical airplane surfaces.....9574
 Possibility of various airfoil shape modes and their steady state stability of single membrane sailing.....10692
 Nonlinear extreme ground effect on thin wings of arbitrary aspect ratio.....10693
 Compressibility correction for flow about wing surfaces.....11651
 Prediction of vortex lift on interacting delta wings in incompressible flow.....11652
 Development of controlled diffusion airfoils for multistage compressor application.....11653
 Modelling of an airfoil empirical flow field below and through dynamic stall.....11654
 Unsteady pressures and forces during transonic buffeting of a supercritical airfoil.....11655
 Measurements of ground effect for delta wings.....11656
 Aerodynamic properties of a two-dimensional inextensible flexible airfoil.....12677
 The Sears problem for a lifting airfoil revisited - new results.....12678
 Porous airfoils in transonic flow.....12679
 Prediction of pressure distribution C_p on a long rectangular wing in transonic-supersonic flow.....12680

378-C Lifting bodies

- Hypersonic slender-wedge analysis with gradual change in angle of attack.....750
 Space shuttle entry aerodynamic comparisons of Flight 1 with preflight predictions.....1710
 On boundary value problems for the domain exterior to a thin or slender region.....1711
 Aeroballistic characteristics of 3-ft-long parachute decelerators.....2791
 Experimental surface pressures on cone-derived waveriders for $M = 3-5$5167
 Turbulent flow over vehicles at angle of attack.....7529
 Aerodynamic calculation of normal hovering flight.....7530
 Numerical design of a shockless transonic quasi-aircraft.....8577
 The validity conditions in three-dimensional supersonic linear aerodynamics.....10694
 Progress towards a theory of jet-flap thrust recovery.....12681

378-D Wing body combinations

- Numerical calculation of nonlinear aerodynamics of wing-body configurations.....751
 Optimum wing sizing of a single-stage-to-orbit vehicle.....1712
 Finite difference computation of the aerodynamic interference of wing-pylon-store combinations at transonic speeds.....1713
 Elementy stochastycznej dynamiki szybowca (Elements of stochastic dynamics of gliders) (Book).....2792
 Aerodynamic characteristics for a slender missile with wrap-around fins.....2793
 On the conceptual design of supersonic cruising aircraft with subsonic wing leading edges.....2794
 Pressure distribution on a simple delta wing.....2795
 Slender body theory and optimization procedures for transonic lifting wing bodies.....8578
 Aerodynamic design optimization trim analysis of canard conventional configurations.....8579
 Aerodynamics of very slender rectangular wing bodies at high incidence.....8580
 Measured aerodynamic forces on three typical helicopter tail boom cross sections.....8581

378-E Control surfaces

- Leading edge vortex flap aerodynamics.....6521
 An exploratory study of area-efficient vortex flap concepts.....9575

378-F Highlift methods

- Selected results from the quiet short-haul research aircraft flight research program.....752
 Flat spin of slender bodies at high angles of attack.....1714
 Circulation controlled STOL wing optimization.....8582
 Development of advanced circulation control wing high-lift airfoils.....11657

378-G Lift & drag

- The aerodynamic characteristics at the mid-span of a circular cylinder with tangential blowing.....753
 Integrals of motion for the classical two-body problem with drag.....754
 Wind-tunnel study of an add-on streamlining bubble on the aerodynamics of utility box-trailers.....3915
 Influence of base slant on the wake structure and drag of road vehicles.....5168
 Lifting entry vehicle mass reduction through integrated thermostructural/trajectory design.....5169
 Maximal lift-drag ratio of wing-cone and wing-half-cone combinations at high supersonic velocities.....7531
 Turbulence effects on some aerodynamic parameters of a circular cylinder at supercritical Reynolds numbers.....9576
 Drag of wings with cambered airfoils and partial leading-edge suction.....9577
 Short, multi-step, afterbody fairings.....9578

- Supersonic missile aerodynamic and performance relationships for long-range mission profiles.....11658
 Profile drag from laser-Doppler velocimeter measurement.....11659

378-H Interference

- Recent improvements in prediction techniques for supersonic weapon separation.....2796
 Two-dimensional wind-tunnel interference from measurements on two contours.....11660

378-I Performance

- Accuracy criteria for evaluating supersonic missile aerodynamic coefficient predictions.....755
 Nonequilibrium viscous shock-layer flows over blunt sphere-cones at angle of attack.....756
 Aerodynamics of wraparound fins.....757
 Axisymmetric nose inlet effects on supersonic airloads.....758
 Plume/flowfield jet interaction effects on the Space Shuttle Orbiter during entry.....759
 Equivalent angle-of-attack method for estimating nonlinear aerodynamics of missile fins.....760
 The search for optimum configurations for re-entry vehicles.....8583
 Generalized maximum specific range performance.....9579
 Asymmetric flowfield development on a slender body at high incidence.....10695

378-J Flight path & trajectories

- Approximate analytical method of calculating the trajectories of an aircraft in the atmosphere.....8584
 Trajectories of flat plates in uniform flow with application to wind-generated missiles.....9580
 Approximation to the optimization of a coast-glide trajectory.....9581

378-K Stability & control

- Airplane model structure determination from flight data.....2797
 Development of the basic methods needed to predict the aeroelastic behavior of helicopters.....7532
 Free-flight and wind-tunnel data for a generic fighter configuration.....8585
 Flight dynamics of rotorcraft in steep high-g turns.....8586
 Aeroelasticity in the time domain.....9582
 Uses of parameter estimation in flight test.....9583
 A fundamental comparison of canard and conventional configurations.....9584
 Aerodynamic aspects of aircraft dynamics at high angles of attack.....9585
 Twenty-five years of handling qualities research.....9586
 An experimental investigation VTOL flying qualities requirements in shipboard landings.....11661
 Thrust vector control of a V/STOL airship.....11662
 A missile flight control system using boundary layer thrust vector control.....11663
 An analytical study of the induced drag of canard-wing-tail aircraft configurations with various levels of static stability.....11664

378-L Unsteady effects

- Aerodynamic theory for wing with side edge passing subsonically through a gust.....761
 An analytical and experimental study of the steady and unsteady airloads on a wing with oscillating control including a streamlined gap.....1716
 The two-dimensional oscillating airfoil: A new implementation of the Galerkin method.....1717
 An aeroacoustic model for high-speed, unsteady blade-vortex interaction.....3916
 A vortex-lattice method for calculating longitudinal dynamic stability derivatives of oscillating delta wings.....5170
 Cellular patterns in poststall flow over unswept wings.....5171

- Unsteady pressure on a cambered blade under periodic gusts (Comparison with the experiments).....6522
 A dynamic model for aircraft poststall departure.....8587
 Analytic extrapolation to full-scale aircraft dynamics.....8588
 Aerodynamic response of airfoils in sinusoidal oblique gust.....9587
 Shock-induced dynamic stall.....9588
 The fluid mechanics of slender wing rock.....9589
 Computations of unsteady transonic aerodynamics using prescribed steady pressures.....9590
 Improved numerical method for unsteady lifting surfaces in incompressible flow.....9591
 Unsteady Newton-Busemann flow theory—Part IV: Three dimensional.....9592
 Doublet-point method for supersonic unsteady lifting surfaces.....10696
 Practical computation of unsteady lift.....10697
 Trailing vortices in homogeneous and density-stratified media.....10698
 Parameter identification applied to the oscillatory motion of an airplane near stall.....11665
 On the convergence of unsteady generalized aerodynamic forces.....11666
 Transient ablation of blunt bodies at angles of attack.....11667
 A review of some recent research on time-dependent aerodynamics.....11668

378-M Aerodynamic loads

- Unsteady pressure on a cambered blade under periodic gust.....762
 Force and moment in incompressible flows.....763
 Aerodynamic penalties of heavy rain on landing airplanes.....1715
 Spin prediction techniques.....1718
 Determination of horizontal tail load and hinge moment characteristics from flight data.....2798
 Prediction of the aerodynamic loads on helicopter blades in hovering and axial flight using lifting-line theory.....6523
 Preliminary supersonic analysis methods including high angle of attack.....9593
 Apparent-mass coefficients for isosceles triangles and cross sections formed by two circles.....9594
 Aerodynamics of pointed forebodies at high angles of attack.....11669
 Unsteady aerodynamic forces by interference of two bluff bodies moving closely. (On unstable phenomenon of automobile running).....12682

378-N Icing

- Microscale ice accretion measurement instrument (MIAMI).....1719
 Icing analysis of an unprotected aircraft radome.....1720
 Numerical simulation of cable twisting due to icing.....8589
 Effect of geometry on airfoil icing characteristics.....11670

378-O Flight tests & instrumentation

- Atmospheric definition for shuttle aerothermodynamic investigations.....2799
 A technique to determine lift and drag polars in flight.....9595
 Comparison of shuttle orbiter surface pressures with wind tunnel and theoretical predictions.....11671

378-Y Computational techniques

- Method of fundamental solutions in plane steady linear aerodynamics.....764
 A superconvergence result for the generalized airfoil equation with application to the flap problem.....1721
 The evolution of computational methods in aerodynamics.....2800
 Note on the box method and the linear segment method in the integral equation of thin airfoil theory.....2801
 A vortex-lattice method in the linear theory on a

- two-dimensional supercavitating flat plate foil.....2802
 Lifting airfoil calculation using the boundary element method.....5172
 On the unsteady separated flow of a viscous fluid around an airfoil: a comparison between numerical and experimental results.....6524
 PAN AIR applications to aero-propulsion integration.....8590
 A method for predicting low-speed aerodynamic characteristics of transport aircraft.....8591
 Computations and aeroelastic applications of unsteady transonic aerodynamics about wings.....8592
 A natural interpolation formula for Prandtl's singular integrodifferential equation.....9596
 Wave drag prediction using a simplified supersonic area rule.....9597
 Numerical and physical aspects of aerodynamic flows II (Book).....10699
 An adaptive method to treat number-sequences occurring in lifting surface calculations.....10700
 Multiple-scale solution of weakly nonlinear elliptic equations on the upper half-plane.....10701
 The inverse problem for supersonic airfoils.....10702
 Computation of transonic flow around airfoils with trailing edge and shock/boundary layer interactions.....11672
 Application of computational aerodynamics to airplane design.....11673
 Engineering analysis of drooped leading-edge wings near stall.....11674

380 Machinery fluid dynamics

380-B Fundamentals

- Blade loss transient dynamic analysis of turbomachinery.....765
 Design and testing of a water tip jet propeller.....766
 Design of supercritical cascades with high solidity.....3917
 Blade boundary layer effect on turbine erosion and deposition.....5173
 Three-dimensional flowfield inside a low-speed axial flow compressor rotor.....5174
 Inlet flow distortion in turbomachinery: Comparison of theory and experiment in transonic fan stage.....5175
 Proceedings of the Seventh Conference on Fluid Machinery, Vol 1 and 2 (Book).....6525
 Self-exciting potential fluid flow, surrounded by inhomogeneities, near a circular grid of profiles.....6526
 Thermodynamics of hydraulic pumps and turbines.....7533
 Investigation of vortex-chamber aerodynamics.....7534
 Hydrodynamics of a vortex chamber with hyperbolic end covers.....7535
 Overall aerodynamic performance of an annular flat-plate airfoil cascade.....10703
 Measurements of the flow from a high-speed compressor rotor using a dual probe digital sampling (DPDS) technique.....11675
 A Navier-Stokes analysis of three-dimensional turbulent flows inside turbine blade rows at design and off-design conditions.....11676
 Calculation of three-dimensional, inviscid, rotational flow in axial turbine blade rows.....11677
 Matrix solution of compressible flow on S surface through a turbomachine blade row with splitter vanes or tandem blades.....11678
 An investigation of the flow characteristics and of losses in radial nozzle cascades.....11679
 Three-dimensional inviscid computation of an impeller flow.....11680
 Improved design of subcritical and supercritical cascades using complex characteristics and boundary-layer correction.....12683
 Review - Turbomachinery performance deterioration exposed to solid particulates environment.....12684
 Guidelines for efficiency scaling process of hydraulic turbomachines with different technical roughnesses of flow passages.....12685

380-C Unsteady flow & systems stability

- Numerical computation of phase separation in two fluid flow.....12686

380-D Turbines (gas & vapors)

- A transonic quasi-3D analysis for gas turbine engines including split-flow capability for turbobfans.....1722
- Influence coefficients of variable geometry free gas turbine engines.....2803
- Flow distributions and discharge coefficient effects for jet array impingement with initial crossflow....3919
- Effect of the aerodynamic connectedness between blades on the aerodynamic damping of their vibrations, and origin of cascade flutter.....3920
- A theory of the Wilson line for steam at low pressures.....5176
- Deposition results of a transpiration air-cooled turbine vane cascade in a contaminated gas stream...5177
- Gas turbine compressor interstage cooling using methanol.....5178
- Thermodynamic models for pipeline gas turbine diagnostics.....5179
- Heat transfer in high-temperature gas turbines.....5180
- Substructuring and wave propagation: An efficient technique for impeller dynamic analysis.....8593
- Effect of casing separations and tip leakage jets on turbine efficiency.....8594
- A three-dimensional model for the prediction of shock losses in compressor blade rows.....11681
- A streamline curvature method for calculating S stream surface flow.....11682
- Flow in a turbine cascade: Part 1 - Losses and leading-edge effects.....11683
- Flow in a turbine cascade: Part 2 - Measurement of flow trajectories by ethylene detection.....11684
- Optimization of the three-dimensional flow path in the scroll-nozzle system of a radial inflow turbine.....11685
- Three-dimensional flow measurements in a turbine scroll.....11686
- A critical approach to evaluation of working fluid mass and energy accumulation in volumes of the gas turbine engine flow section in calculation of nonsteady regimes.....12687
- Gas turbine engine condition diagnosis from models that reflect the dynamics of variation of controlled parameters.....12688
- Rational application of microturbines with working fluid readmission.....12689

380-E Turbines (hydraulic)

- Visualization of unsteady flows in compressors and pumps.....2804
- Unsteady three-dimensional turbine aerodynamics.....3921
- The hydraulic characteristics of a two-stage water turbine.....6527
- The influence of guide apparatus adjustment on the dynamic state of pump/turbine and motor/generator arrangements.....7536
- Novel simplified designs of water turbines and results of their investigations.....7537
- Application of the method of singular points to the design of turbine working parts.....7538
- The development of high power hydraulic turbomachines.....9598
- Rotating water table for the determination of non-steady forces in a turbine stage through modified hydraulic analogy.....11687

380-F Propellers in liquids

- Compressible helicoidal surface theory for propeller aerodynamics and noise.....767
- An ideal wave propeller.....7539

380-G Cavitation effects

- Vibratory cavitation tests at elevated temperature....2805
- Cavitation erosion incubation period.....3918
- Collapse of a cavitating vortex ring.....5181
- Cavitation and polyphase flow forum - 1982, presented at the AIChE/ASME 3rd Joint Thermophysics, Fluids, Plasma, and Heat Transfer Conference, June 7-11, 1982, St. Louis, MO (Book)...6528

- Effect of entrained air on peak pressures and cavitation in a linear hydraulic system.....7540
- Cavitation diagnostics in diagonal pumps.....7541
- Comparative investigation of cavitating flows.....7542
- Profile sensitivity to cavitation and prediction of this phenomenon for guide wheels of reversible machines.....7543
- Cavitation phenomena within regions of flow separation.....9599
- A study of the measurement of cavitation inception using an electrostatic technique.....9600
- Diagnostics of cavitation in the hydraulic machinery..9601
- Correlation of cavitating centrifugal pumps.....12690
- Cavitation limit in liquid flow through contractions.12691

380-H Centrifugal fans, pumps, & compressors

- Design of three element hydrokinetic torque converters.....768
- Studies on the vortex pump. (1st Report, Internal flow), (2nd Report, Pump performance).....1723
- Remarks on the control of large turbo-compressors.....1724
- A solution to inverse problem of quasi three-dimensional flow in centrifugal impeller.....2806
- A new method for calculating the Busemann head coefficients for radial impellers.....3922
- The effect of inlet distortion on the performance characteristics of a centrifugal compressor.....3923
- The influence of tip clearance, stage loading, and wall roughness on compressor casing boundary layer development.....3924
- Simulation of centrifugal compressor transient performance for process plant applications.....5182
- On the transient interaction of centrifugal compressors and their piping systems.....5183
- Aerodynamic tests on centrifugal process compressors - the influence of the vaneless diffuser shape.....5184
- Aerodynamic tests on centrifugal process compressors - Influence of diffuser diameter ratio, axial stage pitch, and impeller cutback.....5185
- A new look at performance analysis of centrifugal compressors operating with mixed hydrocarbon gases..5186
- Transonic compressor development for large industrial gas turbines.....5187
- Effect of impeller-extended shrouds on centrifugal compressor performance as a function of specific speed.....5188
- Aerodynamic damping measurements in a transonic compressor.....5189
- On the flow in the impeller of centrifugal compressor with inducer.....6529
- A possible model of pump's dynamic work.....7544
- Operation of the balance disk in a multistage pump.....7545
- Current concepts in centrifugal pump hydraulic design.....8595
- An experimental study of wear of centrifugal pumps and pipeline components.....11688
- Interaction of upstream flow distortions with high-Mach-number cascades.....11689
- Distinction between different types of impeller and diffuser rotating stall in a centrifugal compressor with vaneless diffuser.....11690
- On the evaluation of Reynolds number and relative surface roughness effects on centrifugal compressor performance based on systematic experimental investigations.....11691

380-I Axial fans, pumps, & compressors

- Shock waves ahead of a fan with nonuniform blades.....769
- Method of calculating optimum angular blade pitches in fan with unequally pitched blades.....1725
- Response of a multistage compressor to circumferential distortions.....1726
- Prediction of the surge line of axial multistage compressor.....1727
- Non-uniform flows in axial compressors due to tip clearance variation.....2807
- Throughflow analysis of axial flow turbines.....2808
- Effects of entrained air on the performance of a horizontal axial-flow pump.....5190
- The calculation of deviation angle in axial-flow compressor cascades.....5191

- Investigation of mixing in a turbofan exhaust duct, Part I: Analysis and computational procedure.....7546
 The influence of volume concentration of fly ash in water on the working parameters of a torque-flow pump.....7547
 Effects of compressor hub treatment on stator stall and pressure rise.....11692
 Redesign and performance analysis of a transonic axial compressor stator and equivalent plane cascades with subsonic controlled diffusion blades.....11693
 A theory of rotating stall of multistage axial compressors: Part I - Small disturbances.....11694
 A theory of rotating stall of multistage axial compressors: Part II - Finite disturbances.....11695
 A theory of rotating stall of multistage axial compressors: Part III - Limit cycles.....11696
 Wall boundary layer development near the tip region of an IGV of an axial flow compressor.....11697
 Theory of blade design for large deflections: Part I - Two-dimensional cascade.....11698
 Theory of blade design for large deflections: Part II - Annular cascades.....11699
 Performance evaluation of centrifugal compressor impellers using three-dimensional viscous flow calculations.....11700
 The calculation of multi-stage axial compressor characteristics.....12692
 Aspects of the appearance and elimination of breakdown in an axial-flow compressor in the presence of a rotating nonuniformity at the inlet..12693
- 380-J Compressibility effects
- A theoretical investigation of transonic flows in radial compressor diffusers.....5192
 Compressibility of transonic flows at thick trailing edge in turbine blade row.....7548
- 380-K Mixed flow fans, pumps, & compressors
- A study on internal flow and performance of a vortex pump. Part 1. Theoretical analysis.....770
 A study on internal flow and performance of a vortex pump. Part 2. A comparison between analyses and experimental results, and a design method of pump.....771
 Studies on the vortex pump. (3rd Report, Estimation of pump performance).....772
 Studies on the vortex pump. (4th Report, Cavitation characteristics).....773
 Influence of clearance volume on the performance of the rolling piston type rotary compressor.....774
 Pressure distribution in a centrifugal impeller handling air-water mixtures.....2809
- 380-L Rotor & inducer blading
- A design calculation procedure for shock-free or strong passage shock turbomachinery cascades.....3925
 The effect of rotor blade thickness and surface finish on the performance of a small axial flow turbine.....3926
 Calculation of the blade profile for a hydraulic machine.....7549
 Aerodynamic loss penalty produced by film cooling transonic turbine blades.....8596
 Analysis of film cooling and full-coverage film cooling of gas turbine blades.....8597
 Experimental cascade analysis of a transonic compressor rotor blade section.....11701
 A rapid blade-to-blade solution for use in turbomachinery design.....11702
 Modifications of the Ives-Luitermoza conformal-mapping procedure for turbomachinery cascades.....11703
- 380-M Stator vanes, inlet guide vanes, & diffuser vanes
- Development of a radial diffuser with boundary layer control.....6530
 An experimental investigation of endwall heat transfer and aerodynamics in a linear vane cascade..8598
- Suppression of the deposition of nucleated fog droplets on steam turbine stator blades by blade heating.....8599
 Experimental study of centrifugal impeller discharge flow in vaneless and vaned diffusers.....11704
 Determination of total pressure losses in stepped annular diffusers with straight outer walls and uniform velocity field at the inlet.....12694
- 380-N Jet pumps & compressors
- Investigation of air driven ejectors at elevated temperatures.....2810
 Fluidic jet-type rectifier: experimental study of generated output pressure.....11705
- 380-O Wave machines
- Application of Riemann problem solvers to wave machine design.....12695
- 380-P Positive displacement machines
- The effects of non-flatness on the performance of sliders in axial piston pumps.....8600
 Coal-fired Stirling engines for railway locomotive and stationary power applications.....8601

 Efficient method for calculating the axial velocities induced along rotating blades by trailing helical vortices.....11706

380-Y Computational techniques

- Angled jet flow model for a Diesel engine intake process - Random vortex method.....775
 A mixed-flow cascade passage design procedure based on a power series expansion.....3927
 A computational geometry for the blades and internal flow channels of centrifugal compressors.....3928
 An improved time-marching method for turbomachinery flow calculation.....5196
 A quasi-three-dimensional finite element solution for steady compressible flow through turbomachines.....5197
 Comparison of two- and three-dimensional flow computations with laser anemometer measurements in a transonic compressor rotor.....5198
 Mathematical aspect of the stream-function equations of compressible turbomachinery flows and their finite element approximations using optimal control.....6535
 Numerical analysis of 3-D potential flow in centrifugal turbomachines.....6536
 Two-dimensional method of determining theoretical characteristics of hydraulic rotodynamic machines.....7550
 A finite volume method for two-dimensional transonic potential flow through turbomachinery blade rows.....8603
 Automated study of aerodynamic contour specification discrete error.....12697

380-Z Experimental techniques

- Turbine flowmeter for the measurement of low flowrates.....3929
 The use of coloured smoke to visualize secondary flows in a turbine-blade cascade.....5199
 Velocity measurements in a confined swirl driven recirculating flow.....5200
 Holographic vibration measurement of a rotating fluttering fan.....10707

382 Lubrication

382-B Boundary lubrication

- Mathematical models of externally pressurized hybrid bearings.....1734
 Heat generated in a viscoelastic fluid by Couette flow in the presence of porous walls.....1735
 An automotive piston lubrication model.....2812
 Characterization of boundary layers formed by different metal dithiophosphates in a four-ball machine.....2813
 Frictional losses of a finite-length cylinder rotating in a closed casing.....2814
 Load enhancement effects by polymer-thickened oils in strip squeeze film flow.....7551
 The significance of load and rubbing time in the four-ball lubricant test.....8604
 Behaviour of fibre brushes under transient atmospheric conditions.....8605
 Adsorption and lubricity of oils (Survey).....10708
 Radical processes during friction in esters.....10709
 Tests on sintered bearings with reduced oil contents.....12698
 Study of oil film screening action in friction pairs.....12699
 Influence of contacting metal ions on the selective transfer process.....12700

382-C Hydrodynamic & hydrostatic lubrication

- An evaluation of starting-load capacity and static friction in babbitt-lined hydrodynamic journal bearings.....776
 How the Reynolds equation is related to the Stokes equations.....777
 Fluid inertia effects on the characteristics of spherical hydrostatic bearings. (Part 1. Bearing forces).....778
 Fluid inertia effects on the characteristics of spherical hydrostatic bearings (Part 2. Stability).....779
 Hydrodynamic lubrication of finite slider bearings: Effect of one dimensional film shape, and their computer aided optimum designs.....780

- Hydrodynamic sector bearings as circular saw guides.....781
 Partial lubrication of full cylindrical bearings.....782
 Roughness effects in porous circular squeeze-plates with arbitrary wall thickness.....783
 Dynamic analysis of rupture in thin fluid films. I - A noninertial theory.....784
 Theoretical effects of rigid particle additives in noncyclic squeeze films.....785
 Analysis of externally pressurized, double-pad, gas porous thrust bearing.....786
 The effect of two sided surface roughness on ultra-thin gas films.....787
 Static characteristics of aerostatic porous rectangular thrust bearings with offset load.....788
 Characteristics of squeeze air film between nonparallel plates.....789
 Two-dimensional finite difference solution for externally pressurized journal bearings of finite length.....790
 Formulating the problem of contact-hydrodynamic lubrication theory.....791
 Dynamics of interaction between a squeezed layer of viscous incompressible fluid and elastic walls.....1736
 The analysis of a pivoted porous slider bearing with a convex pad surface.....1737
 Hydrodynamic instability of self-acting journal bearings of finite length in the turbulent regime.....1738
 Hybrid operation of position-sensing hydrostatic journal bearings.....1739
 Eccentric operation of conical hydrostatic thrust bearings.....1740
 Analysis by the finite element method of hydrodynamic bearings operating in the laminar and superlaminar regimes.....1741
 The significance of the effective viscosity in nonstationary loaded journal bearings.....1742
 Determination of the boundary of a hydrodynamic contact region.....1743
 Analysis of a free boundary problem in partial lubrication.....1744
 A numerical technique in the hydrodynamic theory of foil bearings.....1745
 Variable speed coating with purely viscous non-Newtonian fluids.....1746
 Static and dynamic analysis of hydrodynamic bearings in laminar and superlaminar flow regimes by finite element method.....2815
 Non-parallel operation of conical hydrostatic thrust bearings.....2816
 Adiabatic solution of a tilted hydrostatic thrust bearing.....2817
 Hydrodynamic lubrication of a porous slider bearing with slip velocity.....2818
 Analysis of misaligned journal bearings with axial and spiral feeding.....2819
 Squeeze effects in misaligned radial face seals with coning.....2820
 Performance characteristics of a centrally loaded 120 partial journal bearing using pseudoplastic lubricants.....2821
 Effect of lubricant additives on finite step bearings.....2822
 Comprehensive design data for centrally loaded partial bearings in laminar and turbulent regimes.....2823
 The influence of fluid inertia in steady laminar lubrication.....2824
 The thermal behavior of oscillating squeeze films.....2825
 A look into the Reynolds' lubrication equation.....2826
 Stochastic analysis of a compressible gas lubrication slider bearing problem.....3930
 Development of limit state design of metallic building structures.....3931
 Dynamically loaded rough journal bearings.....3932
 Variable-area orifices in the compensation circuit for circular step ring groove thrust bearings.....3933
 Effect of velocity slip on the performance of aerostatic porous thrust bearings with uniform film thickness.....3934
 Inertia effects in a conical porous bearing with a viscoelastic lubricant.....3935
 Dynamic analysis of a hydrodynamic seal with helical grooves.....3936
 Graphical design procedures for slot entry hybrid gas journal bearings.....3937
 Analysis of externally pressurized gas-lubricated conical bearings.....3938

- Consideration of viscosity variation in determining the performance characteristics of circular bearings in the laminar and turbulent regimes.....3939
- Externally pressurized magnetohydrodynamic bearings under a non-uniform magnetic field.....3940
- Exact mathematical analysis for the determination of performance characteristics of thin partial porous metal bearings of infinite length.....3941
- Influence of secondary restriction on dynamic characteristics of radial gas bearings.....3942
- Theoretical analysis of the dynamic stiffness of conical hydrostatic thrust bearings under tilt, eccentricity and rotation.....5201
- Unsteady flow between rectangular plates and between circular plates.....5202
- An investigation into the effect of side-plate clearance in an uncentralized squeeze film damper...5203
- Load carrying efficiency of floating ring journal bearings.....5204
- Investigation of the effects of initial fluid film profile on pumping ring operation.....5205
- On isothermal squeeze films.....5206
- Centrifugal effects in misaligned hydrostatic thrust bearings.....5207
- Depletion and retention of fluid on a rotating disk...5208
- An experimental investigation of the stability of externally pressurized gas-lubricated porous thrust bearings.....5209
- Analysis of gas-lubricated foil journal bearings.....5210
- Analysis of externally pressurized spherical bearings lubricated with non-Newtonian fluids.....5211
- Thermal and inertia effects in externally pressurized spherical bearings lubricated with non-Newtonian fluids.....5212
- Theoretical study of the effects of solid particles in the lubricant of externally pressurized porous thrust bearings.....5213
- Cyclic squeeze in tapered land aerostatic journal bearings.....5214
- Non-Newtonian power law fluid lubrication of lightly loaded cylinders with normal and rolling motion...5215
- The effect of inlet film boundary conditions on the steady state characteristics of hydrodynamic journal bearings.....5216

- 382-N Gear lubrication**
- Transient elastohydrodynamic lubrication of involute spur gears under isothermal conditions.....12738
- 382-Y Computational techniques**
- Numerical methods for calculating pressure distribution in gas bearings.....794
 Finite element analysis of elliptical bearings lubricated by a non-Newtonian fluid.....2834
 Elasto-hydrodynamic lubrication: A non-linear complementarity problem.....11708
- 382-Z Experimental techniques**
- Technique for experimental evaluation of piston ring—Cylinder film thickness.....5272
 A new experimental technique for the study of the surface reactions of extreme pressure additives at elevated temperatures.....8623
 Mechanochemical processes accompanying metal dispersion in media containing polyisobutylene and oleic acid.....8624
- 384 Flow measurements and visualization**
- 384-B Velocity**
- Seven-hole cone probes for high angle flow measurement: Theory and calibration.....795
 Application of a three-sensor hot-wire probe for incompressible flow.....1752
 A two-component optomechanical speed transducer for use with turbulent flows of liquid metal.....2835
 Modified calibration technique of a five-hole probe for high flow angles.....5273
 A flying hot-wire system.....5274
 Instantaneous two-directional velocity measurement by sensitive pressure detecting method.....6544
 Theory of the electrochemical method for velocity measurement.....8625
- Flow and temperature profile independence of flow measurements using long acoustic waves.....9609
 Measurement of velocity vector in gas stream.....10719
 A guide to uncertainty analysis of hot-wire data.....12739
 Influence of induction swirl and piston configuration on air flow in a four-stroke model engine.....12740
 Hot-film measurements in a water tunnel.....12741
- 384-D Force & skin friction**
- A nonintrusive laser interferometer method for measurement of skin friction.....5275
 Calibration of a heat flux gage for skin friction measurement.....5276
 A note concerning the use of a one-component LDA to measure shear stress terms.....5277
 The base balance technique for the determination of dynamic wind loads.....9610
 A laser interferometer for measuring skin friction in three-dimensional flows.....9611
 Skin friction measurements with hot-element gages.....11709
 A method for measuring skin friction drag on a flat plate in contaminated gas flows.....11710
- 384-E Pressure**
- On the sensitive and wide frequency range measurement of pressure.....1753
 A method for an accurate determination of the wall pressure in fluid flows.....1754
 Sensing characteristics and flow instability of annular jet proximity sensor.....9612
 A detailed design method for pneumatic tubing systems.....9613
 A digital system for the measurement of wind effects on large structures.....9614
 Tubing systems for pneumatic averaging of fluctuating pressures.....9615
 Measurement and analysis of high-frequency pressure oscillations in solid rocket motors.....11711
 The pressure-hole problem.....11712
- 384-F Density**
- Axisymmetric density field measurements by Moiré deflectometry.....5278
 Possibility of using holographic interferometry for study of mass-transfer processes.....9616
- 384-H Mass flow**
- An examination of the pulsed-neutron activation technique for fluid flow measurements.....6545
 Features of the measurement of micro-rates of flow of liquid metals with thermoelectric transducers.....9617
 Measurement of unsteady gas flow under anisothermal conditions.....10720
- 384-J Flow direction**
- Airfoil probe for angle-of-attack measurement.....8626
- 384-K Tracer techniques**
- Measurement of flow in large pipes by the pulsed neutron activation method.....796
 Two-dimensional fluid-velocity measurements by use of digital-speckle correlation techniques.....11713
- 384-L Flow visualization**
- Mechanisms of inlet-vortex formation.....797
 Experimental comparison of heat transfer data with flow visualization on a flat surface in an air fluidized bed.....5279
 Numerical processing of flow-visualization pictures — measurement of two-dimensional vortex flow.....5280
 Flow field measurement by tracer photography.....5281

- White-light speckle method for obtaining an equilibrium velocity map of a whole flow field.....5282
 The "heatline" visualization of convective heat transfer.....5283
 Direct velocity measurement in low-speed water flows by double-wire hydrogen-bubble technique.....5284
 Comparison of visualized turbine endwall secondary flows and measured heat transfer patterns.....8627
 A steady-unsteady visualization technique for wake-flow studies.....10721
 Ultrasonic images of flow regions in a wave tank.....10722
 Wakes of a circular cylinder in stratified fluids.....10723
 Neutrally buoyant anisotropic particles for flow visualization.....10724
 Flow visualization and velocity gradient measurement using photochromic dyes.....12742

384-M Lasers

- Time-resolved two-dimensional concentration measurements in an acoustically driven flow.....798
 Application of forced Rayleigh scattering to studies of laminar and turbulent flows.....1755
 Peculiarities in measuring the velocity vector using a laser anemometer in flow through axisymmetric models.....2836
 Engineering applications of laser velocimetry, presented at The Winter Annual Meeting of The American Society of Mechanical Engineers, Phoenix, AZ, Nov. 14-19, 1982 (Book).....3946
 Particle-sampling statistics in laser anemometers: sample-and-hold systems and saturable systems.....3947
 Laser generated smoke for fluid flow visualization.....3948
 Measuring particle transverse velocity using an LDA.....5285
 A remote laser-probe system for velocity and temperature measurements.....5286
 Laser optical methods for the study of very large phase objects.....5287
 Employment of laser Doppler anemometer for measurements of hydrodynamic properties of immersed jet.....6546
 Aerodynamic measurements about a rotating propeller with a laser velocimeter.....8628
 Laser holographic interferometry for an unsteady airfoil undergoing dynamic stall.....9618
 An experimental verification of laser-velocimeter sampling bias and its correction.....9619
 An investigation into laser diagnostic technique of liquid droplets. (Part 1: Measurements in high temperature streams).....10725
 An investigation into laser diagnostic technique of liquid droplets. (Part 2: Measurement of evaporation rate constant in hot spray).....10726
 Laser diagnostics for flowfields, combustion, and MHD applications.....10727
 Local size distribution of spherical particles diffusing in a fluid: A new measuring technique.....11714

384-N Other optical techniques

- On a method of the concentration measurement by the use of light absorption law.....6547

384-P Water tunnels

- A closed-loop gravity-driven water channel for density-stratified shear flows.....2837

384-Q Subsonic wind tunnels

- Blockage corrections for rectangular flat plates mounted in an open jet wind tunnel.....8629
 Adaptable wind tunnel for testing V/STOL configurations at high lift.....9620

384-R Trans-, super-, & hypersonic wind tunnels

- Three-dimensional flow studies on a slotted transonic wind tunnel wall.....799
 Investigation of transonic Ludwig tubes, Part 1. Starting process in the case of an upstream valve.....800

- Wind tunnel noise reduction at Mach 5 with a rod-wall sound shield.....1756
 Constant temperature hot-wire anemometer practice in supersonic flows. Part 1: The normal wire.....5288
 Wind tunnel wall interference corrections for aircraft models in the transonic regime.....8630
 Simulation of the hypervelocity regime of flow past bodies in wind tunnels.....8631
 Heavy gas mixtures for wind tunnel use.....11715
 T2 wind tunnel adaptive walls: Design, construction and some typical results.....11716

384-S Tunnel techniques

- Wind tunnel wall corrections deduced by iterating from measured wall static pressure.....5289
 Decreasing the side wall contamination in wind tunnels.....5290
 Combined four-wall interference assessment in two-dimensional airfoil tests.....5291
 The influence of free-stream disturbances on low Reynolds number airfoil experiments.....5292
 Review of support interference in dynamic tests.....5293
 Visualization of flow patterns induced by an impinging jet issuing from a circular plenum.....5294
 Sidewall effects on airfoil tests.....10728

384-T Shock tubes & tunnels

- A new method to measure homogeneous nucleation rates in shock tubes.....5295

THERMAL SCIENCES

400 THERMODYNAMICS

400-B Fundamentals of classical thermodynamics

- Thermodynamic theory of stress relaxation waves in fluids.....801
 Lagrangian formulation of the Maxwell-Cattaneo hydrodynamics.....1757
 The inertial relaxation terms and the variational principles of least action type for non-stationary energy and mass diffusion.....1758
 Uniqueness and continuous dependence results in thermodynamics with internal state variables.....2838
 The extremity laws of hydro-thermodynamics.....2839
 Extended thermodynamics of classical and degenerate ideal gases.....5296
 On the role of negentropy in the maximum work and conversion of form.....6548
 Extended formulation of the second law for open discrete systems.....6549
 On the construction of thermodynamic functionals.....6555
 Principles of energetics (Based on Applications de la thermodynamique du non-equilibre) (Book).....7555
 Thermodynamic equilibrium in stressed systems. Part 8 - Stationary state models.....8632
 Introduction to thermal sciences, thermodynamics, fluid dynamics, heat transfer (Book).....8639
 A consideration of the thermodynamics of continuous media using the entropy flux assumption of Muller and the inclusion of more constitutive variables.....12743
 Thermodynamics of the modified material structure with internal state variables.....12744

400-C Statistical mechanics

- A generalized transport equation.....1759
 A method based on probability of adding the individual modes of thermal vibration and predicting their effect on the strength of aluminium crystals.....10729

400-D Thermodynamics of irreversible processes (nonequilibrium states)

- Partial integrability as the basis for the existence of entropy in irreversible systems.....1760

- Equilibrium third moments and non-equilibrium second moments of fluctuations of hydrodynamic dissipative fluxes.....3949
- On irreversible sign-switching of Kelvin temperature and the generalized Sears-Kestin statement of the second law.....6550
- Generalized local balance concepts in non-equilibrium thermodynamic field theory.....6551
- Problems of the thermodynamics of irreversible processes.....6552
- Physics considerations of solar energy conversion.....7556
- The second law efficiency of solar energy conversion.....7557
- Geothermal reservoir simulation using nonequilibrium thermodynamics.....7558
- Application of the theory of extended irreversible thermodynamics to the kinetics of spinodal phase separation in a generalized van der Waals-Kac fluid.....8633
- Variational approach to extended irreversible thermodynamics of heat and mass transfer.....9622
- The Chapman-Enskog theory and non-equilibrium thermodynamics.....9623
- Dynamic phase transitions in a van der Waals fluid.....9624
- Generalized integral variational principles of phenomenological thermodynamics of irreversible processes, and the nature of variation of thermodynamic action.....10730
- 400-E Homogeneous nucleation
- A robust iterative method for flash calculations using the Soave-Redlich-Kwong or the Peng-Robinson equation of state.....8634
- 400-F Critical state phenomena
- Critical-point limit law for Temperley's continuous model.....2840
- Heat transfer associated with an ascending flow of supercritical helium in a heated tube with $Re < 2300$ at the entry.....6553
- A switch function applied to the thermodynamic properties of steam near and not near the critical point.....7559
- 400-G Surface phenomena
- Contribution of crystalline lattice defects to thermal conductivity of porous materials.....8635
- The supercooling of water droplets.....9625
- 400-H Equations of state, including mixtures
- Determination of compressibility and virial coefficients by the Burnett method.....8636
- Equation of state taking the features of the internal energy into account and based on the saturation line.....10731
- Constructing a single equation of state for gas and liquid by the method of minimizing the sum of squares of the relative deviations.....10732
- The Grüneisen parameter in fluids.....12745
- 400-J Thermal & combined cycles
- Stored chemical energy propulsion system for underwater applications.....2841
- Factors affecting the optimization of the Stirling cycle for use as a heat pump.....7560
- Optimization criteria of power cycles for waste heat recovery.....9626
- Absorption cycle heat pumps.....9627
- Derived thermodynamic design data for Rankine power cycle systems operating on PF3.....11717
- Derived thermodynamic design data for Rankine power cycle systems operating on n-heptane.....11718
- Derived thermodynamic design data for Rankine power cycle systems operating on n-pentane.....11719
- Derived thermodynamic design data for Rankine power cycle systems operating on PF2.....11720
- Derived thermodynamic design data for Rankine power cycle systems operating on R718 (water).....11721
- Comparison of binary mixtures for vapour absorption refrigeration systems.....11722
- Theoretical analysis of the dynamic interactions of vapor compression heat pumps.....12746
- 400-L Properties of gases & gaseous mixtures
- Question of the heat conductivity of inert gases at low temperatures.....1761
- Measurement of the mutual diffusion coefficients of a nonideal gas mixture of helium and carbon dioxide.....1762
- Thermal accommodation and adsorption coefficients of gases (McGraw-Hill/CINDAS data series on material properties, vol. II-1) (Book).....2842
- Thermal conductivity of inert gases over a wide temperature range.....7561
- Thermodynamic analysis of the reasons for the difference between the values of the thermal conductivities of gases as measured by steady-state and transient methods.....7562
- Transport properties of nitrogen, oxygen, carbon dioxide, and air at low densities and temperatures from 50 to 3000 K.....7563
- Experimental investigation of the thermal conductivity of vapor-gas mixtures with low vapor concentration.....8637
- Approximate calculation of transport coefficients in multi-component mixtures.....10733
- Nonsteady heat transfer in diffusing systems.....10734
- Combustion gas enthalpy. General calculation for any fuel with different combustant air index and steam.....11723
- 400-M Properties of liquids & liquid mixtures
- Relation between fluid viscosity and compressibility.....1763
- Measurement of thermal conductivity, heat capacity, and thermal diffusivity of sulfur and selenium in the liquid state.....3950
- Study of multiatomic molecular interaction potentials in liquids using perturbation theory. I. Calculation method and comparison of results with Lennard-Jones potential.....7564
- Dependence of the transport properties of liquids on the sound velocity and density.....7565
- On dislocation kinetics and viscosity of liquids.....8638
- Methods for predicting properties of liquids and gases.....9628
- Method of measuring the kinetic and thermodynamic properties in binary stratified systems by means of scattered light spectra.....10735
- Calculation of thermodynamic properties for some halo-substitute aromatic hydrocarbons. Gas and liquid.....11724
- 400-N Properties of solids & solid mixtures
- Thermophysical properties of quartz glass.....1764
- The effective conductivity of a periodic array of spheres.....1765
- Measurement of the heat capacity of molybdenum (standard reference material) in the range 1500-2800 K.....3951
- Heat capacity and electrical resistivity of SRM molybdenum (1300-2500 K).....3952
- Thermal conductivity measurements of solids by coating technique method.....7566
- Application of the heat-flux contraction method for determining the thermal conductivity of solids.....7567
- Instrument with direct reading of the thermal conductivity of solids of arbitrary shape.....7568
- Optoacoustic effect and the thermal diffusivity of solids.....10736
- 400-O Properties of multiphase mixtures
- A thermodynamically consistent model of a mushy zone.....2843

- An experimental study of the effective thermal conductivity of a sheared suspension of rigid spheres.....2844
Thermodynamics of fluid mixtures with two-point interactions.....6554
- 400-Q Properties of matter of very high temperature or pressure
- Measurement of high temperature mechanical properties of materials, based on the edited proceedings of a Symposium held from 3-5 June 1981 at the National Physical Laboratory (Book).....2845
Evaluation of P-V-T-composition characteristics of carbon saturated vapor.....3953
- 400-R Properties of matter at very low temperature
- Mutual friction and vortex motion near the superfluid transition.....2846
Flow of superfluid He through micrometer-size channels.....3954
- 400-S Temperature measurement
- Measurement of high gas-stream temperature using dynamic thermocouples.....2847
Surface temperature measurement errors.....3955
Method of determination of volumetric heat transfer coefficient.....7569
Optical temperature gradient measurements using speckle photography.....9629
Film-type thermoelectric and thermomagnetic thermal radiation sensors and their output parameters.....9630
Moving dynamic thermocouple.....10737
Theoretical and experimental study of the error of temperature measurement by thermocouples in thermal-insulation materials.....11725
- 402 Heat Transfer (one phase convection)**
- 402-B Forced convection (external)
- Forced convection heat transfer from an elliptic cylinder of axis ratio.....802
Temperature on a spherical surface with internal heat liberation and jet streamline flow.....803
Efficiency of gaseous shield on rough surface.....1766
A model of eddy viscosity and eddy diffusivity of heat.....1767
Applicability of boundary-layer theory to calculation of heat transfer under separation conditions.....1768
Heat transfer at an array of co-planar slit-like surfaces oriented normal to a forced convection flow.....1769
Generalized results of study of heat transfer from gas to turbine blade profile elements with porous cooling.....2848
Heat transfer from a porous circular cylinder immersed in a moving stream.....2849
Flow past a suddenly cooled vertical flat surface in a saturated porous medium.....2850
The effect of external convection on freezing in steady turbulent flow in a tube.....3956
Local heat transfer rates from two adjacent spheres in turbulent flow.....3957
Finite analytic numerical solution axisymmetric Navier-Stokes and energy equations.....3958
Effect of vibration on the natural convection heat transfer of a horizontal cylinder.....3959
Unsteady conjugated heat transfer near a stagnation point.....3960
Free convective heat-transfer performance of a two-dimensional open thermosyphon with heat sources of cavity dotted along vertical wall.....5297
The possibility of determining and using a new local heat transfer coefficient.....5298
An experimental study of laminar heat transfer downstream of backsteps.....5299
- Heat transfer coefficient in ducts with constant wall temperature.....5300
Heat transfer measurements in a heated jet-pipe flow issuing into a cold cross stream.....5301
Heat transfer and horizontally averaged temperature of convection with large viscosity variations.....5302
Forced convection in non-Newtonian flow past a nonisothermal needle.....5303
Buoyancy effects in the entrance region of horizontal rectangular channels.....5304
Unsteady free and forced convective diffusion.....6557
Heat transfer from round impinging jets to a flat plate.....6558
Experimental investigation of heat transfer with interaction of a density discontinuity with a turbulent boundary layer on the permeable surface of a rectangular channel.....6559
Transverse curvature effects on a slender cone with heat transfer and angle of attack.....6560
Effect of free-stream turbulence of fluid on heat transfer in turbulent boundary layer (1. Heat transfer and surface friction).....6561
Heat transfer adjacent to the attached end of a cylinder in crossflow.....7570
Conjugate mixed convection heat transfer from a vertical rectangular fin.....7571
Heat transfer in the supercritical region at low pressure and mass velocity.....7572
Turbulent heat transport in circular ducts with circumferentially varying heat flux.....7573
Selected publications of Wilhelm Nusselt and Ernst Schmidt (Issued on the occasion of the 7th International Heat Transfer Conference, Munich, 1982) (Book).....8640
Heat or mass transport to poorly streamlined bodies.....8641
Prediction of heat transfer in turbulent falling liquid films with or without interfacial shear.....8642
Surface step induced gap heating in the shuttle thermal protection system.....8693
Heat transfer in separated flows at Re between 1 and 2 10 and Pr between 0.7 and 10,000 (Separation of vortices from tubes).....8733
Experimental study of heat transfer and friction on a cylinder in longitudinal turbulent flow of air with variable physical properties.....9631
A note on the extended Graetz problem.....9632
Heat exchange and drag in a turbulent boundary layer with pressure gradient.....10738
Cooling of overheated surfaces by a falling liquid film.....10739
Thermal instability of forced convection boundary layers.....11726
Heat transfer from rods or fins which extend radially outward from a rotating shaft.....11727
A numerical analysis of laminar flow and heat transfer of air in an in-line tube bank.....11728
Correlation between heat transfer and fluctuating pressure in separated region of a circular cylinder.....12747
Influence of temperature dependent physical properties on the heat transfer in the turbulent boundary layer of a parallel affluxed flat plate.....12748
Convection heat transfer and pressure drop in cross flow over finned tubes.....12749
Heat transfer in a corner flow with suction.....12750
- 402-C Forced convection (internal)
- Entrance region heat transfer in a uniform wall-temperature helical coil with transition from turbulent to laminar flow.....804
Wall heat/mass transfer in pulsatile flow.....805
Nonlinear convection in a rotating layer: Amplitude expansions and normal forms.....806
The longitudinal vortex and its effects on the transport processes in combined free and forced laminar convection between horizontal and inclined parallel plates.....807
Effect of a change of the turbulent structure of a flow on unsteady heat exchange upon heating of gases and liquids in pipes.....1770
Estimating the intensity of heat transfer to supercritical helium when the specific variation of the thermophysical properties is taken into account.....1771

- Heat transfer between three media in triple
countercurrent pipe flow.....1772
- Design of cooling channels with improved
thermo-hydraulic characteristics.....1773
- Heat transfer in the nonisothermal flow of an
anomalously viscous fluid in a helical duct.....1774
- Transient analysis of packed-bed thermal storage
systems.....1775
- Lumped-system analysis for the simultaneous wall and
fluid axial conduction in laminar pipe-flow heat
transfer.....1776
- Low Rayleigh number heat transfer in ducts of
varying cross-section.....2851
- Heat transfer to Newtonian and non-Newtonian fluids
flowing in a laminar regime.....2852
- Low Prandtl number convection between differentially
heated end walls.....2853
- The effect of thermal boundary conditions on the
heat transport in vertical channels heated from
below.....2854
- Turbulent heat and mass transfer in flows with
moderate drag reduction.....2855
- Laminar forced convection in converging or diverging
planar symmetric ducts.....2856
- Heat transfer in toroidal tubes at large Prandtl
numbers.....2857
- Low Reynolds number flow in a heated tube of varying
section.....3961
- Heat transfer in vertical upwards gas-liquid slug
flow.....3962
- An interferometric investigation of separated forced
convection in laminar flow past cavities.....3963
- Convective flow through internally finned
rectangular fins.....3964
- Fluid flow and heat transfer in corrugated wall
channels (4th Report, Analysis in the case where
channels are bent many times).....3965
- Calculation of transient heat transfer in channels
with Neumann boundary conditions.....3966
- Transient forced convection heat transfer to helium
during a step in heat flux.....3967
- Free, combined free-forced and forced convection in
the vertical thermosyphon heated with a constant
heat flux.....5305
- Enhanced heat transfer in a flat rectangular duct
with streamwise-periodic disturbances at one
principal wall.....5306
- A numerical and experimental investigation of
turbulent heat transport downstream from an abrupt
pipe expansion.....5307
- The effect of inlet and exit losses on free
convective laminar flow in the Trombe wall channel..5308
- Unsteady, conjugated, forced convection heat
transfer in a parallel plate duct.....6562
- Turbulent flow heat transfer and fluid friction in
helical-wire-coil-inserted tubes.....6563
- A numerical solution of the vertical boundary-layer
equations in a horizontally heated porous cavity...6564
- Heat transfer and flow resistance in the turbulent
pipe flow of a fluid with near-critical state
parameters.....6565
- Turbulent heat and mass transfer in Newtonian and
dilute polymer solutions flowing through rough
pipes.....6566
- Heat transfer and resistance with turbulent flow of
heat carrier of variable properties.....6567
- Hydraulic drag and heat transfer in oval twisted
tube.....6568
- The prediction of turbulent flow and heat transfer
in a narrow isosceles triangular duct.....7574
- Pintie difference analysis of laminar separated
forced convection in cavities.....7575
- Pictitious-layer method for thermal contact problems..7576
- Peripheral temperature variation in the walls of
noncircular ducts.....7577
- Effect of configuration of a confined space on the
parameters of convective flows for symmetric
temperature fields.....7578
- Experimental investigation of heat exchange in a
porous annular channel.....7579
- High-temperature heat exchange in the flow of a gas
in a slit-type quenching apparatus.....7580
- Heat transfer in pipe flow of high-viscosity non-
Newtonian fluids under boundary conditions of the
second and third kinds.....7581
- Laminar heat transfer to blood flowing in a circular
duct.....8643
- Optimization of jet cooling of a rotating disk.....8644
- Forced convection in three-dimensional flows: III.
Asymptotic solutions with viscous heating.....8645
- Turbulent heat transfer coefficients in an
isothermal-walled tube for either a built-in or
free inlet.....9633
- Analysis of laminar flow and heat transfer in tubes
with internal circumferential fins.....9634
- Fully developed laminar flow and heat transfer in an
arbitrarily shaped triangular duct.....9635
- Two dimensional analysis of transient flow and heat
transfer in a natural circulation loop.....9636
- Calculation of the cooling of a liquid moving in an
underground channel.....9637
- Thermally developing laminar flow in a duct with
external radiation and convection.....9638
- Numerical study of heat transfer from a rotating
cylinder with external longitudinal fins.....10740
- Combined hydrodynamic and thermal development in a
square duct.....10741
- Solution of a two-dimensional conjugate problem of
stabilized heat transfer in the laminar flow of a
liquid in a channel.....10742
- Effects of free convection and axial conduction on
forced-convection heat transfer inside a vertical
channel at low Peclet numbers.....11729
- The form of presentation of data on heat transfer
with turbulent upflow in vertical tubes.....11730
- Experimental investigation of the free convection
heat transfer from horizontal finned tubes in a
cylindrical container.....12751
- Heat transfer with natural convection around
elliptical tubes.....12752
- Coupled problem of steady-state heat transfer during
turbulent flow of liquid through a plane slot with
dissipation of mechanical energy.....12753
- Heat transfer in the channel flow of a non-Newtonian
fluid with variable physical properties.....12754
- 402-D Natural convection (external)
- Vortex instability of free convection flow over
horizontal and inclined surfaces.....808
- Effects of variable physical properties on free
convection in a porous insulating layer.....809
- Some problems of the hydrodynamics of a horizontal
cylinder with natural convection.....1777
- Laminar free convection on a vertical nonisothermal
plate with vigorous blowing.....1778
- Natural convection heat transfer in air about a
horizontal circular nonisothermal cylinder.....1779
- Note on free convection past a vertical porous plate
in a rotating fluid.....1780
- Turbulent natural convection over a vertical cone....1781
- Natural convection from a horizontal cylinder at
small Grashof numbers.....2858
- Correlations in natural turbulent convection. The
influence of pressure and gas nature.....2859
- A class of backward free-convective boundary-layer
similarity solutions.....2860
- A correlation for heat transfer by natural
convection from horizontal cylinders that accounts
for viscous dissipation.....2861
- Structure of the temperature field in a vertical
layer with thermal gravitational convection.....2862
- Buoyancy-induced two-dimensional vertical flows in a
thermally stratified environment.....2863
- Theoretical considerations of transition to
turbulence in natural convection near a vertical
wall.....3968
- Influence of buoyancy forces and thermal
conductivity on flow field and heat transfer of
circular cylinders at small Reynolds number.....3969
- A refutation of King's rule for multi-dimensional
external natural convection.....3970
- Free convection above a heated horizontal circular
disk.....3971
- Natural convection along a vertical wavy surface.....3972
- Evaporation of water from a horizontal surface by
natural convection.....3973
- Duct-flow versus external-flow natural convection at
a short, wall-attached horizontal cylinder.....3974

- Analysis of transient natural convection flow at high Prandtl number using a matched asymptotic expansion technique.....3975
- Heat transfer in laminar free convection near a vertical plate for fluids in the supercritical regions of state variables.....3976
- An experimental study of plane plumes in cold water.....3977
- Experiments on transient thermal convection with internal heating—large time results.....3978
- Patterns of natural convection around a square cylinder placed concentrically in a horizontal circular cylinder.....3979
- Natural convection from needles with variable wall heat flux.....3980
- Nusselt number distribution in vertical and inclined air layers.....3981
- Laminar free convection around horizontal circular cylinders.....5309
- Natural convective heat transfer on an unheated vertical plate attached to an upstream isothermal plate.....5310
- Approximation of symmetry breaking bifurcations for the Rayleigh convection problem.....5311
- A transient finite element analysis of natural convection around a horizontal hot cylinder.....5312
- Laminar natural convection from a horizontal plate and the influence of plate-edge extensions.....5313
- Thermal stability of Blasius flow over a horizontal flat plate.....5314
- On transient natural convection heat transfer in the annulus between concentric, horizontal cylinders with isothermal surfaces.....6569
- Unsteady free convection from a heated sphere at high Grashof number.....6570
- Optimization of work regimes and geometrical parameters of spirally corrugated tubes in heat exchangers.....6571
- Thermally optimum spacing of vertical, natural convection cooled, parallel plates.....7582
- Enhancement of natural convection heat transfer from a horizontal cylinder due to vertical shrouding surfaces.....7583
- Natural convection heat transfer to liquid metals below downward facing horizontal surfaces.....8646
- Convective heat transfer response to height differences in an array of block-like electronic components.....8647
- Heat transfer with free-convective turbulent flow on a vertical permeable surface.....9639
- Experimental investigation of the natural convection from a horizontal plate.....9640
- Free convection of non-Newtonian fluids over non-isothermal two-dimensional bodies.....9641
- Experimental observations of temperature inversions over the horizontal square cylinder in natural convection.....11731
- The turbulent Prandtl number in the flow near a heated vertical surface.....11732
- Laminar free convection from a vertical plate.....12755
- Approximate solution to the natural convection heat transfer from a vertical plate.....12756
- Natural convection from an isothermal downward facing horizontal plate.....12757
- Heat transfer of isothermal cylinder with natural convection.....12758
- Combined heat and mass transfer in natural convection on a horizontal surface.....12759
- Natural convection heat transfer from square cylinders.....12760
- Thermal oscillations of a particle-fluid mixture with horizontal temperature gradient.....12761
- Thermal convection in a cavity filled with a porous medium: A classification of limiting behaviours....2865
- On partial spectral expansions with natural convection in spherical annulus enclosures as an example.....2866
- The influence of wavelength and bimodal transition on heat flux in the Bénard-Rayleigh problem.....2867
- Interaction between a stream which passes through an enclosure and natural convection within the enclosure.....2868
- Free convection at small Rayleigh number in porous cavities of rectangular, elliptical, triangular and other cross-sections.....2869
- Natural convection between horizontal concentric cylinders with density inversion of water for low Rayleigh numbers.....2870
- Laminar free convection from a vertical plate with nonuniform surface conditions.....2871
- A numerical study of the effect of a vertical temperature difference imposed on a horizontal enclosure.....2872
- Structure of the inner core boundary.....3983
- Laminar natural convection in an inclined rectangular box with the lower surface half-heated and half-insulated.....3984
- An experimental study of free convective heat transfer in a parallelogrammic enclosure.....3985
- Natural convection heat transfer between bodies and their spherical enclosure.....3986
- Free convection in a vertical annulus with constant heat flux on the inner wall.....3987
- Numerical study of transient high Rayleigh number convection in an attic-shaped porous layer.....3988
- Convective heat transfer in a parallel plate channel with porous lining.....3989
- Thermal convection in a porous medium composed of alternating thick and thin layers.....3990
- Effect of transverse misalignment on natural convection from a pair of parallel, vertically stacked, horizontal cylinders.....3991
- The stratification in natural convection in vertical enclosures.....3992
- Laminar forced convection heat transfer in spherical annuli.....3993
- Existence conditions for stationary state of a free convection flow in a confined medium.....3994
- Convective heat transfer in a rotating cylindrical cavity.....3995
- Natural convection experiments in a triangular enclosure.....3996
- A heat transfer correlation for natural convection from a vertical surface in cold water.....3997
- Transient and steady-state natural convection in a porous medium between two concentric cylinders.....3998
- Laser-Doppler measurements of the velocity along a heated vertical wall of a rectangular enclosure.....5315
- Analysis of turbulent thermal convection between horizontal plates.....5316
- Natural convection experiments in a liquid-saturated porous medium bounded by vertical coaxial cylinders.....5317
- Natural convection in a rectangular porous cavity with one permeable endwall.....5318
- Experimental study of the onset of self-excited oscillations of flow in a loop with natural circulation of a boiling fluid.....5319
- Similarity solution for conjugate natural convection heat transfer from a long vertical plate fin.....5320
- Correlations for convective heat transfer in vertical annular gas layers with constant heat flux on the inner wall.....5321
- Natural convection heat transfer in complex enclosures at large Prandtl number.....5322
- Natural convection in enclosures with off-center innerbodies.....6572
- Natural convection in a partially divided enclosure.....6573
- Effects of free convection on turbulent transport for a liquid flowing in a horizontal channel.....6574
- Heat transfer between parallel plates in continuum to free molecular regime.....6575
- Influence of a surface tension minimum as a function of temperature on the Marangoni convection.....7584
- Heat convection in a horizontal curved pipe.....7585
- The boundary layer natural convection regime in a rectangular cavity with uniform heat flux from the side.....7586
- 402-E Natural convection (enclosures)
- Natural convection experiments in an enclosure between eccentric or concentric vertical cylinders of different height and diameter.....810
- Turbulent natural convection in a rectangular enclosure.....811
- Natural convection in a square cavity: A comparison exercise.....1782
- Natural convection heat transfer in a confined-flow geometry.....1783
- Natural convection of air in a square cavity: A bench mark numerical solution.....1784

On the existence of an oscillatory approach to steady natural convection in cavities.....	7587
An experimental study of natural convection in an inclined rectangular cavity filled with water at its density extremum.....	7588
Natural convection in a rectangular porous cavity with constant heat flux on one vertical wall.....	7589
Convective heat transfer in a rectangular porous cavity—Effect of aspect ratio on flow structure and heat transfer.....	7590
Low Rayleigh number thermal convection in a saturated porous medium bounded by two horizontal, eccentric cylinders.....	7591
Free convection flow through a porous medium bounded by two horizontal walls.....	7592
Numerical study of high Rayleigh number convection in a vertical porous enclosure.....	7593
Study of laminar free convection between two eccentric horizontal tubes.....	7594
Natural convection between horizontal concentric cylinders filled with a porous layer with internal heat generation.....	8648
Transient heat transfer in composite coaxial cylinders with a heat flux at the outer surface.....	8649
Natural convection of density-stratified layers in a vessel. I: Observation of flow patterns.....	8650
Multi-Prandtl number correlation equations for natural convection in layers and enclosures.....	8651
Three-dimensional natural convection in an inclined cylindrical annulus.....	9642
Laminar and turbulent natural convection in an enclosed cavity.....	9643
An investigation of natural convection in enclosures with two- and three-dimensional partitions.....	9644
Free convection of gases in a horizontal cylinder with differentially heated end walls.....	9645
Unsteady natural convection in a cavity with internal heating and cooling.....	9646
High Rayleigh number heat transfer in a horizontal cylinder with adiabatic wall.....	9647
Mathematical simulation of thermogravitational convection in solidification of liquid steel.....	10743
Observed flow reversals and measured-predicted Nusselt numbers for natural convection in a one-sided heated vertical channel.....	11733
Experimental investigation of natural convection losses from open cavities.....	11734
Experimental study of three-dimensional natural convection high-Rayleigh number.....	11735
Effects of corona discharge on free-convection heat transfer inside a vertical hollow cylinder.....	11736
Combined Marangoni- and natural convection in a variable micro-gravity-field.....	12762

402-F Thermally unstable configurations

Energy stability in the Benard problem for a fluid of second grade.....	812
Stability of thermocapillary convection in a fluid filling a half-space.....	813
Numerical solution of thermal instability of a rotating micropolar fluid layer.....	814
Stability of stationary spatially periodic convective motions in a plane vertical layer.....	815
Buoyancy-thermocapillary instability: The role of interfacial deformation in one- and two-component fluid layers heated from below or above.....	1785
On stability of convective flow of a binary mixture with thermal diffusion.....	1786
The onset of instability in a horizontal fluid layer due to a step change in temperature.....	2873
Analysis of natural convection in the space between concentric vertical cylinders of different height and diameter.....	2874
Long rolls generated by natural convection in an inclined, rectangular enclosure.....	3999
Domain dependence of critical Rayleigh numbers.....	4000
Rayleigh-Taylor instability of a fluid supported against gravity by an oscillating magnetic field.....	4001
Stability of nonlinear thermal convection in a porous medium.....	4002
A linear analysis of instabilities occurring in plane shear flow of nematic liquid crystals when a vertical temperature gradient is present.....	4003

Stability of finite-amplitude convection.....	5323
What causes the buoyancy reversal in compressible convection?.....	5324
The stability of natural convection in a vertical fluid layer with internal heat generation.....	5325
Evolution of two-dimensional disturbances in the Rayleigh-Benard problem and their preferred wavenumbers.....	5326
Convection in liquids (Book).....	6576
A modified analysis of thermal and thermohaline instability of a liquid layer heated underside.....	6577
Onset of Rayleigh-Benard convection in binary liquid mixtures of He in He.....	6578
Dimension of strange attractors: An experimental determination for chaotic regime of two convective systems.....	6579
Stability of convective motion in a vertical layer in the presence of longitudinal vibrations.....	6580
Overheating instability in Couette flow.....	6581
The onset of thermal convection in a fluid layer with time-dependent temperature distribution.....	8652
The effects of the density extremum and boundary conditions on the stability of a horizontally confined water layer.....	9648
Stability characteristics of a natural convection flow above a horizontal line heat source.....	9649
Planform of convection with strongly temperature-dependent viscosity.....	9650
On calculation of heat transfer from a polydisperse flow of gas suspension in straight channels and pipes.....	12763

402-G Combined natural & forced convection

Heat transfer in parallel plate duct with circular cylinders inserted in staggered arrangement.....	816
Free and forced convection in the entry region of a heated vertical channel.....	1787
A theoretical study of laminar mixed convection from a horizontal cylinder in a cross stream.....	2875
Combined free and forced convection of water between horizontal concentric cylinders.....	4004
Finite-element simulation of an in-package pasteurization process.....	4005
Laminar compressible flow between close rotating disks. An asymptotic and numerical study.....	4006
Mixed convection over a horizontal plate.....	4007
Mixed convection heat transfer in a horizontal open-channel flow with uniform bottom heat flux.....	5327
An approximate solution procedure for laminar free and forced convection heat transfer problems.....	5328
Laminar combined convection from a horizontal cylinder - parallel and contra flow regimes.....	6582
Experimental investigation of mixed convection in a channel heated on one side.....	6583
Mixed convection heat transfer from a vertical heated cylinder in a crossflow.....	6584
Experimental study of the turbulent boundary layer of a jet with condensation.....	8653
Combined natural and forced convection between parallel walls: Developing flow at higher Rayleigh numbers.....	9651
Study of heat and mass transfer between a heated channel and an upper mixing chamber.....	9652
Effects of a strip inserted in the boundary layer on heat transfer from a plane surface (Distribution of heat transfer coefficients).....	10744
Forcing of convection due to time-dependent heating near threshold.....	10745
A numerical study of similarity solutions for combined forced and free convection.....	11737
Combined natural and forced convection in a horizontal porous channel.....	12764
Transient natural convection heat and mass transfer during refrigeration of air by horizontal tubes.....	12765

402-H Separated flows

The use of a simple heat transfer model for separated flows in tubes.....	5329
Developing flow and transport above a suddenly heated horizontal surface in water.....	7595

to boiling incipience.....11747
- Boiling dynamics theory and experiments.....11748

404-C Pool boiling (peak heat flux)

- Thermal instability in pool boiling on wires at
constant pressure.....4021
- Theoretical prediction of maximum heat flux in power
transients.....4022
- Nonequilibrium of vapor-droplet flow in the
postburnout zone for small mass flow rates and low
pressure.....6593
- An experiment on the heat transfer characteristics
in the post-burnout region at high subcritical
pressures.....6594
- On the velocity profile of vapour bubbles at
critical heat flux.....6595
- A mathematical relation for film boiling on a
vertical surface.....6596
- Critical heat flux of forced convection boiling in
an oscillating acceleration field - III. Reduction
mechanism of CHF in subcooled flow boiling.....12771

404-D Pool boiling (minimum heat flux)

- Stochastic characteristics of vapor fraction and
wall pressure fluctuations in boiling flows.....9658

404-E Nucleate flow boiling (external)

- Experimental observations of the microlayer in vapor
bubble growth on a heated solid.....4023
- Boiling on a finned tube and a finned tube bundle.....4024
- Boiling heat transfer in a narrow eccentric annulus,
Part II: Heat transfer.....5340
- Photographic study of the mechanism of heat transfer
enhancement by electrolytic hydrogen gas.....5341
- Certain Aspects of boiling of liquids.....5342
- Generation of a radiation-blocking aerosol jet in
cocurrent flow on a permeable wall.....5343
- Effect of bubble frequency on bubble departure
diameter in nucleate pool boiling.....8662
- Thermal behavior of tube wall in transition from
nucleate to film boiling.....8663
- Size and number density change of droplet
populations above a quench front during reflood.....9659

404-F Flow boiling (internal)

- Forced convection film boiling heat transfer from a
horizontal cylinder to liquid cross-flowing
upward, (2nd Report, Subcooled liquid).....818
- Heat-transfer rate on boiling in the presence of
scaling.....1791
- Simplified nonlinear descriptions of two-phase flow
instabilities in vertical boiling channel.....2882
- Critical equilibrium inhomogeneous two-phase two-
component water-steam-air flow.....2883
- Peripheral variation of heat transfer under pool
boiling on tubes.....4025
- Boiling heat transfer with Freon 11 (R11) in brazed
aluminum, plate-fin heat exchangers.....4026
- Boiling heat transfer in a narrow eccentric annulus,
Part I: Dryout.....5344
- Numerical study of heat transfer in laminar film
boiling by the finite-difference method.....6597
- A comparative study of water boiling in a vertical
tube under temperature-controlled or power-
controlled boundary conditions.....6598
- Effect of crossflow in boiling heat transfer of
water.....6599
- Generalization of experimental data on heat-transfer
crisis in pipes.....8664
- Two-phase heat transfer in two component vertical
flows.....8665
- Flow regime transition criteria for upward two-phase
flow in vertical tubes.....9660
- On the mechanism of flashing injection of initially
subcooled fuels.....9661
- Convective boiling heat transfer in a concentric
annular gap.....9662

404-G Flow boiling, peak heat flux (internal)

- An investigation of critical heat flux and surface
rewet in flow boiling systems.....2884
- Heat-transfer burnout associated with the forced
motion of water in annular ducts.....2885
- Prediction of critical heat flux in flow boiling at
low qualities.....4016
- Analysis of forced-convection boiling flow
instabilities in a single-channel upflow system.....4027
- Boiling heat transfer in a vertical tube with freon
114.....4028
- Experimental study of heat-transfer burnout in
horizontal steam-generating channels with a porous
inner lining and circumferentially nonuniform
heating.....4029
- An investigation into the nature and significance of
a new critical heat flux correlation.....4030
- The prediction of critical mass flux by the use of
Panco lines.....4031
- Analytical comparison of condensing flows inside
tubes under earth-gravity and space environments.....5345
- Shell-side coefficient of heat transfer from steam
contaminated with noncondensable gases.....5346
- Critical heat flux of forced convection boiling in
an oscillating acceleration field - II.
Contribution of flow oscillation.....6600

- Heat recovery using spray recuperators.....11804

410-C Heat exchangers (regenerators)

- A method of comparing performance of extended-surface heat exchangers.....1827
- Heat transfer performance of ceramic regenerator matrices with sine-duct shape passages.....2934
- On the effects of viscous dissipation and pressure work in free convection loops.....2935
- Unsteady thermohydraulic processes in a two-phase system with a free level of heat-transfer agent.....2936
- Mean temperature difference in multipass crossflow.....4082
- Mean temperature difference charts for air coolers.....4083
- A numerical finite difference method for performance evaluation of a periodic-flow heat exchanger.....4084
- On the presentation of performance data for enhanced tubes used in shell-and-tube heat exchangers.....4085
- The thermal performance of the wet surface plastic plate heat exchanger used as an indirect evaporative cooler.....4086
- Materials selection for metallic heat exchangers in advanced coal-fired heaters.....5392
- Boiling crisis in internally-baffled thermosyphons.....5393
- Augmentation of heat and mass transfer in regeneration of fine-grained synthetic adsorbents in a gravity flow.....5394
- Regenerative rotary heat exchanger for heat recovery in residential ventilation.....6631
- The representation of regenerator fluid carryover by bypass flows.....7673
- Regenerative heat exchangers with periodic time variation of coolant temperature.....7674
- Theory and applications of a multi-circuit heat pump system.....7675
- Variation in the mass transfer through a bank of tubes with a triangular arrangement.....10779
- Direct contact heat transfer with phase change: Theoretical expression for instantaneous velocity of a two-phase bubble.....11805

410-D Extended surfaces

- Multiwall TPS - an emerging concept.....843
- Optimal design of a minimum weight thermal diffuser with constraint on the output thermal power flux.....844
- Drag of crisscross bundles of finned tubes in transverse stream of fluid.....1828
- Efficiency of straight fins cooled by natural or forced convection.....1829
- The one-dimensional analysis of fin assembly heat transfer.....4087
- Recent developments in the analysis and design of extended surface.....4088
- Transient response of a composite straight fin.....4089
- Heat transfer from horizontal serrated finned tubes in an air-fluidized bed of uniformly sized particles.....4090
- The optimum dimensions of convective pin fins.....4091
- Transient conjugated heat transfer between a cooling coil and its surrounding enclosure.....5395
- The effect of temperature ratios on the film cooling process.....5396
- Heat transfer coefficients and pressure drop in the condensation of steam along finned surfaces.....5397
- Industrial aluminium finned-tube sealed-circuit wet coolers.....5398
- Calculation method of the optimum configurations of the extended surfaces with simultaneous conductive, convective and radiative heat transfer in heat exchanger.....6632
- Heat transfer from rough and finned horizontal tubes in a gas fluidized bed.....7676
- Analogue modelling of plate fins in heat exchangers of tube-in-line arrangement.....7677
- Length to diameter ratio and row number effects in short pin fin heat transfer.....8717
- Heat transfer and friction loss characteristics of pin fin cooling configurations.....8718
- Effects of pin shape and array orientation on heat transfer and pressure loss in pin fin arrays.....8719
- Optimum fin geometries for simultaneous convective and radiative heat transfer.....8720
- On the solution of heat transfer through an array of extended surfaces.....12799
- Performance of single-pass air-cooled or gas-cooled condensers with inerts.....12800

The heat spreader: Some quantitative results.....12801

410-E Other augmentation techniques

- The geyser effect in a two-phase thermosyphon.....2937
- Enhanced and local heat transfer, pressure drop, and flow visualization for arrays of block-like electronic components.....2938
- Automation of a cooling system by air spraying.....5399
- Investigation of external heat transfer in dispersed systems with correction for the transiency of the process.....5400
- Post-burnout heat transfer to freon flowing in a vertical tube at high subcritical pressures.....6633
- Approximative evaluation of heat transfer experiments in the test section of a double-walled tube.....6634
- Augmentation of heat transfer of cylinder in cross-flow of liquid at critical ranges of the Re.....6635
- Shape of porous region to control cooling along curved exit boundary.....7678
- Comparative efficiency of certain methods of heat transfer augmentation in longitudinal flow over a cylinder.....7679
- Heat transfer from freons in a film flowing over bundles of horizontal tubes that carry a porous coating.....7680
- Analysis of a liquid/gas direct contact heat exchanger concept.....7681
- A criterion for tube arrangement and optimum tube spacing in tube banks.....8721
- Heat transfer characteristics in a rectangular flow section downstream from a mixing junction.....8722
- Average heat transfer coefficients of tube bundles in flows of viscous fluids at different angles of attack.....8723
- Hydraulic drag and heat transfer in bundles of tightly-packed twisted oval tubes.....8724
- Local aerodynamics and heat transfer in beds of packed spheres, simulating spherical fuel elements.....8725
- Investigation of the mean voids fraction of the dynamic two-phase layer in closed thermosyphons.....8726
- A study on temperature separation in a large vortex tube.....9698
- Evaluation of energy roof direct utilization.....11806
- A similarity relation for energy separation in a vortex tube.....12802
- One-dimensional thermosyphon analysis.....12803

410-F Heat pipes

- Characteristics of diode-type heat pipe in forward mode and in reverse mode of operation.....1830
- Nizkotemperaturnye teplovoye trubyy (Low-temperature heat pipes) (Book).....2939
- An experimental investigation of a low heat flux, wickless heat pipe.....5401
- Heat and mass transfer in the vapour gas region of a gas-loaded heat pipe.....5402
- Transient heat and mass transfer in liquid-metal heat pipes.....5403
- Maximum heat flux through heat pipes with varying cross sections.....5404
- Heat transfer and flow in high-temperature alkali-metal heat pipes.....5405
- Hydrodynamic regimes of a liquid in a smooth-walled rotating heat pipe. I.....7682
- Experimental investigation of heat transfer in a centrifugal heat pipe with an optimized layer of heat-transfer agent.....7683
- Effect of parameters of metal fiber capillary structures on maximum heat transport by heat pipes.....7684
- Dynamics of an independently heated heat exchanger with nonuniform axial distribution of the heat flux density.....8727
- Measurements of the transient behavior of a capillary structure under heavy thermal loading.....9699
- Heat transfer in evaporation and condensation zones in heat pipes with intensive heating of their ends.....9700
- Performance of a commercial heat pipe under operational conditions.....9701
- Study of a heat transfer process in the condensation zone of rotating heat pipes.....9702

- A self-driven chemical heat pipe.....9703
 A design procedure for gravity-assisted heat pipe
 heat exchanger.....10780
 Experimental study of a grooved heat pipe at
 moderate temperature range.....10781
 On the heat pipe indirect heat exchangers.....11807
 Optimal heat pipe heat exchanger design.....12804

410-G Drying & freezing

- Design of installation for drying by a gas
 containing hygroscopic particles.....1831
 Dynamics of a variable mass particle during drying
 of dispersed materials in a pneumatic dryer.....8728
 Experimental approach of transfer phenomena during
 high temperature convective drying of softwood.....9704
 Process for the calculation of temperature
 distribution in drying materials.....11808
 A mathematical analysis of pneumatic drying of
 grains—I. Constant drying rate.....12805
 A mathematical analysis of pneumatic drying of
 grains—II. Falling rate drying.....12806

410-H Insulation

- Comparison of different approximations of the
 transfer function of a heat transfer wall.....5406
 Some basic aspects of dynamic insulation.....5407
 The thermal perturbation induced by an insulating
 spot on a heated surface.....6636
 Advanced passive radiator for spaceborne cryogenic
 cooling.....8729
 Heat insulation in vacuum steel-jacket pipe systems..12807

410-I Environmental conditioning & control

- Analysis on air-conditioning heat load of a
 passenger vehicle.....1832
 Surface microfouling during the induction period.....4092
 A new analysis of the closed loop thermosyphon.....6637
 Heat pump systems (Book).....7665
 Effect of operating conditions and tube bundle
 geometry on boiling heat transfer.....7685
 Thermal simulation of buildings by heat flow network
 method.....7686
 The coaxial pipe electric heating system for
 pipelines.....8730
 Characteristics of axial temperature distribution in
 solids-fluid countercurrent moving beds heated
 externally.....9705
 Recirculation of purged flow in an adiabatic
 counterflow rotary dehumidifier.....11809

410-J Cooling towers

- Analysis of mechanical-draught counterflow air/water
 cooling towers.....4093
 Numerical modeling of wet cooling towers - Part 1:
 Mathematical and physical models.....5408
 Numerical modeling of wet cooling towers - Part 2:
 Application to natural and mechanical draft towers..5409
 Study of heat and mass transfer in a vertical-tube
 evaporative cooler.....7687
 Calculations on thermal performance capability of
 mechanical draft cooling towers.....10782
 A theoretical analysis of direct contact evaporation
 in spray columns.....11810

410-K Boilers

- Simple method for determining the steady state and
 unsteady state heat flux on boiler heating
 surfaces, construction of a fluxmeter.....9706
 Heat transfer in boiler furnace, taking account of
 the scattering of radiation.....9707

410-L Thermal energy storage systems

- Heat transfer in energy problems (Book).....9693

412 Thermomechanics of Solids

412-B Thermoelasticity (steady & quasi-steady)

- Thermal contact stresses of bi-metal strip
 thermostat.....845
 Experimental and analytical investigation of the
 heat transfer and thermal stresses in a cylinder
 head of a diesel engine.....846
 State of thermal stress in a two-temperature half-
 space with a periodic surface temperature.....847
 Thermoelastic contact problems with radiation
 boundary conditions.....1833
 Thermal stresses in anisotropic noncylindrical beams..1834
 Thermal stresses in a thin spherical shell with a
 curved hole.....2940
 Variational equations of the thermodiffusion of
 deformable thin shells with a finite shear
 stiffness.....2941
 Thermal stresses in a spherical shell with a
 reinforced curvilinear hole.....4094
 Thermal stresses in a semiinfinite cylindrical shell
 locally heated by convection.....4095
 Three-dimensional thermoelastic treatment in
 spherical region and its application to solid
 sphere due to rotating heat source.....5410
 Temperature stresses in an elastic spherical layer.....5411
 On a supplementary conservation law for the balance
 laws in thermoelastic bodies.....6638
 The temperature stresses in a semi-infinite
 orthotropic plate heated by moving along end
 face heating area.....6639
 Temperature stresses in a partly fixed orthotropic
 plate with a source and flow of heat.....6640
 Stress state of a heated flattened spherical shell
 caused by thermal diffusion.....6641
 Selection of ceramic material specimen dimensions
 for thermal stability tests.....6642
 Thermal stresses in orthotropic disk due to rotating
 heat source.....7689
 Effect of interface reflections and angle of
 incidence of radiation on thermal stresses in
 semi-transparent materials.....7690
 Thermoelasticity of nonsimple materials.....7691
 Thermal stresses in asymmetrically heated thick
 cylindrical shells.....7692
 Thermal stresses in bonded solar cells—The effect
 of the adhesive layer.....7693
 A numerical method in solving a coupled
 thermoelasticity equation and some results.....7694
 The complete stress field produced by frictional
 heating of a thin conductor sliding against an
 insulator.....7695
 Singular integral equations in micropolar
 thermoelasticity.....7696
 Non-simple quasi-static thermoelastic deflection of
 a thin clamped circular plate.....7697
 Relationship between stresses and strains over a
 period with isothermal uniaxial loads.....7698
 Exact analytical solutions of three-dimensional
 problems of thermoelasticity.....7699
 Effective thermal expansion coefficient in a
 nonuniform material.....8734
 A thermoelastic contact problem on strip bending
 with allowance for thickness deformability.....8735
 In-plane thermal stresses in elastic plates.....9708
 Effect of shear deformation on thermal stresses in
 cylindrical shells.....9709
 The reciprocity theorem in coupled problems of
 viscoelastic thermodiffusion.....9710
 Non-Fourier thermal stresses in a circular disk.....9711
 Plane thermostatic problems for inhomogeneous
 anisotropic materials.....9712
 Conservation law in linear thermoelasticity.....10783
 On evaluating the temperature fields and temperature
 stresses in crystal cutting.....10784
 Thermoelastic state of a plate with a moving slit
 and a heat source.....11811
 Analysis of tube-tubesheet joint loading including
 thermal loading.....12808
 Nonlinear analysis of a thermally restrained beam....12809
 Thermal stresses in laminated beams.....12810

- Suggestions for a model of thermoelastic-plastic medium for limit analysis concerned with finite displacement and for generalized variational principle.....12811
Thermal stresses in an elastic half-space.....12812
Solution of the thermoelastic problem for a shell of revolution of arbitrary shape.....12813

412-C Thermoelasticity (transient)

- Eigenvalue approach to the longitudinal vibration of a circular cylinder coupled with a thermal field.....848
Thermal stress concentrations in the transient two-dimensional temperature field. (2nd Report, Plate with a semi-elliptic notch).....849
Transient thermal stresses in a rectangular plate due to variation of heat-transfer coefficients on upper and lower surfaces.....850
Thermal stress state of strip-plate with heat sources.....851
Response of an orthotropic cylindrical shell to sudden heating.....1835
Transient thermal stress problem in a transversely isotropic finite circular cylinder under three-dimensional temperature field.....1836
A new higher order dynamic theory for thermoelastic bars. I: General theory.....2942
A new higher order dynamic theory for thermoelastic bars. II. Application to thermoelastic circular and rectangular bars.....2943
Elasto-plastic behaviour of a thin cylinder under thermal stress cycling.....4096
On variational principles in thermoelasticity.....4097
Coupled thermoelastic vibrations of a Timoshenko beam.....7700
Thermal shock fracture in an edge-cracked plate.....7701
Thermoelastic plane waves in a rotating solid.....9713
Numerical investigation of the temperatures and thermal stresses in thermal treatment of metallic articles.....10785
Dynamic thermal stresses in a circular cylinder subjected to asymmetric heating.....11812
Transient stressed state of double-layer cylinder with thermal contact resistance.....11813

412-D Thermoelasticity (nonlinear)

- A general treatise of plane thermoelastic problem in multiply-connected region exhibiting temperature-dependent properties.....9714
Nonlinear theory of thermal stresses in viscoelastic bodies.....10786

412-E Inelastic thermomechanics

- On the linear theory of thermo-viscoelastic materials with internal state variables.....4098
Study of the strain characteristics of materials and evaluation of deformation conditions in concentration zones with nonisothermal cyclic loading.....4099
Parametric representation of the yield strength-strain rate behavior of A533B steel.....5412
The micropolar thermoelastic problem of uniform heat-flow interrupted by an insulated penny-shaped crack.....5413
Stress distribution in an elastic plastic disk subjected to a circular heat source.....7702
Optimal temperature paths for thermorheologically simple viscoelastic materials with constant Poisson's ratio are canonical.....8736
The effect of temperature and solute content on the plastic properties of polycrystalline alloys.....10787
Reverse springback: A curious manifestation of thermoelasticity.....10788
Effect of thermally induced elastic stresses on the mechanical properties of fine-grained two-phase alloys.....10789
Generalized coupled thermoplasticity. Part I. Fundamental equations and identities.....12814
Generalized coupled thermoplasticity. Part II. On the uniqueness and bifurcation criteria.....12815

412-F Thermomagnetic & thermoelectric effects

- Magneto-thermo-elastic plane waves in rotating media..1837
Thermo-elastic/plastic behaviour of a strain-hardening thick-walled sphere.....5414
Effective thermal expansion coefficients of composites reinforced by two-dimensionally misoriented short-glass-fibers.....6643
Thermal stresses and viscoelastic relaxation in metallic glasses prepared by liquid quenching.....10790

412-G Thermal shock

- Benchmark determination of Shuttle Orbiter entry aerodynamic heat-transfer data.....852
An empirical method for computing leeside centerline heating on the Space Shuttle Orbiter.....853
Analysis of STS-2 experimental heating rates and transition data.....854
Life prediction at elevated temperature.....2944
Thermal shock in a circumferentially cracked hollow cylinder with cladding.....12816

412-H Thermal fatigue & stability

- Push-pull fatigue of LiF at elevated temperatures - I. Mechanical properties; II. Microstructures.....855
Design for temperature and thermal buckling constraints employing a noneigenvalue formulation.....856
On the problem of thermal failure under rapid heating.....4100
Fatigue at high temperature (Book).....5415
Non-linear thermal stability of bimetallic shallow shells of revolution.....5416
Effect of cyclic mechanical loads on the endurance of wedge-shaped structures with thermal cycling in a gas flow.....6644
Prediction of the thermal endurance of turbine disks according to data of bench tests.....6645
The effect of infrequent thermal overloads on the behavior of plates subjected to cyclic thermal loading.....7703
On interaction of thermo-acoustic waves with the progress of phase transition: A continuum approach. II. Growth and decay of thermo-acoustic waves.....7704
On interaction of thermo-acoustic waves with the process of phase transition: A continuous approach. I. Constitutive equations and propagation velocities.....7705
Buckling of a heated thin non-homogeneous annular circular plate of variable thickness.....7706
Study of the thermal fatigue of heat-resistant steels in a nonuniform plane stress state.....7707

412-I Thermal wave propagation

- Thermoelastic and thermal buckling analysis of two-dimensional large space structures.....4101
On generalised spherically symmetric thermo-elastic wave propagation.....6646
Orthotropic thermoelastic problem of uniform heat flow disturbed by a central crack.....9715
Thermally induced vibrations of viscoelastic shallow shells.....9716
Deformation trapping due to thermoplastic instability in one-dimensional wave propagation.....9717
Wave equations of thermoelasticity based on classical thermodynamics.....12817

412-J Thermofracture mechanics

- Partially contacting crack in a plate with an elliptic hole.....857
Transient thermal stress problem for a circumferentially cracked hollow cylinder.....1838
Zakonmernosti termicheskogo razrusheniya prizmaticheskikh tel (Laws of thermal stress failure of prismatic bodies) (Book).....2945
Defect assessments at elevated temperature.....2946

- Fracture mechanics data deduced from thermal-shock and related experiments with LMR pressure vessel material.....2947
- Hydraulic fracturing theory for conditions of thermal stress.....2948
- Critical loading conditions and stress intensity factors for partial or entire closure of a Griffith crack under thermo-mechanical loading.....5417
- Quasistatic thermal crack growth in unidirectionally fiber reinforced composite materials.....5418
- The penny-shaped interface crack with heat flow. Part 2: Imperfect contact.....6647
- Standards for the stress analysis of thin-walled shell structures in cryogenic engineering.....6648
- Thermal-relaxation effects in a material with gas-filled cracks.....6649
- Transversely isotropic thermoelastic problem of uniform heat flow disturbed by a penny-shaped crack.....7708
- Transient thermal stresses in a strip with an eccentric hole.....8737
- High temperature failure initiation in liquid phase sintered materials.....9718
- On virtual thermodynamic forces on defects and cracks.....10791
- The effect of thermomechanical processing on the creep ductility of Mo-5wt.%W alloy.....10792
- One case of closure of a crack in a temperature field.....10793
- Effect of temperature on deformation and fracture of notched polymers.....11814
- The extension of cracks at high temperature by growth and coalescence of voids.....11815
- Cleavage fracture of aluminum plates accompanying pulsed heating.....12818
- 412-K Thermal stresses of solids with phase change
- A model of thermo-mechanical behaviour of metals with phase changes.....858
- Characteristics of stress-strain behaviour associated with thermoelastic martensitic transformation.....2949
- Quenching stress analysis in elastic steel plates.....6650
- Changes of invariance in internal variable theories.....9719
- Thermal expansion of polycrystalline aggregates: I. Exact analysis.....9720
- Thermal expansion of polycrystalline aggregates: II. Self consistent approximation.....9721
- 412-L composite materials
- Thermoelastic stress analysis of anisotropic composite sandwich plates by finite element method...859
- Reduced thermoelastic properties of fibrous composites.....860
- On thermoelastic stresses in composite media.....1839
- On linear thermoelasticity of composite materials.....1840
- Prediction of thermal expansion coefficients of sandwiches using finite elements methods validated by experimental test results.....4102
- Equations of nonclassical thermoelasticity of piecewise-homogeneous media.....4103
- Thermomechanical state of curvilinear orthotropic inhomogeneous bodies of revolution.....7709
- Thermomechanical theory of three-layer orthotropic shells with a viscoelastic filler.....7710
- Overview no. 31: Thermoelasticity and plasticity of composites - I. Mean field theory.....10794
- Thermoelastic analysis of hybrid fabric composites.....10795
- 412-Y Computational techniques
- A convergence theorem for a periodic media with thermoelastic properties.....861
- Eigenvalue approach to thermoelasticity.....1841
- Determination of thermal stresses in disks with the boundary element method.....1842
- On a general treatment for coupled thermal stress problems in a cylindrical coordinate system.....1843
- Boundary integral equation method in thermoelasticity. Part I: General analysis.....1844
- Improvement of mixed time implicit-explicit algorithms for thermal analysis of structures.....2950
- Integral representation and uniqueness theorem in generalized thermoelasticity.....2951
- A two-dimensional finite element idealization for thermo-elastic deflection in beams.....5419
- Finite element analysis of dynamic coupled thermoelasticity problems with relaxation times.....6651
- Thermoplastic deformation of porous materials.....7711
- On the characterization of the mixed problem of coupled, dynamic, linear thermoelasticity in terms of the temperature.....7712
- Axisymmetric thermal stresses in an anisotropic finite hollow cylinder.....7713
- Thermoplastic stress analysis during phase transformations.....7714
- Algorithm for solving a problem of nonisothermal thermoplasticity based on the finite-element method.....7715
- Existence of a generalized solution in thermoelasticity with two relaxation times, Part II.....7716
- Program complex for calculating the state of thermal volume stress of gas-turbine engine blades.....8738
- Boundary integral equation method in thermoelasticity: part II crack analysis.....9722
- Boundary integral equation analysis of axisymmetric thermoelastic problems.....9723
- Hybrid perturbation/Bubnov-Galerkin technique for nonlinear thermal analysis.....10796
- Calculation of temperature fields in solids in the absence of information on initial and boundary conditions.....11816
- 412-Z Experimental techniques
- Thermoelastic polynomials.....2952
- Application of acoustic emission to the assessment of damage in steel in thermal cycling conditions.....2953
- Photothermoelastic measurement by means of high frequency induction heating apparatus.....7717
- 414 Mass Transfer with and without Heat Transfer
- 414-B Convection dominated transfer
- Nonstationary convective heat and mass transfer in a fluid at high Peclet numbers.....862
- Mass transfer and free convection through a porous medium by the presence of a rotating fluid.....863
- Effect of evaporation on convective heat exchange of a porous plate in a rarefied medium.....1845
- Experimental study of mass exchange in axisymmetric cavities.....1846
- Slow flow of gas past a strongly heated sphere in the presence of blowing and evaporation from its surface.....1847
- On the method of moments for solute dispersion.....1848
- Mass transfer into a turbulent liquid film.....2954
- Experimental study of mass transfer around a turbulence promoter by the limiting current method.....2955
- False diffusion in convection and diffusion with chemical reaction.....2956
- Dynamic structure and wall to liquid mass transfer in the laminar vortex regime of a Couette-Poiseuille flow.....2957
- Turbulent velocity fluctuations that control mass transfer to a solid boundary.....2958
- Mechanism of turbulent mass transfer at a solid boundary.....2959
- Diffusion in oscillatory pipe flow.....4104
- An experimental study of gas exchange in laminar oscillatory flow.....4105
- Convective mass transfer at rigid and mobile interfaces in laminar flow.....5420
- Role of surface phenomena in the theory of heat and mass transfer.....5421
- Mass transfer between a spherical particle and a liquid for small Peclet numbers.....7718
- Maximum heat transfer in thermosiphons with separated uptake and downtake flows.....8739

- Solid loaded flows with particular interest to applications in technology.....8740
 A collocation method for convection dominated flows.....9724
 Inertia effects for slow forced scalar transfer from a sphere.....9725
 Experimental investigation of mass transfer from the surface of a sphere under conditions of large Reynolds numbers and cavitation on the surface.....10797
 Mass transport in a circular tube at non-Newtonian liquid flow.....12819

414-C Sublimation or ablation

- Simultaneous heat and mass transfer in film absorption under laminar flow.....1849
 Simulation of the formation of hydrates during gas flow in tubes.....1850
 Analytic theory of ablation layer instability.....1851
 Transient heat and mass transfer in the two-phase system: Sublimating solid-vapour-gas mixture.....2960
 Stagnation-point ablation of carbonaceous flat disks—Part II: Experiment.....5422
 Turbulence modeling of flowfields with massive surface ablation.....5423
 Stagnation-point ablation of carbonaceous flat disks—Part I: Theory.....5424
 Hypersonic dynamic testing of ablating models with three-degree-of-freedom gas bearing.....5425
 Ablation by frictional heating.....6652
 Investigation of transport processes in the high-temperature boundary layer on an ablating graphite surface.....7719
 Diffusion and mass transfer in moderately concentrated disperse system with small Peclet numbers.....7720
 Investigation of condensation of water vapor and cyclonic defrosting of panels in freeze dryers.....7721
 The effect of a wall boundary layer on local mass transfer from a cylinder in crossflow.....11817

414-D Diffusion

- Large time solution of an inhomogeneous nonlinear diffusion equation.....864
 Numerical modeling of a moving boundary diffusion/drift problem.....865
 Optimal control problems in diffusion processes with a nonsmooth nonlinear boundary condition.....866
 Determination of the longitudinal dispersion coefficient in flows subjected to high-frequency oscillations.....867
 Some exact solutions for nonlinear desorptive diffusion.....1852
 Perturbation solution of the diffusion equation in the case of mutual non-stationary isochoric and isothermal diffusion of two real gases.....1853
 On the solution of boundary value problems for fourth order diffusion.....1854
 Diffusion in composite layers with automatic solution of the eigenvalue problem.....2961
 Heat and mass exchange of a droplet in a polyatomic gas.....2962
 Generalization and application of Laplace transformation formulas for diffusion.....2963
 Diffusion in a dilute polydisperse system of interacting spheres.....2964
 Diffusion and information.....5426
 Scalar diffusion in simulated helical turbulence with molecular diffusivity.....7722
 Boiling and spreading of liquid nitrogen and liquid methane on water.....7723
 Computer simulation of the impurity distribution over the thickness of a film during growth out of the gas phase.....8741
 Nonsteady thermodiffusional separation of binary mixtures under sampling conditions.....9726
 Artificial diffusion in the numerical modelling of the advective transport of salinity.....10798
 A perturbation expansion for diffusion in a random velocity field.....10799

414-E Convection with diffusion

- The effect of boundary absorption on longitudinal dispersion in steady laminar flows.....868
 Spatial exponential fitting scheme for the solution of steady and unsteady diffusion-convection problems in two-dimensions.....869
 Turbulent diffusion of mass in circular pipe flow.....870
 On error estimates of the numerical solution of the convection-diffusion equation.....871
 An analytical solution of the diffusion-convection equation over a finite domain.....1855
 Solute dispersion in a pulsating flow.....1856
 Mass transfer across a sheared, wavy air-water interface.....2965
 A survey of some second-order difference schemes for the steady-state convection-diffusion equation.....2966
 Asymptotic solution of a model non-linear convective diffusion equation.....4106
 On the theory of dispersion of a solute during laminar flow in tubes.....4107
 Vortex instability of horizontal and inclined natural convection flows from simultaneous thermal and mass diffusion.....5427
 A statistical model of fluid-element motions and vertical diffusion in a homogeneous stratified turbulent flow.....5428
 On the Taylor-Aris theory of solute transport in a capillary.....6653
 Exact analysis of convective diffusion of a solute in MHD radiating convective flow in a vertical channel.....6654
 Influence of the initial conditions on the characteristics of unsteady natural concentration convection in a closed region.....7724
 Stability analysis of finite difference schemes for the advection-diffusion equation.....8742
 Correlation of thermophoretically-modified small particle diffusional deposition rates in forced convection systems with variable properties, transpiration cooling and/or viscous dissipation.....9727
 Mass transfer due to a confined laminar impinging two-dimensional jet.....9728
 Adaptive Eulerian-Lagrangian finite element method for advection-dispersion.....9729
 Effect of finite normal interfacial velocity on free convection heat and mass transfer rates from an inclined plate.....11818
 Analytical solution of two gradient-diffusion models applied to turbulent Couette flow.....12820
 Calculating the fundamental solution to linear convection-diffusion problems.....12821
 Coupled heat and mass transfer in natural convection under flux condition along a vertical cone.....12822

414-F Double diffusion & other combined effects

- Double-diffusive convection caused by coupled molecular diffusion.....872
 The dynamics of double-diffusive gravity currents.....1857
 Bounds for the growth of a perturbation in some double-diffusive convection problems.....2967
 Fluid flow and transfer behavior of a drop translating in an electric field at intermediate Reynolds numbers.....2968
 Effects of rotation and shear on doubly diffusive instability.....4108
 Double-diffusive plumes in unconfined and confined environments.....4109
 Convection driven by concentration- and temperature-dependent surface tension.....5429
 The characteristics of salt fingers in a variety of fluid systems, including stellar interiors, liquid metals, oceans, and magmas.....5430
 A point source of heat in a stable salinity gradient.....6655
 Double-diffusive interleaving due to horizontal gradients.....7725
 The concentration and temperature fields in the flow of liquid over a chemically reactive particle.....7726
 Salt-finger convection in shear flow.....10800
 Preliminary evidence for internal wave motion at boundaries of convecting and nonconvecting zones in layered thermohaline columns.....11819

- Convective thermocapillary instabilities in liquid bridges.....12823
Effect of a stabilizing solute gradient on the onset of thermal convection.....12824

414-G Chemical reaction

- Heat and mass transfer in micromixing in chemically reacting systems.....5431
Heat and mass transfer in convective drying of granular materials in a packed bed.....5432
Certain aspects of desorption in the boiling of liquids in a centrifugal field.....5433
Heat transfer in solvent evaporation from concentrated polymer solutions.....5434
Interphase heat and mass transfer in turbulent liquid flows. Model applications.....5435
Heat and mass transfer in gas flows with physical and chemical transformations.....5436
Coefficients of heat and mass transfer in falling wavy liquid films.....5437
An asymptotic analysis of some nonlinear boundary-value problems of convective mass and heat transfer of reacting particles with the flow.....7727
Influence of transport processes on steady regimes of a chemical flow reactor with reaction of the type $A + B \rightarrow 2C$7728
Mathematical model of heterogeneous reactions.....7729
Method for investigating heterogeneous processes in a solid-solid system in multisectioned v-shaped continuous action apparatus.....7730
Convective heat and mass transfer of reacting particles at low Peclet numbers.....7731
Studies on hydrogen production by direct thermal dissociation of steam.....7732

414-H Injection or suction

- Arrays of impinging jets with spent fluid removal through vent holes on the target surface, Part 2: Local heat transfer.....4110
Interphase heat transfer upon collision between single- and two-phase flows.....5438
Heat and mass transfer in flow over bodies of various shapes, allowing for blowing.....10801
Experimental studies of a plane buoyant surface jet.....10802

414-I Porous media

- The diffusion of a fluid through a highly elastic spherical membrane.....873
Gas flow across a wet screen: analogy to a relief valve with hysteresis.....1858
Mathematical modelling of heat and mass transfer in agricultural grain drying.....1859
Heat and mass transfer within an intensely heated concrete slab.....2969
Self-similar temperature, pressure and moisture distributions within an intensely heated porous half space.....2970
Heat and mass transfer in a new type of spouted-bed dryer.....5439
Heat and mass transfer through an adsorbing layer in vacuum drying of heat-sensitive materials.....7733
Vaporization in flow through porous metals.....7734
Mass transfer in the leaching of a solid from a porous sphere.....9730
Diffusional extraction of material from model porous bodies.....10803

414-J Transient effects

- Enhancement of diffusive transfer by periodic pulsation between Dirichlet and Neumann type boundary conditions.....2971
Influence of flow pulsations on the heat and mass transfer with particles.....12825

414-Y Computational techniques

- Highly efficient, oscillation free solution of the transport equation over long times and large spaces.....1860
The variational method for the solution of the combined heat and mass transfer problems.....6656
Accuracy of finite-difference methods in recirculating flows.....7735
A space-time least-square finite element scheme for advection-diffusion equations.....9731
Heat transfer from a gas jet impinging onto a liquid surface.....9732
Construction of explicit functions for determining the coefficients of internal heat and mass transfer from the data of measurements in nonstationary regimes.....11820

414-Z Experimental techniques

- Determination of the gas-liquid interfacial area of a perforated plate under cross flow operation.....7736
A method of simultaneous measurement of the Soret and diffusion coefficients of liquid solutions.....9733
The development of theoretically based correlations for heat and mass transfer.....12826

416 Combustion

416-B Fundamentals

- Analysis and computation of three-dimensional, transient flow and combustion through granulated propellants.....2972
Critical requirements in combustion research.....2973
Critical conditions for a spatially-dependent exothermic chemical reaction.....4112
The fluid mechanics of flame tips.....4113
Influence of pressure on the laws governing the combustion of molten heterogeneous systems.....4114
Combustion of condensed material with blowing.....4115
Application of the theory of bifurcations to the investigation of nonstationary combustion regimes.....9734
Light combustion modes.....9735
Combustion in plane steady compressible flow: general considerations and gasdynamical adjustment regions.....10804

416-C Ignition (thermal & heterogeneous)

- Ignition dynamics of fully reactive propellant in stagnation flow.....874
The ignition of a thin layer of explosive by impact, the effect of polymer particles.....1861
Projectile impact ignition characteristics of propellants. III. Effect of particle size and porosity.....1862
Thermal ignition in a reactive slab with unsymmetric boundary temperatures.....1863
Further studies on the ignition and flame quenching of quiescent dust clouds.....1864
The asymptotic structure of a counterflow premixed flame for large activation energies.....1865
Thermal explosion and times-to-ignition in systems with distributed temperatures. I. Reactant consumption ignored.....1866
Limits of ignition and stabilization of combustion by the antechamber flame.....2974
Is gasification rate controlling step in polymer ignition?.....2975
Ignition of a combustible solid by convection heating.....4116
The influence of stretch on a premixed flame with two-step kinetics.....4117
Extinction of premixed flames in a stagnation flow considering general Lewis number.....4118
Stationary thermal ignition of particle suspensions.....4119
Degenerate regimes of heterogeneous ignition and extinction of a particle in a gaseous oxidant.....4120
Theory of ignition of metallic particles.....4121

- Ignition of a fuel in contact with an oxidizer.....4122
 Ignition of fuel droplets behind a shock wave front...4123
 An ignition system for ultra lean mixtures.....6657
 A computational study of ignition by oxygen dissociation.....6658
 The effect of pressure variations on premixed flames...6659
 Ignition of flamelets behind incident shock waves and the transition to detonation.....6660
 Influence of natural convection on the concentration limits of ignition of a fuel mixture in a closed vessel.....6661
 Ignition of disperse heterogeneous systems in successive reactions.....6662
 Termination of periodic vortex formation beyond a stabilizer in an acoustically damped chamber upon mixture ignition.....6663
 Effect of ignition conditions on fuel combustion.....6664
 Ignition characteristics of gelled (O/W emulsified) hydrocarbon fuel pool.....8743
 A comprehensive model for AP-based composite propellant ignition.....9736
 Effects of acceleration by an external force on the growth of a burning focus in a closed vessel.....9737
 Ignition of condensed media with absorbing additives upon concentrated application of radiant energy.....9738
 Thermal self-ignition of a system of hot foci.....9739
 Spontaneous combustion and ignition of metals in an oxidizing atmosphere.....9740
 Ignition of a vapor-gas bubble in a liquid.....9741
 Ignition of crystalline hexogene on adiabatic compression of an adjacent gas cavity.....9742
 On the surface ignition of self-heating materials.....10805
 Anomalous quenching of hydrogen diffusion flames in coflow configurations.....10806
 Combustion process of torch-ignited nonhomogeneous mixtures (An experiment with a constant volume bomb).....10807
 On the initiation of a spherical flame kernel.....11821
 Indirect measurement of the thermal-acoustic efficiency spectrum of a long turbulent burner.....11822
 Estimation of the minimum energy of ignition of a layer of metal particles ignited by an instantaneous source.....11823
 Critical conditions of polymer film combustion in gases.....11824
 The response of a confined gas to a thermal disturbance: rapid boundary heating.....12827
 Scope for reducing the concentrations of NO and CH in forechamber flame ignition of a fuel mixture....12828
 Self-ignition of a fuel gas escaping into an oxidizing medium.....12829
 Calculation of the effect of pressure on the ignition of boron at various oxidation constants...12830
- 416-D Laminar flame propagation
- Elliptic field calculation of a laminar diffusion flame adjacent to a vertical flat plate burner.....875
 A nonlinear problem arising from combustion theory: Linn's problem.....876
 Sensitivity analysis for premixed, laminar, steady state flames.....1867
 Application of the finite-element method to one-dimensional flame propagation problems.....1868
 Overall kinetic parameters and laminar burning velocity from pressure measurements in closed vessels.....2976
 Strained premixed laminar flames under nonadiabatic conditions.....2977
 On the dynamics of nearly-extinguished non-adiabatic cellular flames.....2978
 The influence of the temperature dependence of diffusivities on the dynamics of flame fronts.....2979
 Laminarization of flames in rotating flow.....4124
 Optical measurements of soot particles in a laminar diffusion flame.....4125
 Flame propagation in time-independent concentration gradient fields.....4126
 Fundamental study on quenching distance measured by flanged electrode method.....4127
 Detection property of a curved flame front.....4128
 Characteristics of the combustion of mixtures of combustible gases with refrigerants during downward flame propagation.....4129
- Experimental study of stationary flame propagation in a tube under conditions of weightlessness.....4130
 Existence and uniqueness of the steady solution of the equations of the problem of exothermal-wave propagation in a two-phase medium.....4131
 Fast deflagration waves.....5440
 The acceleration of fast deflagration waves.....5441
 Spherically symmetric flame propagation in hydrogen-air mixtures.....6665
 Nonlinear stability and bifurcation in the transition from laminar to turbulent flame propagation.....6666
 Determination of adiabatic flame speeds by boundary value methods.....6667
 Strained premixed laminar flames with nonunity Lewis numbers.....6668
 On the velocity overshoot in a laminar boundary layer diffusion flame.....6669
 Propagation of a distorted flame front in the prescribed field of a gas flow.....6670
 The response to ambient pressure of fuel drop combustion with surface equilibrium.....7737
 Laminar burning velocities of chlorinated hydrocarbon-methane-air flames.....8744
 Non-one-dimensional combustion of specimens with rectangular cross section.....9743
 Development of perturbations at a detonation front.....9744
 Stable solution of nonlinear flame shape equation.....10808
 Flame propagation in vertical channels: bifurcation to bimodal cellular flames.....10809
 Strained premixed laminar flames with two reaction zones.....11825
 Effects of transport properties and flow non-uniformity on the temperature of counterflow diffusion flames.....11826
 Mixed convective burning of a fuel surface with arbitrary inclination.....11827
 Rate of ascent of a cylindrical combustion center in near-limit mixtures.....11828
 Quasi-periodic waves along a pulsating propagating front in a reaction-diffusion system.....12831
 Burke-Schumann flame with streamwise and preferential diffusion.....12832
 Measurements of the effect of elevated pressure on soot formation in laminar diffusion flames.....12833
 Diffusion combustion of liquids with a free surface...12834
 Effect of heat losses on the limits and structure of the diffusion flame formed in polymer combustion...12835
 Flame propagation rate in air suspensions of metal powders.....12836
 Gas-dynamic structure of flames near the limits of flame propagation.....12837
- 416-E Turbulent flame propagation, flammability
- Thermal structure of a flat plate turbulent boundary layer diffusion flame.....1869
 Flame structure and propagation through an interface of layered gases.....2980
 On effects due to thermal expansion and Lewis number in spherical flame propagation.....2981
 Turbulence properties of flames and their measurement.....2982
 Turbulent combustion of mixtures of hydrogen and carbon monoxide.....4132
 Stagnation point heat transfer from turbulent methane-Air flames.....6671
 Characteristic scales for density fluctuations in a turbulent premixed flame.....6672
 A coalescence/dispersion model for turbulent flame stability.....7738
 Influence of turbulence on the formation of high nonequilibrium concentrations of atoms and free radicals in diffusion flames.....7739
 Experimental study and modelling of the reactive flow in a constant section reactor.....7740
 Some experimental data on liftoff characteristics of turbulent jet flames.....8745
 Time-resolved density measurements in premixed turbulent flames.....9745
 Turbulent properties of a flat-plate boundary layer with a diffusion flame.....9746
 Effect of pressure on molecular gas properties in turbulent combustion.....9747

Formation of carbon monoxide in turbulent diffusive combustion.....9748
 Probability calculations for turbulent jet flows with mixing and reaction of NO and O.....12838
 Limiting phenomena in turbulent combustion.....12839

416-F Flame stability & stabilization

Incomplete combustion: A possible cause of combustion instability.....877
 On flame stretch.....2983
 Stability of the porous plug burner flame.....4133
 Mathematical analysis of thermal runaway for spatially inhomogeneous reactions.....4134
 The effect of fuel volatility on spray flame stabilization.....4135
 A calculation of wrinkled flames.....4136
 Secondary effects in combustion instabilities leading to flashback.....5442
 Combustion in a turbulent mixing layer formed at a rearward-facing step.....5443
 Dynamic behavior of a bluff-body diffusion flame.....5444
 Temperature characteristics of turbulent, premixed flames stabilised on a step.....5445
 Linearized unsteady flame surface approximation result in complex notation.....5446
 Flame stabilization in a layered medium.....6673
 The stability and structure of flame-bubbles.....6674
 Polyhedral flames—An exercise in bimodal bifurcation analysis.....6675
 Effect of a standing sound wave perpendicular to the flow on a turbulent flame.....6676
 Unstable regimes of thermite system combustion.....6677
 Stability of wedge combustion.....6678
 Detachment of the flame of a burning liquid by an air flow.....6679
 Linear long-wavelength stability of curvilinear stationary laminar flames.....6680
 Linear longwave stability of a cylindrical stationary laminar flame in a vortical medium.....6681
 Extinction of premixed flames by stretch and radiative loss.....7741
 Method of calculating limits of stabilization of a flame of inhomogeneous mixtures traveling over a poorly streamlined body.....7742
 Investigations on the stability and extinction of a laminar diffusion flame over a porous flat plate.....8746
 Density fluctuations in a flame in a Karman vortex sheet.....9749
 Influence of the mode structure of laser radiation on lead azide stability.....9750
 On the stability of plane and curved flames.....10810
 Expanding flames may delay the transition to cellular structures.....11829
 A review of theories currently being used to model steady plane flames on flame-holders.....11830
 Numerical modeling of one-dimensional enclosed homogeneous and heterogeneous deflagrations.....11831
 Necessary means for a fundamental study of combustion instabilities in a liquid propellant engine.....11832
 Stability of a hydrogen diffusion flame in an accompanying air flow.....11833
 Linear longwave stability of a cylindrical stationary laminar flame in a rotating medium.....11834
 Unstable combustion of samples of gas-free compositions in the form of rods of square and circular cross section.....12840
 Analysis of reacting gas flow behind a flame stabilizer in a plane channel.....12841
 Stability of the combustion of composite metallized samples.....12842
 Establishment of Deacon equilibrium in a flame.....12843
 Relation between the inhibition of the laminar diffusion flame of polymers, soot formation, and radiation.....12844
 Burning rate and stability in forechamber flame ignition in an internal-combustion engine.....12845

416-G Ionization of combustion products

Formation, growth and oxidation of soot particles under the influence of an alternating electric field. Part I, Experiments on coaxial-flow jet diffusion flames.....10811

Formation, growth and oxidation of soot particles under the influence of an alternating electric field. Part II, Experiments on the sonic sampling technique and premixed flat flames.....10812

416-H Interaction of flames & surfaces

Combustion of hydrogen at high concentrations including the effect of obstacles.....4137
 On the nonuniqueness and instability of the stationary combustion modes in the boundary layer, with strong injections.....4138
 Dynamics of gas combustion in closed vessels with various laws of flame-surface variation.....4139
 Flame zone in gas combustion in an inert porous medium.....4140
 Filtration combustion of gases.....6682
 Influence of the diameter of the heat-conducting elements on their efficiency during the combustion of condensed systems.....6683
 Thermal mechanism of destruction of the barrier of a transonic jet of combustion products of rocket fuel.....9751
 Calculation of combustion of single particles in a fluidized bed.....9752

416-I Kinetics & mechanisms

Using a global hydrogen-air combustion model in turbulent reacting flow calculations.....878
 Numerical modeling of smoke formation in soldering solid fuels by heterogeneous condensation.....2984
 Singular Langmuir-Hinshelwood reaction-diffusion problems: Strongly nonisothermal conditions.....4141
 Stability of stationary powder combustion acted on by a constant light flux.....4142
 Flames in fluids: Their interaction and stability.....6684
 Analysis of hydrocarbon emissions from conventional spark-ignition engines.....6685
 A combustion bomb study of the hydrocarbon emissions from engine crevices.....6686
 Regularities in the change of combustion characteristics for competing reactions.....6687
 Finding order in coal pyrolysis kinetics.....8747
 Approximate equation of kinetics in heterogeneous systems of the gas-condensed-phase type.....11835
 Sooting correlations for premixed flames.....12846
 Chemical kinetic modeling of hydrocarbon combustion.....12847

416-J Unsteady combustion & combustion acoustics

The temporal evolution of a system in combustion theory.....1870
 The effect of fluctuations in temperature and oxygen concentration on the lifetime of a fuel droplet.....4143
 Nonstationary combustion regimes in porous powders.....4144
 An experimental study of pulsating low pressure flames.....6688
 Mass exchange and combustion in a laminar boundary layer behind a shock wave when a detonation is propagated in unmixed two-phase systems.....6689
 Distributed combustion effects on particle damping.....7743
 An overview of combustion noise.....7744
 Ramjet rumble: The low-frequency instability mechanism in coaxial dump combustors.....8748
 Formal relaxation oscillations for a model of a catalytic particle.....8749
 Sound radiation mechanism in a turbulent gas flame.....9753
 Optimal conditions for accelerating the flame of gaseous mixtures on discrete obstacles in large volumes.....9754
 Results of a qualitative analysis of the nonstationary convective combustion equations of porous systems.....9755
 Wave disturbances of the atmosphere due to large fires.....9756
 Oscillations in fuel combustion.....9757
 Combustion-wave propagation in a thin layer of material with gas-phase reaction between fuel and oxidant.....9758

416-K Supersonic combustion

- Characteristics of supersonic combustion of unmixed gases in channels.....9759
- Initiation of fast reactions in oxidant-fuel mixtures.....9760

416-L Heterogeneous & multiphase combustion

- Nonidentity of steady conditions of combustion of gas-free mixed compositions.....9761
- Phase transitions in an inverse wave of filtration combustion.....9762
- Percolation in combustor sprays II. Width of the percolate combustion zone.....12848
- Effects of turbulence on combustion of homogeneous mixture of fuel and air in closed vessel.....12849
- Kinetics of the self-similar conditions of diffusional combustion of polydisperse liquid fuel.....12850

416-M Flame radiation

- Radiation from liquefied gas fires on water.....4145
- Laser Doppler velocimetry—Effect of refractive index change at flame front.....7745
- Energy exchanges in a medium in combustion.....8750
- Thermal radiation hazards from hydrocarbon pool fires.....12851

416-N Furnaces

- Heat exchange in gas furnaces.....1871
- Energy exchanges in a furnace. Modelling and heat balance from spectropyroscopic measurements.....8751
- Numerical study of the thermal processes in a furnace.....10813

416-O Combustors & afterburners

- Combustion characteristics of high-pressure gas-fired combustors.....879
- Experimental study of jet mixing mechanisms in a model secondary combustor.....880
- Mean flowfields in axisymmetric combustor geometries with swirl.....881
- The design and combustion performance of practical nozzles for integral rocket/ranjets.....1872
- A sensitivity study of the effect of parameters on results from an in-situ combustion simulator.....1873
- Gas turbine combustor modelling for calculating pollutant emission.....1874
- Effects of flame temperature and fuel composition on soot formation in gas turbine combustors.....4146
- Development and operating characteristics of an advanced two-stage combustor.....4147
- The combustion of coal in fluidized beds, and its application for the production of electric energy. Part I.....4148
- The combustion of coal in fluidized beds, and its application for the production of electric energy. Part II.....4149
- Design of a catalytic combustor for heavy-duty gas turbines.....5447
- Effect of using emulsions of high nitrogen containing fuels and water in a gas turbine combustor on NO and other emissions.....5448
- Burners adapted to biogas combustion.....5449
- Investigation of slurry fuel performance for use in ramjet propulsors.....6690
- Number of steady regimes of a one-dimensional flow through reactor with reactions of the autocatalytic type.....6691
- Aspects of computer simulation of liquid-fueled combustors.....7746
- Correlation of gas turbine combustor efficiency.....7747
- The Rolls-Royce annular vaporizer combustor.....8752
- Chemical and physical properties of soot as a function of fuel molecular structure in a swirl-stabilized combustor.....8753
- The effect of hydrocarbon structure upon fuel sooting tendency in a turbulent spray diffusion flame.....8754

- Temperature profile development in turbulent mixing of coolant jets with a confined hot crossflow.....8755
- Design criteria for post-combustion chambers of incinerators.....11836
- A Eulerian-Lagrangian model for turbulent combustion.....11837
- Peculiarities of the formation of the diffusion flame front in a diesel.....12852

416-P Solid fuels

- A numerical study of nonlinear instability phenomena in solid rocket motors.....882
- Single particle model for char oxidation.....4150
- Combustion phenomena of highly metallized solid propellants.....4151
- Erosion combustion of a solid fuel for various gas flow temperatures.....4152
- Erosive burning.....5450
- The effect of nonlinear heat conduction on the pressure-coupled response of solid propellants.....7748
- The role of pore structure in coal pyrolysis and gasification.....8756
- Low burning rate aluminized propellants in acceleration fields.....9763
- Theoretical study of nonsteady-state combustion of a gas-producing solid fuel upon a pressure drop.....9764
- Theoretical investigation of processes of condensed product formation during combustion of metal particles.....9765
- Combustion of ballistite powders with thermal fluctuation spectroscopy.....9766
- Universal dependence for heat liberation in the k-phase and gas macrokinetics in ballistic powder combustion.....9767
- Two-phase model of solid-fuel combustion in a fluidized bed of inert filler.....9768
- General laws of coal-particle combustion.....9769
- Acceleration and heating of a metal particle behind a detonation wave.....9770
- Experimental determination of the response of a solid propellant to high-frequency pressure oscillations.....11838
- Mechanism of transport of condensed combustion products to the surface of a burning magnesium particle.....11839
- Transient processes of combustion surface formation in solid-propellant engines with hydraulic regulation.....12853
- Role of the surface properties of dispersed carbon in its inflammation.....12854
- Ignition of high ash coal particles.....12855
- Nonuniqueness of stationary states in combustion of mixtures of zirconium and soot powders in hydrogen.....12856
- Dynamics of solid-fuel burnup in a fluidized bed of finely dispersed inert particles.....12857

416-Q Liquid fuels

- Evaporation and combustion of sprays.....2985
- Combustion of substances with a liquid reaction layer.....4153
- Droplet size effects on NO formation in a one-dimensional monodisperse spray combustion system.....5451
- Coke formation in the combustion of isolated heavy oil droplets.....8757
- Flammability limits of coal-derived low-BTU gas mixtures containing large amounts of inert gases.....8758
- Surface diffusion combustion of heterogeneous systems with liquid fuel.....8759
- Fuel droplet vaporization and spray combustion theory.....8760
- Extinction of model fuels with anomalous pressure dependence of the combustion velocity.....12858

416-R Oxidation & oxidizers

- A comprehensive chemical kinetic reaction mechanism for oxidation and pyrolysis of propane and propene.....11840
- Analysis of possible transformations of hydrocarbon ions in atmospheric-pressure propane-air flames.....11841
- Effect of the gas flow velocity on the oxygen index of polymer materials.....12859

- Combustion and detonation of hydrogen-air mixtures in free spaces.....12860
- Limit conditions of polymer material combustion in helium-oxygen and nitrogen-oxygen media.....12861
- Combustion characteristics of metallized compositions.....12862
- 416-S Flame & fire (spread & extinction)
- Transport of firebrands by line thermals.....1875
- Fire loads on mobile platforms.....1876
- Flame spread in an opposed flow with a linear velocity gradient.....1877
- Measurement of material flame spread properties.....2986
- A simplified model of flame spread in an opposed flow along a flat surface of a semi-infinite solid.....2987
- Modelling the fuel temperature effect on flame spread limits in opposed flow.....2988
- Controlling mechanisms of flame spread.....4111
- A numerical study of tunnel fires.....4154
- The detailed processes involved in flame spread over solid fuels.....4155
- Correlating downward flame spread rates for thick fuel beds.....4156
- Prediction of metal fire spread in high pressure oxygen.....4157
- Towards wind-aided flame spread along a horizontal charring slab: The steady-flow problem.....4158
- Nonsteady flame spreading in two-dimensional ducts.....5452
- Spread of a flame through a system of fuel droplets under conditions of weightlessness.....5453
- The development of hazardous conditions in enclosures with growing fires.....6692
- An investigation of steady wall-ceiling and partial enclosure fires.....7749
- Flame spreading along the surface of gelled (O/W emulsified) hydrocarbon fuel pool.....8761
- An investigation of three-dimensional fires in enclosures.....9771
- Asymptotically large area fires.....11842
- Flame spread along gelled (O/W emulsified) pool of high-volatile hydrocarbon fuel.....12863
- 416-T Combustion, flame, & fire modeling
- Low-temperature zone in a hydrocarbon-flame front. VII. Structure of the flame front in hexane with aerosol fuel injection.....4159
- Release rate model for developing fires.....4160
- On the flame-sheet assumption and flame temperature determination in combustion modeling.....6693
- Model equation for the probability distributions of the velocity and concentration during turbulent mixing and diffusion combustion of gases.....6694
- Simulation of engine combustion processes.....9772
- 416-Y Computational techniques
- Transport algorithms for methane flames.....6695
- An improved Spalding-Stephenson procedure for one-dimensional flame calculations.....6696
- Numerical simulation of unsteady laminar flame propagation via the method of lines: Further mathematical refinements and results obtained on halogen inhibition.....6697
- Stochastic calculation of laminar wrinkled flame propagation via vortex dynamics.....6698
- Numerical modeling of thermal compression of a supersonic stream by combustion.....6699
- Determining all the steady solutions of the chemical-kinetics equations using the modified exclusion method. I. Algorithm.....6700
- Determining all the steady solutions of the chemical-kinetics equations using the modified exclusion method. II. Application.....6701
- 416-Z Experimental techniques
- Spectral composition of the emission of a nonisothermal stream of combustion products.....1878
- Measurement of flows in luminous flames with photoelectron correlation laser-Doppler method.....2989
- A method for particle and gas temperature measurement in laboratory-scale, pulverized-coal flames.....2990
- Drop size and velocity instrumentation.....2991
- Correctness of mass-spectrometric probe measurements when investigating the flame structure of condensed systems.....2992
- Experimental study of external fuel vaporization.....4161
- Flame studies with the coherent anti-Stokes Raman spectroscopy technique.....4162
- Temperature and species-concentration measurements in turbulent flames by the CARS technique.....4163
- Swirl combustor flow visualization studies in a water tunnel.....5454
- Velocity and turbulence measurements in combustion systems.....5455

- Optical and probe measurements of soot in a burning fuel droplet stream.....8762
- SiO₂ coated thermocouples.....8763
- Visualization of two-dimensional nonstationary flows of combustible media.....9773
- Procedure for multiparametric investigation of the combustion of metallic particles in a freely falling chamber.....9774
- Burning of petroleum on the surface of water (large-scale experiment).....9775
- Self-propagating high-temperature synthesis by the method of x-ray diffraction analysis using synchrotron radiation.....9776
- Application of holographic interferometry methods for qualitative investigation of gasdynamic flows with chemical reactions.....9777
- Time-resolved LDV and CARS measurements in a premixed reacting flow.....10814
- Flow measurement in a swirl combustor in two cases of with and without combustion.....10815
- Acoustic imaging for local diagnostics of chemically reacting systems.....11843
- Determination of the refractive indices of soot particles from the reflectivities of compressed soot pellets.....11844
- Design considerations for aerodynamically quenching gas sampling probes.....11845
- Experimental observation of the nonuniqueness of stationary combustion in systems with parallel reactions.....11846
- New possibilities of investigating the combustion processes of condensed systems by interferometry.....12864
- 418 Prime Movers and Propulsion Devices (systems and applications)
- 418-B Fundamentals
- Acoustic signature from flames as a combustion diagnostic tool.....892
-equation for compressible reciprocating engine flows.....2993
- 418-C Performance
- Development and use of a spray combustion modeling to predict diesel engine efficiency and pollutant emissions. (Part 1. Combustion modeling).....883
- Development and use of a spray combustion modeling to predict diesel engine efficiency and pollutant emissions. (Part 2. Computational procedure and parametric study).....884
- Development and use of a spray combustion modeling to predict diesel engine efficiency and pollutant emissions. (Part 3. An analysis by the method of system-model transformation).....885
- State of the art and future trends in hydrogen-fuelled engines.....6702
- Transients and unsteady phenomena to improve the designs of hydroelectric, pumped-storage, and pumping stations.....9778

418-D Steam engines & turbines

- Thermal/hydraulic tests of tube supports in a multitube steam generator model.....5457
 Modeling considerations for the analysis of LMFR steam generator tube clamps.....5458
 Erosion prediction of steam turbine rotors.....8764
 Choice criteria of materials in high capacity steam generating plants.....11847
 A study of the formation of nitrogen oxides in combustion of a lean homogeneous mixture in an automotive gas turbine engine hybrid combustion chamber.....12865

418-E Internal combustion, positive displacement engines

- A study on diesel engines with alcohol fuels. (Engine performance with ethanol-castor oil fuel blends).....886
 Measurement of transfer time constant of effective torque in internal combustion engines.....887
 Computed and measured turbulence in axisymmetric reciprocating engines.....888
 Turbulence characteristics in internal combustion engines.....889
 A stochastic model of turbulent mixing for the prediction of burn rate in a spark-ignition engine.....1879
 Heat losses from a divided-chamber diesel engine.....2994
 The performance potential of limited cooled diesel engines.....2995
 The differential compound engine—a new integrated engine transmission system concept for heavy vehicles.....2996
 The use of gas dynamics to improve reciprocating engine performance.....2997
 Modeling and experimental determination of the axisymmetric flow in a diesel engine cylinder.....4164
 Simulation of the gas exchange process in a small two-stroke cycle engine (1st Report Theoretical treatment).....4165
 Simulation of the gas exchange process in a small two-stroke cycle engine (2nd Report Comparison between experimental and theoretical treatments).....4166
 A perspective of reciprocating-engine diagnostics without lasers.....4169
 Practical applications of the combustion rate for estimating the thermal efficiency and gas states in internal combustion engines.....6703
 Mathematical model of the vortical flow of an air charge in the cylinder of a diesel engine.....6704
 A method for measuring the gas temperature in a cylinder of internal combustion engine using a cold-wire (Examination of a method by numerical analysis).....7750
 Modeling of a turbocharger.....7751
 Temperature of exhaust gases of Diesel engines.....7752
 Storage and partial oxidation of unburned hydrocarbons in spark-ignited engines—Effect of compression ratio and spark timing.....8765
 Conditionally-sampled velocity and turbulence measurements in a spark ignition engine.....10816
 Hydrocarbon oxidation in a spark ignition engine exhaust port.....11848
 Combustion chamber design for optimum spark-ignition engine performance.....11849
 Formation and destruction of vortices in a motored four-stroke piston-cylinder configuration.....12866

418-G Gas turbines

- Combustor development for automotive gas turbines.....4167
 Longitudinal gas vibration modes in the main combustion chamber of a gas turbine engine (GTE).....4168
 An analysis of the performance of a gas turbine cogeneration plant.....5459
 Development of the transpiration air-cooled turbine for high-temperature dirty gas streams.....5460
 Steam-cooled gas turbine casings, struts, and disks in a reheat gas turbine combined cycle: Part I—Compressor and combustor.....5461
 Steam-cooled gas turbine casings, struts, and disks in a reheat gas turbine combined cycle: Part II—Gas generator turbine and power turbine.....5462

- Simplified mathematical representations of heavy-duty gas turbines.....5463
 Conversion of a heavy-duty industrial gas turbine to combined cycle.....5464
 The gas turbine heat exchanger in the fluidized bed combustor.....5465
 The design and testing of air-cooled blading for an industrial gas turbine.....5466
 RACER conceptual design.....5467
 Heat transfer characteristics for jet array impingement with initial crossflow.....7753
 Effect of location in an array on heat transfer to a short cylinder in crossflow.....7754
 Heat transfer optimized turbine rotor blades—An experimental study using transient techniques.....8766
 Full-coverage discrete hold wall cooling: Discharge coefficients.....8767
 Cooling airflow studies at the leading edge of a film-cooled airfoil.....8768
 Effect of an oscillating flow direction on leading edge heat transfer.....8769
 Unsteady approach to heat transfer in turbine blade cooling passages.....12867
 Evaluating aircraft GTE condition from the thermodynamic parameters with account for natural scatter of the state parameters.....12868

418-H Rocket motors

- Theoretical and experimental evaluation of an indoor rocket test stand.....890
 Thermal storage life of solid-propellant motors.....891
 Analysis of secondary flows for tube-launched rocket configurations.....1880
 Assessment of future solid rocket motor flight instrumentation/data needs.....2998
 Vibration and pulsation processes in feed systems of liquid rocket engines.....5468
 Application of the Saderholm erosive burning model to nozzleless solid propellant rocket motors.....7755
 Modeling slag deposition in the space shuttle solid rocket motor.....7756
 Concepts and status of laser-supported rocket propulsion.....7757
 Investigation of freejets issued from small solid-propellant rocket engines.....8770
 Dual-chamber rocket motor operating characteristics.....8771

418-I Jet & fanjet engines

- Aero engine development for the future.....2999

418-J Ramjets

- An analysis of the parameters that determine ramjet maximum thrust.....12869

418-K Nuclear power systems

- Materials development for HTGR heat exchangers.....5469
 Investigation of mass transfer between parallel streams in a two-cell rod-bundle simulator.....10817

418-L Ionic, electric, & photonic propulsion

- Thrust measurement of an ion engine system.....7758
 Absorption of electromagnetic radiation in an advanced propulsion system.....7759
 Electric thruster performance for orbit raising and maneuvering.....8772

418-N Other devices

- Shape memory heat engines.....11850

EARTH SCIENCES

450 Micromeritics

450-B Geometrical properties of solid particles

Model of variation of the specific surface area during sintering.....893

450-C Mechanical & physical properties of solid particles

Dependence of tensile strength of compacted powder bed on deformation characteristics of its granules.12870
Effect of tensile strength and tensile-breakup energy on mulling power requirement of green mold sands.....12871

450-D Communion of solids

Sintering-Theory and practice (Proceedings of the 5th International Round Table Conference on Sintering, Portoroz, Yugoslavia, September 7-10, 1981 (Materials Science Monographs, 14) (Book).....7760

450-E Statics of solid particles

The surface statistics of a granular aggregate.....894
A class of exact solutions of the equations of statics for a granular medium.....12872

450-F Dynamics of solid particles

The flow of granular materials - I. Discharge rates from hoppers.....895
The flow of granular materials - III. Rapid shear flows.....896
The flow of granular materials - II. Velocity distributions in slow flow.....1881
On the solution of plane flow of granular media for jump non-homogeneity.....4170
Grain flow as a fluid-mechanical phenomenon.....5470
A theory for the rapid flow of identical, smooth, nearly elastic, spherical particles.....5471
Kinetic theories for granular flow: inelastic particles in Couette flow and slightly inelastic particles in a general flowfield.....9779
A kinetic model for rapid flows of granular materials.....10818
Stresses developed by dry cohesionless granular materials sheared in an annular shear cell.....11851

450-G Snow motion

Experiments on mechanics of flowing snow.....897
Avalanche forecast with the method of nearest neighbours: An interactive approach.....4171
Contribution of theoretical and experimental results to powder-snow avalanche dynamics.....10819

450-H Characteristics of packings (pressured particles)

Limit plasticity approach to piping in bins.....4172

452 Porous Media

452-B Fundamentals of fluid flow

Stochastic analysis of spatial variability in two-dimensional steady groundwater flow assuming stationary and nonstationary heads.....898

Identification of the coefficients in the equations of motion for a fluid-saturated porous medium.....899
Flow of a viscous fluid through a porous medium bounded by a vertical surface.....900
Axisymmetric vertical circulation in a stratified reservoir.....901
On Volterra's boundary value problem for axial-symmetric flows with free surfaces in porous media.....902
Self-similar solution to a problem of axisymmetric motion of gas through a porous medium in the case of a quadratic law of resistance.....903
A theoretical investigation on the transport of chemicals in reactive porous media.....1882
Single waves in underground hydromechanics problems.....1883
Calculation of two-dimensional dispersion in a gas in unsteady flow in a porous medium.....1884
Vorticity of the velocity field for flow in a porous medium with random inhomogeneities.....1885
On the Riemann-Hilbert's boundary value problem, for flow through porous inhomogeneous media.....1886
Analogy between dispersion in porous media and in MHD.....4173
Viscosity renormalization in the Brinkman equation.....5472
Movement of a semipermeable vesicle through an osmotic gradient.....5473
Fluid flow through a crack network in rocks.....6705
Analysis of strong discontinuity wave in a consolidating medium.....6706
Critical angles of shock wave collision in porous media in the low-pressure domain.....6707
High-speed gas motion in a porous medium.....6708
Capillary impregnation of porous metal gauzes with liquid.....7761
Higher-order approximations for Darcian free convective flow about a semi-infinite vertical flat plate.....7762
Boundary conditions for Darcy's flow through porous media.....9780
Fluid motion in a harmonic nonhomogeneous porous medium.....9781
Effect of surface forces on fluid flow in thin pores.10820
On stability and uniqueness of fluid flow through a rigid porous medium.....11852
The permeability of a random array of parallel infinite cylindrical rods.....12873
Numerical solutions of one-dimensional self-similar problems of gas motion in a porous medium for a quadratic drag law.....12874
Question of the movement of water in concrete when it freezes.....12875
Dynamics of moving interface in porous media for power law fluids with yield stress.....12876
On the Volterra boundary value problem for axial-symmetric flow through porous media with free and seepage surfaces.....12877

452-C Seepage (including pollutants)

More detailed analysis of the effects of inertia on the filtration efficiency of granular bed filters...3000
Analysis of two-dimensional steady-state filtration into a soil layer with a strongly permeable foundation.....4174
On solutions to the initial-boundary value problem for an equation in the theory of infiltration.....6709
Numerical analysis of nonlinear steady-state seepage...7763
Probabilistic model of a retention reservoir.....9782
A finite element formulation for brine transport in rock salt.....12878
Finite element seepage flow nets.....12879

452-D Multiphase flow in porous solids

A theoretical study on G. Chavent's modelling of the secondary recovery from oil fields.....904
Effects of soil properties on overland flow and infiltration.....905
Theory of slow biphasic flows in porous media.....1887
On two phase filtration under gravity and with boundary infiltration: Application of a Backlund transformation.....1888
Two-phase displacement of non-Newtonian fluid.....3001
On a new kind of methods to solve the plane problems of two-phase flow through porous media.....3002

- Heat transfer on staggered smooth- and finned-tube bundles in fluidized-bed furnaces and in model beds.....5474
- Non-equilibrium thermodynamics in non-saturated porous media with phase change.....5475
- Mechanisms of the displacement of one fluid by another in a network of capillary ducts.....6710
- Flow of solutions containing a solid phase into a porous medium.....6711
- Displacement of oil by a solution of an active and a passive additive.....7764
- Mathematical simulation of micellar-polymer displacement of oil from flooded strata.....7765
- Steady and unsteady regimes of flow of a multicomponent sorbable mixture through porous media.....7766
- Miscible, equal mobility displacement within layered porous media. The influence of transverse dispersion.....8773
- Estimate of the residual volume of viscoplastic oil after flooding.....8774
- The flow of two immiscible fluids through porous medium.....8775
- Cyclic operation of underground gas store.....9783
- Hydrodynamic dispersion in unsaturated porous media...10821
- Modeling two-phase flow in a succession of pores.....12880

452-E Unsteady flow

- Plane progressive waves in a heat conducting fluid saturated porous material with relaxing porosity.....906
- Validity of the pseudo-steady-state approximation.....907
- The boundary correction for the Rayleigh-Darcy problem: limitations of the Brinkman equation.....1889
- Similar solutions of Brinkman equations for a two-dimensional plane jet in a porous medium.....5476
- Flow over immersed bodies and heat and mass transfer in an air-fluidized bed.....5477
- Heat transfer between a fluidized bed operating under pressure and a wall immersed in it.....5478
- Investigation of fluctuations of the heat transfer coefficients in fluidized and pulsed beds.....5479
- Heat transfer from an immersed heater to an air-fluidized bed at subatmospheric pressure.....5480
- A note on the simulation of unsteady gas flow in porous media.....6712
- Hydraulic calculations of subterranean reservoirs in regions of artificially increased rock permeability.....8776
- Flow uniformity in rock beds.....9784
- The free surface on a liquid filling a porous slab heated from its sides.....12881
- The evolution of a two-dimensional small-amplitude voidage disturbance in a uniformly fluidized bed...12882

452-F Fluidized beds

- Fluidization of an inhomogeneous granular layer in a field of centrifugal forces.....908
- Discharge of a turbulent jet in a monodisperse fluidized bed.....1890
- Statistical study of fluctuation of gas flow rate in cups in fluidized-bed processing units.....1891
- Heat transfer in a fluidized bed with allowance for the filtration component.....1892
- Convective instability of a homogeneous fluidized bed.....1893
- Heat transfer in large particle fluidized beds.....3003
- The propagation of a voidage disturbance in a uniformly fluidized bed.....3004
- A mechanistic theory for heat transfer between fluidized beds of large particles and immersed surfaces.....3005
- Computer simulation of a cold fluidized bed.....4175
- A time-dependent, reactive model of fluidized-bed chemical reactors.....4176
- Coupled gas convection and unsteady conduction effects in fluid bed heat transfer based on a single particle model.....4177
- High pressure heat transfer investigations for fluidized beds of large particles and immersed vertical tube bundles.....5481
- Heat transfer in three-phase fluidized beds.....5482

- Heat transfer around a horizontal tube in freeboard region of fluidized beds.....6713
- Solid particle mixing in a continuously operated fluidized bed reactor.....6714
- Heat transfer in large particle bubbling fluidized beds.....7767
- Heat transfer to a bayonet heat exchanger immersed in a gas-fluidized bed.....7768
- Heat exchange and hydrodynamics during boiling on a horizontal tube bundle in a fluidized bed of solid particles.....7769
- Mass transfer and combustion in fuel beds with pulsating air flow.....7770
- Simulation of vertical transport of heat and solid particles in fluidized-bed apparatus.....9785
- Optimization of horizontal tube arrangement in fluidized beds.....10822
- Pressure pulsation mechanism in a nonuniform fluidized bed.....12883
- Study of heat exchange between a model particle and a fluidized bed.....12884

452-G Elastic behavior of fluid-filled solids

- A plasticity theory for fluid-saturated porous solids.....909
- A continuum theory for fully saturated porous elastic materials.....910
- A spherical harmonic analysis of spherical suction anchors.....1894
- Inertial effects in poroelasticity.....4178
- Stressed state of a porous fluid-saturated half-space acted upon by an external distributed pressure.....6715
- The role of Terzaghi effective stress in linearly elastic deformation.....8777

452-H Dynamics of fluid-filled solids

- Stabilization of partitioned solution procedure for pore fluid-soil interaction analysis.....4179
- On the viscoelastic behaviour of a porous saturated medium.....6716
- Dynamic behaviour of saturated porous media - The generalized Biot formulation and its numerical solution.....8778
- Propagation of acoustic waves in saturated porous media.....12885

452-I Thermodynamics, heat transfer, & combustion

- Unsteady free convective flow through a porous medium.....911
- On setting up of convection currents in a rotating porous medium under the influence of variable viscosity.....912
- Three-dimensional natural convection in a confined porous medium with internal heat generation.....1895
- Matched asymptotic expansions for free convection about an impermeable horizontal surface in a porous medium.....1896
- Kinetics of isothermal evaporation of a porous or dispersed body.....1897
- Thermal convection near a partly insulated vertical flat plate embedded in a saturated porous medium.....1898
- The boundary layer regime in a porous layer with uniform heat flux from the side.....3006
- An axisymmetric model for the charging of a liquid-dominated geothermal reservoir.....3007
- Fluidized-bed firing technology - State of the art and prospects.....3008
- Study of nonlinear convection in a sparsely packed porous medium using spectral analysis.....3009
- Heat transfer in porous media heated from above with evaporation, condensation, and capillary effects.....4180
- Similarity solutions for buoyancy induced flows in a saturated porous medium adjacent to impermeable horizontal surfaces.....5483
- Nonlinear convection in a porous layer with finite conducting boundaries.....5484
- Heat and mass transfer in mixing of coaxially-flowing jets during fluidized-bed combustion of natural gas.....5485

- Heat and mass transfer in fluidized-bed heat treatment of granular silicate particles.....5486
Effects of the thermal gradient on the moisture migration in a cylindrical concrete vessel.....5487
Vertical natural convection flows in porous media: Calculations of improved accuracy.....6717
Transient free convection about a vertical flat plate embedded in a porous medium.....6718
Natural convection in vertically and horizontally layered porous media heated from the side.....6719
Unsteady free convective flow and mass transfer through a porous medium bounded by an infinite vertical limiting surface with constant suction and time-dependent temperature.....6720
MHD unsteady free convective flow through a porous medium.....6721
The Prandtl number effect in porous layer convection.....6722
Temperature distributions in packed beds with temperature dependent physical properties.....7688
Heat transfer in porous media, presented at the Winter Annual Meeting of the American Society of Mechanical Engineers, Phoenix, Ariz., Nov. 14-19, 1982 (HTD-Vol. 22) (Book).....7771
Natural convection in a vertical porous annulus.....7772
Dryout heat fluxes in particulate beds heated through the base.....7773
Multiple steady-state solutions for buoyancy-induced transport in porous media saturated with cold pure or saline water.....7774
Dispersion resulting from flow through spatially periodic porous media - III. Time-periodic processes.....7775
Modeling of the effective thermal conductivity with diffusivity of a packed bed with stagnant fluid.....8779
Natural convection in saturated porous layers with internal heat sources.....9786
The nonDarcy regime for vertical boundary layer natural convection in a porous medium.....9787
Transient heat transfer behaviors in cylindrical porous beds at relatively large Reynolds numbers.....9788
Similar solution of the problem of gas motion in a porous medium taking heat exchange into account.....9789
Pattern selection for finite-amplitude convection states in boxes of porous media.....10823
Unsteady flow through a porous medium with the presence mass transfer.....11853
Natural convection with coupled mass transfer in porous media.....11854
Non-similar boundary layer analysis of mixed convection about a horizontal heated surface in a fluid-saturated porous medium.....12886
Some related problems of filtration and heat conduction in porous bodies.....12887
Steady-state problem of local pore cooling.....12888
- 452-J Reservoir engineering (steady state)
Periodic flow of brine in the drilling hole of a salt cavern, application to the determination of its volume.....1899
The influence of integration rule accuracy on the calculation of surface subsidence by the nucleus of strain method in conjunction with a finite element reservoir simulator.....6723
The application of adaptive mesh methods to petroleum reservoir simulation.....8780
- 452-K Reservoir engineering (transient)
Vertical circulation in reservoir in case of vanishing density stratification.....7776
Collection techniques for modeling compositional flows in oil reservoirs (Lecture Notes in Engineering, no. 6) (Book).....8781
Surface selective withdrawal in sedimentation basins.....9790
Unsteady state equation of cavity well and its parameter estimation.....10824
- 452-L Flow stability
Thermal convective instabilities in a porous medium.....7777
- Heat transfer augmentation in tubular flow by twisted tapes at high temperatures and optimum performance.....8782
- 452-M Non-Newtonian fluids
Rheological behaviour effect of non-Newtonian fluids on steady and unsteady flow through a porous medium.....1900
Rheological behaviour effect of non-Newtonian fluids on dynamic of moving interface in porous media.....6724
- 452-Y Computational techniques
Control of spurious oscillations in the salt water intrusion problem.....913
Numerical solutions for solute transport in unconfined aquifers.....1901
Modelling of discontinuities through dipole distribution.....3010
Finite difference methods for two-phase incompressible flow in porous media.....3011
Exact solution of unsteady axisymmetrical two-dimensional flow through triple porous media.....5488
Numerical methods for a model for compressible miscible displacement in porous media.....5489
A frontal method based solution of the quasi-three-dimensional finite element model for interconnected aquifer systems. Steady and unsteady equations, with the E.N.S. method for fluid mass balance evaluation.....5490
Numerical solutions to some free surface flows through nonhomogeneous media.....6725
Boundary integral equation method for linear poroelasticity with applications to soil consolidation.....9791
Boundary integral equation method for linear poroelasticity with applications to fracture propagation.....9792
Modelling fluid flow in fractured-porous rock masses by finite-element techniques.....11855
- 452-Z Experimental techniques
Measurement of pulsations in heat flow on thermally loaded surfaces.....7778
- 454 Geomechanics
454-B Geomorphology
Evidence of tectonic release from underground nuclear explosions in long-period P waves.....1902
Visco-elastic interpretation of sedimentary subsidence.....3012
- 454-C Tectonics
Numerical evaluation of near-field, high-frequency radiation from quasi-dynamic circular faults.....1903
Thrust tectonics, thin skinned or thick skinned, and the continuation of thrusts to deep in the crust.....6726
The calculation of bulk strain in oblique and inclined balanced sections.....6727
Precursory surface deformation in great plate boundary earthquake sequences.....8783
Stochastic analysis of lithologic sequences: Bed thickness distribution.....11856
Application of time series analysis to the tectonic analysis of disturbed rock sequences recorded from drill hole logs with examples from the Paleozoic of Graz (Austria).....11857
Numerical simulation of the initiation of subduction at the fracture zone.....11858
Possibilities of the focused-field surface geoelectric method.....12889
Why do the patterns of geoidal undulation and those of free-air anomalies in the northwestern Pacific look alike?.....12890

- Numerical simulation of the mutual interaction
between a trench and a seamount.....12891
Double-planed structure of intermediate-depth
seismic zone and thermal stress in the descending
plate.....12892

454-D Seismology

- Mean field attenuation and amplitude attenuation due
to wave scattering.....914
A theoretical study of the radiation from small
strike-slip earthquakes at close distances.....915
High-frequency approximation to the nongeometrical
S* arrival.....916
The horizontal propagation of P waves through
scattering media: Analog model studies relevant to
long-range Pn propagation.....917
Surface waves from underground explosions with
spall: Analysis of elastic and nonlinear source
models.....918
Two methods to improve location estimates —
Preliminary results.....919
Attenuation in the Earth at low frequencies.....920
The one-dimensional inverse problem of reflection
seismology.....1904
Fundamentals of generalized rigidity matrices for
multi-layered media.....1905
A statistical model of the earthquake process.....1906
Finite element eigenfunction method (FEEM) for
elastic (SH) wave scattering.....1907
Apparent stress: An estimate of the stress drop.....1908
Two-dimensional array measurements of near-source
ground accelerations.....1909
Comparison of the effects between single and
multiple scattering on coda waves for local
earthquakes.....1910
Dispersion relation extraction by multi-trace
analysis.....1911
Joint determination of seismic velocity ratios:
Theory and application to an aftershock sequence.....1912
Digital filtering with the second moment norm.....3013
Predictive deconvolution in shot-receiver space.....3014
Numerical analysis of the 45-degree finite-
difference equation for migration.....3015
Vertical seismic profiling: Separation of upgoing
and downgoing acoustic waves in a stratified
medium.....3016
Automated analysis of marine refraction data: A
computer algorithm.....3017
Computer processing of vertical seismic profile data.....3018
Applications of operator separation in reflection
seismology.....3019
Lattice filtering applications to deconvolution of
seismic data.....3020
Fast seismic ray tracing.....5491
Effect of topography and subsurface inhomogeneities
on seismic SV waves.....5492
Elliptical anisotropy—its significance and meaning.....5493
Resolution performance of Wiener filters.....5494
Compensation of marine seismic data for the effects
of highly variable water depth using ray-trace
modeling—A case history.....5495
Propagation, reflection and transmission of waves
under initial shear stresses.....5496
Energy radiation from a spherically symmetric
homogeneous source.....6728
On the Green's functions for a layered half-space.
Part I.....6729
On the Green's functions for a layered half-space.
Part II.....6730
A specific barrier model for the quantitative
description of inhomogeneous faulting and the
prediction of strong ground motion. Part II.
Applications of the model.....6731
Generalization of Higurashi's conditions for Love
waves propagating through two welded quarter-
spaces with two surface layers on each.....6732
Preliminary results of numerical modelling of "seam-
waves".....7779
Practical application and preliminary interpretation
techniques of in-seam seismology.....7780
Influence of charge depth on the frequency content
of seismic waves.....7781
SH waves due to a point source in an inhomogeneous
medium.....8784

- Retrieval of source-extent parameters and the
interpretation of corner frequency.....8785
On an improved method to obtain the moment tensor
and depth of earthquakes from the amplitude
spectrum of Rayleigh waves.....8786
Diffraction of elastic waves by three-dimensional
surface irregularities.....8787
Wave propagation in a three-dimensional circular
basin.....8788
Nongeometric arrivals due to highly concentrated
sources adjacent to plane interfaces.....8789
The viscoelastic reflection/transmission problem:
Two special cases.....8790
A generalized reflection-transmission coefficient
matrix and discrete wavenumber method for
synthetic seismograms.....8791
The computation of seismic travel times.....8792
Scattering of plane harmonic SH wave by dipping
layers or arbitrary shape.....8793
"Instantaneous amplitudes": A new method to measure
seismic magnitude.....8794
Theoretical study of the excitation, spectral
characteristics, and geometrical attenuation of
regional seismic phases.....9793
Use of seismoscope records to determine M and peak
velocities.....9794
Seismic geohistory analysis - A case history from
the Canning Basin, Western Australia.....10825
Complex seismic trace analysis of thin beds.....10826
Anisotropy and dispersion in periodically layered
media.....10827
An experimental test of P-wave anisotropy in
stratified media.....10828
Rise times of attenuated seismic pulses detected in
both empty and fluid-filled cylindrical boreholes.....10829
Traveltime inversion of offset vertical seismic
profiles - A feasibility study.....10830
The characteristics of reflection traveltimes for
some layer models.....10831
A two-way nonreflecting wave equation.....10832
The relationship between "direct, discrete" and
"iterative, continuous" one-dimensional inverse
methods.....10833
Models for thermoelastic attenuation of waves in
heterogeneous solids.....11859
The effects of tectonic release on short-period P
waves from MTS explosions.....12893
First noise and teleseismic recordings on a new
ocean bottom seismometer capsule.....12894
Travel time(like) variables and the solution of
velocity inverse problems.....12895
Two-point ray tracing in a three-dimensional medium
consisting of homogeneous nonisotropic layers
separated by plane interfaces.....12896
Causes of compressional-wave anisotropy in
carbonate-bearing, deep-sea sediments.....12897
Seismic waves in a multi-layered elastic half space
due to a horizontally propagating vertical fault.....12898
Attenuation of seismograms obtained by the Cagniard-
Pekeris method.....12899
Structural inversion of salt dome flanks.....12900
Strains developed in the hangingwalls of thrusts due
to their slip/propagation rate: a dislocation
model.....12901
On S-wave directivity patterns.....12902

454-E Earthquake prediction

- Some probabilistic aspects of earthquake prediction.....6733
Earthquake frequency and prediction.....9795
On Rosenbluth's rule to combine the modes of
systems with closely spaced natural frequencies.....9796
Physical significance of the earthquake magnitudes
and the characteristic frequency of body-wave
spectra.....9797
The 1981 earthquake swarm off the Kii Peninsula
observed by the ocean bottom seismometer array.....12903

454-F Heat transfer aspects

- Heat flow in the Uinta Basin determined from bottom
hole temperature (BHT) data.....10834
Localized heat flow and Tertiary mineralization in
southern New Mexico.....12904

454-H Glaciology

- Rheological structure of the earth's mantle derived from glacial rebound in Laurentide.....12905

454-I Gravity

- A least-squares approach to depth determination from gravity data.....921
 Approximate method for direct interpretation of gravity anomalies caused by surface three-dimensional geologic structures.....922
 Global measurement of the earth gravity field using a gradiometric satellite.....5497
 A preliminary analysis of the NRL airborne gravimetry system.....11860
 A simple objective method for minimizing crossover errors in marine gravity data.....11861
 Microgravimetric and gravity gradient techniques for detection of subsurface cavities.....11861
 The gravity profile and its role in positioning the edge of a two-dimensional faulted structure having an arbitrary vertical variation of density.....11863

454-Y Computational techniques

- An error analysis of frequency-time analysis.....923
 Modeling some empirical vertical component lg relations.....924
 Maximum-likelihood seismic deconvolution.....925
 Improved wavenumber resolution for small arrays.....926
 On the resolution in geophysical probing using electromagnetic methods.....927
 Resistivity response of a homogeneous earth with a contained vertical conductor.....928
 Numerical methods in geomechanics, Proceedings of the NATO Advanced Study Institute, Univ. of Minho, Braga, Portugal, held at Vimeiro, Aug. 24 - Sept. 4, 1981 (Book).....3021
 Some applications of the boundary element method in geomechanics.....4181
 Predictive deconvolution and the zero-phase source.....10835
 Optimum suppression of coherent signals with linear moveout in seismic data.....10836
 Poststack estimation of three-dimensional crossline statics.....10837
 Migration of seismic data by phase shift plus interpolation.....10838
 Accommodating lateral velocity changes in Kirchhoff migration by means of Fermat's principle.....10839
 Dip-moveout by Fourier transform.....12906
 A case study of stratigraphic interpretation using shear and compressional seismic data.....12907
 A method of editing time series observations.....12908
 Accuracy of finite-difference and finite-element modeling of the scalar and elastic wave equations.....12909
 A computationally fast approach to maximum-likelihood deconvolution.....12910
 Automatic velocity analysis.....12911
 Numerical methods for the migration of constant-offset sections in homogeneous and horizontally layered media.....12912
 Butterworth dip filters.....12913
 Computing true amplitude reflections in a laterally inhomogeneous earth.....12914
 Review of elastic and electromagnetic wave propagation in horizontally layered media.....12915
 Applications of bidimensional spline functions to geophysics.....12916
 Computational experience with Marple's algorithm for autoregressive spectrum analysis.....12917
 Iterative deconvolution.....12918

454-Z Explorations & measurements

- Seismic array configuration optimization.....929
 Application of image enhancement and pattern recognition algorithms to seismic reflection data.....930
 Quantitative determination of Al₂O₃ content in bauxite-prospecting boreholes by means of neutron-activation logging.....7782
 The migration of common midpoint slant stacks.....10840

- Modeling the effect of static errors in areal seismic data caused by glacial erosion over carbonate reefs.....10841
 An analysis leading to the reduction of scattered noise on deep marine seismic records.....10842
 Radiation from a downhole air gun source.....10843
 Cross-hole seismic surveys: Applications for studying subsurface fracture systems at a hot dry rock geothermal site.....10844
 A method of determining a preferred P-wave velocity profile in a borehole using surface explosions.....11864
 Synthetic full waveform acoustic logs in cased boreholes.....11865
 Seismic vibrator control and the downgoing P-wave.....12919
 Integrated interpretation of geological and geophysical data in oil and gas exploration and prospecting.....12920
 The resonant acoustic pulser - A continuous-frequency marine seismic source.....12921

456 Earthquake Mechanics

456-B Seismicity (rates of occurrence)

- Consequences of slip rate constraints on earthquake occurrence relations.....1913
 A theoretical basis for macroseismic scales and some implications for practical work.....10845
 The MSK-78 intensity scale and seismic risk.....10846

456-C Characteristics of strong ground motion

- A specific barrier model for the quantitative description of inhomogeneous faulting and the prediction of strong ground motion. I. Description of the model.....1914
 Ground motion amplification due to elastic inclusions in a half-space.....4182
 Classification and rating of strong-motion earthquake records.....4183
 Highly accurate inversion methods for three-dimensional stratified media.....5498
 Near-field source characterization of contained nuclear explosions in tuff.....9798
 Observed variations of earthquake motion across a sediment-filled valley.....9799
 Relations between ground motions and earthquake magnitude, focal distance and epicentral intensity.....10847

456-D Geological criteria

- Effect of topography and subsurface inhomogeneity on seismic Rayleigh waves.....9800

456-E Soil-structure interaction

- Simplified dynamic analysis of buildings with basements.....931
 Shear vibration of vertically inhomogeneous earth dams.....932
 Pile foundation modelling for inelastic earthquake analyses of large structures.....1915
 Cavitation in fluid-structure response (with particular reference to dams under earthquake loading).....5499
 Frequency-independent impedances of soil-structure systems in horizontal and rocking modes.....5500
 Soil-structure interaction with Rayleigh waves.....5501
 Site-structure dependent excitations.....6734
 The influence of shear modulus and damping ratio on amplification spectrum and response spectra.....7783
 Thin-layer element for interfaces and joints.....8795
 Effect of soil-structure interaction on damping of structures.....8796
 Dynamic response of 3-D rigid surface foundations by time domain boundary element method.....9801
 On the effective seismic input for non-linear soil-structure interaction systems.....9802
 Dynamic response of twin circular tunnels due to incident SH-waves.....10848

- Soil-structure interaction effects on the steady-state response of torsionally coupled buildings.....10849
 Seismic soil-structure interaction by the superposition method.....10850

456-F Structural response

- The spatial static and dynamic analysis of tall building structures.....933
 Upgrading seismic resistance of buildings for moderate earthquake risk.....934
 Earthquake response of sea-based storage tanks.....1916
 On a problem of structural dynamics.....1917
 Vibration studies and tests of liquid storage tanks...3022
 Seismic analysis of structures with Coulomb friction..3023
 Effect of radiation damping on earthquake response of pile-supported offshore platforms.....4184
 Response of sliding structures to harmonic support motion.....4185
 Evaluation of the inelastic spectrum design method for two degree-of-freedom structures under earthquake loading.....5502
 Response of a nuclear power plant on aseismic bearings to horizontally propagating waves.....5503
 Dynamics of flexible systems with partial lift-off....5504
 Optimal seismic-resistant design of a planar steel frame.....5505
 Reliability upgrading of lifeline networks for post-earthquake serviceability.....5506
 Prediction of earthquake motion for railway structures.....5507
 A case study of the seismic response of fluid-coupled-flexible cylinders.....6735
 Suitability of synthesized waveforms for seismic qualification of equipment.....7784
 Reliability analysis of structures under seismic excitation (Part I: Response ratio of structure having bi-linear spring behavior).....7785
 Reliability analysis of structures under seismic excitation (Part II: Reliability by cumulative damage failure method).....7786
 Reliability analysis of structures under seismic excitation (Part III: Comparison of reliabilities obtained by first passage failure method and cumulative damage failure method).....7787
 Seismic analysis of a gyroscopic mechanical system...7788
 Response of sliding structures to earthquake support motion.....8797
 Seismic response of torsionally coupled base isolated structures.....8798
 Seismic design response by an alternative SRSS rule...8799
 Effects of reservoir bottom absorption on earthquake response of concrete gravity dams.....8800
 The comparative performance of seismic response spectrum combination rules in building analysis....8801
 On the application of the mode-acceleration method to structural engineering problems.....8802
 Constitutive model for concrete under dynamic loading.....8803
 Modelling hysteretic behaviour of coupled walls for dynamic analysis.....8804
 Time-dependent variance and covariance of responses of structures to non-stationary random excitations..9803
 Dynamic response of pipelines to moving loads.....9804
 Effect of epicentral direction on seismic response of asymmetric buildings.....9805
 Progressive failure for seismic reliability analysis.10851
 Influence of gravity forces in the response of framed structures to earthquake excitations.....10852
 Stochastic seismic analysis of multidegree of freedom systems.....10853
 The optimum design of a base isolation system with frictional elements.....10854
 Earthquake response of structures with partial uplift on Winkler foundation.....10855
 Analysis of rotor vibration excited by seismic wave..10856
 Earthquake response of circular column submerged in water partially.....10857
 Seismic analysis of shaft supported elevated tanks...10858
 Seismic analysis of a rotor-bearing system.....11866
 A linear mathematical model for the seismic inplane behaviour of brick masonry walls. Part 1: Theoretical considerations.....11867

- A linear mathematical model for the seismic inplane behaviour of brick masonry walls. Part 2: Determination of model parameters through optimization using experimental data.....11868
 Seismic design charts for coupled wall frame systems.11869
 Stress analysis of rectangular walls under seismically induced hydrodynamic loads.....12922

456-G Design criteria

- Deterministic seismic design procedures for reinforced concrete buildings.....935
 Lead-rubber hysteretic bearings suitable for protecting structures during earthquakes.....3024
 Building over faults: A procedure for evaluating risk.....4186
 Aseismic toughness of structures.....5508
 Effect of ground motion duration on seismic design load for civil engineering structures - Development of equivalent ground acceleration (EQA).....7789
 A proposal for an aseismic design method of equipment and piping for NPPs in a low seismicity area.....9806
 What research is needed in reliability and failure prevention in the field of anti-earthquake design of industrial facilities.....9807

456-I Tsunamis

- Numerical simulation of the 1973 Shikotan (Nemuro-Oki) tsunami.....11870

456-Y Computational techniques

- Estimation of the parameters in the modified Omori formula for aftershock frequencies by the maximum likelihood procedure.....7790
 Spatial integration of strains using finite elements..8805
 Finite element versus simplified methods in the seismic analysis of underground structures.....11871

456-Z Experimental methods

- A mechanism for generation of short-period transverse motion from explosions.....936
 Selection of shaker specifications in seismic qualification tests.....5509

458 Hydrology, Oceanography, and Meteorology

458-B Hydrology

- How to use single-parameter conceptual model in hydrology?.....7791
 A geostatistically based approach to the identification of aquifer transmissivities in Yolo Basin, California.....10859

458-C Physical oceanography (currents, waves, etc.)

- North Atlantic potential vorticity and its relation to the general circulation.....937
 A modulated point-vortex model for geostrophic, B-plane dynamics.....938
 On the effect of bathymetry in numerical storm surge simulation experiments.....939
 Orientational effects in geophysical fluid dynamics...940
 On the stability of the moments of the maximum entropy wind wave spectrum.....941
 Stability of Rossby solitons.....1918
 Some new results on statistical properties of wind waves.....1919
 Calculation of slowly varying drift forces.....1920
 Wave setup/setdown and longshore current on non-planar beaches.....1921

- The influence of a coastal headland on oceanic boundary currents.....1922
 A model of secondary upwelling over the shelf break.....1923
 Shelf similar topographies for free continental shelf waves.....1924
 Consistent balanced models in bounded and periodic domains.....1925
 Relaxation processes for internal waves in mesoscale flow.....1926
 Measurement of water particle velocities in waves.....1927
 Energy intensity of inertial waves in a sphere.....3025
 Waves and circulation driven by oscillatory winds in an idealized ocean basin.....3026
 Experimental study of the coastal thermocline height variations caused by an impulsively applied wind of limited along-shore extent.....3027
 Regimes of validity for balanced models.....3028
 The anti-cyclonic shear wave: A new geophysical wave.....3029
 Stationary waves forced by topography in a vertically sheared, stratified, rotating fluid.....3030
 Nonlinear effects on the distribution of crest-to-trough wave heights.....3031
 Effects of spectrum band width on the distribution of wave heights and periods.....3032
 Propagation of long waves into a set of parallel vertical barriers on a rotating earth.....4187
 The reflection of obliquely incident tsunamis.....4188
 Stereophotography of ocean waves.....5510
 Local properties of sea waves derived from a wave record.....5511
 The interaction of waves and a turbulent current: waves propagating against the current.....5512
 Transition of mechanically generated regular waves to wind waves under the action of wind.....5513
 Longshore motion generated on beaches by obliquely incident bores.....5514
 Normal modes of the shallow water equations for zonal wavenumber zero.....6736
 A study of entrainment at the interface in a two-layer liquid.....6737
 The relation between suspended sediments and bedload on an underwater coastal slope.....6738
 A weakly nonlinear theory of continental shelf waves.....7792
 A note on the accuracy of the mild-slope equation.....7793
 Estimation of multi-modal directional wave spectra from tri-orthogonal measurements.....7794
 A numerical experiment on nearshore circulation in standing edge waves.....7795
 Open boundaries in short wave simulations - A new approach.....7796
 A model of secondary upwelling over the shelf break. II.....8807
 Linear baroclinic instability of a nonzonal flow with special regard to thermal internal forcing.....8808
 A note on the use of two-layer models of coastally trapped waves.....8809
 Variation of the spectrum of wind ripple on coastal waters under the action of internal waves.....8810
 Topographic instability and multiple equilibria on an f-plane.....8811
 Effects of dissipation on internal waves in a contained rotating stratified fluid.....8812
 Stability and stable modes of coastal fronts.....8813
 On internal wave dynamics in the northern basin of the lake of Lugano.....8814
 Eikonal description of internal wave interactions: A non-diffusive picture of "induced diffusion".....8815
 Interaction of internal waves and turbulence in the ocean.....8816
 The physical significance of modons: Laboratory experiments and general integral constraints.....8817
 A representation for the frequency spectrum of wind-generated waves.....8818
 Group bounded long waves in physical models.....8819
 Long nonlinear waves in stratified shear flows.....9808
 Representation of double-peaked sea wave spectra.....9809
 Benthic fronts and global excess radon distribution.....9810
 Wave-island interactions about circular artificial islands.....10860
 On a free boundary problem for the equations of tidal motions.....10861
 African wave disturbances in a general circulation model.....10862
 Stability properties of cylindrically curved mean flows.....10863
 On the theory of the katabatic slope wind.....10864
 On the mechanics of the deep-water flow in the Bornholm channel.....10865
 On the response of ocean currents to atmospheric cooling.....10866
 The near-surface dynamics of coastal upwelling.....10867
 The physical oceanography of fjords.....10868
 Symmetric baroclinic instability for small Ekman numbers.....11872
 An analytical model for ice-edge upwelling.....11873
 Edge waves over a shelf: full linear theory.....11874
 The development characteristics of quasi-geostrophic baroclinic disturbances.....11875
 Long-term analysis of wave climate using short-term techniques.....12923
 458-D Heat transfer in H₂O.
 Annual oceanic heat transports computed from an atmospheric model.....1928
 A new technique for iceberg drift prediction.....8820
 Frequency locking in a periodically forced thermal two-phase oscillator.....8821
 A new approach to evaluation of the atmospheric effects on upwelling radiance from the ocean.....8822
 A real-time synoptic ocean thermal analysis/forecast system.....8823
 The heat fluxes on the inland sea in summer by the graphical bulk aerodynamic method.....9811
 Numerical analysis of the effective radiation of the sea surface.....9812
 A numerical study on cyclic behaviour of polar ice sheets.....10869
 458-E Computational techniques in H₂O.
 Formulation of a linear three-dimensional hydrodynamic sea model using a Galerkin-eigenfunction method.....1929
 ARMA algorithms for ocean wave modeling.....6739
 A method of calculating time-averaged solutions to a transport equation.....6740
 Large-scale fluctuations in a long-range integration of the ECMWF spectral model.....10870
 458-F Experimental techniques in H₂O.
 Tracer dispersal by mid-ocean mesoscale eddies. Part I. Ensemble statistics.....8824
 Structure of the vertical velocity field analyzed with a Doppler Sodar.....8825
 A scattering light probe for the measurement of oceanic air bubble sizes.....9813
 458-G Physical meteorology
 Finite-amplitude stability of a zonal shear flow.....942
 The amplification and capture of atmospheric solitons by topography: A theory of the onset of regional blocking.....943
 A water vapor-energy balance model designed for sensitivity testing of climatic feedback processes.....944
 The role of latent heat release in baroclinic waves - without B-effect.....945
 Testing subroutines solving advection-diffusion equations in atmospheric environments.....946
 Interaction of internal waves in a continuous thermocline model.....1930
 Rossby wave propagation in a barotropic atmosphere.....1931
 On the predictability of quasi-geostrophic flow: The effects of beta and baroclinicity.....1932
 A conservation law for small-amplitude quasi-geostrophic disturbances on a zonally asymmetric basic flow.....1933
 Simulations of nocturnal drainage flows by a q2t turbulence closure model.....1934
 Hill growth in a three-dimensional cloud model.....1935
 A relationship between hillstone concentration and size.....1936
 Stationary waves in the winter stratosphere: Seasonal and interannual variability.....1937

- Baroclinic instability of the summer mesosphere: A mechanism for the quasi-two-day wave?.....1938
 Global Hopf bifurcation in a simple climate model.....3033
 A turbulent energy model for geophysical flows.....4189
 A simple model for the diurnal variation of the mixing depth and transport flow.....5515
 Non-adiabatic oscillations in an isothermal atmosphere.....5516
 On a nonlinear initial boundary-value problem of meteorology.....6741
 An observational study on the amplification of planetary waves in the troposphere.....6742
 Atmospheric flows steady, periodic and non periodic.....6743
 Long-period atmospheric waves excited by a periodic source.....6744
 Parametrization of phase transitions of water in equations of deep convection.....7797
 Simulation of the quasi-steady planetary boundary layer of the atmosphere under unstable stratification.....7798
 Dimensional analysis of the equations of a multiphase atmosphere.....7799
 Low-level jet phenomena described by an integrated dynamical PBL model.....8806
 A note on the temporal evolution of Taylor columns over topography.....8826
 Unsteady convective atmospheric vortices.....8827
 On simple climate models with periodic and stochastic forcing.....9814
 Variational principles and stability of stationary flows of barotropic ideal fluid.....9815
 Downdrafts from tropical oceanic cumuli.....9816
 Simulations of regional atmospheric flows on small scale topographical models.....9817
 L current system in a multi-layer ionospheric model.....9818
 Problems with environmental data: A case study in climatology.....10871
 VHF radar observations of a Kelvin-Helmholtz instability in a subtropical jet stream.....10872
 Spectral study of wintertime kinetic energy of the northern hemisphere in the troposphere.....10873
 On low-order non-linear stochastic-dynamic systems.....10874
 Linear non-divergent mass-wind laws on the sphere.....10875
 Characteristics of northern hemisphere blocking as determined from a long time series of observational data.....11876
 The use of dynamical constraints in the analysis of mesoscale rawinsonde data.....11877
 On viscous and resistive dissipation of hydrodynamic and hydromagnetic waves in atmospheres.....11878
- 458-H Tornadoes
- Numerical simulations of tornado-like vortices.
 Part I: Vortex evolution.....8828
 Numerical simulations of tornado-like vortices.
 Part II: Two cell vortices.....8829
 Influence of certain operating and geometrical parameters on the flow structure in an air vortex.....12924
- 458-I Hurricanes
- Tropical cyclone winds: Uncertainties in Monte Carlo simulation.....8830
 Gradient height and velocity profile during typhoons.....9819
 Comparison of some ambient and typhoon instantaneous wind speed characteristics.....9820
 Wind profiles, turbulence intensities and gust factors for design in typhoon-prone regions.....9821
 Design wind speeds in regions dominated by tropical cyclones.....9822
 A further study of the tropical cyclone without parameterizing the effects of cumulus convection.....9823
- 458-J Thunderstorms
- A numerical model of surface outflows from convective storms.....9824
 Constructing mathematical models of convective clouds. Study of an intertropical squall line.....12925
- 458-K Atmospheric turbulence
- Molecular dissipation of turbulent fluctuations in the convective mixed layer. Part I: Height variations of dissipation rates.....5517
 Concentration pattern during turbulent dispersion.....8831
 Spatial structure of surface wind over the ocean.....9825
- 458-L Heat transfer in the atmosphere
- An experimental appraisal of the terms in the heat and moisture flux equations for local advection.....1939
 Theory of equilibrium temperatures in radiative-turbulent atmospheres.....1940
 The existence of Hadley convective regimes of atmospheric motion.....1941
 An analytic version of Jacchia's 1977 model atmosphere.....3034
 A few-component model study of the effects of surface thermal characteristics on the atmosphere.....6745
 Study of the Sahelian convective boundary layer in the presence of dusty conditions (the ECLATS experiment).....9826
 Prediction of surface potential temperature over complex terrain.....9827
- 458-M Atmospheric turbulence
- The theoretical distribution of wind in the planetary boundary layer with circular isobars.....947
 An error analysis of profile flux, stability, and roughness length measurements made in the marine atmospheric surface layer.....948
 Factors influencing the marine boundary layer during a cold-air outbreak.....949
 Similarity functions in the tropical marine boundary layer.....950
 Wave and turbulence structure in a disturbed nocturnal inversion.....951
 A study of multiple stable layers in the nocturnal lower atmosphere.....952
 A simple model of neutrally stratified boundary-layer flow over real terrain incorporating wavenumber-dependent scaling.....953
 Improving the eddy kinetic energy model for planetary boundary layer description.....1942
 Molecular dissipation of turbulent fluctuations in the convective mixed layer. Part II: Height variations of characteristic time scales and experimental test of molecular dissipation models.....5518
 On the influence of variations in Monin-Obukhov length on horizontal roll vortices in an inversion-capped planetary boundary layer.....5519
 Low-level wind response to mesoscale pressure systems.....5520
 Theoretical investigation of the effects of aerosol characteristics on the radiative heat transfer in the atmospheric boundary layer.....7800
 Buoyant boundary layer flows - an analogy to the Ekman spiral.....8832
 Wind flow over conical hills: Computer model results.....8833
 On wakes and the net forces produced by surface-mounted obstacles in neutrally stratified atmospheric boundary layers.....8834
 Statistical characteristics of instantaneous dense gas clouds released in an atmospheric boundary-layer wind tunnel.....9828
 Characteristics of wind profiles over complex terrain.....9829
 The influence of thermal stability and angle of incidence on the acceleration of wind up a slope.....9830
 Escarpment induced flow perturbations, a comparison of measurements and theory.....9831
 The prediction of mean wind speeds above simple 2D hill shapes.....9832
 Wind-tunnel and full-scale comparisons of mean wind flow over an isolated low hill.....9833
 The influence of model scale on a wind-tunnel simulation of complex terrain.....9834
 A new theory for rotating boundary layers.....10876
 A heat-flux history length scale for the nocturnal boundary layer.....10877

- Turbulence of vertical velocities at the coast of reclaimed land.....12926
- 458-N Air-sea interaction
- A dynamical model of storm surges along island coasts.....1943
- Wind waves generated by tropical cyclones and hurricanes.....1944
- A note on the generation of surface waves by inviscid shear flows.....6746
- Statistical analysis of slow-drift responses.....6747
- Langmuir circulations in a laboratory tank.....6748
- Possible boundary conditions in a model of the structure of the wave sublayer.....6749
- A method of including observations in a model for wind-induced wave evolution.....6750
- Computation of improved nomograms for determining drag, heat and moisture transfer coefficients above the sea surface.....7801

- Effects of mobile water on multiple-contact miscible gas displacements.....8845
- Evaluation of the salinity gradient concept in surfactant flooding.....8846
- Characterization of surfactants using a scaling law interpretation of coreflood residual oil saturation profiles.....8847
- Interpretation of well-block pressures in numerical reservoir simulation with nonsquare grid blocks and anisotropic permeability.....8848
- Neutron-induced gamma ray spectroscopy for reservoir analysis.....8849
- The analysis and deconvolution correction of natural gamma-ray logs.....9836
- Well test analysis for two-phase flow of non-Newtonian power-law and Newtonian fluids.....12931
- 500-G Solid fuel conversion to liquid/gas fuel
- Underground coal gasification cavity growth model.....4191
- A side wall burn model for cavity growth in underground coal gasification.....6760
- 500-H Heat transfer & combustion problems
- Underground coal gasification research.....6761
- Reverse in situ combustion in oil reservoirs.....8850
- RDF combustion trials in a specially designed high intensity "hot" combustion chamber.....12932

502 Nuclear Systems

502-B Dynamics & vibration aspects

- A nodal approach to nonlinear stability in nuclear reactor space dynamics.....954
 The probability of a tornado missile hitting a target.....4193
 A comparative study of combination methods used in response spectrum analysis of nuclear piping systems.....7813
 Dynamic tests of cracked pipe components.....7814
 Soil-structure interaction in explosive testing of model containments.....9837
 Analysis and test correlation of flexible and stiff piping systems.....9838
 Probabilistic methodology for turbine missile risk analysis.....9839
 Experimental studies of pipe impact on rigid restraints and concrete slabs.....9840
 Piping extreme dynamic response studies.....9841
 Dynamic behaviour of reactor structures subjected to impulsive loads.....10881

502-C Structural mechanics aspects

- Ceramics for fusion reactor applications.....955
 Stress relaxation of thermally bowed fuel pins.....956
 Progress in developing constitutive equations for inelastic design analysis.....3036
 Lifetime analysis of fusion reactor first wall components.....3037
 Combined dynamic effects of correlated load processes.....4194
 Containment vessel stability analysis.....4195
 Thermoplastic analysis of a sphere-pac fuel pin.....4196
 Analysis of impact properties of A533 steel for nuclear reactor pressure vessel by instrumented Charpy test.....5521
 Experimental studies of 4-inch pipe whip test under BWR LOCA conditions.....6762
 Overview of the use of prestressed concrete in U.S. nuclear power plants.....6763
 Neutron multiplier thermal stresses in pure fusion and fusion-fission reactor blankets.....7815
 Model tests of turbine missile impact on reinforced concrete.....9842
 Nonlinear dynamic analysis of high energy line pipe whip.....9843
 Tension tests of concrete containment wall elements.....9844
 Evaluation of calculational and material models for concrete containment structures.....9845
 Air ingress to internal concrete members of a reactor containment building during leakage rate tests.....9846
 The role of the true surface energy in understanding liquid metal embrittlement phenomenon.....9847
 Failure of graphite short bars with hemispherical seats.....12933

502-D Fracture mechanics aspects

- The opening of through-wall cracks in BWR coolant lines due to the application of severe overloads.....957
 Effects of irradiation on the iodine-induced stress corrosion cracking of CANDU zircaloy fuel cladding.....958
 Fracture mechanics analysis of stable crack growth under sustained load and instability of circumferential cracks in straight water-steam pipes.....959
 Relationships between Charpy impact shelf energies and upper shelf K values for reactor pressure vessel steels.....960
 The influence of axial end loads on critical crack length behaviour of CANDU-PHW pressure tubing.....1949
 Corrosion fatigue crack growth in reactor pressure vessel steels in PWR primary water.....3038
 Damage evaluation for structural reliability assessment.....4197
 The integral evaluation of a nozzle corner crack under thermal transient loading condition.....4198

- Fracture mechanics analysis of iodine-induced crack growth in Zircaloy-4 tubing between 500 and 700 C....4199
 On the information about fracture characteristics obtained from instrumented impact test of A533 steel for reactor pressure vessel.....5522
 Fracture assessment of a PWR pressure vessel.....6764
 Tests of spinning turbine fragment impact on casing models.....9848
 Critical parameter study of PWR primary coolant pipe leak failure using probabilistic fracture mechanics.....10882
 The restraining effect of austenitic cladding on the extension of a three-dimensional crack into the wall of a water-cooled nuclear reactor pressure vessel during a hypothetical overcooling accident.....10883
 Influence of cladding on linear elastic RPV-analysis during loss of coolant accident.....10884
 The effect of composition and radiation on the fracture of a nuclear waste glass.....10885
 On the mechanisms of environment sensitive cyclic crack growth of nuclear reactor pressure vessel steels.....10886

502-E Fluid mechanics aspects

- A new correlation for quench front velocity.....4039
 Void fraction under high pressure, low flow conditions in rod bundle geometry.....4200
 Flow limitations during transient gas release from oxide nuclear fuels.....5523
 A nonequilibrium vapor generation model for flashing flows.....7816
 Hydraulic problems connected with nuclear power plant once-through cooling systems.....7817
 Power response to the reactivity and demand changes in PWR.....7818
 Existence, uniqueness and behavior of solutions of a singular nonlinear system from fluid dynamics.....12934

502-F Fluid structure interactions

- Interactive fluid-structural dynamic problems in power engineering, presented at the Joint Conference of the Pressure Vessels and Piping, Materials Nuclear Engineering, Solar Energy Divisions (Book).....3040
 Analytical method for solving fluid-structure interactions in BWR pressure suppression pool.....4201
 Simple mixing model for pressurized thermal shock applications.....6765

502-G Transient behavior (loss of coolant accidents, etc.)

- Lower plenum voiding.....961
 Mechanical modelling of PCI with FRAGEMA and CEA finite element codes.....962
 Thermal hydraulic considerations in the design and analysis of the UK test in the Battelle/NRU experiment.....963
 Temperature coefficients for global stability in a reactor with two-temperature feedback.....1950
 MODCIR: A three-dimensional transient code used in thermal-hydraulic analyses of CANDU power reactors.....4192
 Three dimensional aspects of fast reactor containment studies.....4202
 A study of risk reduction for some mitigation features for PWRs.....4203
 Film boiling from a vertical jet of fuel entering a water pool.....4204
 Transient analysis of blowdown thrust force under PWR LOCA.....4205
 The LMFR fuel-design environment for endurance testing, primarily of oxide fuel elements with local faults.....5524
 LMFR operational and experimental in-core, local-fault experience, primarily with oxide fuel elements.....5525
 Quench front propagation during bottom reflooding of a heated annular channel.....6766
 Severity, causes and frequencies of pressure vessel thermal shock at U.S. pressurized water reactors (1963-1981).....6767

- A quantitative methodology for reactor vessel pressurized thermal shock decision making.....6768
 Load combination by partial safety factors.....6769
 Carryover characteristic during reflood process in large scale separate effects tests.....6770
 Experimental and computational thermal-hydraulic results of fluid and thermal mixing tests.....6771
 Thermostatic reactor rigs for material investigations.....7819
 Rewetting of tubes in a nuclear reactor core by means of a falling film and by a pressurized downflow.....7820
 Investigation of the thermohydraulic situation in a steam-generating tube following a loss of coolant accident (LOCA).....7821
 Numerical simulation of thermal-hydraulic transients in LMFBR piping systems.....7822
 The local air-injection loads in BWR Mark II pressure suppression containment systems.....9849
 Break opening times for axial rupture of a gas-pressurized pipe.....9850
 Boundary-layer effect on pressure variations in expansion waves.....9851
 Test results of jet discharge from a 4 inch pipe under BWR LOCA conditions.....12935
- 502-H Radiation interaction on materials
- Irradiation creep in the fusion reactor first wall.....964
 Thermomechanical behaviour of a cellular structure exposed to a high radiation flux.....965
 Theory of void swelling: Effects of continuous gas generation.....3041
 BWR mechanics and materials technology update.....4206
 Special aspects on the behaviour of PCRV under extremely high core temperature loading.....4207
 Creep cavitation in the neighborhood of stress concentrations.....6772
 Experimental checking of the kinetic failure criterion for combined cyclic and static loading in reactor irradiation conditions.....6773
 Fizika si tehnologija materialelor nucleare (Physics and technology of nuclear materials) (Book).....8851
 Numerical evaluation of the growth rate material parameters in fatigue propagation of surface flaws.....9852
 The effect of anisotropy on the ballooning of zircaloy cladding.....9853
 The iodine-induced strain rate sensitivity of Zircaloy fuel rod cladding.....10887
- 504 Geothermal Systems
- 504-D Rock mechanics aspects
- Thermoelastic analysis of a cracklike reservoir in a hot dry rock during extraction of geothermal energy.....8852
 A quantitative evaluation of two classical approximations used to predict the extent of vertical hydraulic fractures.....8853
- 504-G Heat transfer aspects
- Realization of recoverable zone from the stand point of flow lines.....4208
- 504-Z Experimental methods
- Practical applications of a versatile geothermal simulator.....8854
- 506 Solar Systems
- 506-B Radiation & other meteorological data
- Solar flux distributions from circular cylindrical concentrators.....966
- Enhancement of radiation cooling by means of reflectors.....967
 Prediction of global solar radiation from bright sunshine hours and other meteorological data.....1951
 Experimental validation of a spectral direct solar radiation model.....1952
 On the optimum exposure of flat-plate fixed solar collectors.....1953
 On the estimation of global solar insolation.....1954
 The distribution of global solar radiation over the land surfaces of the Earth.....1955
 Calculation of availability of solar energy on arbitrary plane with regard to influence of cloudiness.....3042
 Strengths and limitations of the Liu and Jordan model to determine diffuse from global irradiance.....3043
 A worldwide examination of solar beam-slope angle values.....3044
 The oblateness effect on the extraterrestrial solar radiation.....3045
 Measurements on the accuracy of pyranometers.....4209
 Statistical comparison of models for estimating solar radiation on inclined surfaces.....4210
 Algorithm for evaluating the hourly radiation utilizability function.....5526
 Dust storm simulation for accelerated life testing of solar collector mirrors.....5527
 Correlations of solar insolation and wind data for SOLMET stations.....5528
 A new look at the correlation of K_t and K_{th} ratios and at global solar radiation tilt models using one-minute measurements.....6775
 Techniques for the precise estimation of hourly values of global, diffuse and direct solar radiation.....6778
 Instantaneous flux distribution on a solar central receiver.....7823
 On correlations between beam and global radiation.....9854
 On the random nature of solar radiation.....9855
 A simple hourly all-sky solar radiation model based on meteorological parameters.....9856
 Study of the corrective factor involved when measuring the diffuse solar radiation by use of the ring method.....10889
 A simple, solar spectral model for direct-normal and diffuse horizontal irradiance.....10890
 Fourier analysis of meteorological data to obtain a typical annual time function.....10891
 Estimation of daily and monthly direct, diffuse and global solar radiation from sunshine duration measurements.....10892
 Computation of solar radiation from observations of cloud cover.....10893
 Loss-compensated radiometer.....11881
- 506-C Collectors
- The design and performance of ideal solar concentrators based on the prism-assisted cylindrical reflector.....968
 Monthly average optical efficiency of flat plate collectors.....969
 Performance simulation of regenerating type solar collectors.....970
 An approximate method for calculating the heat flux through a solar collector honeycomb.....971
 Transmittance of reflected diffuse radiation.....972
 Studies on radiation intensity distribution in the focus of compound parabolic concentrators.....973
 Transient characteristics of flat-plate solar collector.....1956
 Reduced order dynamic model of the flat-plate solar collector.....1957
 Year-round performance of an improved collector-cum-storage type solar water heater.....1958
 Transient performance of normal/reverse flat plate collector with selective absorber surface.....1959
 Study of transmittance in an evacuated flat plate collector with double cylindrical glass cover.....1960
 Heat loss coefficients and effective products for flat-plate collectors with diathermanous covers.....1961
 The multiple layer solar collector.....1962
 Heat withdrawal from multi-layer thermal trap collectors.....1963

- Geometrical effects on the performance of trough collectors.....1964
 Dish concentrators for solar thermal energy.....3046
 Buoyancy effects and the unfolding of single ended absorber tubes.....3047
 Heat extraction from single ended glass absorber tubes.....3048
 Transient performance of evacuated tubular solar collectors.....3049
 Modeling and analysis of an all-plastic flat-plate solar collector.....3050
 Solar collector durability evaluation by stagnation temperature measurements.....5529
 The effects of temperature settings on cycling rates for bang-bang controllers.....5530
 Diffuse sky measurements and determination of corrected shadow band multiplication factors.....5531
 Design and optimization of the heliothermal converter at the heat source of a THER type concentrator.....5532
 On the weathering of thin plastic films.....5533
 Buoyancy effects in the entrance region of an inclined multirectangular-channel solar collector.....5534
 Energy analysis for the performance of solar collectors.....5535
 Temperature control of line-focus solar collectors.....5536
 Transient response of flat plate solar collector for periodic solar intensity variation.....6779
 Development of a "volume heat-trap" type solar collector using a fine-particle semitransparent liquid suspension (FPSS) as a heat vehicle and heat storage medium. Unsteady, one-dimensional heat transfer in a horizontal FPSS layer heated by.....6780
 Transit theory of a tubular solar energy collector.....6781
 Effect of finite angular width of the sun on design and concentration characteristics of a Fresnel-Winston tandem concentrator system.....6782
 Performance of plastic solar air heating collectors with a porous absorber.....6783
 A general chart for sizing the collectors of solar heating systems.....6784
 Performance comparison of two-pass modified reverse flat-plate collector with conventional flat-plate collectors.....6785
 Analysis of concentrating collectors of energy from a distant point source.....6786
 Solar geometry for fixed and tracking surfaces.....6787
 Optimum mass flow rate of water in a flat plate solar collector coupled with a storage tank and an organic Rankine cycle power loop.....6788
 Energy characteristics of experimental module of cylindrical parabolic solar installation.....6789
 Analysis of a black liquid flat plate solar collector.....7824
 The effect of concentrator field layout on the performance of point-focus distributed receiver systems.....7825
 Experimental performance characterization of line-focus collectors.....7826
 Antireflection Pyrex envelopes for parabolic solar collectors.....7827
 Testing and analysis of a heat-pipe solar collector.....7828
 An analysis of a flat-plate solar collector with internal boiling.....7829
 Theoretical and experimental study of solar photoreactors.....7830
 A simple model for predicting the flux distribution through the focal plane of a multifaceted-concentrator solar furnace.....7831
 Experimental investigation of an aerosolar collector.....8855
 A contribution to the study of windowers flatplate solar collectors in unsteady state.....8856
 Temperature distribution in a solid adsorption type solar collector for refrigeration. Experimental results in an equatorial climate.....9857
 An analytical method for reflected flux density calculations.....9858
 Optimum orientation of tilting solar concentrator arrays.....9859
 A generalized method for testing all classes of solar collector-I. Attainable accuracy.....9860
 A generalized method for testing all classes of solar collector-II. Evaluation of collector thermal constants.....9861
- A generalized method for testing all classes of solar collector-III. Linearized efficiency equations.....9862
 Water-in-glass manifolds for heat extraction from evacuated solar collector tubes.....9863
 Effect of collector components on the collection efficiency of tubular evacuated collectors with diffuse reflectors.....9864
 Optical properties of an inflatable concentrator with parallel fin absorber.....9865
 Design parameters for concentrators without gap losses.....9866
 Silicon low-reflection coatings for collector covers, by a dip-coating process.....10894
 A new model of stationary concentrator formed with multiple channels having reflecting walls - Principles of construction and properties.....10895
 A compound parabolic concentrator.....11882
 The effects of unbalanced flow on the thermal performance of collector arrays.....11883
 Nongray-radiative and convective-conductive thermal coupling in Teflon-glazed, selective-black, flat-plate solar collectors.....11884
 Experimental results of pitching moment tests on parabolic-trough solar-collector array configurations.....11885
 The thermal performance of refrigerant cooled solar collectors in a solar source heat pump system.....11886
 Freeze-protection heat loss from a parabolic-trough solar system.....11887
- 506-D Heat transfer aspects
- Selection of a working fluid for an organic Rankine cycle coupled to a salt-gradient solar pond by direct-contact heat exchange.....1965
 Heat transfer characteristics of in-ground heat exchangers.....3051
 Proportioning composites for efficient thermal storage walls.....4211
 Contribution to the study of convective conditions in a horizontal flat solar converter.....5537
 A graphical method for passive building energy analysis.....5538
 Fundamentals of solar energy conversion (Book).....6774
 Investigation of heat and mass transfer processes in a subsurface regenerative gravel heat accumulator of a block solar hothouse.....6790
 Regulation of solar systems with forced circulation of the heat-transfer agent.....6791
 Convection heat loss from a cavity receiver.....7832
 Alternative energy sources III, Vol. 1-3, Solar energy, Proceedings of the Third Miami International Conference on Alternative Energy Sources, Dec. 15-17, 1980, Miami Beach, Florida (Book).....10888
- 506-E Energy storage
- Low temperature latent heat thermal energy storage: Heat storage materials.....974
 A numerical study of transient mixed convection flows in a thermal storage tank.....5539
 Thermal energy storage development for solar electrical power and process heat applications.....5540
 Buffer thermal energy storage for a solar Brayton engine.....5541
 Fluid mechanical design of a dry-cooling system thermal storage reservoir, or stratification minimization in horizontal channel flow.....5542
 Parametric sensitivity studies using paraffin wax storage sub-systems.....6792
 Solar storage systems using salt hydrate latent heat and direct contact heat exchange - II. Characteristics of pilot system operating with sodium sulphate solution.....6793
 Experimental studies of solar energy accumulation in solar hothouses.....6794
 Thermal performance of a heat storage module using calcium chloride hexahydrate.....7833
 Conductive heat transfer in salt gradient stabilized solar ponds.....7834

- Solar energy storage by reversible chemical reactions: feasibility discussion with some examples.....7835
- Feasibility study of chemical heat pumps using gas-solid and gas-suspension systems suitable for house heating.....7836
- A survey of the industrial potential for thermal energy storage systems.....9867
- Low temperature latent heat storage by reciprocal salt pairs.....10896
- An analytical study of heat exchanger effectiveness and thermal performance in a solar energy storage system with PCM.....11888
- The characteristics of the thermal energy storage in a two-compartment water tank.....11889
- Performance studies of a double glazed augmented integrated rock system.....12936
- Natural energy autonomous house with underground water reservoir.....12937

506-F Materials

- Method for the direct measurement of the emissivity of semi-transparent materials.....5543

506-G Heating (space & water)

- Long term performance of thermosyphon solar water heaters.....975
- The influence of solar and long-wave radiation on the thermal gain of a room with opaque external wall.....976
- A simple tool for the design of passive solar buildings.....1966
- A "once-through" solar water heating system.....1967
- A simplified approach for evaluating performance of a solar water heater with side losses.....1968
- Comparative study on performance of two models of solar device for melting wax during the winter season.....1969
- Transient analysis of forced circulation solar water heating system with collectors in series.....1970
- Experimental and analytical performance study of a thermosyphon water heater.....1971
- A study on the effect of enhanced heat transfer area in solar air heaters.....1972
- Analysis of passive heating concepts.....1973
- Analysis of solar sand heater.....3052
- Transient analysis of a natural circulation solar water heater with a heat exchanger.....3053
- Performance analysis of solar space heating system.....3054
- Design and performance of a roof integrated solar air heater.....3055
- Numerical optimization of a solar air heating system based on encapsulated P.C.M. storage.....4212
- Comparison of test results for flat-plate, transpired flat-plate, corrugated, and transpired corrugated solar air heaters.....5544
- The thermal performance of the two-pass, two-glass-cover solar air heater.....5545
- Performance of solar domestic hot water systems at the National Bureau of Standards—measurements and predictions.....5546
- Theoretical and experimental study of a solar water heater with heat exchange operating by natural circulation.....5547
- Design, construction and experiments on a 1 m cold room operating by an intermittent solar absorption cycle.....5548
- Verification of BLAST by comparison with measurements of a solar-dominated test cell and a thermally massive building.....5549
- Influence of collector plate temperature gradient on solar heater performance.....6776
- Effect of the baffle plate on transient performance of built-in-storage water heater.....6777
- Scaling relations for the performance of passive systems.....6795
- Analytical simulation models for solar heating system design.....6796
- A review of materials for solar heating systems for domestic hot water.....6797
- An improved design method for solar water heating systems.....6798

- Simulation of an absorption heat pump solar heating and cooling system.....6799
- Thermal analysis of a solar advanced water/steam receiver.....7837
- A rating procedure for solar domestic water heating systems.....7838
- A TRNSYS/GROCS simulation of the TECH House I ground-coupled series solar-assisted heat pump system.....7839
- Status review and prospects for solar industrial process heat (SIPH).....7840
- Analysis of a glass solar air heater.....8857
- Theoretical study of honeycomb structure collector for space heating.....9868
- Development of heat pipes for solar water heaters.....10897
- Gaussian Thermal Flux model - I. Theory.....10898
- Gaussian Thermal Flux model - II. Validation.....10899
- Design method and performance of heat pumps with refrigerant-filled solar collectors.....11890
- An evaluation of solar domestic hot water control systems.....11891
- Thermal behaviour of a building subjected to external temperature oscillations.....12938
- Winter temperature control in a non-airconditioned building with non-convective roof pond.....12939

506-H Cooling

- Performance of cross-cooled desiccant dehumidifiers...5550
- Methodology to determine cost and performance goals for active solar cooling systems.....5551
- Heat flux reduction by a flowing liquid desiccant film over the roof.....5552
- Spectral analysis of the effective temperature in passive solar buildings.....7841
- Passive cooling measurements for a concentrating photovoltaic array.....7842
- Choice of thermal energy system for solar absorption cooling.....9869
- Solar-powered/fuel-assisted Rankine-cycle power and cooling system: Simulation method and seasonal performance.....11892
- A compact low-pressure drop desiccant bed for solar air conditioning applications: Analysis and design.....11893
- Weather sensitivity analysis of solar-assisted heat pump systems.....11894
- Air infiltration and building tightness measurements in passive solar residences.....11895
- The performance of various types of regenerators for liquid desiccants.....11896

506-I High temperature applications (IPH & thermo electric)

- Optimization of static or quasi-static photovoltaic installations.....1974
- Theoretical concentration of solar radiation by central receiver systems.....4213
- Development of a point focusing collector farm system.....4214
- High-efficiency, thin-film GaAs solar cells.....5553
- A new high-temperature solar research furnace.....5554
- Analysis of a combined thermal-photovoltaic solar system based on the spherical reflector/tracking absorber concentrator.....5555
- Performance benefits of the direct generation of steam in line-focus solar collectors.....5556
- Determination of heliostat and concentrator size for solar furnace facilities.....5557
- Design and optimization of solar industrial hot water systems with storage.....6800
- Management of excess energy in autonomous photovoltaic systems.....6801
- High temperature solar gas heating comparison between packed and fluidized bed receivers—I.....6802
- On the calculation of the efficiency of a thermoelectric generator.....6803
- Development and investigation of energy characteristics of a large-scale heliostat.....6804
- Optimization of dish solar collectors.....7843
- Conversion of solar energy by a thermoelectrochemical process: A thermocell with circulation of electrolyte and with hybrid cycles of hydrogen generation.....7844

- Evaluation of air-cooled central receivers.....7845
 Estimating loss-of-power probabilities of stand-alone photovoltaic solar energy systems.....9870
 Direct coupling of photovoltaic power source to water pumping system.....10900

506-J Other thermal applications (solar ponds, distillation, etc.)

- Shallow solar pond: State-of-the-art.....977
 A parametric study on solar ponds.....978
 Thermal model of a cylindrically symmetric solar pond.....979
 Coal gasification using solar energy.....980
 Constant flow solar pond collector/storage system.....1975
 Linear stability analysis of double-diffusive solar pond.....1976
 Transient analysis of double basin solar still.....1977
 Theoretical study of tilted solar still as a regenerator for liquid desiccants.....1978
 Analytical model of solar pond with heat exchanger.....1979
 Reduction of surface mixing in solar ponds by floating rings.....1980
 Optimal water cost from solar-powered multieffect distillation.....3056
 Desalination of brackish water with thermally regenerable ion-exchange resin using a solar pond...3057
 A wind-mixed layer model for solar ponds.....4215
 Thermal performance predictions and sensitivity analysis for a parallel flow solar regenerator.....5558
 Effect of dye on the performance of a double basin solar still.....6805
 Solar pond design and cost analysis.....6806
 Single basin solar still coupled with flat plate collector.....6807
 Thermal model of solar swimming pools.....6808
 Solar thermal engine systems using two stage concentrators.....6809
 Heat exchange from solar capturing to storage: Research of a system with the utmost flexibility - Part 3.....6810
 Assessment of generic solar thermal systems for large power applications.....7846
 A reciprocating solar-heated engine utilizing direct absorption by small particles.....7847
 A numerical model to describe the layer behavior in salt-gradient solar ponds.....7848
 A halo-thermal simulation of the Dead Sea for application to solar energy projects.....7849
 Effects of friction and extraction on the stability of solar ponds.....7850
 Simulation of a solar pond with a stratified storage zone.....7851
 Numerical simulation of the performance of a salt-gradient solar pond.....7852
 Oscillatory motions in the nonconvective layer of a solar pond.....7853
 In situ measurement of solar pond density profiles.....7854
 Design and testing of a plastic bubble-film covered shallow solar pond.....7855
 Use of concentrated solar energy for wood and heavy oils pyrolysis.....7856
 Treatment of solids at high temperature in fluidized-bed solar reactors. Application to dolomite decarbonation.....7857
 Observations of the transmittance in two solar ponds..7858
 Analysis of solar-dehumidification drying.....9871
 Thermal performance of built in storage water heaters (or shallow solar ponds) in series.....9872
 On solar ponds: Critique, physical fundamentals and engineering aspects.....11897
 Solar distillation of pond (muddy) water.....12940
 Influence of kind of raw materials used for industrial production of alcohol on air and water pollution.....12941
 Long term performance of large scale solar water heating systems: Forced circulation mode.....12942
 Reflecting bottom solar pond.....12943

508 Wind Energy Systems

508-B Physical modeling

- Windpower, A handbook on wind energy conversion systems (Book).....981
 Some aspects of fluctuating vertical wind shears.....982
 Modular simulation model for a wind turbine system....3058
 Difficulties in using power laws for wind energy assessment.....3059
 Modern developments in wind engineering: part 4.....5561
 Studies on the dynamic characteristics of the horizontal shaft wind turbine.....7859
 An analytical study of a hybrid wind-passive solar system.....9873
 Actuator-disc theory for vertical-axis wind turbines..9874
 Prediction of the maximum power coefficient of a tornado-type wind-energy system.....9875
 A semiquantitative explanation of the observed ventisphère phenomenon.....11898

508-C Wind machinery

- On the rotary wing concept for jet stream electricity generation.....983
 Mean flow energy content of boundary layer downstream of vertical-axis wind-turbine simulators.....984
 Aerodynamic tests of Darrieus wind turbine blades.....985
 Numerical study of the performance of tornado-type wind energy systems.....986
 Pitch control system for large-scale wind turbines....987
 Transformation of wind energy by a high-altitude power plant.....3060
 Optimization of Darrieus turbines with an upwind and downwind momentum model.....3061
 Comparison of NACA 6-series and 4-digit airfoils for Darrieus wind turbines.....3062
 Optimizing a tandem disk model.....3063
 Aerodynamic analysis of the Darrieus rotor including secondary effects.....4216
 Power coefficient of a Savonius rotor.....4217
 Fixed wake theory for vertical axis wind turbines.....5559
 Blade configurations and performance of the Savonius rotor with application to an irrigation system in Indonesia.....5560
 Performance of wind turbines in a turbulent atmosphere.....6811
 Predicted and experimental aerodynamic forces on the Darrieus rotor.....7860
 Performance of propeller wind turbines.....7861
 Optimum propeller wind turbines.....7862
 Size effects in DAWT innovative wind energy system design.....7863
 Design, performance, and economics of 50-kW and 500-kW vertical axis wind turbines.....7864
 Performance of tornado-type wind turbines with radial inflow supply.....7865
 Power coefficient of tornado-type wind turbines.....7866
 The performance of biplane Wells turbine.....7867
 Method for estimating the aerodynamic coefficients of wind turbine blades at high angles of attack.....7868
 Optimum-configuration studies and prototype design of a wind-energy-operated irrigation system.....8858
 Minimum induced loss windmills and propellers.....9876
 Experimental research on gyromill type vertical axis wind turbine using a sailing.....9877
 On the design of horizontal axis two-bladed hinged wind turbines.....11899
 Tethered wind systems for the generation of electricity.....11900
 Performance testing of small interconnected wind systems.....11901
 Tester excursions of a two-bladed horizontal-axis wind-turbine rotor in a turbulent velocity field...12944
 Momentum analysis of wind energy concentrator systems.....12945

508-Y Computational techniques

- Application of the James-Stein estimator to extreme wind speeds.....988

510 Ocean Energy Systems

510-B Wave energy utilization

- Theoretical analysis of wave energy converter consisting of three floating bodies.....989
 Wave power absorption by a small body moving in surge.....990
 The low-frequency limit for wave-power systems.....991
 The Schlömilch matrix in wave power theory—Facts and conjectures.....992
 Wave energy losses in intermediate depths.....5562
 Peristaltic pumping in water waves.....7870
 Performance of small-scale tidal power plants.....7871
 Available ocean wave power and prediction of power extracted by a contouring raft conversion system....8859
 The experimental and theoretical evaluation of a twin-flap wave-energy absorbing device.....8860
 Wave energy conversion with an oscillating water column on a fixed offshore platform.....8861

510-D Thermal gradient utilization

- A regional comparison of solar, heat pump, and solar-heat pump systems.....993
 Ocean thermal energy conversion: Historical highlights, status, and forecast.....3064
 Bubble nucleation and growth in open-cycle OTEC subsystems.....5563
 Vapor/droplet coupling and the mist flow (OTEC) cycle.....5564
 An experimental investigation of OC-OTEC direct-contact condensation and evaporation processes.....7872
 On the selection of fin profiles for OTEC plate-fin evaporators.....8862
 Performance of the heat exchangers of a 100-kW (gross) OTEC plant.....11902
 Mathematical simulation of ocean thermal energy conversion seawater systems.....11903
 Inverted vertical spout evaporators for open cycle ocean thermal energy conversion.....11904

512 Energy Distribution and Storage Systems

512-B Pipeline technology

- Nonlinear stress analysis of offshore pipelines during pickup operations.....4218
 Stresses in buried conduits caused by freezing front.....4219
 Study of variable flows in natural gas transport networks.....7873
 The hydraulic transport of coarse coal at high concentration.....8863
 Long distance pneumatic transportation.....10901
 Pneumatic transport of hazardous materials.....10902
 Electrostatic effects in pneumatic transport: Assessment, magnitudes, future direction.....10903
 Minimum energy pneumatic conveying. I. Dilute phase..10904
 Minimum energy pneumatic conveying. II. Dense phase..10905
 Analysis of contact-load distribution and application to deposition limit in horizontal pipes.....11905
 Wall erosion in slurry Couette flow.....11906
 Erosion of concentrated slurries in turbulent flow.....11907
 Simplified optimum-cost design of a slurry pipeline along a given route.....11908
 Factors affecting the potential of galvanostatically polarised pipeline steel in relation to SCC in CO₂-H₂O solutions.....11909

512-C Liquefied natural gas transport technology

- Looping requirements in natural gas transmission lines—Equivalent diameter approach.....994
 Modelling of high-pressure gas transmission lines.....1981

512-H Thermal energy storage

- Heat pumps—Applications for heating conservation and heat recovery.....4220
 Transient behavior of a rock-bed thermal storage system subjected to variable inlet air temperatures: Analysis and experimentation.....5565
 Geothermal district heating using existing potable water piping systems.....6812
 Mixing characteristics of water masses in cooling ponds (2. Fluctuations of current velocity, turbulent momentum and heat fluxes, coefficients of eddy viscosity).....9878
 Mixing characteristics of water masses in cooling ponds (1. Pontoon platform for hydronothermal monitoring and preliminary data of monitoring).....9879

514 Environmental Fluid Mechanics

514-B Architectural aerodynamics

- Gas dispersion near a cubical model building. Part I. Mean concentration measurements.....995
 Formulae for optimum drift resistance of outrigger braced tall building structures.....996
 Gas dispersion near a cubical model building. Part II. Concentration fluctuation measurements.....3065
 Wind loads on wind-permeable building facades.....4221
 Influence of the ratio of building height to boundary layer thickness and of the approach flow velocity profile on the roof pressure distribution of cubical buildings.....4222
 Wind loading of flat roofs with and without parapets..4223
 Wind tunnel studies on a dome in turbulent boundary layers.....4224
 Dynamic response under wind of a cylindrical air-supported structure.....4225
 Wind loads on film plastic greenhouses.....4226
 Wind action and temperature difference effects on the ventilation rate and internal pressure of two communicating low-rise buildings.....4227
 Interference effects on the response of a tall building model.....4228
 Surface flow field around three-dimensional bluff bodies.....4229
 Inhibition of downwash of effluent from a triple-flue stack.....4230
 Wind tunnel tests on model crane structures.....5566
 Numerical modelling of wind flow over buildings in two dimensions.....6813
 Wind microclimate around buildings: Characteristics and control.....8864
 Pressure fluctuations on a square building model in boundary-layer flows.....8865
 A parametric study of extreme pressures for the static design of canopy structures.....8866
 Measurements of wind loads on full-scale film plastic clad greenhouses.....8867
 Parameters characterising dispersion in the near wake of buildings.....8868
 Effects of permeability on wind loads on pitched-roof buildings.....8869
 On the behaviour of open-topped oil storage tanks in high winds. Part I. Aerodynamic aspects.....8870
 The effect of uncertainties in wind load estimation on reliability assessments.....9880
 Pressure response inside double glazed windows.....9881
 A study of a probabilistic model of wind induced ventilation.....9882
 Non-linearity of pressure differentials induced by wind and mechanical ventilation.....9883
 Turbulence characteristics of wind flow at ground level in built-up area.....9884
 Development of velocity and shear stress distributions in the wake of a porous shelter fence.....9885
 The turbulent kinetic energy budget behind a porous barrier: An analysis in streamline co-ordinates.....9886
 The relationship of reliability to wind loading.....9887
 Wind induced torque on square and rectangular building shapes.....9888

- Pressure fluctuations on square prisms -
 Applicability of strip and quasi-steady theories....9889
 Large models of low rise buildings loaded by the
 natural wind.....9890
 Scale effects in wind tunnel testing of low
 buildings.....9891
 Laboratory simulation of tornadoic wind loads on a
 rectangular model structure.....9892
 Analysis of the forced ventilation in containership
 holds.....11910
 Effect of frequency response on peak pressure
 measurements.....12946

514-C Dynamic response of structures (buffeting, vortex excitation, etc.)

- Across-wind vibrations of structures of circular
 cross-section. Part I. Development of a
 mathematical model for two-dimensional conditions....997
 Across-wind vibrations of structures of circular
 cross-section. Part II. Development of a
 mathematical model for full-scale application.....3066
 Whirl flutter analysis of a horizontal-axis wind
 turbine with a two-bladed teetering rotor.....3067
 Damping of structures due to soil-structure
 interaction.....4231
 Unsteady aerodynamics and vortex induced aeroelastic
 instability of a structural angle section.....4232
 Further studies of wind-induced vibrations of
 grouped stacks.....4233
 Investigation of ground wind conditions produced by
 staggered sets of 'slab' type tower buildings.....8871
 Oscillation of chimneys: Induced by vortex shedding or
 self-excited?.....9893
 Aeroelastic interference effects between slender
 structures.....9894
 Response of steel chimneys with added damping.....9895
 Measurement and application of the aerodynamic
 admittance function for a box-girder bridge.....9896
 Pressure distribution measurements for wind induced
 vibrations of box girder bridges.....9897
 Control of wind-induced vibrations of cable-stayed
 bridges.....9898
 Wind tunnel experiments on the effects of turbulence
 on the aerodynamic behaviour of bridge road decks.....9899
 Estimation of conductor vibration amplitudes caused
 by aeolian vibration.....9900
 On vortex locking-on phenomenon for a cable in
 linear shear flow.....9901
 Role of damping in wind induced excitation of towers.....9902
 Nonlinear dynamic analysis of compliant offshore
 platforms subjected to fluctuating wind.....9903
 Effect of tuned mass dampers on wind induced
 response of tall buildings.....9904
 On classification of vortex-induced oscillation and
 its application for bridge structures.....9905
 Reliability of gust response prediction considering
 height dependent turbulence parameters.....9906
 Analytical estimation of the alongwind response of
 structures.....9907
 Control of tall buildings response by aerodynamic
 appendages.....9908
 An investigation on the response of pretensioned
 one-way type suspension roofs to wind action.....9909
 Wind tunnel studies of cable roofs.....9910
 Vibration characteristics of a cooling-tower shell.....9911
 A cable-damper system for preventing wind-induced
 oscillations of suspension-bridge towers during
 erection.....9912
 Wind loads on low-rise buildings: a review of the
 state of the art.....10906
 Model for predicting the acrosswind response of
 buildings.....10907
 The flowage - laboratory tests of a novel renewable
 energy device for flowing water.....11911
 Effect of a damper on the wind-induced oscillations
 of a tall mast.....12947
 Vibrations and aerodynamic stability of a
 prestressed pipeline cable bridge.....12948

514-D Air dispersion

- Industrial air pollution engineering (Book).....3068

- Markov chain simulations of vertical dispersion from
 elevated sources into the neutral planetary
 boundary layer.....4234
 Near-field dispersion from instantaneous sources in
 the surface layer.....5567
 The zone of flow establishment for plumes with
 significant buoyancy.....6814
 Steady self-similar turbulent plume above a point
 source of heat and water.....6815
 An LPG pipeline break flow model.....6816
 Condensation and coagulation of aerosol particles in
 the decay phase of the stratospheric aerosol layer
 after the volcanic eruption.....6817
 Analysis of descriptive statistics of the air-
 pollutant and meteorological-parameter
 concentration fields in heavily industrialized
 cities.....7874
 A review of the dispersion of liquefied petroleum
 gas in the atmosphere.....9913
 Measuring the distribution of plume concentration
 and an experimental study of its mathematical
 model.....9914
 Dispersion of discrete particles by continuous
 turbulent motions. Extensive discussion of the
 Tchen's theory, using a two-parameter family of
 Lagrangian correlation functions.....10908
 Turbulent dispersion from an elevated line source:
 measurements of wind-concentration moments and
 budgets.....10909
 Carbon monoxide modeling for urban air quality
 management.....11912
 Scalar dispersion in model building wakes.....12949
 Enhanced dispersion in oscillatory flows.....12950
 Temperature-field structure within atmospheric
 buoyant thermals.....12951

514-E Water dispersion

- Experiments with scale models of oil collectors for
 subsea well blowouts.....998
 An asymptotic theory for dispersion of reactive
 contaminants in parallel flow.....4235
 Dispersion by randomly varying currents.....4236
 Effect of boundary absorption upon longitudinal
 dispersion in shear flows.....5568
 The dependence of shoreline contaminant levels upon
 the siting of an effluent outfall.....5569
 Longitudinal dispersion coefficients for varying
 channels.....5570
 The contraction of contaminant distributions in
 reversing flows.....5571
 Field-flow fractionation.....5572
 Gravity currents produced by instantaneous releases
 of a heavy fluid in a rectangular channel.....6818
 Temporal moments at large distances downstream of
 contaminant releases in rivers.....9915
 The dispersion of solute from time-dependent
 releases in parallel flow.....10910
 Contaminant dispersion in some time-dependent
 laminar flows.....11913
 A general stochastic model for predicting BOD and DO
 in streams.....11914
 Diffusion of a passive contaminant issued from a
 line source by a turbulent flow: the effect of a
 imposed uniform distortion.....11915
 A new approach to predicting the dispersion of a
 continuous pollutant source.....12952

514-F Snow & ice mechanics

- Viscoelastic solid relations for the deformation of
 ice.....999
 Thermal response of unconfined ice shelves to
 climatic conditions.....1000
 Scattering of visible and near infrared radiation by
 NaCl ice and glacier ice.....4237
 Deformation within polar ice sheets: An analysis of
 the Byrd Station and Camp Century borehole-tilting
 measurements.....4238
 The relationship between creep and strength behavior
 of ice at failure.....4239
 A comparison of two sea ice trajectory models with
 AIDJEX observations.....6819

Limit analysis of ice sheet indentation.....	6820
Sample preparation techniques and compression apparatus for ice flow studies.....	8872
Requirements for modeling of a snowdrift.....	8873
The time and strain required for development of minimum strain rates in ice.....	8874
Ice crystallographic and strain rate changes with strain in compression and extension.....	8875
On the transport of moisture in polythermal glaciers..	8876
Model for heave and settlement predictions in discontinuous permafrost.....	8877
A computer-based simulation of ice-breaking by impact.....	8878
The effect of stress application rate on the creep behavior of polycrystalline ice.....	8879
Strain patterns in an ice cap and implications for strain variations in shear zones.....	8880
Influence of non-uniform temperature distribution on the steady motion of ice sheets.....	9916
Ice action on two cylindrical structures.....	10911
Creep model of ice for monotonically increasing stress.....	10912
Flexural strength and fracture toughness of sea ice..	10913
The mechanism of repeated-segregation for the formation of thick layered ground ice.....	10914
The cohesive and adhesive strength of ice.....	10915
Possibility of estimating the stress-strain state of an ice sheet on the basis of the characteristics of a probe pulse.....	11916
An investigation of the failure envelope of granular/discontinuous-columnar sea ice.....	12953
Development of a uniaxial ice tensile specimen for low temperature testing.....	12954
Electromagnetic properties of sea ice.....	12955
Euromech Colloquium 172: Mechanics of glaciers, Interlaken, 19-23 September, 1983, (Review).....	12956

514-Y Computational techniques

Analysis of multi-correlated wind-excited vibrations of structures using the covariance method.....	5573
Selection of local peak pressure coefficients for wind tunnel studies of buildings.....	9917

516 Mechanics of Hazardous Waste Containment and Disposal

516-B Storage/disposal concepts

Design and operation of a versatile pollution control/liquid waste thermal destruction system with maximum energy recovery.....	6821
Direct cobarburing of unprepared municipal solid waste and sludge.....	6822

BIOSCIENCES

550 Biomechanics

550-B Skeletal systems, joints, ligaments, etc.

Analysis and measurement of lumbar trunk loads in tasks involving bends and twists.....	1001
Experimental investigation in biomechanics with regard to development of endoprostheses.....	1002
Electro-mechanical remodeling of bones.....	1003
The assessment of in vivo bone condition in humans by impact response measurement.....	1982
The use of ligament efficiency to model fenestrations in the internal elastic lamina of cerebral arteries. I—Modelling scheme.....	1983
The use of ligament efficiency to model fenestrations in the internal elastic lamina of cerebral arteries. II—Analysis of the spatial geometry.....	1984
Strain measurement in the medial collateral ligament of the human knee: An autopsy study.....	1985
On the foundations of biomechanics.....	3069
Morphometrical studies on the symmetry of the human knee joint: Femoral condyles.....	3070

Stresses in Harrington distraction rod: Their origin and relationship to fatigue fractures in vivo.....	4240
Monitoring fracture site properties with external fixation.....	4241
An analytical technique for modeling knee joint stiffness - Part II: Ligamentous geometric nonlinearities.....	4242
Tension-torsion characteristics of the canine anterior cruciate ligament - Part I: Theoretical framework.....	4243
Cycle-dependent and time-dependent bone fracture with repeated loading.....	4244
Pre-collapse stress redistributions in femoral head osteonecrosis - A three-dimensional finite element analysis.....	4245
Effect of rotation in the lubrication of a short porous journal bearing: A simple model for hip joints.....	4246
In vitro contact stress distributions in the natural human hip.....	4247
Mathematical modeling of the stress-strain-strain rate behavior of bone using the Ramberg-Osgood equation.....	4248
Effect of the deformation rate on the nature of compound bone tissue fracture.....	4249
Tension-torsion characteristics of the canine anterior cruciate ligament - Part II: Experimental observations.....	4250
A model for studying the stress-field around simple fractures in human patella.....	5574
Simultaneous quantitation of knee ligament forces.....	6823
Surface remodeling of bones induced by intra-medullary nailing.....	6824
In-vitro measurement of static pressure distribution in synovial joints - Part I: Tibial surface of the knee.....	6825
In-vitro measurement of static pressure distribution in synovial joints - Part II: Retropatellar surface.....	6826
Age-dependent influence of strain rate on the tensile failure of rat-tail tendon.....	6827
The mechanical properties of human tibial trabecular bone as a function of metaphyseal location.....	6828
The mechanical characteristics of cancellous bone at the upper femoral region.....	6829
A dynamometer for the measurement of the extension torque of the lower leg during static and dynamic contractions of the quadriceps femoris muscle.....	6830
Multiaxial strength characteristics of trabecular bone.....	6831
Bone stress in the horse forelimb during locomotion at different gaits: A comparison of two experimental methods.....	6832
Some mechanical properties of goose femoral cortical bone.....	6833
Fourier analysis of ground reaction forces in normals and patients with knee joint disease.....	6834
The effects of composition, structure and age on the torsional properties of the human radius.....	6835
Dynamic simulation of the leg in torsion.....	7875
Finite element studies of some juxta-articular stress changes due to localized subchondral stiffening.....	7876
Fracture mechanics of bone—The effects of density, specimen thickness and crack velocity on longitudinal fracture.....	7877
Three-dimensional response of a lumped parameter head-neck model due to impact and impulsive loading.....	8881
Mechanical response of a simple finite element model of the intervertebral disc under complex loading.....	8882
Analysis of compressive creep behavior of the vertebral unit subjected to a uniform axial loading using exact parametric solution equations of Kelvin-solid models - Part I. Human intervertebral joints.....	8883
Analysis of compressive creep behavior of the vertebral unit subjected to a uniform axial loading using exact parametric solution equations of Kelvin-solid models - Part II. Rhesus monkey intervertebral joints.....	8884
On the specification of joint configurations and motions.....	8885
Evaluation of bone cement failure criteria with applications to the acetabular region.....	8886

- Non-invasive measurement of long bone cross-sectional moment of inertia by photon absorptiometry.....10916
 Fracture of human femoral bone.....10917
 Is bone a Cosserat solid?.....10918
 Study of friction process in hip joint endoprosthesis.....10919
 Structural features of human tubular bones relative to ultrasound measurements.....10920
 A review of biomechanical models.....11917
 Strain topography of human tendon and fascia.....11918
 The gaits of bipedal and quadrupedal animals.....11919
 A continuous wave technique for the measurement of the elastic properties of cortical bone.....11920
 An in-vitro study of the kinematics of the normal, injured and stabilized cervical spine.....11921
 The relationship between elastic properties and microstructure of bovine cortical bone.....11922
 Architectural changes in the proximal femur following prosthetic insertion: Preliminary observations of an animal model.....11923
 Model for static lifting: Relationship of loads on the spine and the knee.....11924
 Comparison theorems and similarity solution approximations for a nonlinear diffusion equation arising in the study of soft tissue.....12957
- 550-C Muscle mechanics
- A new approach to the human muscle model.....1986
 Mechanical properties of a single equivalent muscle producing forearm supination.....1987
 Stresses in the closed mitral valve: A model study.....1988
 Tendon excursion and moment arm of index finger muscles.....4251
 Invariance of ankle dynamic stiffness during fatiguing muscle contractions.....6836
 Correlation of myoelectric activity and muscle force during selected cat treadmill locomotion.....6837
 Compressibility and constitutive equation of arterial wall in radial compression experiments.....7878
 Passive stiffness of rat cardiac myocytes.....7879
 Muscle pathway geometry in the heart wall.....8887
 A computerized mathematical model for studying nonlinear functional characteristics of skeletal muscle activity.....10921
 Mechanical properties of human tendon and their age dependence.....11925
- 550-D Kinesiology
- Impulse and moment of impulse in the leg joints by impact from kicking.....4252
 Error analysis of a system for measuring three-dimensional joint motion.....4253
 A joint coordinate system for the clinical description of three-dimensional motions: Application to the knee.....4254
 Leg motion analysis during gait by multiaxial accelerometry: Theoretical foundations and preliminary validations.....6838
 Fiber stabilization of bent cylinders, with an application to intervertebral disks.....6839
 Quantitative gait evaluation of hip diseases using principal component analysis.....6840
 Mechanics of gliding in birds with special reference to the influence of the ground effect.....6841
 Head orientation measured with a video system.....8888
 Analysis of stress transmission in skulls by photoelastic coatings.....9918
 Linear approximations for swing leg motion during gait.....11926
- 550-E Mechanical properties of tissues & blood
- A method for analysis of bending and shearing deformations in biological tissue.....1004
 A nonlinear diffusion equation arising in the study of soft tissue.....1005
 A large deformation analysis for aortic walls under a physiological loading.....1006
 On relationship between bulk modulus and relative volume of lung during inflation-deflation maneuvers.....1989
- Model experiments to study the stress distributions in a seated buttock.....3071
 The elastic behavior of the urinary bladder for large deformations.....3072
 Positional variations in fracture toughness, stiffness and strength of descending thoracic pig aorta.....3073
 Elastic and viscoelastic material behaviour of fresh and glutaraldehyde-treated porcine aortic valve tissue.....3074
 Poisson's ratio and incompressibility.....4255
 The dynamic mechanical properties of human skin in vivo.....4256
 The mechanical properties of porcine aortic valve tissues.....4257
 Three-dimensional stress distribution in arteries.....6842
 Measurement of effective peripheral bronchial cross section from single-breath gas washout.....6843
 Analysis of the passive mechanical properties of rat carotid arteries.....6844
 Thermal regulation mechanisms and their effect on rheology of whole blood.....7880
 Analysis of the water permeability of human granulocytes at subzero temperatures in the presence of extracellular ice.....8889
 Constitutive equations for the lung tissue.....8890
 Parameter sensitivity analysis and improvement of a two-layer arterial wall model.....8891
 A simple method for testing the effects of reagents on the mechanical properties of sheets of connective tissues.....10922
 A new clamping and stretching procedure for determination of collagen fiber stiffness and strength relations upon maturation.....10923
 Measurement of the fracture toughness of extensible connective tissues.....10924
 Incremental formulations in vascular mechanics.....11927
 A continuum theory and an experiment for the ion-induced swelling behavior of articular cartilage.....11928
 Relaxation and creep quasilinear viscoelastic models for normal articular cartilage.....11929
 An analysis of the unconfined compression of articular cartilage.....11930
 Histological staining as a measure of stress in collagen fibers.....11931
 Elastic properties of arteries and their influence on the cardiovascular system.....11932
 Viscoelastic properties of proteoglycan subunits and aggregates in varying solution concentrations.....11933
 Detectability of gas bubbles in blood by the ultrasonic method.....11934
- 550-F Organs
- Performance studies on a fluidic heart pump.....6845
 Ventilation inhomogeneity: Alveolar mechanics and gas distribution.....6846
 Estimation of respiratory impedance and source pressure using a Thevenin equivalent circuit model.....6847
 Finite element modeling of lungs including interlobar fissures and the heart cavity.....6848
 Dynamical relations for left ventricular ejection: Flow rate, momentum, force and impulse.....7881
 Modeling technique of prosthetic heart valves.....7882
 Design of a system for the accelerated loading of heart valve prostheses.....8892
 Morphometry of cat's pulmonary arterial tree.....11935
 In-vitro wall shear measurements at aortic valve prostheses.....11936
- 550-G Microbiomechanics
- Models of cell interaction based on differential adhesion.....7883
- 550-H Transport phenomena (diffusion)
- Transient transport across the blood-retina barrier...1007
 Water transport in the arterial wall—A theoretical study.....1990
 Digital simulation of indoor temperatures of buildings with roof ponds.....3075

- A theoretical model of absorption of gases by the bronchial wall.....5575
Oxygen diffusion in blood: A translational model of shear-induced augmentation.....8893
- 550-I Fluid mechanics of circulatory systems & other body fluids
- Movement of interstitial water through loaded articular cartilage.....1008
Arterial tonometry: Review and analysis.....1009
Motion of a tank-treading ellipsoidal particle in shear flow.....1010
Flow visualization in isolated transparent natural blood vessels.....1011
Microcontinuum approach to the pulsatile flow in tubes with and without longitudinal vibration.....1012
Effects of periodic accelerations on blood flow in arteries.....1013
The dynamics of the stress stage of osmotic hemolysis.....1014
Peristaltic transport of a physiological fluid. Part I. Flow in non-uniform geometry, Part II. Flow in uniform geometry, Part III. Applications.....1015
Quasisteady arterial blood flow.....1991
Effect of magnetic field on blood flow in artery in the presence of a body force.....1992
Internal geometry of arterial bifurcations.....1993
Laser anemometry measurements of pulsatile flow past aortic valve prostheses.....1994
Peristaltic transport of a solid bolus.....1995
Velocity measurements in steady flow through axisymmetric stenoses at moderate Reynolds numbers.....1996
A comprehensive elementary model of the mammalian circulatory system.....3076
Effect of inertia and compressibility on the stress-field in blood vessels.....3077
Stenosis severity effects for unbalanced simple-pulsatile bifurcation flow.....3078
A model investigation of the velocity and pressure spectra in vascular murmurs.....3079
Experimental study of pulsatile and steady flow through a smooth tube and an atherosclerotic coronary artery casting of man.....3080
A calculation method for blood flow velocity distribution in smaller blood vessels.....3081
Pulsating flows of non Newtonian fluids in mild stenosis.....4258
Pulsatile flow in tapered tubes: A model of blood flow with large disturbances.....4259
Measurement of turbulence intensity in the center of the canine ascending aorta with a hot-film anemometer.....4260
The motion of close-packed red blood cells in shear flow.....4261
The bulk rheology of close-packed red blood cells in shear flow.....4262
Human blood oscillating axially in a tube.....4263
Multiple scale analysis of the spirally coiled cochlea.....5576
Unsteady flow with attenuation in a fluid filled elastic tube with a stenosis.....5577
Pressure difference-flow rate variation in a femoral artery branch casting of man for steady flow.....6849
The impedance of curved artery models.....6850
Flow disturbance measurements through a constricted tube at moderate Reynolds numbers.....6851
Steady flow development past valve prostheses in a model human aorta - I. Centrally occluding valves.....6852
Steady flow development past valve prostheses in a model human aorta - II. Tilting disc valves.....6853
Model studies on the influence of nonstationary flow on the mean flow estimate with the indicator-dilution technique.....6854
On large periodic motions of arteries.....6855
Comparison of steady and pulsatile flow in a double branching arterial model.....6856
Analytical solutions for shear deformation and flow of red cell membrane.....7884
Effects of fluid flow on living vascular cells.....7885
Effect of mild atherosclerosis on flow resistance in a coronary artery casting of man.....7886
Comparison of steady and pulsatile flow near the ventral and dorsal walls of casts of human aortic bifurcations.....7887
- Continuum mechanical model of leukocytes during protopod formation.....7888
Comparative study of the amount of backflow produced by four types of aortic valve prostheses.....7889
Mechanics of mucociliary transport.....8894
Two-dimensional approach to the motion of a red blood cell in a plane Couette flow of plasma.....8895
Wall shear stress during pulsatile flow distal to a normal porcine aortic valve.....8896
In-vitro fluid dynamic characteristics of the Abiomed trileaflet heart valve prosthesis.....8897
Nonlinear pulse wave reflection at an arterial stenosis.....8898
An experimental study of velocity distribution in a human lung cast.....8899
Theory of non-Newtonian viscosity of red blood cell suspension: Effect of red cell deformation.....8900
Measurement of the static pressure in a channel by a Pitot tube with diameter comparable to the channel diameter.....8901
Analysis of mass transport from arterial wall to viscous fluid flow.....10925
The dynamics of the coronary venous system in the dog.....10926
Qualitative investigation of dynamical equation system of hemoglobin (or allosteric enzymes).....10927
A note on the blood analog for in-vitro testing of heart valve bioprostheses.....11937
Effect of aortic valve orientation on arterial flow distribution.....11938
Effects of couple stresses on the blood flow through an artery with mild stenosis.....11939
Shear viscoelasticity of suspensions of biological cells with viscoelastic membrane.....11940
Fluid transport and mechanical properties of articular cartilage: A review.....11941
The hemodynamic forces acting on thrombi, from incipient attachment of single cells to maturity and embolization.....11942
The effect of unsteadiness on the flow through stenoses and bifurcations.....11943
- 550-J Brain & spinal trauma
- Turbulent flows through a disk-type prosthetic heart valve.....6857
Mechanical model of scoliosis.....8902
- 550-K Shock & vibration effects
- Estimation of the area function of human ear canals by sound pressure measurements.....1016
Effects of the ablation of the nucleus pulposus on the vibrational behavior of the lumbosacral hinge.....1997
Stress wave propagation in bone.....1998
On the mechanical resonances of a human tibia in vitro.....1999
Biodynamic response of the human body in the sitting position when subjected to vertical vibration.....3082
Response of a human head-neck model to transient sagittal plane loading.....3083
Predictions of the existence, frequency, and amplitude of physiological tremor in normal man based on measured frequency-response characteristics.....6858
The effect of impact on the marrow pressure of long bones in vitro.....6859
Identification of in-vivo vibration modes of human tibiae by modal analysis.....6860
Thresholds of perception of vibration in recumbent men.....8903
A method for in vivo quantitative occlusal strain and stress analysis.....8904
Local vibrations - Mechanical impedance of the human hand's glabrous skin.....8905
In-vitro head and neck response to impact.....8906
A three-dimensional model of the human cervical spine for impact simulation.....8907
Wave propagation in tubular bones.....9919
Study on shock absorb properties of protective helmet.....10928
Alterations in the mechanical properties of peripheral nerve following crush injury.....10929

- On the propagation of a wave front in viscoelastic arteries.....11944
 Mechanical response of articular cartilage to an oscillating load.....12958

550-L Heat transfer aspects

- Transient temperature profiles in tissues with nonuniform blood flow distributions.....2000
 Model simulation of heat and water transport dynamics in an airway.....4264
 A finite element model of burn injury in blood-perfused skin.....6861
 Thermal modeling of the normal woman's breast.....11945

550-M Biopropulsion

- Analysis of the aerodynamic performance of birds during bounding flight.....8908
 Model estimation of the energetics of bipedal walking and running.....8909

550-Y Computational techniques

- A finite element analysis of the influence of surgical herniation on the viscoelastic properties of the intervertebral disc.....2001
 Soft tissue strain and facet face interaction in the lumbar intervertebral joint - Part I: Input data and computational technique.....6862
 Soft tissue strain and facet face interaction in the lumbar intervertebral joint - Part II: Calculated results and comparison with experimental data.....6863
 Finite-element-analysis and experimental investigation in a femur with hip endoprosthesis.....6864
 A close-range photogrammetric system for 3-D measurements and perspective diagramming in biomechanics.....6865
 A direct substitution, equation error technique for solving the thermographic tomography problem.....6866
 Analysis of blood velocity waveforms by phase shift averaging and autoregressive spectral estimation....8910
 Autoregressive spectral estimation of poststenotic blood flow disturbances.....8911

550-Z Experimental techniques

- A constant stress creep testing machine.....2002
 A method of bite force measurement in primates.....2003
 Evaluation of cross-sectional geometry and mass density distributions of humans and laboratory animals using computerized tomography.....2004
 The evaluation of forearm density with axial tomography.....3084
 Effect of micro rheology of blood on the apparent flow instability in a rotational viscometer.....4265
 An improved microindentation technique to measure changes in properties of arterial intima during atherogenesis.....4266
 A pressure distribution transducer for in-vitro static measurements in synovial joints.....6867
 Tissue culture cells on deformable substrata: Biomechanical implications.....7890
 A pulsed wire probe for the measurement of velocity and flow direction in slowly moving air.....7891
 Wave phenomena in physiological flows.....8912

552 Human Factors Engineering

552-C Control devices

- A cam-type electric motor-driven left ventricular assist device.....2005
 Optimizing control system for phase coordination of assisted blood circulation apparatus with the patient's heart.....2006
 On nonlinear viscoelastic properties of arterial tissue.....7892

552-D Man-machine interface

- Industrial design in engineering, a marriage of techniques (Book).....8913

552-E Operator performance

- A dynamic biomechanical evaluation of lifting maximum acceptable loads.....11946

554 Rehabilitation Engineering

554-E External prosthetics

- Fatigue failure of cortical bone screws.....3085
 A survey of finite element analysis in orthopedic biomechanics: The first decade.....4267
 Phasic relations in 90° abduction-adduction of the arm: the ARIMA representation.....10930

554-C Orthotics

- Force generation from orthodontic appliances.....1017
 Mechanical analysis of the human pelvis and its application to the artificial hip joint—by means of the three dimensional finite element method.....4268

554-D Functional adaptation

- Mechanical properties of elastomers for artificial leaflet heart valves.....4269

556 Sports Mechanics

556-B Body forces & movements

- A model for the calculation of mechanical power during distance running.....2007

556-D Dynamics of body motions

- A procedure for determining angular positional data relative to the principal axes of the human body....1018
 Changes in knee function associated with treadmill ambulation.....2008
 A simple and inexpensive technique for the measurement of head sway.....3086
 Quantification of intersegmental reactions during rapid swing motion.....4270
 The influence of aerodynamic and biomechanical factors on long jump performance.....6868
 Biomechanics of optimal flight in ski-jumping.....10931
 Air resistance and its influence on the biomechanics and energetics of sprinting at sea level and at altitude.....11947

556-D Active equipment & implements

- Methods for the simultaneous determination of air resistance to a skier and the coefficient of friction of his skis on the snow.....1019
 Field measurements in snow skiing injury research....6869
 Javelin dynamics with measured lift, drag, and pitching moment.....12959
 A parametric solution to the elastic pole-vaulting pole problem.....12960
